The Pierce is the pioneer. Since 1897 it has been the choice of discriminating riders. Its Cushion Frame, Spring Fork and Coaster Brake are exclusive Pierce features. These, together with its high standard of mechanical construction, make the Pierce the best seller on the market. Arrange for an agency for 1906.

The George N. Pierce Company

The Gillette Safety Razor--

Has the FIRST, and only NEW idea in RAZOR BLADES for OVER FOUR HUNDRED YEARS

Exact Size Complete Razor.

Although on the market for less than two years, the **Gillette Safety Razor,** judging alone by actual sales, is to-day used, appreciated and endorsed by *more* enthusiastic, discriminating shavers during this time than *all* of *the rest* of the so-called safety razor purchasers in the same period.

There is a reason for the success of the **Gillette Safety Razor.**

It is as *different* from other *so-called* safety razors as *other so-called* safety razors are from the old-fashioned razor.

The dealer who handles the **Gillette Razor** makes *liberal* profits, for the fixed retail price of $5.00 for a set *is*, and *will* be *maintained* under U. S. Patent laws, thus assuring every dealer a full profit.

The blades are as thin as paper, as hard as flint, as tough and flexible as whalebone.

The Gillette Safety Razor is made by *automatic machinery insuring perfection* and *uniformity* in every detail and a never varying quality which is so often found in the old-fashioned hand-make razors and blades.

The Gillette's Advantages

Our manufacturing facilities have been increased recently to meet the enormous and growing demand for the **Gillette Razor,** and this demand proves that it will certainly pay YOU to investigate at once the many advantages that are now offered in handling this phenomenal shaving device which is the talk of the civilized world.

Remember -- The Gillette while having *many imitations*, has no direct competitor, *is in a class by itself*, is here to stay, and its patents will be fully protected and all infringements on its rights will be prosecuted.

TWELVE BLADES.

GILLETTE
GILLETTE
GILLETTE

Are You A Gillette Safety Razor Dealer?

Then you will receive the benefit of the enormous advertising plans that are now being worked out, embracing Magazine publicity, Signboards, extensive catalog distribution, and in fact, *every known* and *up-to-date* method in the science of advertising.

By our publicity methods we are interesting and appealing to *millions* of shavers *every* month.

We are *spending more money* in *making known* the unique advantages of the **Gillette Safety Razor** than is being spent by all the combined, *so-called* safety razor manufacturers in the country, which benefits every Gillette dealer.

That this advertising is producing the desired results is a fact which we will prove to every **Gillette** dealer to his entire satisfaction.

If you are not selling the GILLETTE SAFETY RAZOR, Get into line, for once in it, means you are there to stay.

The "Gillette" cannot be put together in any way but the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see **Gillette** advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us, has resulted in your name not being on our list of dealers.

ADDRESS TO DAY.

Gillette Sales Company,

1104 TIMES BUILDING BROADWAY, NEW YORK CITY.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Aurora, N. C.—The Aurora Hardware Company has been incorporated, $5,000 to $10,000, to conduct the Hardware business in all its branches.

Buffalo, N. Y.—The Republic Hardware Co. has been incorporated with a capital of $1,500,000. The firm takes over the business of Sidney Shepard & Co., in Buffalo, New York and Chicago. The interests represented in the new company are practically the same as those of Sidney Shepard & Co. The following officers of the Republic company have been elected: Chairman, C. Sidney Shepard, New Haven, Ct.; president, Charles W. Wells, Chicago; vice-president and treasurer, James F. Foster, Buffalo; secretary, Sidney Detmers, Buffalo; manager of the Buffalo works, Franklin Agge.

Carlisle, Pa.—The Wagner Hardware Co. has been incorporated with $50,000 capital stock. Directors are M. N. Wagner, Melvin L. Dungleberger, H. W. Ruple.

Charlotte, N. C.—The Core Hardware Co. has been incorporated with $125,000 authorized and $400 subscribed capital stock. The incorporators are G. M. Core, L. L. Caudle and F. M. Redd.

Clinton, I. T.—Bonebrake-Lack Hardware Co. has been incorporated. Capital stock, $6,000. The directors are J. E. Bonebrake of El Reno; H. E. Bonebrake of Weatherford, and T. J. Lacy of Clinton.

Dannebrog, Neb.—S. B. Knudson has engaged in the Hardware business.

Denver, Colo.—The Colorado Hardware and Supply Co. has been incorporated; capital stock, $10,000.

Downs, Kans.—The Downs Hardware & Implement Co. has been incorporated with a capital stock of $25,000.

Evansville, Ind.—The Paul & Ortmeyer Co. has been incorporated to deal in Hardware and tinware. Capital stock, $10,000; directors, John D. Ortmeyer, Wm. J. Snurpus and M. L. Paul.

Janesville, Wis.—Sheldon Hardware Co. has been incorporated with $25,000 capital. The incorporators are Alfred H. Sheldon, Lucy A. Sheldon and Fred'k S. Sheldon.

Maywood, Neb.—H. H. Cleveland has opened a new Hardware store.

Milford, Conn.—The Milford Hardware company has been incorporated. The capital stock is $5,000, all paid in. George B. Clark, George J. Smith and Frank M. Thompson, all of Milford, are the incorporators.

Pierre, S. D.—Hatch & Fisher have incorporated their Hardware business as the Charles A. Fisher Co.

Ragan, Neb.—Hatfield & Aten have engaged in the Hardware and implement business.

Redwood City, Cal.—The Wisnom-Bonner Hardware Company has been incorporated with the folowing stockholders: Robert Bonner, G. W. Wimmer, R. J. Robert and W. D. Wisnom. The capital stock is $75,000.

Seward, Kans.—Harry Smith has engaged in the Hardware business.

Wilmot, Kansas.—A. C. Stephens has engaged in the Hardware and implement business.

Changes and Improvements.

Ashland, O.—W. F. Claxton has purchased the Hardware store of the McCready Co.

Beatrice, Neb.—G. M. Smith & Son of Lincoln, have purchased the Hardware store formerly conducted by F. D. Kees and later the property of P. Pierson.

Bellville, Ont.—Byron Hudson has purchased the Hardware store of the John Lewis Co.

Binger, Okla.—M. K. Simmons has sold his Hardware and implement business to Geo. B. Beck.

Capron, Okla.—S. E. Stitt has sold his Hardware and implement business to E. N. Yarrington.

Chester, Pa.—John Fisher, Hardware dealer, has made some important improvements in his large store recently, which makes it the largest store in the borough.

Correctionville, Ia.—Bickel & Jones have sold their Hardware business to Irvin Catlin.

Duenweg, Mo.—The Hardware firm of Meek & Beechund have sold their business to Martin Lown and J. R. Hastings. The new firm will be known as Lown & Hastings.

Edgerton, Mo.—Tracy & Holmes have succeeded to the Hardware business of Fidler & Tracey.

Fairfield, Neb.—Kavalack & Bryant have sold their business to the Phillips Hardware Co.

Filley, Neb.—W. D. Reid has purchased the Hardware business of C. S. Spurr.

Holly, Colo.—Harden & Son have sold their Hardware business to J. H. Loffbourow.

Hugo, O. T.—Leighton & Blakeney have been succeeded in business by the Blakeney-Allen Hardware Co.

Ireton, Ia.—Gerlas & Fredericks has purchased the Hardware business of R. A. Zimmerman.

Lewis, Kans.—Misner & Smith have sold their business to the Central Hardware and Supply Company.

Manchester, Okla.—F. H. Peters has purchased the Hardware and implement business of F. A. White.

Marathon, N. Y.—Arvine C. Johnson has purchased the interest of Earl W. Seamans and F. H. Swift in the Marathon Hardware store and will take possession in the near future.

Mobile, Ala.—The Cunningham Hardware Co., has increased its capital stock from $30,000 to $60,000.

Modena, Mo.—Wood & Hill have been succeeded in the Hardware and furniture business by Henry P. Hill.

Montgomery, Ala.—The Young Hardware company has purchased a sufficient number of shares of the Southern Supply Company to secure control of that corporation. The two companies combined will make the largest wholesale establishment of the kind in this part of the South.

Moorehead, Ia.—Bailey & Son have purchased the Hardware business of Adams & Andrews.

North Yakima, Wash.—D. R. Barton has sold his Hardware store to S. C. Raynor.

Prairie View, Kans.—F. Walker has sold his stock of Hardware etc., to Boogaart Bros.

Reading, Pa.—Hoff & Bro., Hardware merchants, are making extensive improvements in their building. When the entire first floor is finished they will have a store room 30x150 feet in size.

Sanborn, Ia.—Jos. Metcalf has sold his Hardware business to Flint & Cronk.

Terryville, Mo.—J. W. Brooks has succeeded to the Hardware business of Brooks & Spillers.

Wayne, Neb.—J. E. Marsteller has been succeeded in the Hardware business by Marsteller & Peterson. They also succeed to the Hardware business of Peterson & Berry.

Wingham, Ont.—B. Gerry has sold his Hardware and Stove business to Mr. Bishop and Mr. Brewer of Parkhill.

Winnetoon, Neb.—Wm. Sanders & Son have purchased the Hardware business of C. H. Kienow.

Fires.

Burney, Ind.—Fire recently destroyed the large Hardware store of D. M. Minor & Son.

Grantsburg, Wis.—Fire destroyed the Hardware store of Luther & Jensen, the loss amounting to $20,000.

Owatonna, Minn.—Fire destroyed the three-story brick block occupied by Parrot & Smith, Hardware dealers. Loss, $50,000.

Washington, Ind.—The M. J. Carnahan Hardware & Implement Co. recently sustained a loss by fire of $5,000.

Miscellaneous.

An involuntary petition of bankruptcy was filed in Milwaukee against the sporting goods firm of Longdan & Brugger. Their liabilities are about $6,500. The secured claim is for $5,270, which is a mortgage on the real estate owned by the firm.

It is claimed that the Lobdell & Bailey Manufacturing Co., of Onaway, supplies practically all of the wooden bicycle rims used in the United States, and 56 per cent of all that are used in France, where the output of bicycles is about 400,000 per annum.

James F. Smith, dealer in automobiles and sporting goods, Springfield, Ill., has filed a petition of bankruptcy, scheduling his liabilities at $5,851.60 with assets amounting to $1,156.60.

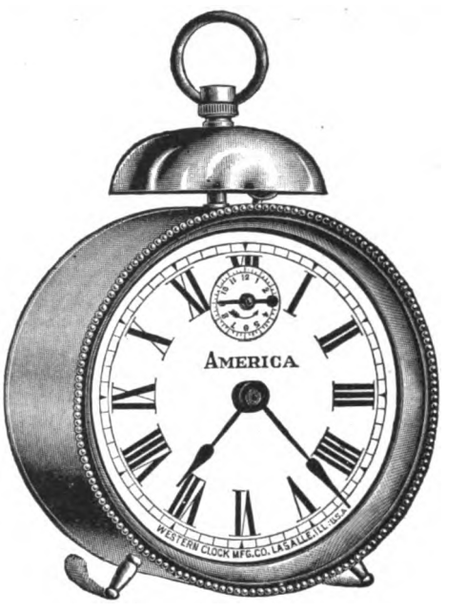
GIBFORD'S

TRADE

RED-E-FOR USE

MARK

RAZOR STROP



This brand on razor strops is as standard as Sterling on silver. It is the warrant of quality to your customers and a guarantee of satisfactory trade to you.

As the name implies every Red-E-For Use Razor Strop is ready for instant service when sold. It is not necessary to suggest a little paste or "dope" to make it work better. It is in condition at once and for all time to put that smooth, keen, cutting edge on a razor.

Will it pay *you* to sell RED-E-FOR USE RAZOR STROPS? It will if you care to increase your trade and reputation for quality goods. Ask your jobber or write us.

Gibford Mfg. Co.
Adrian, Mich.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

The **Western Clock Mfg. Co.**
La Salle, Ill.

NEW YORK
51 Maiden Lane

CHICAGO
131 Wabash Ave.

THE BISSELL

Is the only carpet sweeper on the market sold at fixed retail prices, and the value of this policy to the dealer in making his profits both good and secure, is well understood by the trade generally. One large retailer said to a certain manufacturer recently: "If you will agree to maintain a fixed selling price, I will buy a carload, but I will not put a ten cent piece in your goods if later I may have to sell them without profit, to meet competition."

Here is a strong endorsement of our price maintenance policy, and is precisely what we have advocated for over twenty years. A fixed retail profit in the sale of a commodity. Please remember the Bissell is the *only* sweeper sold under a carefully devised and rigidly enforced price maintenance policy.

Bissell Sweepers are sold at the following fixed retail prices:

"Grand Rapids," japan,	$2.50
" " nickel	3.00
"Gold Medal,"	3.00
"Superior,"	3.00
"Prize,"	3.00
"Welcome,"	3.00
"Premier,"	3.00
"Ideal,"	3.25
"Boudoir,"	3.50
"American Queen,"	3.50
"Elite,"	3.75
"Parlor Queen,"	4.00
"Superba,"	5.00
"Grand,"	4.50
"Club,"	6.00
"Hall,"	7.00

In the extreme western and southern states our fixed retail prices are fifty cents higher than those given above. Write for our special Christmas Offer, the most liberal we have ever made.

BISSELL CARPET SWEEPER CO., GRAND RAPIDS, MICH.

(Largest sweeper makers in the world. Established 1876.)

Branches: 25 Warren St., New York; 13 Pearl St., Toronto; London, Paris.

Millbury, Mass.—Charles Buck Edge Tool Company has been incorporated. Capital stock, $10,000. Incorporators are M. C. Buck, F. C. Wheeler and C. F. Crossman.

Nashville, Ga.—The Nashville Sash & Door Co. has been incorporated and capitalized at $4 000, with the privilege of increasing to $20,000. The principal stockholders are W. H. Paulk, W. D. Buie, J. D. Lovett, S. T. Tygart and P. H. Askew.

New York, N. Y.—The Vapo Oven Co has been incorporated to manufacture ovens, ranges, stoves and furnaces; capital, $500,000. Incorporators; Lewis Squires, Plainfield, N. J.; John B. Pruyn, New York; Richard Krause, New York; David B. Melick, Morristown, N. J.; A. L. Kent, Bay Ridge, N. Y.

New York, N. Y.—The Victor Novelty Co. has been incorporated to manufacture Hardware and Hardware supplies; capital, $2,000. Incorporators; Harry B. Wood, Gerard Roberts, both of Brooklyn; Edwin A. Watson, New York.

Richmond, Va.—Cameron Stove Co., has been incorporated. B. H. Cameron, president; St. C. M. Anderson, treasurer; Archer Anderson, Jr., secretary. Capital stock, $50,000. Objects and purposes; To deal in ranges, stoves, burners, engines, etc.

Rochester, N. Y.—Boiler Specialty & Manufacturing Co. has been incorporated to manufacture machinery, tools, etc.; capital $15,000. Incorporators; Orrin Haxie, Charles J. Robinson and Joseph B. Miller.

Vincennes, Ind.—The Star Shovel and Range Co., Limited, has been incorporated with $100,000 capital stock. Directors—Edward Watson, Eugene Hack, Anton Simoon, Charles Eirhaus and William A. Cullon.

Changes and Improvements.

Athol, Mass.—The L. S. Starrett Co., manufacturers of mechanics' fine tools, has secured a controlling interest in the Athol Machine Co. The new company has organized with Frank A. Ball, president, L. S. Starrett, vice-president and treasurer.

Binghamton, N. Y.—The Innes & Demarest Stove and Heater Co. has completed its new factory building. This building is substantially constructed of brick and concrete, and in architecture, equipment and location is not excelled by any stove factory or foundry in the United States. The cost of the plant is approximately $75,000, which includes machinery and all the modern facilities which will be installed. This factory will manufacture the Demarest combination safety steam heaters, gaslight warm air furnaces and cast iron and steel quick working ranges.

Oklahoma City, Okla.—The Excelsior Stove Mfg. Co. has started a branch house here in which will at once be installed stock amounting to $100,000.

Quincy, Ill—The Lahan Stove & Mfg. Co. has increased its capital stock from $25,000 to $100,000.

So. Norwalk, Conn.—The Lockwood Mfg. Co., makers of builders' Hardware, is erecting a large addition to its plant. One addition has recently been completed, but further enlargement has become necessary in order to meet the demands of the business.

Rochester, N. Y.—The Novelty Tool Co., of Syracuse, is about to erect a factory here. Capital, $50,000. This company manufactures wrenches, tin shears, drills, meat cleavers and plumbers' wrenches.

Rochester, N. Y.—The Sill Stove Works is erecting a new factory. The factory is to be of brick, five stories in height, and will be 60 feet wide by 130 feet long. The estimated cost is $25,000.

Rockford, Ill.—The America Company, manufacturers of Hardware specialties, will move their plant to La Crosse, Wis., in the near future. The structure will be two stories high, 125x50 feet.

St. John, N. B.—James Pender & Co. is erecting a new nail factory.

Terryville, Conn.—The Eagle Lock Co. has decided to make a new factory building a four-story instead of a two-story structure, as originally planned.

York, Pa.—The York Safe & Lock Co. is building an addition and erecting two furnaces for tempered steel in this building.

Sterling, Ill.—The Mississippi Valley Stove Works is erecting an addition to its building. The new structure will be one story and 40x75 feet.

Syracuse, N. Y.—The Syracuse Stove Co. is making a large addition to its plant. The present main building is three stories in height, of brick construction, and the new addition will be of the same material, making the building five stories in height. The two new stories to be added to the building, each of which will have floor proportions of 275 by 50 feet, will be used for storage purposes. At present a part of the third floor of the building and an addition between the main building and the foundry is put to that use. With the completion of the new addition, the entire third floor and the addition between the main building and the foundry will be used for manufacturing purposes.

Warren, Pa.—Rogers Shear Co. has increased its capital from $25,000 to $100,000.

Westfield, Mass.—The United States Whip Co. has purchased a large tract of land and will, in the near future, erect a large addition to its already extensive plant.

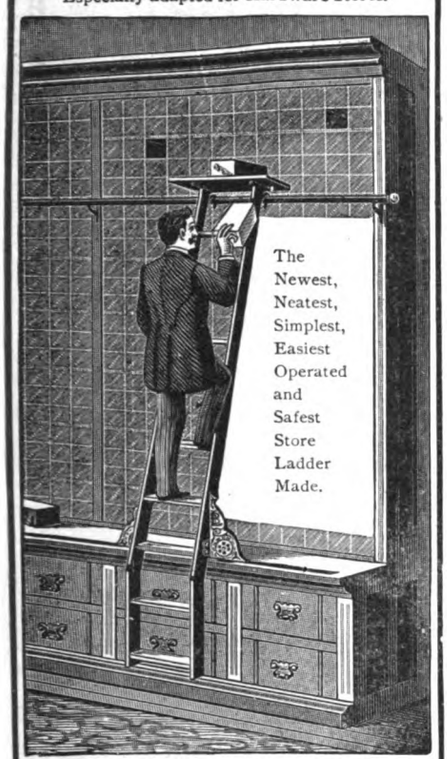
Winchester, Va.—The Virginia Lightning Conductor, Stove and Steel Range Co. has started business in its new store with a large stock of lightning rods and supplies, as well as the modern style of steel ranges for which the company has the exclusive agency in this section.

York City, Pa.—The York Safe and Lock Company is erecting an addition to its plant, and the building will be ready for occupancy about the first of the year.

Fires.

Gas City, Ind.—The Edge Tool factory has recently been destroyed by fire, causing a loss of $25,000, partly covered by insurance.

Kendallville, Ind.—Fire destroyed the main plant of J. R. Baker & Sons' establishment, manufacturers of Hardware specialties, the powerhouse and foundry alone being saved. The loss is estimated at $28,000 with but $7,000 insurance.



Nashville, Tenn.—Fire almost completely destroyed the Gray & Dudley Hardware Company's trunk and saddle factory. The factory was one of the two or three owned by the company and used in the manufacture of saddles, trunks, etc. It was operated as two distinct plants, the basement being used in the making of trunks and the upper floors of saddles. The company has another factory of the same nature and the fire will not interfere with the business to any considerable extent.

Pittsburg, Pa.—The five-story building of the Graff Stove and Range Company was recently totally destroyed by fire. The loss is about $150,000.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Berkley, Tenn.—R. B. Lambdin and D. B. Bott, have established a plant for the manufacture of small power boats, principally naphtha and gasoline launches.

Camden, N. J.—The M. F. B. Washington Mfg. Co. has been incorporated to manufacture cutlery, etc. The capital stock is $125,000, and the incorporators are James S. Tarsey, Jos. H. Neal and others.

Cleveland, Ohio.—The George W. Gillette Razor Company has been incorporated with $50,000 capital stock. The incorporators are Sheridan Risley, D. C. Emmons, J. F. Castle, W. J. Monagher and B. Bradhead.

Cleveland, Ohio. — Wm. Bradley and Charley Carr, of the Cleveland Baseball Club have formed a partnership to be known as the Carr-Bradley Sporting Goods Co. Associated with them will be Gerry Cathcart, of Cleveland, and D. Zimmerman, of Petoskey, Mich. It is understood that the business will be run on the co-operative plan and that stock will be sold to league players. It is stated that a number have already subscribed. The company has been incorporated with $25,000 capital with power to increase. It is their intention to start the factory for the manufacture of sporting goods supplies with headquarters at Cleveland and branches established at Philadelphia, New York and other large cities.

Kahlotus, Wash. — Smith Bros. have opened a general sporting goods store.

Monroe, La.—George Zeigin has opened a gun and bicycle store. He will carry a full line of guns, ammunition and sporting goods, and make a specialty of fine repair work.

Springfield, O.—Charles T. Ridgely and W. H. White are establishing a factory to manufacture a compound invented by J. W. Barrett which makes gasoline inexplosive without impairing its useful qualities for use in automobiles and other motors.

Toronto, Canada.—The Economy Powder Co. has been incorporated with a capital stock of $10,000. The main office will be at Ottawa.

Changes and Improvements.

Danbury, Ct.—The Danbury Hardware Company has taken the agency for the Rambler automobile. One or two machines of the 1906 model will arrive in a few days and will be ready for demonstration. The company is preparing to put in a full line of automobile supplies of all kinds.

London, England.—F. A. Davis, Ltd., athletic goods makers, have removed their works and offices from 147 Aldersgate Street to 82 Union Street, London Bridge, S. E.

New York, N. Y.—Francis Bannerman is now occupying the entire five story building at 501 Broadway. Mr. Bannerman has long made a specialty of all kinds of military goods from government auctions, ancient firearms and other implements of war.

New York.—The Safety Powder Mfg. Co., having a mill at Farmingdale, N. J., will locate near Hazelton, Va. They expect to employ about 30 hands.

Norwich, Ct.—The Thames Arms Company's entire capital stock has been sold out. Inasmuch as the factory passes into the hands of parties who are interested in the sale and manufacture of firearms, they are in position to continue this prosperous industry uninterruptedly. The newly elected officers are D. R. Harvey, of New York, president; Edwin C. Harrington, of Worcester, vice-president, and George F. Brooks, of Worcester, secretary.

Oshkosh, Wis.—The capital stock of the Oshkosh Boat Works has been increased to $50,000.

Petersborough, Can.—A new $4,000 building is being added to the plant of the Peterborough Canoe Co. The ground plan is 25x125 feet and the building is to be three stories high.

Plymouth, Mich.—The business and plant of the Atlas Gun Co., Ilion, N. Y. has been purchased by the Daisy Air Rifle Co., and the machinery will be transferred to the factory of the purchasing concern.

Fires and Explosions.

East Alton, Ill.—The foreman of the Union Cap & Chemical Co., Anthony Beechy, was killed by an explosion which wrecked the primer dry house recently. The explosion set off 10,000,000 gun and cartridge primers stored in the dry house and blew the building, which was of stone, to pieces. The cause of the explosion is not known.

Edwards Station, Ills.—An explosion at the Buckeye Powder Works, caused by the carelessness of workmen in using matches about the building, resulted in the death of two employees, and several others were seriously injured.

Belleville, Ill.—The presshouse of the Pheonix Powder Company was recently blown into fragments by an explosion, for which no cause has been ascertained. Four men were killed and several others injured.

Parlin, N. J.—An explosion in the laboratory of the International Smokeless Powder and Chemical Co., resulted in the death of the superintendent and his three assistants.

Pensacola, Fla.—F. B. Bruce, a sporting goods dealer, was one of the principal losers by a $150,000 fire which destroyed a business block here recently.

Rochester, N. Y.—Fire recently damaged the Automobile Garage and Bicycle establisment of Thomas J. Northway. The loss will not exceed $1,000, and is covered by insurance.

ELECTRICAL SUPPLIES.

American Goods In Active Demand In South Africa.

Africa, both north and south, is an important customer for electrical supplies of every description; and although the British firms have been capturing the majority of contracts, due to their being on the ground floor, it is evident that the United States can come in for a larger share of the trade by the prosecution of an energetic campaign and by having competent and forcible men in the field. Our trade has been falling off this year, the last month reported being May, in which there was a decrease in the shipments of electrical machinery from the corresponding month in 1904 of $2,800.

The great activity in the electrical trade is not by any means confined to South Africa, for in Egypt and other northern provinces large electrical problems are under consideration. As for instance, the Soudan Government is considering the introduction of an extensive electric tramway system into Khartum. Neither cables or overhead wires will be used, the intention being to store the electric power in the cars. It is expected that the system will be extended to Omdurum. Public and private installations of electric light on an extensive scale, electrical power, etc., are under consideration, and for years to come Egypt will be sending out orders to firms whose names are kept to the forefront, so that it behooves American companies to keep their eyes open for that trade, which alone will run up into the millions. As the British are in control in Egypt they look upon that field as part of their Empire.

If the Americans care for this trade they will have to wage a war for it against the Britishers, who are on the ground and in possession of the country. It will be difficult to wrest it from them. However, as America has captured the mining machinery trade on the Rand from all competitors, even under British rule, it can do likewise in the electrical field if the same amount of energy, concerted effort, and brains are expended as was laid out by the pioneers in the gold fields.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

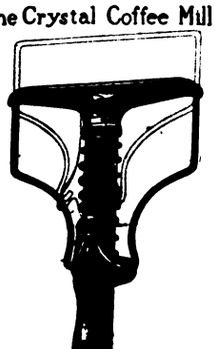
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

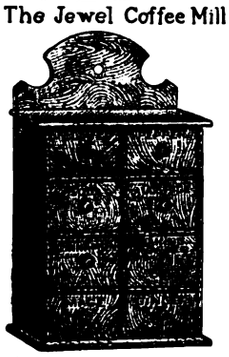
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

A Square Deal

— FOR —

Square Dealers

Square dealers, we take it, are those who try to give their customers goods that are "square" — honest all through. For forty years we have been giving all dealers the "square deal."

We make all the "ENTERPRISE" hardware specialties just as good as we know how—then we go out and tell the public, of all the world, about their merits. Square Dealers *distribute* them — they are already *sold.* Just ahead is the big demand for

"ENTERPRISE"

Meat and Food Choppers and "ENTERPRISE" Sausage Stuffers, Lard and Fruit Presses. They are being widely advertised now to the public. Write for our literature about them, including our new catalogue of all the "ENTERPRISE" specialties. Get ready for the biggest season you have ever seen on "ENTERPRISE" goods. We are ready. Get your share.

Increase your sale of "Enterprise" Meat and Food Choppers by using our new booklet: "The Cook, Her Critic and—". We will send you a supply of these on request.

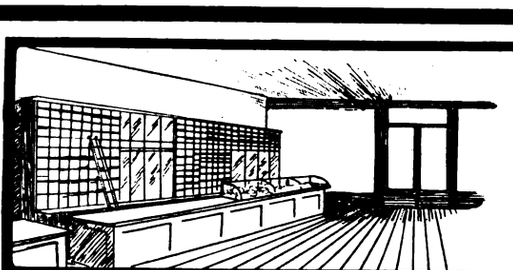
MENTION HARDWARE

"The best silent salesman I ever saw,"

writes W. L. Skinner a leading dealer of Dunkirk, Ind., in a letter commending the

Best Portable Revolving Whip Rack and Display Stand.



It brings the whips out where they are seen and displays them in such an attractive manner that they catch the customer's eye at once.

The stand is durably made of steel, handsomely enamelled in Blue with Gold trimmings. It holds from ½ to 1½ gross of whips and keeps them straight and elastic. Hight adjustable from 8 ft. to 9 ft. 10 inches. Weight 80 lbs. Boxed, 100 lbs.

The Revolving Shelf makes an attractive display of Greases, Oils, Dressings, Liniments, Brushes, Combs, etc.

Catalog with Prices mailed on request.

JOHN H. BEST
1905 10th St. GALVA, ILL.
Patented May 1, 1900—Oct. 2, 1902.

DON'T MOVE

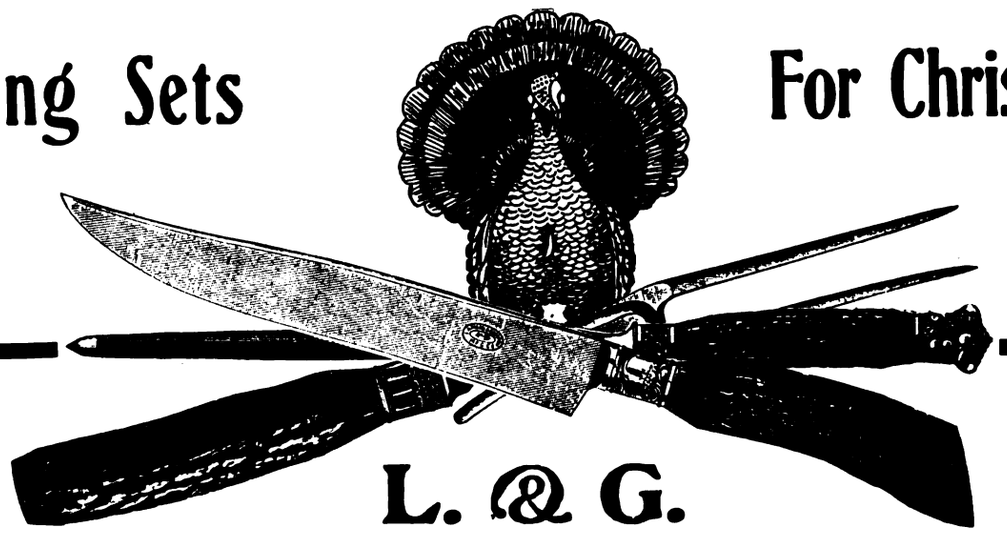
You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.



Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

No. 31 Torch, $2.50 Net.

A Torch in hand is worth two in the bush. You will soon hear the quick, impatient or imploring voice of the householder saying, "*Please hurry. The water pipes are frozen.* We must have immediate attention." Are you prepared for this work? You know it pays and that customers are easily won or lost at such times.

A No. 31 Torch costs you $2.50 and is worth its weight in gold for this work. Jobbers sell at factory price, or we will ship direct if cash accompanies the order. Your money back if you are not pleased. Send for booklet describing forty-eight styles of torches.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

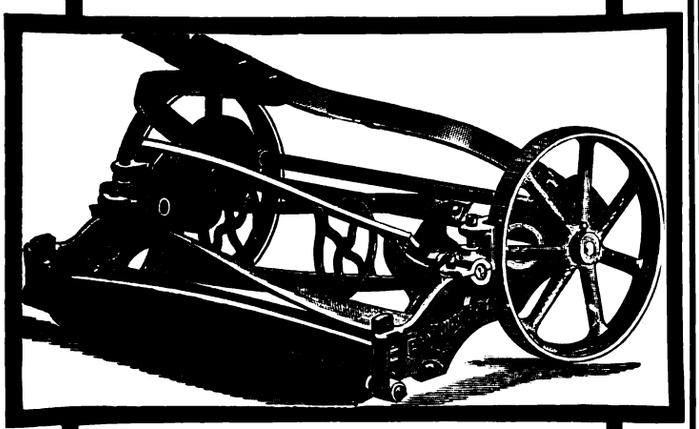
The Wiederhold Inverted Light

LIGHT COMPLETE
Price $1.50
GLOBE REMOVED

The Best--Because

It never flashes back, blackens mantels nor smokes. Does not flicker.
It's ornamental, durable and gives
50 Per Cent. More Light
at less cost for gas and mantels. Fits any fixture—burns all kinds of gas.
Mark: Its Rays Are Downward.
We want a representative in every town. Write us.
The WIEDERHOLD LIGHT CO.
96 Warren St., New York



Why
is it thousands of Hardware Dealers are discarding their inefficient lighting systems, whether gasoline, gas or electric, and installing the
AMERICAN AUTOMATIC LIGHTING SYSTEM
Because there is money in it. These machines cost less for maintenance and installation and consume less gasoline per candle power than any other gasoline system on the market.
Compared with gas or electricity they cost less than either per hour and give the merchant perfect independence.
Send us plan and size of your store and we will give you an estimate of the cost of installation and maintenance.

GENUINE

Philadelphia Lawn Mowers

STYLE E, HIGH WHEEL

A Point of Excellence

in this style is its solid frame: The Box cap to cylinder cutter and the cutter itself can be removed without disturbing frame.

Made of iron and steel. Has 4 blades, 10 inch wheel, 6½ inch cylinder train of 3 gears, double ratchet.

ANOTHER:

Philadelphias are the Mowers "with a go." They sell when other kinds fail to sell. They have the name for bestness.

Be convinced, get our catalog to-day.

Philadelphia Lawn Mower Co.

3101–09 Chestnut St., Philadelphia, Pa.

SUPERIORITY

L. & I. J. White Co.'s Edge Tools have been marketed for nearly three quarters of a century.

It requires, therefore, no second glance to determine their superiority over any others on the market.

Thousands of skilled mechanics use them to-day because their fathers used them before them.

If you are not handling White's Edge Tools—is not that a good reason why you should?

Get our catalog to-day.

Not all Washers are what they appear to be But—

"A Look Behind The Scenes"

substantiates our every claim for

The Imperial Rotary

It excels because it is excellent in every respect:
Construction,
Capacity for good work,
Easy operation,
Noiselessness.

Its sliding cylinder on square post makes it the strongest Rotary on the market. All Steel Roller Bearings give it speed and make it noiseless.

Tub extra large.

All castings in Gold and Aluminum Bronze.

Handsomely finished.

Our catalogue tells of the rest of our line.

Get it to-day.

Blackstone Mfg. Co.
Jamestown, N. Y.

Every Hardware Dealer

recognizes that an advertised article is four times easier to sell than an unadvertised one.

We have appropriated this season a good many thousand dollars for advertising our products in the large papers and magazines of national reputation. You are certain to have calls for:

The Hartmann Stockade Wire Fence
The Hartmann Steel Picket Fence
The Glen Steel Folding Mat

If your stock on these goods is low just drop us a line. You can't help selling them and run no risk in stocking up.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

The best equipped factory, the best advertised product.

We make a few articles, in large quantities, make them better than any one else does, and we tell everybody about them.

We *know* we have the right principle in our "one-motion" Peerless Iceland Freezer and we've put up a new factory adequately equipped for turning out this freezer in great numbers.

Peerless Iceland Freezer

Our advertising—covering *every bit of freezer-selling territory* in the United States—gives an impulse, as strong as it is steady, to Peerless Iceland sales.

Every woman in the country interested in her home knows about the Peerless Iceland and believes in it. It's "the freezer the cook likes"—the freezer the *housekeeper* wants when she goes into your store.

Dana Iceless Refrigerator

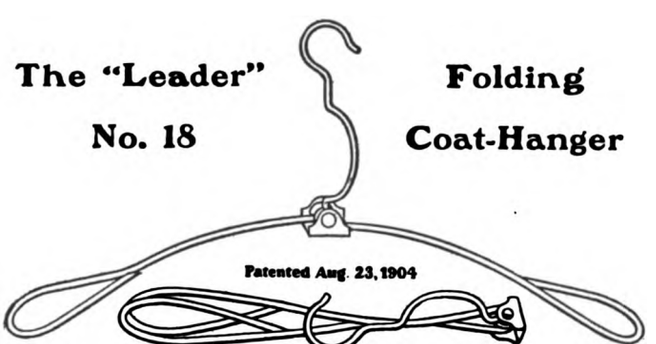
For the window. No ice bill. A refrigerator that takes up no floor space and is run without ice eight months in the year.

Dana Mop Wringer

wrings the mop dry in five seconds. You stand in a natural position—both feet rest firmly on the floor.

Tub is well made, very strong and extra braced with heavy, flat iron, rust proof hoops. The rollers are of solid maple and never stick. The latest, the simplest and the best mop wringer on the market.

The Dana plant is fire-proof; we can *guarantee* delivery as promised. *Everything* about it is *modern*—selling organization and all.



Both jobber and dealer make a good profit on the Dana line.

Your jobber will be around soon. *Ask him.*

10 Warren Street, New York. **The Dana Mfg. Co.** Cincinnati.

TANNING

Much depends on this first step in the process of making RED-E-FOR USE RAZOR STROPS. The leather is kept in the vats until every part is impregnated with the preserving liquid. This continued steeping insures great durability and eveness of texture so necessary to a good strop.

Each tiny fibre bears its portion of the work equally, giving the horse hide sharpening strop the requisite friction to give a keen cutting edge and a soft and kind surface to the finisher that tones the edge down to the smoothness so essential for a good shave.

Consider the care used in every step of the manufacture of RED-E-FOR USE RAZOR STROPS and you will readily understand why they prove such satisfactory trade producers. Can you afford to be without them? Not if you sell razors.

Ask your jobber for a sample doz.

A Square Deal

— FOR —

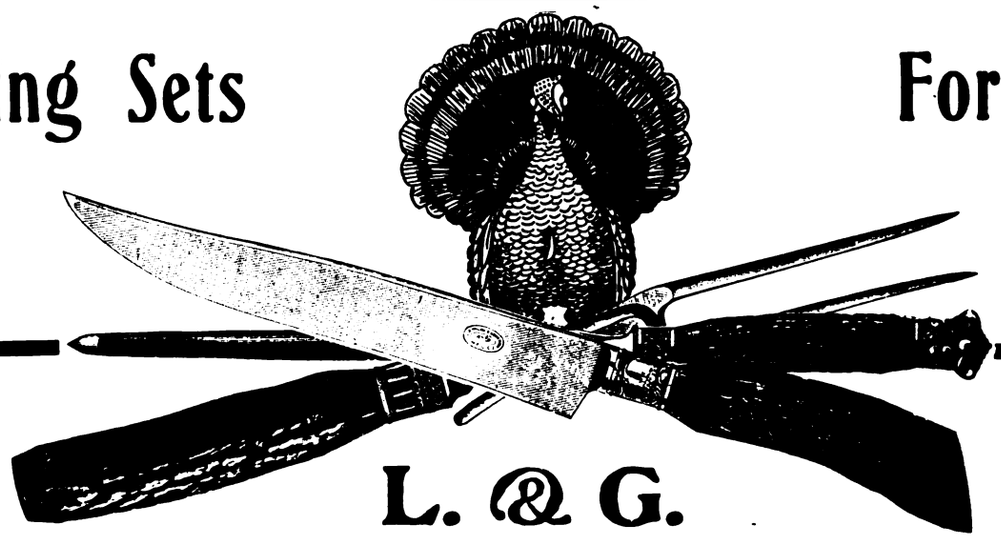
Square Dealers

Square dealers, we take it, are those who try to give their customers goods that are "square" — honest all through. For forty years we have been giving all dealers the "square deal."

We make all the "ENTERPRISE" hardware specialties just as good as we know how—then we go out and tell the public, of all the world, about their merits. Square Dealers *distribute* them — they are already *sold*. Just ahead is the big demand for

"ENTERPRISE"

Meat and Food Choppers and "ENTERPRISE" Sausage Stuffers, Lard and Fruit Presses. They are being widely advertised now to the public. Write for our literature about them, including our new catalogue of all the "ENTERPRISE" specialties. Get ready for the biggest season you have ever seen on "ENTERPRISE" goods. We are ready. Get your share.



Increase your sale of "Enterprise" Meat and Food Choppers by using our new booklet: "The Cook, Her Critic and—". We will send you a supply of these on request.

The Enterprise Manufacturing Co. of Pa.

"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No.....

That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.

It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

HARDWARE

At the recent quarterly meeting of the directors of the Minnesota Retail Hardware Dealers' Mutual Fire Insurance Company the statement of condition presented shows total assets of $65,528.75, an increase during 1905 of $17,494.02, and net surplus $42,662.13, an increase during 1905 of $10,842.78. The return premium on policies expiring in 1906 will be 40 per cent.

✤

PIERSON HARDWARE COMPANY, Pittsfield, Mass., in making its recent improvements has arranged its establishment so that the counters and show cases now extend right through the center of the store. This leaves an aisle on either side, so that customers can walk directly to the shelving on each side of the store and make a close inspection of the sampled articles. The rearrangement has added materially to the attractiveness and convenience of this large establishment.

✤

A fire recently occurred in the Hoboken factory plant of the Keuffel & Esser Company, 127 Fulton street, New York. Fortunately, however, it was confined to several annex buildings and the main buildings were not damaged in any way. The company anticipates no serious interruption in its business on account of the fire.

✤

The fire at Harriman, Tenn., by which the Harriman Hoe & Tool Company's works, a subordinate plant of the American Fork & Hoe Company, was supposed to have sustained a large loss; was ascertained to be of small moment, as only a limited portion of the Finishing Shop was injured. The Warehouse and Manufacturing Plant is intact, and there will be only a few days' delay in repairing the slight damage.

✤

On January 12, 1906, the Chicago Retail Hardware Association will give a stag party in place of a business meeting. It is the intention of the committee having this affair in charge to leave nothing undone in order to make this the greatest Party of the kind the Association has ever given.

✤

J. R. CLANCY, Syracuse, N. Y., has sent us a copy of his Price List No. 17 of Sure Grip Rust Proof Hose Clamps manufactured by him. He states: "That the Sure Grip Hose Clamp has no superior in merit and cheapness can easily be proven. Try a sample under any pressure your hose will stand and be convinced. It will not leak." Price List will be furnished to interested parties upon application.

THE NAPANOCH TOOL KIT BANNERET.

The successful introduction by C. J. Ulery, 9 Warren Street, New York, of the Napanoch Pocket Knife Tool Kit, of which we gave editorial notice a few issues back, has warranted him in getting up a descriptive little Banneret showing the "Kit" in all its detail in an attractive manner. It is designed to be suspended in the show window, or about the store, and is calculated to be a trade winner when so displayed. It is printed in two colors and cannot help but assist in the marketing of this useful set of tools. If you have not already received one write for it.

CENSUS OF THE BRITISH INDIES.

Consul-General Guenther, of Frankfort, has extracted from the English Blue Book the following facts and figures:

The British East Indies comprise 1,766,597 square miles with a population of 294,000,000, almost 41,000,000 more than twenty years ago. This population lives in 2,148 cities and 728,605 villages with 55,841,315 dwellings. Two hundred and sixty-five million live in the country, and of these 192,000,000 support themselves entirely by agricultural pursuits. The chief product is rice, with which 70,000,000 of acres are planted. Last year the rice crop amounted to 439,280,700 hundred weight. Of wheat which comes second, the crop was only 9,600,000 hundredweight. Of the population 207,000,000 are Hindoos and 62,000,000 Mohammedans. The total number of Christians is 2,923,241, of whom 2,600,000 are natives, an increase of 700,000 in ten years. In the whole of India there are only 18,000 Jews; 277,000,000 can neither read nor write. The taxes per capita of population increased from 36 cents ten years ago to 45 cents at present. The total railroads of India yielded last year a net revenue of £860,669, while only five years ago the deficit amounted to £620,000.

FORTY YEARS AN ADVERTISING AGENT.

George P. Rowell with his fifty-second consecutive letter will complete the most interesting series of reminiscences possible to an active and hard working participant in all the scenes which he so graphically describes. The best news of all is the fact that they are to be published in book form, and in this permanent shape will have a host of readers who will enjoy the perusal of this contribution to the history of American journalism, and will be found full of practical experience to the many workers in the vineyard of advertising, and bring valuable suggestions to all of us.

BALDWIN & ROBBINS COMPANY.

The business of the well-known Hardware jobbing house of Baldwin, Robbins & Co., Boston, Mass., will after January 1 be conducted by Baldwin & Robbins Company, a corporation already formed under Massachusetts laws, with a paid in capital of $150,000. The following are the officers of the new company: President A. H. Decatur; treasurer, W. A. Hopkins; directors, Messrs. Decatur and Hopkins and Thomas H. Baldwin and John H. Robbins. Mr. Baldwin and Mr. Robbins retire from active participation in the business, except as directors and stockholders.

WHITE MOP WRINGERS.

The sales of the "White Mop Wringers" during the year 1905 have broken all records, and the manufacturers, White Mop Wringer Co., Fultonville, N. Y., (formerly Jamaica, Vt.), are anticipating continued increase and have provided for it by largely increasing their facilities, having perfectly refitted and equipped their newly acquired and commodious factory. They have assimilated the business of their principal competitor, and registered their Trade Mark which guarantees every Wringer on which it appears. They have also secured two additional U. S. patents. Their Mop Wringers are shipped from the factory into more than thirty States, and are sent into still others by their jobbers.

COLORADO RETAIL HARDWARE ASSOCIATION.

The Annual Meeting for 1906 of the Colorado Retail Hardware Dealers' Association will be held at Denver on February 7 and 8, 1906, Headquarters at the Adams Hotel. The indications are that the meeting will be an enthusiastic one and well attended by the members, as the Association is enjoying a healthy state of progress in every particular. Davis Barclay, Secretary, is at Fort Collins.

HOPKINS & ALLEN ARMS CO. CALENDAR.

The Hopkins & Allen Arms Co., Norwich, Conn., issue a very handsome and picturesque calendar for 1906, in which they depict a man and woman fond of outdoor sports and dressed as becomes them when on the hunt. He is letting her do all the shooting with the Hopkins Rifle she holds in her hands, while he keeps the canoe steady and occasionally paddles to a new location. They are a very handsome couple and are evidently taking an interest in the sport, which is a continuous performance, judging by the alert manner in which she is watching for game. There are only three lines of advertising on the Calendar which is the address of the Hopkins & Allen Arms Co. Send 10 cents for postage and wrapping and receive in exchange this beautiful specimen of the artist's skill.

"COMING OUT AHEAD."

Among the calendars we receive annually there are few for conception and artistic execution that surpass those of The Peters Cartridge Company. That distributed for this year is in harmony with the general plan and constitutes a work of art that will prove to be an ornament wherever it is shown. It is of the usual size and under the above title illustrates that happy moment in the life of a hunter for big game when, after weeks of steady quest, he emerges from the depths of the forest with the prized Moosehead borne on the back of his self-satisfied guide, who is only too proud to bear the burden. The calendar is attractively lithographed in eight colors and will be much esteemed by those obtaining it, whether dealers or sportsmen generally. The Peters Cartridge Company, Cincinnati, Ohio, will send it by mail to any address upon application with enclosure of 10 cents in stamps or coin to cover the cost of mailing.

DECEMBER 25, 1905

Editorial Trade Review

The year is closing with more than its accustomed vigor, the continuous demand for goods has been so steady. The manufacturers and dealers have enjoyed the pressing tide of the holidays' increasing trade with eminent delight and under the best possible conditions. The year has been so successful from all points of view that the hope is fostered and encouraged for its continuance during 1906.

Manufacturers have had to run their plants actively to provide the goods that have been wanted for current use with no thought of the future, and the demand for the production of the manufactures in many cases has prevented the accumulation usually provided for Spring orders.

Retailers report excellent holiday trade which usually closes the year, and they will soon prepare plans on which the trade of the year 1906 will be founded with more than the usual feeling of confidence.

The high prices prevailing for metals of all kinds, will speedily affect the readjustment of prices for the goods that may be wanted for Spring purchases. The advance in the price of Copper a metal that now enters into every grade of our advanced products, and the upward tendency of the Iron market, will cause substantial advances to be entertained frequently to avoid loss.

It is amazing to think that with our record of Iron production, which bids fair to rival in its productive ratio, the phenomenal crops we have been blest with, the prices have held up so well to reimburse the producer, and with all the Iron being absorbed into products anxiously solicited at advancing prices we can safely look upon 1906 as continuing the prosperous conditions which made 1905 so significant.

There have been some croakers who thought we ought to see a state of depression before long; but while business shows its present state of prosperity and continued activity, the pessimistic prophesies find few supporters. We may safely feel that we have been a favored country indeed during the past year, which we can look back upon with an enviable degree of complacency. It is great to record that advances in Hardware have not been radical ones, but the conservative rule prevailing of a little at a time has satisfied everybody, making sales easy at every stage and causing a free buying movement that can still be banked upon.

The transportation problems have been greatly lessened by the mild weather prevailing, by which obstructions were few, and less apprehension was felt in consequence.

Traveling salesmen will now be coming back from their long and arduous services for their annual rest, with the preparation of their samples the only care on their hands. Inventories will occupy the time of the house employes, which will result in a few days hard work, with the anxious idea of seeing the range of profit that will close up the year's business.

We hope our readers have had vouchsafed them a full and heaping measure of the good things the year should bring them in its general prosperity, and that they can see the rainbow of promise in the skies for 1906. We wish them one and all a Merry Christmas and a Happy New Year.

OUR COMMERCE WITH THE PHILIPPINE ISLANDS.

Commerce between the United States and the Philippine Islands seems likely to aggregate about 20 million dollars in the year which ends with the present month. While only ten months' figures of the present calendar year are available, they so much exceed those of any earlier year to justify the belief that the total will reach about 20 millions, against about 15 millions in 1904, 10 millions in 1900, 4 millions in 1898, and a little over 4 millions in 1897, the year prior to American occupation. Thus it seems likely that our trade with the islands in the year about to end will be nearly four times as great as the last year of Spanish control, and approximately four times as great as the average during the several years prior to American occupation. Prior to the year 1899 exports from the United States to the Philippine Islands had never exceeded a quarter of a million dollars. In the present year they will aggregate nearly 6 million dollars, or certainly twenty times as much as in any year prior to American occupation. Imports from the islands, which ranged between four and five million dollars per annum prior to 1899, were in 1902, 10 million dollars; in 1903, 12½ millions, and in 1905 will be about 14 millions, or about three times as much as the average prior to American occupation.

This increase in trade with the islands is distributed through a large number of articles, especially in the case of exports, which have grown from $69,459 in 1897, the year before the American occupation, to about 6 million in 1905.

The table which follows shows the value of imports from and exports to the Philippine Islands in each of the calendar years from 1895 to 1904, and in the ten months of the calendar year 1905:

Calendar year.	Imports from the Philippines. *Dollars.*	Exports to the Philippines. *Dollars.*
1895	4,120,134	140,455
1896	5,187,241	174,287
1897	4,352,181	69,459
1898	4,099,525	147,846
1900	6,095,949	3,523,146
1901	3,737,071	4,173,387
1902	10,211,303	4,736,836
1903	12,489,500	4,808,742
1904	10,325,351	5,040,579
1905 (10 months)	12,652,262	4,860,252

GUARD AGAINST WASTING TIME.

We realize the value of time in the payment and discounting of bills. Do we realize it in our own office work? Do we value our own time enough to guard against the encroachments of idle talk, half-hearted attention to business, outside considerations? A man's time is the only part of his capital supplied him ready made, and that he cannot increase by any amount of effort, or any partnership arrangement. All he can do is to make the most of what he has by taking care of it. In how many ways can we economize here more than we do?

Then comes another question, do we safeguard the time of our employees as we might? If they are late we reprimand them, and consider they are defrauding us out of so many minutes time that we are paying for the use of. Then we let them waste several times as much during the day hauling and hunting over poorly arranged goods, delving into half-lighted corners, using up energy and time in various needless ways.

Even in the office, where the best of system is supposed to rule, we hunt about for needed paper, cover its mate up with a lot of other papers and spend more time in the searching than

Digitized by Google

in the actual work at hand. Perhaps our letters are more lengthy than they need be. That takes our own time, destroys their force, takes more of the stenographer's time in transcribing them, and proves an all around luxury that nobody enjoys. Perhaps the greatest loss of all is the impression we thus give to our employees, that we value our own time and theirs lightly because we waste it with such a reckless hand.

TAKE A NEEDED REST.

Some men become so engrossed in business that their mind is in their office night and day for seven days the week, the year round. Don't do it; you are wasting time.

The human mind needs rest and if that rest is not forthcoming at intermittent periods it is taken in a continual half rest that only permits half attention to business or else there is a complete collapse sooner or later.

How often we see men seeking their desks and dreamily idling undecided over some matter that a few moments concentrated energy would dispose of finally in a few moments. That man is simply working himself out without accomplishing anything. What his mind needs is, not tonics and stimulents, but a little strenuous exercise intermixed with strenuous rest.

There is an old saying that it is the really busy man who has time for things. That is because his mind is wide awake when he is working. No sleepy half-thought for him. He takes a matter up vigorously, disposes of it in a moment and forgets it. When he is through for the day he does not take home with him a headful of matters that are only half disposed of. If anything is unfinished it is left unfinished till he is ready to take it up again. He is out for recreation now. If he goes to a play he enjoys the play alone and gives no thought to settling with Jones. That comes up the next day perhaps and he is ready to take it up when he comes to his desk with a mind that has been refreshed by entertainment and then rested by actual *rest;* now it is healthy, vigorous and active, ready to grapple with whatever the day brings on.

TRUST YOUR CLERKS.

Don't tie your employees down with trivial directions; trust something to their judgment. If they haven't enough for you to put some trust in, better discharge them and secure a better lot. An occasional blunder is better than a lot of clerks who depend wholly on "the boss." That either destroys their self-respect or makes them hate the sight of "the old man." Besides you havn't time for all details. If your time is not too valuable for that better go in as clerk yourself and hire some better man to take your place in the office.

A watchful eye over general results and over the general deportment of individual clerks will soon tell you who is trying to do his best. Have patience with those who really are trying whether they always succeed in pleasing you or not. Point out in all kindness such mistakes as they may overlook. Leave such as they can themselves see readily, for them to correct without reproof. It is a wise master who always knows just when to put in the word of criticism; it is a wiser one who also knows when to omit and "not notice."

ON RETURNING DRAFTS.

The practice of making drafts on customers by wholesale houses for the settlement of accounts is one that is practiced by the majority of the trade, and furnishes a satisfactory method of doing business between the two parties, when the retailer carries out his part of the programme.

Unfortunately, however, says the *Canadian Harness and Carriage Journal*, there are a few who do not always do so and the draft is sometimes returned to the wholesaler either with no explanation attached, or else on some trivial excuse, that no self-respecting business man should ever employ.

It may be that there is some slight mistake in the amount of the draft, but as all wholesale houses send out statements of account in advance to their customers, notifying them at the same time of their intention to draw on them at a certain date, the time to dispute this account is on receipt of this statement, not to wait until the draft is presented before calling attention to the error. In any case the business way is to accept the draft and pay it and afterwards explain to the wholesaler about the error, which would be allowed on the next bill of goods. This course would save much useless trouble to both parties and also expense to the wholesale house.

It can, moreover, truthfully be said that the retailer, who, for no good reason, returns drafts made upon him, is perhaps unconsciously, but none the less most surely, injuring his credit in the eyes of the wholesale merchant who has drawn on him, and the oftener he does this the lower sinks his credit. This fact, if realized by the retailer, should in itself be sufficient to cause him to cease the practice, except for very good cause.

THE WHITE LILY WASHER CO. UNJUSTLY ACCUSED.

The White Lily Washer Co., of Davenport, Iowa, feel that they have been unjustly accused of furnishing a certain proprietary medicine concern with Washing Machines, so the medicine distributor can give them away as premiums as a reward for selling a specified number of cases. This would be, if true, the course of action criticized by our Pittsburgh trade correspondent recently as being detrimental to the interests of the entire retail trade of the country. The White Lily Washer Co. strenuously object to this false position before the trade in which they have been placed, as they are opposing the catalogue and premium giving houses continually and earnestly, and have never even had any correspondence with the parties who have referred to their washers as being obtainable under the specified conditions, or with anyone in the town where the remedy plant is located. The cut of Washer used in the advertisement is one apparently "faked" for the occasion, as it represents none of the features which have made the "White Lily Washer" famous. The White Lily Washer Co. express their willingness to spend $1,000 if it can possibly prevent the advertising parties from filling any orders they receive for Washers, as the great interest felt by the Washer Company in their own method in selling only to the legitimate retail Hardware trade by which they purpose to protect them in every way imaginable, in making their Washer retain the popularity which their methods of fair dealing have achieved

We present herewith the article complained of which was published in the *Iowa Trade Journal* of December.

WASHING MACHINE GIVEN AWAY.

Look on your display floor—in your warehouse—and see if you have any White Lily Washing Machines. If you have, how do you expect to sell them when other people are offering to give them away. In the *Chicago American*, on Sunday, November 12th, appears an ad of the Grandma Remedies Co., New Milford, Conn. For the selling of these remedies, this company give what they call a large number of useful and handsome premiums. One of these "premiums" is the White Lily Washing Machine, given for selling 48 boxes.

On this page we reproduce the cut of the washing machine just as it appeared in the ad. Our reason for doing this is that it is hardly fair to ask a merchant to try to sell an article for money, that others are trying to give away.

When any article is offered as a premium for selling patent medicines it surely depreciates its value and its position as a meritorious article. It is better to cut out all articles used as premiums in this way and handle only those that are not finding their way into such avenues of trade.

In reply to this the president of the White Lily Washing Machine Co. addressed the editor as follows:

DAVENPORT, IOWA, Dec. 6, 1905

MR. W. J. PILKINGTON,
Editor *Iowa Trade Journal*,
Des Moines, Ia.

Dear Sir: We are just in receipt of your issue of December, and note your comment on an advertisement that appeared in the *Chicago American* of Nov. 12th, in which the Grandma Remedies Co. offers to give away a "White Lily" washing machine for selling 48 Boxes of some patent medicine. We want to take exception to your criticism, not because we think you are wrong in fighting the Premium Fakir, but because a man is considered innocent until he is proven guilty. There is no concern in this country that is fighting the Catalogue House and Premium-giving Concern any stronger than the White Lily Washer Co., and as soon as we saw this advertisement in the *Chicago American*, we immediately started an investigation to try and find out where these people got our machines. On investigation, we find that we have never quoted nor had any correspondence whatever with the Grandma Remedies Co., nor have we ever shipped a machine to their order. We also find that we have never shipped any of our machines to anyone in the town of New Milford, Conn.

On further investigation, we find that the electrotype used, is different from anything we ever had made. We do not sell our machines to the jobbing trade, but sell direct to the legitimate retail dealer, so that we are in a position to know just where our machines go. We have endeavored to find out from dealers in the vicinity of New Milford, Conn., if they have been supplying the Grandma Remedies Co. with our machine, but have been unable to locate anyone who will admit that they supply our machines to this concern.

After all the investigation we have done, we have come to the conclusion that the Grandma Remedies Co. have gone to some dealer outside, secured one of our machines, had a cut made at their own expense, and used it because they thought it would be a drawing-card on account of the popularity of the "White Lily" washer. We can only wait and see. If they do much business from their adv., some dealer will be ordering more than the usual amount and we will then probably be able to find out where they are getting our machines; and we are willing to spend One Thousand Dollars if we can possibly stop these people from filling any orders they take, and we assure you that we will leave no stone unturned to probe this matter to the bottom.

Now, Mr. Editor, we think that our interests are mutual. We appreciate the fact that you are fighting the Catalogue House and the Premium Fakir. Do you not think that you are doing the cause an injustice by not investigating a matter of this kind before passing judgment and asking the trade to cut out the sale of a machine from

Digitized by Google

a manufacturer who, we take it upon ourselves to say, (and we are prepared to back up our statement) has done more to fight the Catalogue House and Premium Fakir, than any other concern in the washing machine business. We wish to ask you one thing more. How can a manufacturer prevent a Fakir from going to a retail dealer, buying an article of any kind, having an electrotype made of it, and advertising it for any purpose he sees fit? If you are sincere in your fight, you can probably answer this question, although we admit that while the writer has taken a deep interest in this question, he is unable to solve the problem. After the above explanation, we think you will agree that you have done us an injustice, and we hope you will see fit to give this the same publicity given the criticism in this month's issue of your valuable paper.

Very truly yours,
WHITE LILY WASHER CO.
By SAM T. WHITE,
Secy. & Treas.

THE MANUFACTURING CENTRE OF THE UNITED STATES.

It has been discovered by the aid of the Census that the centre of population is moving farther west with the increase of population, and is now found to be in Ashland County, Ohio. As the United States now stands at the head of the world in manufacturing it is pleasant to know that Ashland County holds her own and enjoys the unique distinction of being the centre of our manufacturing activity. Recently in Chicago F. E. Myers of F. E. Myers & Brother, who is no stranger to Ashland and vicinity, had his attention called to this important fact by the secretary of the National Association of Exporters who informed Mr. Myers that the U .S. Census, Department of Manufactures Volume 1, Page 171, locates the centre of manufacturing activity three miles southeast of Loudonville, Hanover Township, Ashland County. In 1850, the centre was near Mifflintown, Pa.; in 1860, near Indiana, Pa.; in 1870, near Kittanning, Pa.; in 1880, near Butler, Pa.; and in 1890, near Canton O. The census of 1900 places the centre of our manufacturing in Ashland County as above referred to. What effect this will have in the manufacturing of Pumps and Haying Tools cannot be ascertained at the present moment, but occupying as they do so favorable a central location F. E. Myers & Bro., Ashland, Ohio, ought to catch the trade from every direction, and bag the game "both coming and going."

NO OPENING TIME.

Who opens the store in the morning? Not you, of course; but do you know when it is done? There is a big leak in many a concern just by not having things in running order promptly in the morning. Somebody gets there first, but usually that somebody is the office boy or one of the less responsible members of the working force.

Did you ever think how a great military campaign is carried out? It is the head of the army that gets busy first; then he calls in his high officials and they work out their plans. The army rests.

When the time of action comes, not a column is moved or started by the order of a subaltern; the commanding officer himself is on the ground to actively supervise the preliminary preparations.

It may not be consistent with the dignity of the firm to get to the office in advance of the office boy, or in accordance with their ideas of comfort to arrive until the room is warmed; still, before opening time there should be some one of responsibility there to see that the business machinery is properly oiled for the day's grind.

EXHIBITS AT THE IOWA CONVENTION.

The Iowa Retail Hardware Dealers' Association, which will meet in annual convention at Des Moines, February 14, 15 and 16, are perfecting arrangements by which they will make the exhibits a feature of the convention programme. To this end they are perfecting arrangements to hold the Convention Meetings and exhibits under the auspices of the Association, on the first and second floors of the Bush Block at 812 and 814 Walnut St., Des Moines, Iowa. These two rooms each 44x125 will give ample space for meetings and exhibits, and identify the exhibits as a feature of the convention programme, at the same time assuring all exhibitors an equal opportunity of displaying their goods and wares which is impossible under the hotel system. They have placed the rental for space at a nominal figure, and thus relieve the exhibitors of exorbitant charges frequently demanded by the other system. The Association will have a superintendent of exhibits with watchmen and janitors to give general care to building and exhibits. Both rooms will be lighted and heated and open from 9 a. m. to 10 p. m. each day of the convention. Special lighting for exhibits, if desired, will of course be arranged for by the exhibitors. Those who desire particulars as to charges, etc., may communicate with A. B. Sale, secretary-treasurer, Mason City, Iowa.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

PAYMENT OF DEBT WITHOUT DEBTOR'S REQUEST.

QUESTION.—A property owner owed a firm of Hardware dealers $36.50 for materials which he had bought of them. "X", a neighbor, who did not owe the firm anything and was not under any obligation to the property owner, paid the debt as an act of kindness during the debtor's absence. The debtor never requested him to pay the bill and now refuses to pay him the amount advanced. Can "X" recover it against the debtor?

ANSWER.—"X" cannot. There was never any express request to pay this debt. There are no circumstances from which a request can be implied in law. A man who pays another's debts without being asked to do so and without any obligation to do so, pays at his peril and if the debtor chooses not to reimburse him, he cannot recover anything against the man whose debt he has foolishly paid.

LIABILITY OF A RAILROAD COMPANY FOR FALSE ARREST

QUESTION.—A man went to a railroad station and bought a ticket for a town about twenty miles distant, paying for it with a five dollar bill and receiving the change. While he was on the platform waiting for the train, he was arrested by a police officer and charged with passing counterfeit money. After an examination it was found that the bill was good and he was released. It seems that a short time before the arrest, a circular had been left with the ticket agent at this station, describing a man who it stated was engaged in passing counterfeit five dollar bills and offering a reward for his arrest. The ticket agent believing that the man arrested was the person described in this circular and in order to obtain the reward, caused the arrest described. On these facts has the man who was arrested any remedy against the railroad company?

ANSWER.—We do not think that he has. Assuming that the ticket agent directed the arrest and that it was not justified, the question still remains whether the ticket agent was acting in the line of his duty so as to make the railroad company responsible for his acts. For whatever the agent did within the scope of his employment and for the purpose of protecting the interests of the railroad company, the company is responsible. But on the facts as you state them, the agent was not acting with a view to the protection of the interests of the company, but apparently for the purpose of aiding the police in the detection of a criminal and thereby securing for himself a reward. If the agent had caused the arrest for the purpose of recovering the property of which he supposed the railroad company had been defrauded by the counterfeit bill, it might then be said that he was engaged in the protection of the property of the company and acting within the lines of his duty, and the company would be responsible for his acts. But no such facts appear from your statement.

SALE OF CABBAGE SEED BY DESCRIPTION—WARRANTY.

QUESTION.—I went to a seed store and bought six pounds of cabbage seed, ordering the same from a printed catalogue of seeds, which in the catalogue were described as "Genuine large Bristol Cabbage seed". The seeds were delivered to me and I planted them, but after the cabbage were grown, found that they were mixed with inferior varieties so as to be worthless for the market. Consequently my whole season's crop was spoiled. Have I any remedy?

ANSWER.—The general rule is that a sale of goods by a particular description implies a contract or warranty that the goods sold are of that description. A dealer who sells an article, describing it by the name of an article of commerce must understand that the purchaser relies upon the description as a representation by the seller that it is the thing described. This is the rule, even though there has been no express warranty or agreement that the goods furnished corresponded to the description. We think, therefore, that by the selling of the seed as large Bristol cabbage seed, the dealer warranted it to be such and that you are entitled to recover from him the difference in value between the crop raised from the defective seed and the value of Bristol cabbage such as would ordinarily have produced that year.

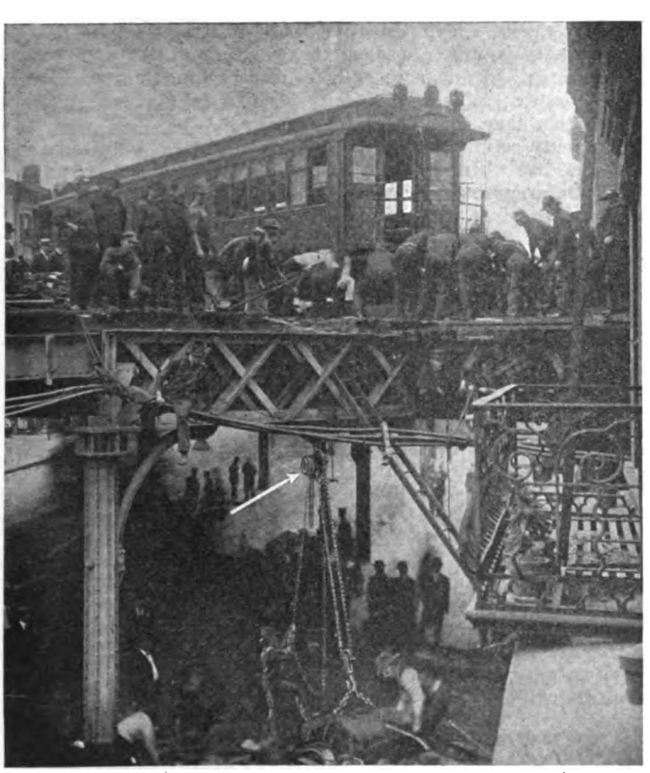
PROFIT MAKING LINES

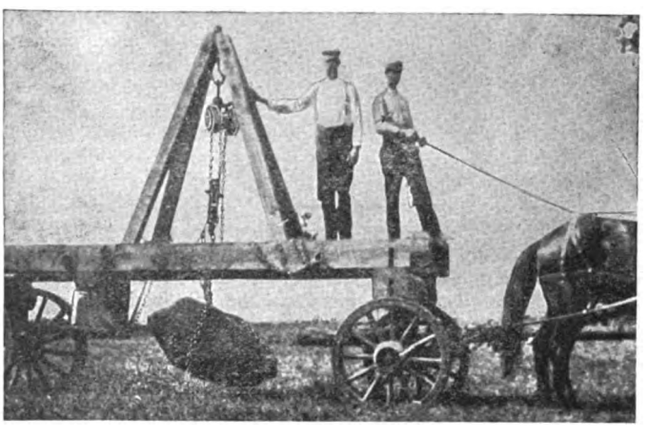
CHAIN BLOCKS IN THE HARDWARE STORE.

In casting about for new lines which will yield profits, the Hardware merchant should not overlook Chain Blocks.

At first thought, the ordinary merchant will say, "There is no use for chain blocks in my vicinity. Why, half the people don't know what a chain block is." Right *there* is the point. Educate your customers about chain blocks—their convenience, safety and ability to *save money*—and you can make a neat profit. The other day a garage in a suburban town near the writer's home bought a chain block from a local Hardware merchant to lift automobiles.



Chain blocks are used for almost every conceivable lifting purpose. Farmers use them for pulling stumps, lifting horses, wagon beds and rigging; truckmen use them for handling baled hay, cases, heavy timbers, stone, and for lifting pianos, safes, etc., to upper floors; monumental men use them for loading and setting monuments; water departments use them for laying heavy piping. Street railway systems, ice and electric lighting plants, freight houses, brick works, factories, machine shops, foundries, railroads, shipyards, refineries, ships, mines, and building contractors, all use chain blocks extensively.

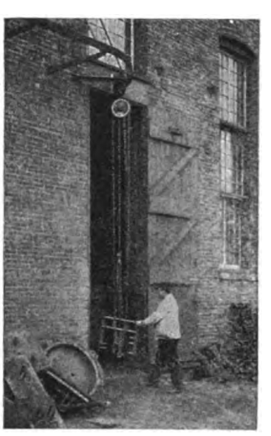


TO LIFT A HORSE.

A chain block has several distinct advantages over rope tackle. It holds the load automatically so that the danger of the load falling is eliminated; the chains (unlike rope) are not effected by dampness and cold; it is much safer and very much more efficient—that is, it has a greater work-doing power.

The original chain block—the Weston Differential pully block—has achieved literary immortality in Victor Hugo's "Toilers of the Sea." This block has been manufactured for more than 30 years by The Yale & Towne Manufacturing Co., of 9 Murray Street, New York. With it one man can lift as much as half a ton. It is a safe and convenient hoist for all ordinary lifting where high speed and economy of power are not essential factors. They have since put two more-efficient blocks on the market—the screw-geared Duplex and the spur-geared Triplex. The latter is the best chain block made in points of ease, safety, economy of effort and ability to withstand wear.

AN EMERGENCY HOIST—CLEANING UP A WRECK.



ON THE FARM—HANDLING A 3-TON STONE.

One man has lifted as much as 20 tons with the 20-ton size. A boy can readily lift 10 tons with it, or the full capacity with the smaller sizes of the Triplex. It is veritably a lifting giant, yet very quick. This latter merit has placed it in Uncle Sam's forts and battleships where it is used to handle ammunition, etc.

To show the unusual character of some applications of chain blocks, it will be of interest to know that they are used in churches to lift heavy altar lamps and in museums to handle the bones of gigantic pre-historic animals.

Yale & Towne Triplex blocks with 100 ft. lifts are in use in a New York theatre to handle scenery. Recently a safe was elevated to the fifth floor by using two 2-ton Triplex Blocks of 45 ft. lifts. These blocks were hooked together, thus getting double speed and doing the job in a very satisfactory manner.

In many large and small plants, all the lifting is done with chain blocks, while others use hundreds as supplementary hoists. The simplest application of a chain block is to sling it from a beam or hook. In mills they are generally used on cranes and trolleys.

ON A LIGHT TROLLEY.

A large department store is installing a $1400 trolley system using Triplex Blocks to handle goods. Such a system enables one man in a short space of time to unload, transport to any part of the floor and tier unwieldy or heavy packages without assistance. There is no wear on the floor, no noise as in using hand trucks, and no stirring up of dust. This brings us to the thought that even the smallest Hardware dealer can use a Triplex on a few feet of track to unload goods and convey them into the warehouse or store. The cost of such an installation may be from $60 up. A merchant could use the block for this purpose and at the same time exhibit it as an object lesson to customers.

We illustrate herewith a few applications of chain blocks which will appeal to many customers of the ordinary Hardware store.

✤

The aim of education should be to teach us rather how to think, than what to think—rather to improve our minds, so as to enable us to think for ourselves, than to load the memory with thoughts of other men.—*Beattie.*

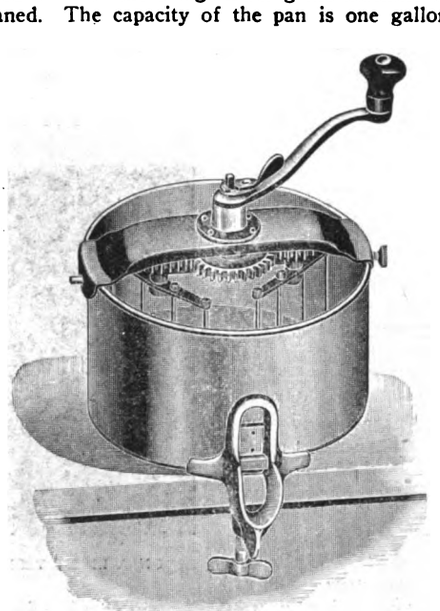
THE "UNIVERSAL" CAKE MAKER.

Landers, Frary & Clark, New Britain, Conn., with New York office at 300 Broadway, are introducing to the Hardware and House Furnishing Trades a new article in the "Universal" Cake Maker, which is destined to become an exceedingly popular culinary improvement, which we show in the several cuts herewith. All parts are heavily tinned, including the pan, which is made of one piece of sheet steel covered with a heavy coating of pure tin, which does not darken the batter and prevents rusting. It



TINNED STEEL PAN.

OPERATIVE PARTS WITH BRIDGE.

is extremely simple in its construction and the operative parts can be lifted off with the bridge making the machine exceedingly easily cleaned. The capacity of the pan is one gallon, and the

THE "UNIVERSAL" CAKE MAKER.

machine may be firmly clamped to the table, leaving both hands free, the lightness of the pan making it more easily handled than the customary earthen bowl. Through the large and small gears the beaters revolve five times for every revolution of the crank, insuring rapid, uniform and thorough mixing of the materials. Each machine weighs 4½ pounds and is packed in a strong pasteboard box, six being packed in a case.

PARALYZING PROSPERITY FIGURES.

In his annual report the Secretary of Agriculture states that the wealth production on the farms of the United States in 1905 reaches $6,415,000,000, the highest amount ever attained in this or any other country. Four crops make new high records as to value, namely, corn, hay, wheat and rice, but corn is the only one that exceeds previous yield. Besides the enormous yield of wealth, the secretary estimates that the farms of the country have increased in value during the past five years to the large amount of $6,133,000,000. Analyzing the principal crops for the year the production of corn is given as 2,708,000,000 bushels, of a value of $1,216,000,000. The hay crop this year comes second in value, replacing cotton, which held that place in the two preceding years. The value of the former is placed at $605,000,000 and of the latter at $575,000,000. The wheat crop is given at $525,000,000, oats at $282,000,000; potatoes $138,000,000; barley, $58,000,000; tobacco, $52,000,000; sugar cane and sugar beets $50,000,000; rice, $13,892,000; dairy products $665,000,000. In concluding his report the secretary says: "Should there be no relapse from his present position as a wealth producer, three years hence the farmer will find that the farming element, about 35 per cent. of the population, has produced an amount of wealth within ten years equal to one-half the entire national wealth produced in three centuries."

I. E. PALMER CO.'S NEW CATALOGUE OF HAMMOCKS.

The I. E. Palmer Company, Middletown, Conn., have recently issued their full and complete catalogue, illustratmg their line ot Hammocks all in colors, which they state represents the most elaborate and extensive line they have thus far put upon the market. The designs are selected and executed by the best talent which could be procured, and their striking appearance and harmonious blending of colors have brought the company words of appreciation from all over the country and abroad. Particular attention is called to the completeness of the line of Hammock Accessories offered in the catalogue. A variety of portable and adjustable supports, with awnings and nets; the Trapeze Bar, allowing the easiest and maximum movement to be obtained from a hammock; the Hammock Mosquito Bar, completely enveloping the hammock; the Anti-Friction Adjustable Hammock Hitch Hook, together with ropes for same; End Rings for hammocks, containing double eyes, allowing the jambing hitch, therefore doing away with any anchor or adjustable ropes. All wood bars are furnished with patented tips, so shaped that the stringing, when carelessly caught around the end of the wood bar, will slide off and not catch and break. The end cords at both head and toot of the hammock are carried down into the fabric and spreader, thus strengthening the edges of the hammock which usually give way first. The theory upon which the Palmer Hammocks are made gives greater strength and durability than is obtained, with the same amount of material, by any other method. One very striking design is that of a Hammock representing a Tiger skin. The entire hammock represents a complete skin with head and legs and the delicate warp shading, showing every grade of color from straw to dark orange, is most beautifully brought out in the fabric. Other lines represented are the Japanese, Bagdad, Grille, Indian, Solitaire, Utopia, and the Cupid Outfit for infants, on which a patent has been allowed making it the only properly constructed Infants' Hammock on the market. This beautiful catalogue will be sent to the trade free of charge upon receipt of application.

PARTNERSHIP DANGERS.

Partnership is rather a dangerous venture unless you know your man well in advance; still, insufficient capital is an incessant hindrance; so it is frequently wise to embrace the uncertainty rather than continue the known evil.

It is pretty certain that no two men will always think alike in all things, but where there is an equal partnership between two men some compromises will be a necessity. Both understand that from the first and neither one can over-ride the rights of the other. With more than two it is different. Two will go together, first on some unimportant matter, then as their natures coincide, will pull together more and more and the third man is sure to get discouraged or dissatisfied and pull in some other direction. There is where the fun comes in, for that concern's competitors in the business.

The moral of it all is, think twice before going into a partnership arrangement of two. Think many times before going into one of more than two. Don't think at all of going into an unequal partnership of any kind. If you were to get the big end of the partnership just make up your mind that you are getting associated with some sort of a fool. If you think of taking the little end conclude that you are associated with one sort of a fool already who will give you trouble enough. The only safe partnership arrangement is one wherein the interests of neither can by any means be controlled by some one else, where each has equal rights of control and there can be no combinations of a part of the business against the rest. The partners on the big side may profit from their weaker associates but a divided house does not hold public confidence.

✤

If a man does not make new acquaintances as he advances through life, he will soon find himself left alone. A man should keep his friendship in constant repair.—*Johnson.*

IDEALISM IN TRADE

BY F. H. LUTHE, OF THE LUTHE HARDWARE CO., DES MOINES, IOWA.

While we are all somewhat, and maybe too largely, inclined to deplore the prevalence of what we term "trade inconsistencies" and "trade abuses," have we analyzed sufficiently the tendencies of the times, to convince and satisfy ourselves that they are anything but the logical consequences of evolution and progression in the economics of trade, contrasting strongly the present with the past, and imparting to us a sense of deep concern for the future?

Have we not long ago emerged from "pioneering" in trade, and are we not, in deploring the departure of a few propitious elements that characterized trafficking in Hardware in those days, and seeking to discover or create agencies for the removal of avowed antagonistic customs of to-day, attempting to reconcile provincial ways with metropolitan demands?

Are these various encroachments upon our trade "reserves," as far out of harmony with the complexity of influences and elements, which distinguishes trading of to-day, from that of a decade or two ago, as we in our more meditative moments permit ourselves to believe? Perhaps not. While we all refer reverentially to the good old days of yore, we would not if power were given us, ever consider abandoning the broader environment of to-day, for the narrower opportunity of the past.

Ideal Trade.

To my mind, idealism in trade, contemplates several essentials, in order to make success attainable.

First—The choice of a substantial, legitimate and well defined branch or line of business.

Second—Its establishment in a reliably productive, uniformly prosperous section of country.

Third—An increasing population of liberal consumptive capacity, endowed with an instinct and genius for producing and accumulating property and wealth.

It seems to me, that the fabric out of which success had to be woven, never was supplied with such manifold ingredients of superior raw material as we command. No branch of trade is regarded with more dignity and respect, than the one with which we are allied. There are no ninety-nine counties, contiguous to each other, anywhere in Uncle Sam's grand domain, that can, year after year, excel in productiveness, this beautiful garden spot that kind fortune smiled at, and placed us upon. And a sturdy people of industry and thrift lays a foundation of security upon which our negotiations and transactions are to rest.

All the elements are present which are primarily contributory to the attainment of Idealism in Trade. They will not, however, flow together through natural processes, and form a chemical compound that can be bottled, labeled and held ready for use. Talent, enthusiasm, courage and perseverance in generous proportions, must be mixed therewith, before substantial returns or results are manifest.

Competition.

Amid surroundings eminently favorable to great achievement, it should not be surprising to find a sharp contention for the possession of the returns of industry and commerce.

Competition with ourselves, and counter-competition with branches of "outside" or unrelated businesses, finds as a result, a keen development. Inroads are being made on what we regard as our legitimate trade province, and human-like, we attribute the absence of part of the success we should have merited, to these incursions made by trade foes, rather than to acknowledge it as the penalty paid for moments when we indulged in sleeping on our rights.

Admitting that some "raids" are being made on our profession, are we administering to our neighbor's rights, the same conscientious consideration to which we are, with unquestioned authority, claiming title. What have not only been our own practises, but what are we now advocating with much ardor and zeal. An increase in, and greater variety of lines in our stores. And does that not directly imply trespassing on the rights of other merchants.

Have we any closer moral claim to trade on silver plated ware and clocks, paints, oils and glass, harness and whips, screen doors and building papers, field and garden seeds, and a multitude of other lines, originally undentified with Hardwaredom, than for example, the groceryman has on tinware and other kitchen utensils?

Is it a rational business proposition which contemplates "Entrance Forbidden" on one side of the fence, and an "open field" on the other, especially in an age when the blending of all classes of business seems to be a feature of trade?

Momentarily, these questions may appear as irrelevant, but a little further deliberation will prove that they are very pertinent to the subject in hand, inasmuch, as the broad development of any industry or trade, makes a circumspective analysis of antagonistic, as well as favorable influences a matter of primary consideration.

Doubtlessly, the strongest opposing forces to our ultimate success, are as now viewed, these encroachments on our trade rights, which we are enduring under so much protestation, and for which, if no immediate means of removal can be found, a strong preventative from further depredations must be sought and applied. To handle intelligently a trouble of this nature, its source must first be located. We find that inducements to the consumer by way of prices, have tended to divert a considerable percentage of trade, that was formerly classed with our regular patronage.

Increased Business.

In some instances, like with tinware, granite ware, etc., the competition consequent upon new interests engaging in the business, has reduced prices on entire lines of previously restricted consumption, so that, in a few years, the demand has increased four and five fold. Articles of infrequent use and sale, have been promoted to the ranks of the most staple sellers that our stores contain. Thus, competition has not been without its compensation, if, in the change established, our heretofore larger percentage of profit upon smaller gross sales, has been reversed to a reduced margin on multiplied sales, yes, making our actual revenue on a year's business in that department much greater than heretofore.

Trading in the abstract, is no different now, from what it was when man first found himself in need of commodities which a neighbor possessed. With the multiplicity of sources of supply that we find in each community now-a-days, the question of price is the one which holds the balance of power. In this country in particular, the average American citizen, is a Yankee Trader, and a bargain loving individual.

In our home requirements, we are all guided in bestowing patronage by the requisitions made upon the pocketbook, and not by sympathy, sentiment or philanthropy. So it is, with the great bulk of consumers of the land, and it thus becomes self-evident, that if we expect to continue as the leading distributors of Hardware and allied lines, we must heed this strong force of attraction, which controls to a greater extent than all other influences combined, the destiny of trade in its various departments. It is not enough to regard nails, wire and washing machines as the only items upon which the trading public expect attractive figures. All staple articles, and by that I mean, all goods and materials which have a reasonably frequent sale, as well as many commodities of lesser importance, must, to command 1905 trade, convey 1905 price benefits. The figures at which they are offered, must, to a reasonable degree, reflect present values.

Same Methods as Other Business.

The same methods and practices which contribute to the success of other legitimate branches of trade, may with discretion be applied to the Hardware business. In most of such other enterprises, we see frequent evidences of the use of price attractions, and where judgment is exercised, with good results to the seller.

The Hardware business, more than any other branch of trade, is closed to the introduction of "get rich quick schemes" or "gold bricks," for its very legitimate nature forbids such interspersements. Quality and appearance, in material and workmanship, must be conspicuous with each article offered, commensurate, of course, with the price asked. Where the basis of value is found in the metals employed in its manufacture, no item can command a fancy price because it has a beautiful exterior, but a shoddy interior. Actual value of the item offered from a viewpoint of utility, comes into first consideration. Our success cannot be spontaneous or spasmodic, but will be of the kind developed by the slow, but sure processes of wise business engineering.

Originally, we held firmly in hand, the entire Hardware situation. The practises which have alienated any portion of our trade, are in the eyes of the consuming public, just as legitimate, and as salutary as those we employ in the conduct of our own

Digitized by Google

institutions. Such being the case, it is evident that it would have been infinitely better for us, to have anticipated many of those movements and practises and to have made of them, sensations within our own ranks. The advantage would have been, that the trade would still be confined to its natural channels, and instead of divided sales and diverted trade, the entire business would have passed over our counters, and would continue to flow toward us.

Successful trading in future, in iron and steel manufactures, contemplates a thorough and rigid adherence to rules, laid down by the economics of traffic, elevated to a scientific level. It is a problem, a study, but it will find a competent solution, in which sagacity and intrepidity will perform its part, like in the case of General Grant, when he was met by his much discouraged chief of staff, McPherson, at the close of the first day of the battle of Shiloh, a day of heavy Union losses, the latter said to him: "Things look bad enough, general. We have lost about half of our artillery and a third of the infantry. Our line is broken in several places, and we are pushed back nearly to the river." General Grant made no reply, and finally McPherson said, impatiently: "Well, general, what do you intend to do about it?"

Quick as a flash came the answer: "Do. Why I shall reform the lines and attack them at daybreak. Lord! Won't they be surprised." The outcome—the confederates in full retreat next morning before 9 o'clock.

I should not be misunderstood as otherwise than ardently and actively favorable, in a broad sense, to reform and restrictions, which offer fair promise of protection to our interests, against unbusinesslike customs and usages.

I believe that the question of increased business, and increased profits will find its natural, and most acceptable solution, to trader and consumer alike, in an era of increased consumption, brought about by a judicious campaign of gradual popularization of retail prices.

A readjustment of our old plans of operation will be necessary, and a system will be evolved, which will bring the various departments of our business into harmonious relation, for sales with small profits are never possible except when quick proceeds are yielded, which may in turn, find prompt reinvestment in the enterprise.

Our salvation, our immediate success and our enduring progress, lies in our inclination to grasp the opportunity of to-day, and to make it abound with auspicious results. To divine the tendencies and requirements of to-morrow, and to be prepared to meet and accept conservative reforms so that we may advance our interests along with the march of progress that characterizes commercial pursuits of the Twentieth Century. Most certainly we are not retrograding.

THE ADAMS & ELTING CO.

The third Annual Convention of the members, salesmen and other employees of the Adams & Elting Compnay, Chicago, was held in the rooms of the Hamilton Club, Chicago, December 4-5th. In point of attendance and enthusiasm it was far ahead of any former convention of this company and the only regret expressed was at the absence of the president, W. P. Adams, who is still in the East. Philip Elting, who presided, made the announcement that in every single line—and this aggressive concern manufactures a score— the volume of business had far exceeded that of last year, or any former year. In many instances the sales were 150 per cent. over any other year's sales. The first day of the session was given over to the discussion of mixed paints and fillers and stains, in which latter line the Adams & Elting Company claims to lead all other manufactures in the country in both quality and extent of production. It was shown that the Ad-el-ite Fillers and Stains were used in almost every large furniture manufacturing house in the United States, and much encouragement was found in the constantly increasing demand for them in view of the fact that high class goods are only produced and no cheap fillers or stains are put out. The mixed paints showed a very large increase in sales over last year, as did all specialties for which this firm is famed. Demonstrations were carried on throughout the convention and comparative tests against competing lines were made. The Enamels were given considerable attention and letters were read from several large iron bedstead manufacturers praising Ad-el-ite Tinted and White Enamels. This is one of the foremost lines of the Adams & Elting Company. The convention concluded with a banquet Tuesday evening at which covers were laid for about 100 guests. There was much speech making and much enthusiasm and the policy of the company to push the Ad-el-ite line by extensive advertising was applauded soundly. That this company can congratulate themselves again at the next annual banquet upon increased business and increased growth goes without saying. They have the aggressiveness and the progressiveness and they know no such word as "Fail." The banquet broke up about midnight with three cheers for the Adams & Elting Company.

RECENT TRADE PUBLICATIONS.

WE HAVE RECENTLY RECEIVED a very interesting and useful pamphlet entitled, "Standard List Prices on Carriage Forgings", which has been prepared and adopted by the following well-known manufacturing concerns: The Atwater Mfg. Co., The E. D. Clapp Mfg. Co., The Cleveland Hardware Co., Columbus Bolt Works, C. Cowles & Co., Richard Eccles Co., Keystone Forging Co., M. Seward & Sons Co., The H. D. Smith & Co., Toronto Bolt & Forging Co., Union Forging Co., Upson Nut Co., The D. Wilcox Mfg. Co. Up to the time of the publication of this pamphlet there has been no standard list of prices on carriage forgings, and for this reason it comes before the trade as a feature of especial interest. The list has been adopted by these manufacturers with the belief that the trade desires some uniform list on which they may base their quotations and purchases, and a copy may be obtained by applying to any of the manufacturing companies above named, who will be only too glad to furnish same to interested parties.

THE MCCRAY REFRIGERATOR COMPANY, Kendallville, Ind., have favored us with four very handsome books recently published by them, all of which are exceedingly artistic and interesting and full of the most valuable information regarding their Refrigerators and Cooling Rooms. One of these books is entitled "American Homes Provided With McCray Refrigerators", and shows a number of the various classes of residences from different sections of America, where these refrigerators are used, the object in particular being to illustrate the many ways of installing a McCray Refrigerator. Another of these most instructive books, which is their Catalogue No. 80, illustrates and describes at length the high grade McCray Tile, Opal-Glass and Oderless-Wood Lined Refrigerators, and is accompanied by a pamphlet which contains useful directions as to "How to Use a Refrigerator". The other two books are Catalogues No. 46 and No. 57, and describe and illustrate very thoroughly the McCray Refrigerators and Cooling Rooms which they claim have met with remarkable success in every field of operation and are unsurpassed in every way. Any of these valuable books will be sent upon request to parties interested in purchasing this line of goods.

THE GLOBE LAWN MOWER & MFG. CO., Reading Pa., have recently issued a very interesting and finely illustrated catalogue of their "Hawk" and "Sparrow" Lawn Mowers, a copy of which has been sent to us. They state in presenting their Lawn Mowers to the public as follows: "Knowing the long-felt want of a mower that can be easily adjusted and understood by the ordinary person, so as to avoid the usual troubles experienced on the lawn while cutting grass, we have invented, after years of study and practical experience, the 'key' to the situation, which will now make the lawn mower a perfect machine." They claim that the "Hawk" and "Sparrow" are the very best high-grade, ball-bearing lawn mowers made, the material and workmanship being of the best, and their being so constructed as to cut with ease grass seven to eight inches high. They also claim that they cut closer to a border than other lawn mowers and that they can be adjusted to actually shave the earth, making them desirable mowers for use on the Golf Links, Parks and Fine Lawns as well as on ordinary Lawns. Further information may be obtained by writing to the manufacturers.

THE WOOD SHOVEL AND TOOL CO., Piqua, Ohio, have sent us an exceedingly artistic brochure containing a number of very fine illustrations relating to their plant, and showing the rooms in which various operations are conducted. This Company manufactures Shovels, Spades, Drain and Ditching Tools, of all kinds and styles, in the plain and hollow back patterns, also Telegraph and Telephone Shovels and Spoons. The plant occupies a two-acre tract, with streets on two sides, and has its own private railroad track of 600 feet. The pamphlet describes the Main Factory Building and others, and the Steam and Power Plant, and contains a very interesting article on "Making A Shovel". When writing, ask for pamphlet entitled, "The Model Shovel Plant of the World."

THE WILSON SAW & MFG. CO., Port Huron, Mich., have made us the recipients of one of their latest catalogues which is attractively gotten up and finely printed on excellent paper. The book is very comprehensive, containing over fifty pages of valuable information regarding Saws of every description, and is profusely illustrated. They state as follows: "Each Saw is warranted perfectly true, or as true as it is possible to make it, free from flaws and seams. If found to be defective in any of these particulars it may be returned to us, and if on examination we are satisfied the Saw is at fault, all necessary repairs will be made free of charge, or a new Saw given in exchange, provided it is returned within 30 days from delivery." Catalogue may be had upon request.

RECENT TRADE PUBLICATIONS.

THE BILLINGS & SPENCER CO., Hartford, Conn., makers of Genuine Packer Ratchet Drills, are issuing an eight-page folder describing, illustrating and pricing their products. Price lists are given of Packer and Boiler Ratchets with Square Taper Holes in Socket, Taper Socket Packer Ratchet with Taper Hole in Socket, "Railroad" Packer Ratchet Drills, and Billings Double Acting Ratchet Drills. A copy of this most interesting and instructive pamphlet may be had upon application.

CRANE BROTHERS, Westfield, Mass., manufacturers of Linenoid Seamless Goods, are issuing an attractive circular which is their Price List of Phonograph and Graphophone Horns, Megaphones, Model Yacht Hulls, Sportsman's Carry-All, and Pool Triangles. Information regarding these and other goods manufactured by this Company will be gladly sent to interested parties.

THE PIKE MFG. CO., Pike, N. H., have sent us an eight-page folder regarding Corundum and Emery Wheels, which they state they have recently added to their general abrasive business, and are now prepared to furnish promptly. The pamphlet contains a Price List of Regular Wheels, Cylinder and Cup Wheels, A Classified Table and a Table of Grinding Wheel Speeds. An illustrated catalogue showing a full line of these goods will be furnished on application.

THE BUCKEYE CHURN COMPANY, Sidney, Ohio, manufacturers of Woodenware Specialties, have sent us a neat little booklet which describes and illustrates the Buckeye Churn, Ash Dash Churn, The Buckeye, The Queen and the Hero Washing Machines, and the Eureka, Climax and Buckeye Oak Horse Pails. Accompanying this pamphlet is Price List F, illustrating and pricing Root and India Palmetto Scrub and Horse Brushes. The manufacturers will be pleased to send any information desired in regard to their goods, and to quote their best discounts to the trade.

THE BRIDGEPORT WIRE GOODS CO., 82 W. Broadway ,New York, N. Y., have favored us with a copy of their pamphlet, describing, illustrating and pricing "Swift-Selling Wire Specialties." In presenting this Catalogue to the trade they call particular attention to the high-grade character of their goods. Every piece of wire used, they claim, is of the best steel, heavily tinned after goods are made. Workmanship is unsurpassed and durability assured beyond any similar goods in the market. Among the specialties shown are the following: Smokeless Broiler, Soap Rack, Sink Cleaner, Tumbler Holder, Tea and Coffee Strainers, Sink Brushes, the Ideal Gas Toaster and the Ideal Gas Broiler. Send for catalogue.

PATTERSON, GOTTFRIED & HUNTER, LIMITED, New York, N. Y., have recently issued an attractive little booklet entitled, "Holiday Suggestions, 1906". The book contains descriptions and illustrations of The Champion Automobile Repair Kit, The Folding Bench Cabinet, The Machinists' Bench Tool Set, Pocket Knife Tool Kit, and Machinist and Jewelers Small Tool Cabinet. The pamphlet will be found a handy and useful one to those interested in this line. Send for one.

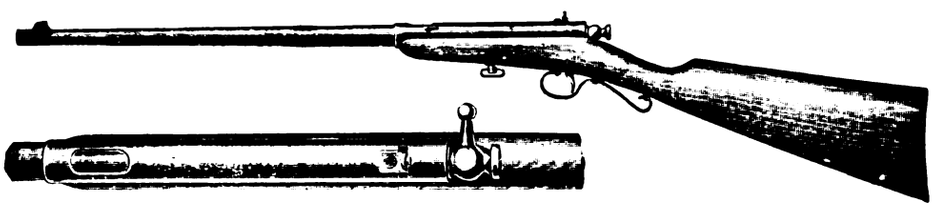
THE JOHN E. BASSETT & CO., New Haven, Conn., have presented us with a very unique pamphlet entitled, "The New Haven Almanack for the Year 1906." This interesting booklet contains a calendar of days and months to which are added certain old time pictures with some historical facts and many pertinent observations, all bringing to the attention of the reader, more or less, the complete line of Hardware carried by this Company. A copy of this most interesting and useful little pamphlet will be gladly sent upon request.

COLWELL LEAD CO., New York, N. Y., are presenting to the trade their Catalogue "D", entitled "Lead Goods", which is finely gotten up and carefully arranged throughout. They state that the booklet is issued because of the numerous requests which have come to them from time to time for catalogues embracing the lines of metal goods to which it pertains, for information and formulas characteristic of and applying to them. This concern has for many years been among the largest manufacturers of the lines represented in this most instructive and convenient catalogue, and they claim their capacity is now greater than ever as a glance at the view of their works at Elizabethport, N. J., given as a frontispiece, will indicate. The book is indexed and is profusely illustrated, and will repay a careful perusal. For information on Lead Goods of any description write for this most interesting and valuable book.

AMERICAN IRONING MACHINE CO., 100 No. Clinton St., Chicago, Ill., have recently issued a very attractive little pamphlet entitled, "To Lighten Women's Work", setting forth in a very convincing manner the numerous advantages to be derived from the use of the "Simplex" Ironing Machine. The manufacturers claim that the machine is exceedingly simple, easy to operate, economical in fuel, and does its work in one-tenth the time it takes to do it by hand. The large size irons goods two yards in width with one fold, and up to 37 inches without folding; the smaller size in proportion. They state they will be pleased to give any further information desired.

J. STEVENS ARMS & TOOL COMPANY, Chicopee Falls, Mass., have sent us a copy of an exceedingly interesting booklet, showing "What the Manufacturers of the Famous Stevens Firearms are doing for the Merchant who handles this popular line." They are only too glad to furnish dealers with Abridged Catalogues, Part Envelopes, Aluminum Hangers, Blue Cards, Electrotyped Advertisements, also cuts of Stevens Models, assured that Stevens practical Advertising Accessories are trade winners. They state as follows: "Stevens Advertising Methods, like Stevens Arms, are hard hitting and shoot true. Our manufacturing, selling, and advertising policy epitomizes a square deal for the dealer. Almost half a century of consistently successful achievement is behind our tried and proven line. Our line is the most extensive and varied, representing the output of one manufacturer, and consists of Rifles, Pistols, Shot Guns, Rifle Barrels and Specialties, etc." Send for their 140-page illustrated catalogue for more complete information.

BROWN & SHARPE MFG. CO., Providence, R. I., have sent us a copy of their latest catalogue of Mechanical Machinists' Tools of every description. The catalogue is finely gotten up, being profusely illustrated and the descriptive matter being very instructive and comprehensive. It contains over 160 pages and is carefully indexed. The Brown & Sharpe goods are so familiar to all who deal in this line that a description of them is unnecessary. However, especial attention is called to a number of new tools that have been added during the past year; among them are Tempered Steel Hook Rules, Tool Makers' Knife Edge Straight Edges, "B. & S." Scribers, Tool Makers' Clamps and Automatic Centre Punches. These Punches are claimed to be one of the most novel and practical tools that have been added during the year. The Adjustable Centre Punch is provided with means for regulating the strength of the blow and is found particularly well adapted to laying out tool work. Other new tools are Tool Makers' Calipers and Dividers, Universal Dividers No. 856, Improved Steel Beam Trammels, No. 852, Micrometer Calipers, Nos. 4-A and 5-A, Micrometer Caliper Set, Dial Test Indicator and Universal Surface Gauges. Write for Catalogue No. 107.



KEYSTONE LOCK WORKS, Lancaster, Pa., have sent us a copy of the very handsome catalogue which they have recently published, which they state supersedes all former issues published by them. The catalogue contains a very complete showing of the goods manufactured by them, and gives detailed descriptions and profuse illustrations of Pressed Steel, Wrought, Cast and Malleable Iron, Steel, Bronze, Brass, Nickel and Aluminum Padlocks and Night Latches. Attention is called to the many new lines designed, and the many improvements, of merit in old lines, all of which will be readily recognized by a careful perusal of the pages of the book. They state that the volume includes goods only of their own production, most of which originated with them, and they believe theirs is the most extensive line of Padlocks made by any single concern in the world. Their line has been so broadened during the past few years as to now include Padlocks for every known purpose, all of which are straight, honest and reliable goods. The catalogue measures 7x10 inches, numbers over 80 pages, and contains a very carefully arranged Numerical Index. When writing for this very interesting and instructive book ask for Catalogue No. 16.

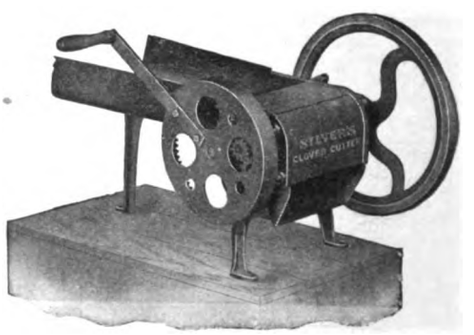
NEW GOODS AND SPECIALTIES.

HAMILTON RIFLE—MODEL 23.

The Hamilton Rifle, Model No. 23, is of the Bolt Action type, combining simplicity of action with strength and safety. The barrel, with action, is 21¾ inches in length, being finely tapered and beautifully finished in Blue-Black gun finish. The quality of rifling is unsurpassed, assuring absolute accuracy and strength of shooting. The action is automatic, both in putting cartridge into the chamber and ejecting exploded shell. To open action, throw up the thumb-lever and pull back the bolt, thus opening aperture to top of barrel. If exploded shell is in barrel, this action automatically ejects same, leaving action ready for new cartridge. To load, simply drop cartridge into aperture thus opened, push bolt forward, automatically putting cartridge into chamber, and throw thumb-lever to the right, which securely locks it. To fire pull back firing pin until it locks into trigger. Firing pin and trigger cannot be operated, however, unless thumb-lever is properly locked, thus making the entire action of Rifle absolutely safe under all conditions. When action is closed the breech-lock and working parts are thoroughly protected from dirt, rain, snow, etc., by a sliding cover which covers the aperture, and also thus protects the shooter against any danger from leakage of defective cartridge. To more readily clean barrel and action, the working parts may be easily and quickly taken out of barrel, by throwing thumb-lever up and pulling back bolt, holding trigger back with finger at the same time.

HAMILTON RIFLE—MODEL 23.

GOODELL "400" KITCHEN KNIFE.

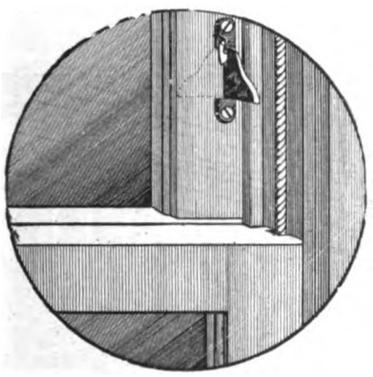


The Goodell Company, Antrim, N. H., and 10 Warren Street, New York, N. Y., are the manufacturers of this handsome addition to their line of Cutlery, which is destined for kitchen use. We illustrate herewith the Kitchen Knife No. 400, which is a high grade knife for the purpose, made from a special grade of steel which is used only in their highest grade of Shoe Knives devoted to cutting sole leather. This steel is tempered by an improved process, and the acid usually found in apples, lemons, etc., does not affect the temper, enabling the edge to be held better when thus applied than any other material. This Kitchen Knife is beautified by having a very ornamental metal bolster, and the improved method of fastening the Knife tang in the ebony handle, which is done by forcing hot metal under pressure inside the ferrule and handle by the Company's patented process, which was originally used in connection with the cut glass handled cutlery of its manufacture. The blade is warranted not to come off as the metal is forced into the handle at right angles with its length, thus filling a portion of the handle and the ferrule. The blade has a cutting edge of 3⅛ inches and the knife is 7¼ inches long over all.

GOODELL "400" KITCHEN KNIFE.

SILVER'S CLOVER CUTTER.

The Silver Manufacturing Co., Salem, Ohio, are the manufacturers of the Clover Cutter which is shown in the accompanying illustration. This machine has been specially designed for cutting clover, alfalfa, etc., for feeding poultry, as it has been demonstrated that cut feed is one of the necessities in successful poultry raising. The machine has a heavy fly wheel, and is easy running with great rapidity of execution. The cutting plate is adjustable, allowing the operator to keep the cutting device in the best possible condition. The throat of the machine is wide, giving more room to spread out the clover, which makes the machine cut very much easier than machines with a narrow throat. This machine has four 8 inch solid center spiral knives and cuts ⅛ inch in length. The length over all is 24 inches, length of box 18 inches, width of box at largest end 10 inches, width of box at throat 8 inches. It is claimed that it will cut a bushel of clover in ten minutes. It is intended to be mounted on a box or bench the proper height for the convenience of the operator, and its weight is 60 pounds.



SILVER'S CLOVER CUTTER.

THE CANNON VENTILATING WINDOW LOCK.

The Cannon Manufacturing Co., 388 La Salle Avenue, Chicago, Ill., is offering the Ventilating Window Lock, shown herewith. It is made of malleable iron and has a swinging leaf to allow the sashes to pass each other when the lock is not in use. The lock is secured in its open or closed position by a safety catch. It is screwed on to the right hand side of the upper sash about 5 or 6 inches from the bottom of the sash, thus permitting ventilation by having either the bottom or the top sash open or both. The dotted lines in the illustration indicate the position

Digitized by Google

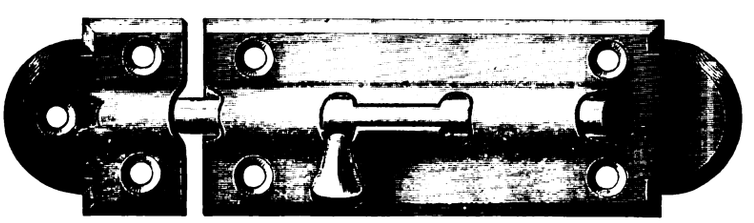
of the swinging leaf when the sashes are to pass so that the window will be wide open. In places where articles in the room can

THE CANNON VENTILATING WINDOW LOCK.

be reached from the outside through the lower window another lock may be placed on the casing or molding just over the top of the lower sash, thus permitting the locking of the lower sash independently of the upper one.

CRONK'S STAR DOUBLE BIT HOE.

The Cronk & Carrier Manufacturing Co., Elmira, N. Y., are placing upon the market "Cronk's" Star Double Bit Hoe, which

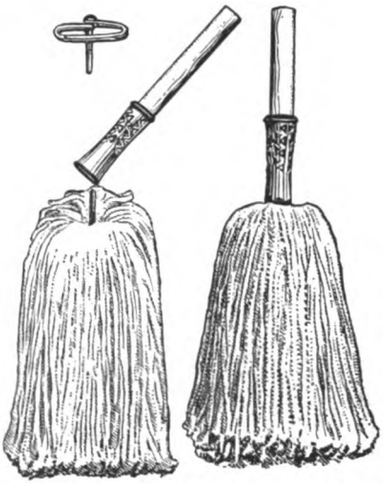


CRONK'S STAR DOUBLE BIT HOE.

we illustrate herewith. It is provided with a full polished blade of a fine quality of high carbon steel. It is a combined garden and weeding hoe and can be retailed at the same price as the regular field hoe. The blades are respectively 6½ and 2⅛ inches, with 4½ foot handles. They weigh 30 pounds per dozen.

BEVEL WROUGHT STEEL BARREL BOLT.

The Shelby Spring Hinge Company are the manufacturers of the neat stamped steel Door Bolt which is being placed upon the market and of which we give an illustration herewith. The



BEVEL WROUGHT STEEL BARREL BOLT.

frame and keeper are each stamped from one piece of steel. The edges are slightly bevelled which improves its general appearance and gives it additional strength. This bolt is nicely finished in Japan and also all the usual Hardware finishes so that it can be in harmony with the rest of the trim, and the moderate price at which the makers are enabled to sell it is calculated to make it popular with the trade.

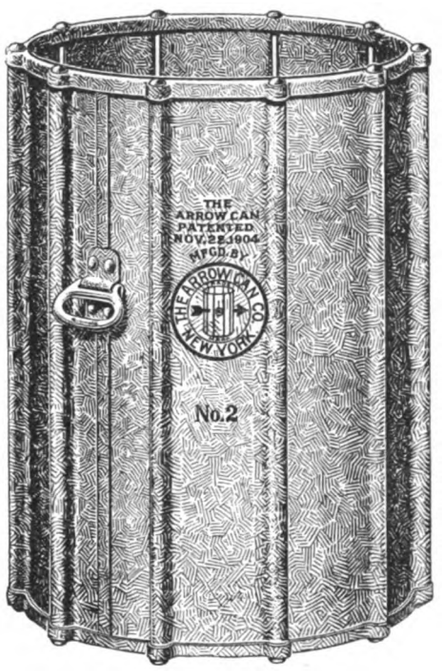
OHIO MOPHEAD AND DETACHABLE HANDLE.

Eagle Cooperage Works, Circleville, Ohio, is placing upon the market a Mophead and Detachable Handle which presents novel improvements that will make it a ready seller. We give an illustration of the same. The device is quite simple in construction; the cotton is clamped with a positive grip by wire which, it is explained, will neither break nor rust, making it impossible to pull off on the floor or in a wringing pail when in use. The Mop is attached to handle by a bolt and nut adjustment which it is claimed cannot work loose, yet can be quickly and easily released when desired. As the device is constructed of only two

OHIO MOPHEAD AND DETACHABLE HANDLE.

parts it cannot get out of order. By the use of this improvement the operator is enabled to get the use of every ounce of cotton as none is bound to the handle which cannot be used. All of the castings used in its construction are of malleable iron.

WIRE NAIL PULLER.



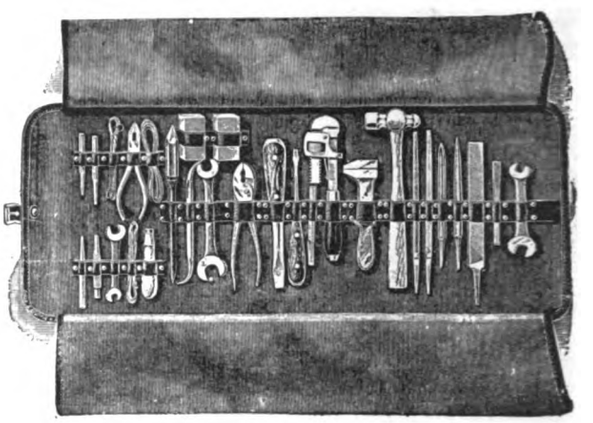
In unpacking large boxes and crates it is very desirable to have a good instrument for pulling out nails. Invariably this is done in a careless and slipshod manner, anything sufficing so long as the box is opened. To break the lid takes more time than if the nails were carefully extracted, besides ruining the box for future use. An Indiana man has patented a wire nail puller which possesses several novel features. This instrument is formed of a shank, having attached at the end a pair of claws of the usual form employed upon hammers, one claw having a longer curve than the other. The shank is bent in the centre, the free end in alignment with the claw having the shorter curve, so that when the claw is placed beneath the head of the nail the shank will be parallel with the box from which the nail is drawn. When in position the draft or force required to first engage the claw with the nail is in direct line with the structure and at right angles to the nail and enables the operator to utilize the force upon the claw to a much better advantage and with a correspondingly better effect. To assist in this action a supplemental handle is formed, extending from the shank, whereby a strong drawing pressure can be exerted upon the shorter claw to force it beneath the nail head. The shank and handle thus co-act to greatly expedite the action and decrease the labor and time required to start the nail from the wood, and after the nail is partially drawn the implement is reversed and the other claw brought into action, which, by reason of its longer curve,

Digitized by Google

exerts a longer leverage and completes the drawing of the nail without bending it. Thus the longest nails may be readily and quickly drawn without bending them or injuring the structures from which they are drawn.

ARROW ASH AND GARBAGE CAN.

The Arrow Can Company, 35 Warren street, New York, is introducing to the Hardware Trade an improved, pressed steel ash and garbage can, of which we give an illustration. The can is practically made in three parts of sheet metal stamped with dies, the bottom, which is to stand the greatest strain, is made of one solid piece of 16 gauge sheet steel formed in a die and is made to fit the body snugly like a cap, the metal being drawn up over the outside edge and thus doing away with the hood or



ARROW ASH AND GARBAGE CAN.

band generally used. The body is made of one strip 24 inch sheet metal having ten flutes which extend from the inside outwards. In these flutes are inserted half inch iron rods. This Rod and Flute combination, it is claimed, forms the strongest possible side reinforcement. Two of these flutes always rest on the side of a cart when the can is being emptied. These rods are shouldered on the inner sides, both the top and bottom, to give solid support, the reduced ends run through holes in the bottom and in the top rim and are riveted, making it impossible for the top and bottom rim to be pulled apart or torn away from the body. The top rim instead of being a band with the ends linked together or mortised, is made from a solid piece of 16 gauge sheet steel, formed in a die, so that it has two flanges, one of which fits over the outside of the body and the other on the inside. The top edge of the body being thus crimped between the two flanges, makes it impossible for it to be torn or crumpled. This also forms a smooth edge for handling and makes a top rim, without a break in it anywhere. The bottom edge of the body is crimped in the same manner between the flanges of the bottom. The can is assembled with the sheet steel in its natural state and then galvanized thoroughly. This solders all the joints and adds very greatly to the strength of the can. This is a feature that prevents corrosion and rust from eating out the bottom and is claimed as greatly superior to any form of japaning or painting as used in a great many high grade cans. The covers are made convex so that a can may be heaped full, the flanges being made to wedge sufficiently, so that it cannot readily be knocked off by animals. For the present a standard size will be made 17x24 inches. All cans have the company's arrow trade mark inpressed in the sheet metal and cast in the handles.

CHAMPION REPAIR KIT.

Patterson, Gottfried & Hunter, 146-150 Centre Street, New York, N. Y., are placing upon the market the very useful Champion Repair Kit of which we give an illustration. As very few automobilists are familiar with the hundred of small tools made, or have the skill to select from among them the dozen or so best suited to their requirements, the makers of this Repair Kit, by consultation with some of the most successful manufacturers and best known chauffeurs, and with the help of their advice combined with their own experience have successfully established

CHAMPION REPAIR KIT.

this line of repair tools. The Repair Kit contains enough tools to make any repair which can be managed away from a shop. The case which holds them is of the best grade of water proof duck and each tool selected is of good quality and made for heavy service.

AVERY STAMPING COMPANY.

THE AVERY STAMPING COMPANY, Cleveland, Ohio, has just issued its No. 2 catalogue of Shovels, Spades and Scoops. It gives illustrations, dimensions, weights, special list numbers, as well as list price of each size, style, pattern, brand and grade and finish, and it is probably the most complete catalogue of shovels obtainable.

According to this catalogue the Avery Stamping Company makes a full line of Cleveland pattern, hollowback dirt shovels, spades, Eastern and Western pattern scoops, and Patented plainback dirt shovels and spades, also special locomotive firing scoops, gas-house charging scoops, galvanized shovels and scoops for salt works, brass shovels for special purposes, galvanized and perforated scoops for handling crushed ice, No. 242½ ore shovels, extra heavy tamping and plain handled railroad track shovels, moulders' shovels, "Alaska" steel snow shovels, "Tropic" ash shovels, "Klondike" and "Solid-Steel" sidewalk cleaners, and "Never-Break" post-hole diggers.

The four regular brands and grades of this company are "Never-Break", "National", "Buckeye" and "Mohawk". Strange as it may seem, this company has not followed the custom of most other shovel makers, as it does not label or brand any of its shovels with the firm's name "Avery". It does, however, make a special, high-grade shovel which is called the "Knocks-All".

A notice is printed on page 4, giving a concise description of the patented plainback shovels and spades placed on the market by this company a number of years ago. On the preceding page is a "double cut" showing a comparison of this type of shovel with the older known plainback shovels, meant to set forth the points of superior strength, leverage power and durability of the former over the latter.

The claim is made that only goods of excellent quality, style and finish are produced, as "cheap shovels, of which there are any number on the market, are not good shovels at any price."

This catalogue may be had on request, in fact should be of use to everyone interested in the line of shovels.

✤

PARAGON MFG. CO., 1175 Third Ave., New York, N. Y., have sent us a very attractive catalogue, which describes and illustrates the Paragon Family Cylinder Washer. They claim that the revolving cylinder system for washing clothes is universally conceded to be the least injurious, most rapid and the only really effective method of sanitary washing, and that it cannot be surpassed for durability, simplicity, sanitation and clothes capacity. They state that every machine is tested before leaving the factory, and guaranteed to be absolutely perfect in material, mechanism and workmanship and exactly as represented. The catalogue also gives directions for using the Paragon Washer and contains a very interesting article on "Parisian Laundering Art." A copy of this most useful and instructive book will be gladly sent upon request.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

London, December 16, 1905.

RETROSPECTIVE AND PROSPECTIVE.

When this letter reaches its destination the Christmas festivities will be close at hand and the business cares and worries of 1905 will for a time be forgotten. British ironmongers during the fast closing year have not experienced altogether unmixed prosperity and some business difficulties have been met with. The position has been gradually improving and the efforts of association work have been felt throughout the entire country. Little by little the movement has been gaining ground and in first one district and then another ironmongers have grasped the reality of the permanent betterment which may be effected by organization. Gradually differences between ironmongers dwelling in the same town, and prejudices which have existed for many long years, have become less and less; so that at last it is possible for Hardwaremen to shake hands when they meet and to gather together to discuss business transactions. Ironmongers can now agree to a common basis of trading whereby the Hardware business may be robbed of such evils as direct trading, price-cutting, and municipal trading whereby retailers lose local contracts but still have to pay rates to maintain unprofitable undertakings instead of securing profitable work themselves. All matters enumerated have been very prominent at association meetings during the past year, but a retrospective view of the proceedings of the leading association in this country shows very clearly that retailers have, by combination, improved their positions. Manufacturers who, a few years ago, showed complete indifference to the wishes of retailers and claimed the right of conducting their businesses in their own way, now see the advantages of conforming to the principles of trading laid down by the I. F. A. One of the great achievements of associations during the past year has been the establishment of an "In Accord" list, and the compilers of the revised edition, which is about to be circulated among the association members for their private use, have found a great difference in the spirit shown and in the reception they have met with towards that expressed at the commencement of the movement. Instead of manufacturers objecting to agree to conform to the principles of the so-called Magna Charta of the I. F. A., a large number of leading firms have come forward asking to be enrolled upon the "In Accord" list, declaring themselves willing and wishful to distribute their goods through the medium of accredited ironmongers. Undoubtedly the position of retail ironmongers of the present day is more assured than it was, and a marked progress has been made during 1905. The prospects for the New Year are fairly good and, as far as the association movement is concerned, there is every probability that the missionary work, which has been carried on extensively both in London and in the provinces, will tell, and that some important extensions and developments will take place in the New Year. The most important branch formed recently has been that in North Wales. In several parts of the Principality towns have been grouped together in separate districts affiliated in one powerful Branch of the I. F. A. It is quite evident that the system of grouping together small towns in English counties must be adopted to a greater extent in the future than in the past as there are many ironmongers in sympathy with association work located in isolated districts where it is not possible to form working associations. The fallacy of attempting to form such associations has been established through the number of small associations which have become almost lifeless. The formation of Ironmongers' Assistants' Associations, which I have referred to in recent letters, is a development which must be recorded in the future as having taken place in 1905. The assistants of to-day show a great amount of life and energy, and the eagerness with which they are entering into educational schemes for their own improvement and culture and for the acquiring of greater trade knowledge augers well for the British ironmonger of the future.

THE DIFFERENCE IN METHODS OF TRADING NOT VERY GREAT.

When the trade journals in this country and those emanating from the United States of America are read and scrutinized it is strange how great is the similarity between the trading efforts of both countries. Although the conditions under which business is carried out here are not always identical there is underlying them one common basis of thought and action. The same smartness of salesmanship is needed and the same activity of brain required in order to keep pace with the times and to secure a continuance of business. The average British ironmonger carries on his business in a somewhat smaller way than his American brother, preferring, wherever possible, either to retain the grip of the business himself or to conduct his retail establishment as a private limited liability company, frequently being prejudiced against the development into large household stores; but although the British ironmonger has a rooted antipathy to stores and the universal providers who seem to have siezed hold of a little of the business of almost every retail tradesman, it cannot be denied that the tendency of the present day is to develop and extend. That development and extension takes the form of adding first one branch and then another; embracing little by little those trades closely allied to Hardware which have been allowed to let slip in the past. It is an unfortunate fact that the average ironmonger of the past was too cautious to take up freely new developments, and too conservative to affect reforms in his methods of doing business whereby he might be in a position to add goods, which, under the old methods of conducting trade, were almost impossible.

DEVELOPMENT IN THE WORKSHOP.

Within recent years an English ironmonger's workshop consisted chiefly in the employment of tinmen, locksmiths and bellhangers (crank). Occasionally a larger firm would employ a coppersmith and sometimes a blacksmith. The tools and workshop outfit used precluded the possibility of manufacturing new goods at prices which would compete with the larger wholesale firms. Want of tools and plant, as well as want of technical education, prevented the average middle-aged workman from taking up such branches as electrical work, plumbing, hot water, modern gas-fitting, and, indeed, any of the advanced working departments which entailed scientific knowledge and the application of something more than a knowledge of the use of tools. The average ironmonger was helpless, inasmuch as he had not been taught to study modern theory and practice, nor had he then learned the advantages of acquiring a trade library. Much of this apathy has been overcome and the impetus which has been given of late years to electricity, ventilation, sanitation and such modern sciences has caused the younger generation of ironmongers to enquire into these questions and to ascertain why plumbing, gas-fitting and such like have been allowed to slip away from the established Hardwareman. The arrangements which have already been made by several local associations whereby gas companies have agreed to give up a certain portion of their work and allow ironmongers a commission upon sales of stoves and the introduction of new business, have given encouragement and there is every probability that, not only in the sale of gas stoves, lighting and heating fittings, etc., but also in the carrying out of larger undertakings, the ironmongers of the future will become contractors. The same energy is now being shown as regards electric lighting and heating, as well as the supply of power. In order to effect all these and to enable them to carry out other important contracts ironmongers are showing themselves willing to improve their plants, and manufacturers of lathes, stocks and dies, drilling machines, and the larger tinmen's machines state that the demand for such improved workshop fittings is increasing.

CHRISTMAS BUSINESS.

During the past few weeks retail ironmongers have given up some portion of their establishments to the sale of toys and fancy goods and Christmas presents are enquired after freely just now; many buyers preferring to give useful and ornamental Hardware goods and household appointments instead of more perishable articles which have been so long associated with Christmas gifts. Many of the English ironmongers' windows at the present moment are well filled with Christmas goods and you will, doubtless, be interested to know that a large number of American novelties are very conspicuous; the utility of some of the domestic and labor-saving appliances which have their origin in the United States are much appreciated by British housewives.

UNIFORMITY IN THE SIZE OF CATALOGUES DESIRED.

The movement which has recently been made in New York by the Southern Hardware Jobbers' Association to establish a uniform size of catalogues will meet with appreciation in this country, for one of the great drawbacks which ironmongers have experienced is the uneven sizes and want of standardization in respect of catalogues and lists. A uniform system would greatly facilitate the keeping of lists and catalogues, especially if a better method of classification could be adopted so that ironmongers might readily refer to the right catalogue for the goods they had received enquiries about. One of the weak points of the business

Digitized by Google

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

Who's On Top?

Does some other dealer in your town sell more JAP-A-LAC than you? Do you consider *any* dealer your superior? Don't you think you can sell as much JAP-A-LAC as any other man?

Think this over during your noon hour, carefully. It may mean a good many dollars to you. If some other dealer is selling more JAP-A-LAC isn't it because he gives it more attention?

You want to do big things, you want to do things in a big way; to do big things you must have big plans. Try to estimate just what commodity offers you the opportunity of becoming the largest and best dealer in your community. You may be in that position now, if you are, we can suggest a way to become still larger.

JAP-A-LAC has discarded its swaddling-clothes. It is full-grown and healthy. It is, by far, the biggest thing a paint dealer can possibly take hold of. Stop and think! It is absolutely the only article in your stock which is advertised extensively. Is this not true?

We mean by this that it has $200,000 advertising back of it, and we propose to spend a small fortune the coming season in still further promoting its sale. JAP-A-LAC has proven itself; it has grown through six years of continuous advertising to a permanent advertised success. An advertised article bears a closer scrutiny from the public than an unadvertised one. A commodity that is advertised must be absolutely as good or better than anything of the kind made. If it is not as good or better, it can never be an advertised success. JAP-A-LAC is a success, and we want you to realize just what profit there is in it for you to properly handle JAP-A-LAC.

You cannot afford to put JAP-A-LAC on the back shelves of your store; it should be kept in front. We have thousands of women whom we have convinced that they want JAP-A-LAC. There are a great many right in your neighborhood. We would suggest that you try the experiment of pushing JAP-A-LAC to the limit for just one week. Instruct all of your clerks to sell as much JAP-A-LAC as they can. Explain to your customers how it can be used, and place JAP-A-LAC where the passersby on the street can see it, then Saturday night count up your JAP-A-LAC money and see if it does not pay you to give heed to something which offers splendid profits to you.

PUSH JAP-A-LAC

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

641 ROCKEFELLER BUILDING, CLEVELAND, OHIO.

arrangement of the average ironmonger in Great Britain is his want of office routine generally brought about by an inefficient clerical staff; in fact, until quite recently the English ironmonger was his own bookkeeper, and typists and lady clerks are even now somewhat of a rarity in the establishments of small ironmongers. Progress in the office department is badly needed and much valuable time is lost by the principal attempting to carry out too much of the small details of business routine, and, consequently, neglecting the more important part of the shop management, leaving himself but little time to think out schemes of business advancement and trade development.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 4, 1905.

393,881. CHISEL GAGE. Aaron T. Binkerd, Alleghany, Pa.
393,931. WASHING MACHINE. Samuel T. Smith, Truckee, Cal.
393,957. WASHING MACHINE. Erasmus W. Allen, Seneca, Kans.
394,025. LANTERN. Frank R. Smith and Addison P. Smith, Houlten, Me.
394,058. WAFFLE IRON. Ebenezer Christie, St. Louis, Mo.
394,123. CAN OPENER. George W. Lyons, Watertown, N. Y.

PATENTS ISSUED DECEMBER 5, 1905.

806,106. SASH HOLDER. Sanford D. Case, Brooklyn, N. Y.
806,165. BOLT CLIPPER. Arthur L. Moore, Springfield, Mass.
806,327. WRENCH. Henry F. Dickinson, Lafayette, Colo.
806,425. WRENCH. Robert McMillen, Pittsburg, Pa.
806,497. WRENCH. John W. Rehling, Alleghany, Pa.
806,547. CAMP STOOL AND LIKE SEAT. Thomas Lees, Girvan, Scotland.
806,646. GRATER. William J. Curry, Toronto, Canada.
806,680. COMBINED WASHTUB AND WASHBOARD. Frank X. Kottmeyer, Louisville, Ky.
806,701. WRENCH. Theodore McMaster, New York, N. Y.
806,703. WRENCH. Robert Nolen and Wm. B. Knight, St. Louis, Mo.
806,704. WRENCH. William P. Roelkrag, Bayonne, N. J.

PATENTS EXPIRED DECEMBER 11, 1905.

394,222 SAW. Franklin Stephens, Vineland, N. J.
394,236. WINDOW SCREEN. George Willard and Lewis T. Wilson, Pasadena, Cal.
394,253. SHUTTER BOWER. Joshua A. Dill, Frederick, Md.
394,411 BENCH PLANE. William Stevenson, Douglas Flat, Stockton. Cal.
394,427. LATCH. Edward S. Winchester, Boston, Mass.
394,428. REVERSIBLE LATCH. Joseph H. Woolaston, New Haven, Conn.
394,492. STEP LADDER. Benjamin F. Johnson, Waverly, N. Y.

PATENTS ISSUED DECEMBER 12, 1905.

806,775. LOCK MECHANISM. Chas. J. Caley, New Britain, Conn.
806,776. LOCK AND LATCH OPERATING MECHANISM. Charles J. Caley, New Britain, Conn.
806,815. WRENCH. Emil R. Klemm, Chicago, Ill.
806,854. KNOB FOR LOCKS AND LATCHES. Henry G. Voight, New Britain, Conn.
806,882. DOOR HANGER. Henry L. Ferris, Harvard, Ill.
806,915. STEP LADDER. Melancthon W. Reed, Marion, Ind.
806,944. SUPPORT FOR CORNICE OR CURTAIN HOLDERS. Per Wendelus and Erik Mattsson, Stockholm, Sweden.
806,989. GARMENT HOOK. Thomas F. Nightingale, Boston, Mass
807,075. ROLLING PIN. Morton Harloe, Hawley, Pa.
807,143. FILE.—Alexis Vernaz, Yverdon, Switzerland.
807,166. TOOL HOLDER AND TOOL. Charles W. Grant, Derby, Conn.
807,209. WRENCH. James H. Shepherd, Idaho Springs, Colo
807,396. WRENCH. Henry L. Newton, Butte, Mont.
807,397. PIPE WRENCH. Henry L. Newton, Butte, Mont.

The sufficiency of my merit is to know that my merit is not sufficient.—*St. Augustine.*

REVIEW OF THE MARKETS.

WIRE NAILS: There has been unusual demand for Wire Nails during the past fortnight, the evident belief being that they were at the lowest point for the next three months anyway. Consumption has been equally as good and prices have been well sustained. Mills have been flushed with orders and the rule is adhered to of the non-accepting of orders for shipment at a later date than 60 days from date of ordering. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, sixty days or 2 per cent. discount for cash in ten days. Car loads to jobbers, $1.80; car loads to retailers, $1.85.

New York.—The demand for small lots of Nails from store has been large during this month, the open season enjoyed by all mechanics enabling work to be continued to a later date than usual. The market is firm and the price for small lots from store was well maintained at a basis of $2.05.

CUT NAILS have been in good request and it was noticed that the mills endeavoring to have the production meet the demand made no excess that would affect the market. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.70 base; for less than carload lots, $1.75. For carload lots on dock New York, $1.85; for less than carload lot, $1.90. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—Trade in the Cut Nail market is moderate. Small lots from store are generally quoted at $1.95 base.

BARB WIRE: While it is anticipated there will be a large increase of orders in the immediate future, the mills find most of their business to-day in filling specifications on orders already booked. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The same conditions prevail in this market as noted in that of Barb Wire. There is a limited amount of new business, the shipments being made on orders already in hand and partly filled. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days. Jobbers in car load lots $1.65. Retailers in car load lots, $1.70. The foregoing prices are for base numbers 6 to 9. Other numbers, plain and galvanized wire, take the usual advances.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12½
B Quality Manila	11½
Pure Sisal, 7-16 and larger	9½
No. 2 Sisal, 7-16 and larger	8

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....39 cents per gallon.
In lots of 5 barrels or more.....38 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil.....62 cents per gallon.

THE DAVENPORT TRADE.

The stimulating effect of advancing prices is shown in larger and more frequent orders, and trade in general Hardware, especially in seasonable and sporting goods, is much better than a year ago. Weather continues clear, cool and pleasant; country roads are as hard as the hearts of monopoly managers, and as smooth as the voice of some life insurance solicitor; hence, farmers are marketing their produce at prices that fill their souls with joy and their wagons with good things to take home to their families. Poultry prices are too high for a Hardware pedler to reach; it takes the profit on sixty kegs of nails to buy one turkey.

SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

December is keeping up the year's record with a very satisfactory volume of trade and it looks as if 1905 would be a record breaker in many ways. The demand for Winter goods has been somewhat delayed owing to the unusually mild weather and yet we are surprised to see what a quantity of Snow Shovels has been sold. The cold weather of last year cleaned out the Retailers' stocks so low that they have been obliged to anticipate their wants for this season and the present Winter is still so young that there is a fair prospect of stocks being similarly closed out this season. The most obvious fact of the present market is its strength as prices in most lines are very firm and advancing from day to day. Copper goods especially have scored very marked advances and higher prices are freely predicted. These advances are by no means confined to Copper and Brass but almost all Hardware is being marked up in price and there seems to be every indication that these advances will be well maintained for at least the first six months of 1906 and perhaps much longer. The general outlook apparently assures a good trade and preparations are now being made to handle an unusually large volume of business in 1906.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

With three to five stores in the same place selling the same brands of goods one of them may cut a price to secure custom, which results in loss to all. As a relief from this, special brands were introduced, and this has greatly modified such evils. This applies to jobbers and retailers alike. If special brands were inferior in quality, neither jobbers or retailers would want them. The introduction of special brands has resulted in improvement in style and quality, as both jobbers and retailers have given special attention to make such improvements. The most careful attention is given to the quality of any article which is to be identified with the firm name, and with all good houses their special brand is a recommendation of quality. Wildcat brands not identified by any responsible names have discredited special brands. If inferior goods are sent out with manufacturers or jobbers brands the sale will be short lived. There is no more sure road to defeat than dealing in goods of inferior quality. Whoever handles the highest grade of goods that can be marketed is on the way to success, because he identifies himself with quality. The tendency is toward better things rather than cheaper. A poor tool is dear at any price. An inferior machine in place of a good one is an imposition and fraud. Poor binding twine in the harvest field causes expensive delay at a critical time and endangers the crop. Even a poor fork handle may seriously interfere with important work. Every article for use should be capable for its place and every merchant should regard it as his business to protect his customers from fraud. The local merchant in every community who stands for this will make it a poor place for transient peddlers and fakirs. Selling a poor article hurts the reputation while selling a good one is a recommendation for the seller. A fair deal benefits both seller and buyer The people are able to pay for the best goods and they want them. The passion for cheapness has cheapened the seller, as well as the article sold, and makes the purchaser feel cheap when he finds he was sold, with the article.

LOCKWOOD-TAYLOR HARDWARE CO.

THE ST. PAUL TRADE.

"At this time make new resolutions" is what an old almanac stated, opposite the date of January 1st While we hope and expect that all men and women live every day in such a manner that new resolutions are unnecessary, still it is well to stop and think, on the first of the year, how we can improve ourselves and our financial condition. It should be our aim to always treat our fellow-man in such a way that we have no regrets, when the day is over; if we faithfully do this, then New Years resolutions are uncalled for. The past year has been one of prosperity in all lines. No man able and willing to work, need be without. The value of merchandise, real estate, bonds and stocks has increased. The crops of last year were greater than an average, so the Lord has blessed us beyond our expectations—for this let us be thankful. We should think of the future and so look 1906 in the face and ask, what have you in store for me? Observers of the times agree that never were the conditions better to insure continued prosperity. Prices are firm with an occasional advance. The large interests have already sold in advance much of the possible

output of iron and steel. Last year the increase in Minnesota mines was 50 per cent. greater than in 1904—a total of 34,000,000 tons against 21,000,000 in 1904, and it has been consumed. This is surely a positive proof of what our country is doing, but remember that 1904 was a phenomenal year, and yet we increased one-half. Competition has been called the life of trade. Once in a while we think it too lively, but do not get discouraged. We read that hundreds of years ago the people had their troubles and we must expect ours. We can be glad that we live in this United States and nowhere else. This is the greatest and best country in the world. Our ambition is only stopped by our ability. We can all reach the highest of everything, if we have the power within us. We believe in merchants in small towns and villages combining against outside competition. Where a man sends his money away from his home town to buy his goods, he should be made to feel it by being refused credit, when he has no money. He should be told to sell his produce or labor to these same people from whom he buys his goods. If he is not loyal to his town and its merchants, they need not help to support him. We know that the home merchant can sell equal qualities of goods at same prices as any other city. This must sometimes be proven to certain people, but it can and should be done, as each community should in a sense live within itself. Altogether the prospects for this year of 1906 could not be better.

HACKETT, WALTHER, GATES HARDWARE CO.

THE SAN FRANCISCO TRADE.

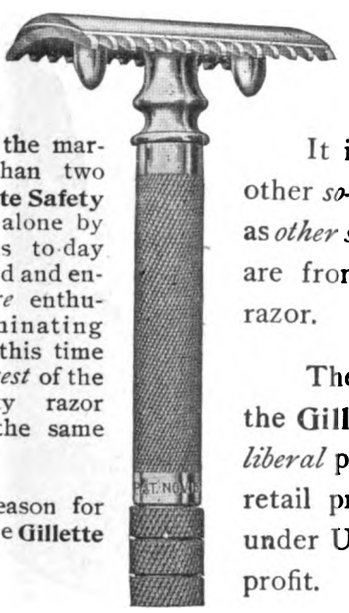
It is now the middle of December and the winter lull in trade which usually makes its appearance about the last of November has not yet arrived. As has been said before conditions on this coast at the moment are largely hinging on the weather. While the recent rains have enabled the plows to start in many localities, the current cool nights and frosty mornings have kept green feed and other vegetation back, and the general desire now is for more rains and softer weather; otherwise conditions are fully as promising as at any time during the past six or eight years.

Now that the time is rapidly approaching when the retail Hardwaremen of the State will be here in convention the question of holding a Hardware Fair at the time is being discussed. President Bennett of the California State Retail Hardware Association is heartily in favor of it. The scheme he says "would be a profitable one for the wholesaler, who would be able to get the attention of the retailer and exhibit his wares with little expense and a possibility of future profit. This would also be an interesting feature of the convention from the retailer's standpoint, and it would be an incentive for the retailer to attend the convention. It could be arranged to have an industrial fair on a small scale, and one night could be opened to the public who are interested in Hardware," and, continued President Bennett, "I should be in favor of inviting the architects, contractors and carpenters to visit the fair and inspect the exhibits."

This item contemplates a different type of brotherly fellowship than the one next following implies: Over the bay in Oakland the Hardware Association members are members of the Merchants' Exchange, and this organization decided this week to assist the local labor unions in raising funds to entertain the State Federation of Labor when that organization holds its annual meeting there the first week of next month. The Merchants' Exchange adopted resolutions declaring itself in favor of the convention and directed its committee to aid the committee of the Unions in raising funds."

F. B. Dickson, traveling man and organizer for the California Retail Hardware Association, speaks for the good of the order in this way: "It is certainly surprising to see so much selfishness and shortsightedness among many Hardware merchants of the State. There are some, and no small number at that, who have that amount of selfishness in their dispositions that they are jealous if the competitor across the street gets any trade at all, and many have gone to the extreme of slashing prices, injuring himself in order to keep the other from doing business at a profit. Is it not time for association work? Is it not time for unions and general meetings to talk over matters with the man across the street? What is this all leading to, if not loss of trade, loss of money and loss of self-interest?"

All the principal Hardwaremen of San Francisco are members of the Merchants' Exchange of San Francisco, and two days ago this organization received from President Roosevelt an autograph letter relating to China, the exclusion laws and boycott. It was a responsive letter to one the President had received from the Exchange. Concerning the Chinese boycott of American goods and also the exclusion laws the President expressed himself by writing that this Government must do justice as well as exact justice, and that Chinese laborers should be excluded, but that the exempt classes of Chinese should be treated courteously. If the exclusion laws need to be amended the American merchants, he says, must exercise their influence for amendment through their "own representatives in the Senate and House, by way of making such changes in the exclusion law as to prevent the injustice and humiliation to which the Chinese who do not belong to the coolie class have been subjected in coming to this country. If you and all the other American merchants who are injured by the boycott will urge upon your representatives in Congress to do away with the cause of the boycott, you will probably succeed." The President adds that the immigration department has acted with utmost harshness toward the Chinese, the fault resting ultimately with mistaken public opinion.



The Merchants' Exchange speedily called a general meeting and gave prompt asquiescence to the President's views by adopting resolutions favoring such amendments to the exclusion laws as would cause them to conform to what the Chief Executive deemed right and just. INDUSTRIAL PRESS ASSOCIATION.

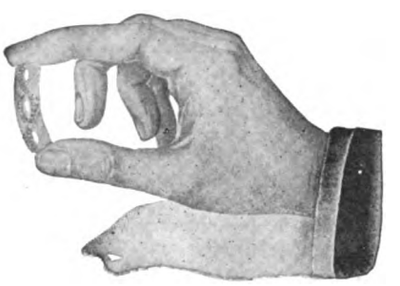
The Gillette Safety Razor--

Has the FIRST, and only NEW idea in RAZOR BLADES for OVER FOUR HUNDRED YEARS



Exact Size Complete Razor.

Although on the market for less than two years, the **Gillette Safety Razor,** judging alone by actual sales, is to-day used, appreciated and endorsed by *more* enthusiastic, discriminating shavers during this time than *all* of *the rest* of the so-called safety razor purchasers in the same period.

There is a reason for the success of the Gillette Safety Razor.

It is as *different* from other *so-called* safety razors as *other so-called* safety razors are from the old-fashioned razor.

The dealer who handles the **Gillette Razor** makes *liberal* profits, for the fixed retail price of $5.00 for a set *is*, and *will* be *maintained* under U. S. Patent laws, thus assuring every dealer a full profit.

The blades are as thin as paper, as hard as flint, as tough and flexible as whalebone.

The Gillette Safety Razor is made by *automatic machinery insuring perfection* and *uniformity* in every detail and a never varying quality which is so often found in the old-fashioned hand-make razors and blades.

The Gillette's Advantages

Our manufacturing facilities have been increased recently to meet the enormous and growing demand for the **Gillette Razor,** and this demand proves that it will certainly pay YOU to investigate at once the many advantages that are now offered in handling this phenomenal shaving device which is the talk of the civilized world.

Remember -- The Gillette while having *many imitations*, has no direct competitor, *is in a class by itself*, is here to stay, and its patents will be fully protected and all infringements on its rights will be prosecuted.

TWELVE BLADES.

TWENTY-FOUR SHARP EDGES

A Paying Proposition

No shaving proposition to-day offers you the inducements that the Gillette does.

Write to-day for further particulars and do not allow yourself to be persuaded to do otherwise by other *so-called* safety razors that have been put on the market, due solely to the phenomenal success of the **Gillette Safety Razor.**

Gillette Sales Co., **1104 TIMES BUILDING, BROADWAY, NEW YORK CITY.**

Digitized by Google

Are You A Gillette Safety Razor Dealer?

Then you will receive the benefit of the enormous advertising plans that are now being worked out, embracing Magazine publicity, Signboards, extensive catalog distribution, and in fact, *every known* and *up-to-date* method in the science of advertising.

By our publicity methods we are interesting and appealing to *millions* of shavers *every* month.

We are *spending more money* in *making known* the unique advantages of the **Gillette Safety Razor** than is being spent by all the combined, *so-called* safety razor manufacturers in the country, which benefits every Gillette dealer.

That this advertising is producing the desired results is a fact which we will prove to every **Gillette** dealer to his entire satisfaction.

If you are not selling the GILLETTE SAFETY RAZOR, Get into line, for once in it, means you are there to stay.

The "Gillette" cannot be put together in any way but the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see **Gillette** advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us, has resulted in your name not being on our list of dealers.

ADDRESS TO DAY.

Gillette Sales Company,

1104 TIMES BUILDING BROADWAY, NEW YORK CITY.

PITTSBURG'S FIRST AXES AND SHOVELS.

The name of Pittsburgh is and always will be associated with the production of iron and steel and the articles that are made from these products. It may be said with propriety that the introduction of the business in the United States had its incipiency there, but along with those others to whom the credit of the business belongs the names of the pioneers in this business are seldom mentioned, for they were pioneers and served only to pave the way for the substantial men who builded upon the foundation that they laid.

This fact is gathered, says the *Iron and Machinery World,* from the manuscript of a biography written by Oren Waters in 1866, which has just come to light, in which he recounts the preiod of his active carreer from the time of his arrival in the vicinity of Pittsburg and his life while he lived in that city from the year 1824 to the date of the manuscript. He moved to Pittsburg June 8, 1824, and entered into partnership with his brother in the manufacture of axes and shovels.

The shovel business did not pay well; there was little demand for the product. The price of iron was high and there was no money in the country. At one time it was possible to exchange one coal shovel for a barrel of flour or 100 bushels of coal. Handles for the shovels had to be hauled from Philadelphia by wagon and were very expensive. It was this circumstance that led us into the manufacture of other articles and we added axes to the list.

These were the first axes that were manufactured in the city of Pittsburg. All the work was done by hand, and it was considered a good day's work if two hands were able to forge six axes, and even at this the axes were not polished and were sold as they came from the forge.

The biography then goes on to state that the business was improved by the introduction of a grindstone and polishing arrangement, the addition of the manufacture of picks, shovels, mattocks and "scoops" to be drawn by oxen, for the purpose of excavating the Pennsylvania canal.

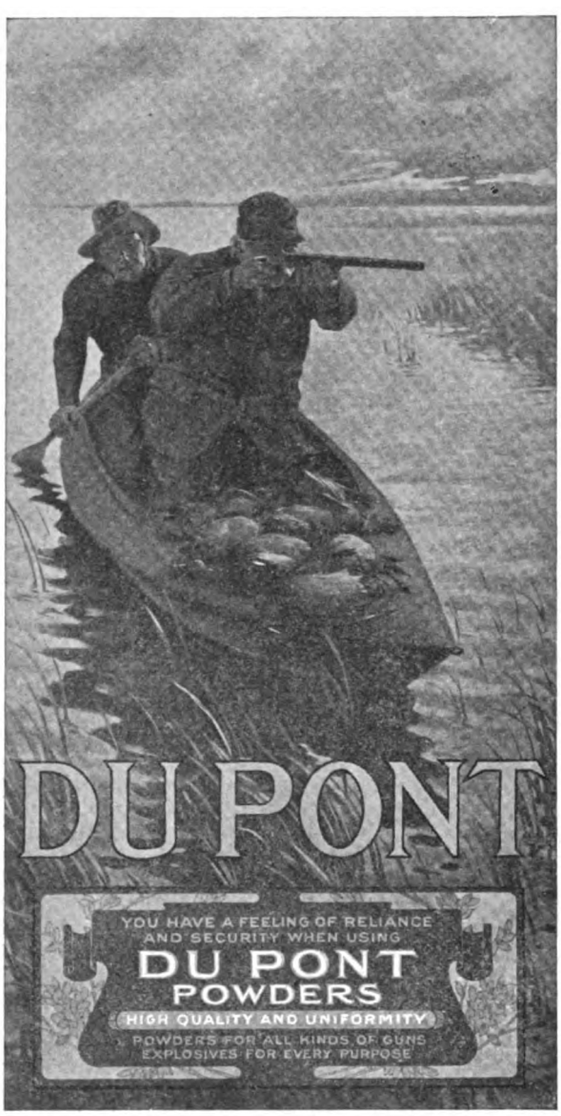
It was here that the "furnace fire" and the modern method of forging was originated and is described by Mr. Water as follows:

"It consisted of a brick wall being built up forming a square of about 3x4 feet and three feet high. The inside of the wall being filled up with earth about two feet and on top of this earth was set what is called an air chest or box. It is made of sheet iron bent around and riveted together, forming a box about 12x15, or 18 inches square and 12 inches depth, being open at the top. A set of grate bars was then made of small bars of iron strongly riveted at each end to plates of iron, thus forming a grating of the right size to completely cover the air box.

"This grating being laid on the box, the space on each side of the box was now filled up with brick and clay to keep it secure in its place, leaving the ends open, for the purpose of introducing the wind into one and cleaning out the ashes at the other. And now walls are built around this grating with fire brick, forming a furnace with a small opening at each end to shove in the coke for the fire and one at each side to put in and out the axe. The top of this furnace being covered over with fire brick.

"I have been thus particular in describing this fixture, not to give information about its structure, because every mechanic acquainted with the working of iron at the present date knows all about it, but because it was the first fire on that principle ever built in Pittsburg, and from that small beginning has come into general use. But a more important part has yet to be told connected with this.

"You will see at once that all this fixture will be of no use without air or wind to fill the air chest. Well, the plan we started out on at that time was to set two pair of common-size bellows side by side with the pipes of each centering into the air chest. And the chest, sufficient to keep up a lively fire and take a good heat. So that the whole fixed together was a decided improvement in the way of making axes. After some few months working in this way I thought that it would be better to use steam power to blow the bellows and dispense with the two men.



"Accordingly by the means of cranks and long rod of iron the power was carried from the engine to the bellows, consequently saving the labor of two men. This way of forging axes was continued about six years without any improvement, though in consequence of Eastern axes being sent there, some short time after, we had to pay more attention to the finishing part, the grinding and the polishing became more important. I have been particular in speaking of axes, not from their importance to us at that time, but from its being the introduction of the business in Pittsburg and the manner of making them.

"Our shovel business was of more importance to us than the axes, besides we went considerably into the making of hoes and knives for cutting straw. But little improvements, however, were made in the shovel department. Some little attempts were made at grinding some of them and of grinding the straps into their flat state before the handle was put in, but this was of but little account."

The great fire of 1845 completely wiped out the business and rendered them almost bankrupt, and soon after an epidemic of cholera swept over the city and Asa Water died with the disease, but the brother continued in the business, starting up at Lawrenceville. Here he added one of the greatest improvements known to the business, the tilt hammer. Of this he says: "Hitherto our shovels had been a very poor article, but little better than sheet iron shovels. I had long felt anxious to make some improvement in them, accordingly I got up a tilt hammer and sledge for planishing the plates after they were rolled, thereby smoothing and stiffening them. This was the first hammer of the kind ever gotten up in Pittsburg, and the forerunner of the many tilt hammers now in use for the various pruposes of working iron and steel. In addition to the hammer we introduced the plan of pressing the shovels into shape. This we did by means of a screw press, having dies made of cast iron of proper size and shape for the different sizes of shovels we made. The drop press has been introduced since, and, I believe, is in general use now.

CALENDAR OF THE E. I. DU PONT CO.

A calendar of artistic importance is distributed this year exploiting the products of the E. I. Du Pont Company, Wilmington, Delaware. We present herewith a half-tone showing the characteristic scene which it seeks to impress upon the vision. It is lithographed in a number of colors and the company state that to obtain it, it will be necessary to send them the name of the brand of powder that is used by the individual, requesting it, accompanied by ten cents in coin or stamps. It is important that the full name and street address be given.

THE SUGGESTION SYSTEM AND WHAT IT HAS ACCOMPLISHED.

How to get the benefit of your employes' brains as well as the output of their hands is the problem which has been solved by the National Cash Register Company at its factory in Dayton, O.

The means of solving the problem is the "suggestion system," which has in recent years been adopted to a greater or less extent in other factories.

The scheme of securing suggestions from employes has been carried out to a very complete extent at the N. C. R. factory, and arrangements have been made by which any suggestion from any member of the organization is easily and quickly brought to the attention of the authorities. The employes have taken hold with marked enthusiasm, and each year thousands of suggestions are received. For handling these and all complaints as well, a department of complaints and suggestions has been organized. A head, an assistant head, and several stenographers and clerks are kept busy receiving, recording and investigating these suggestions and complaints which are made.

Any employe desiring to make a suggestion for the betterment of the tools, methods or output in his own or another department, writes it out on a piece of paper and drops it into a suggestion box; or, if he prefers, he writes it out on a manifolding autographic register. In all cases the employe signs his name to a suggestion, and also the name of the department in which he is employed. The suggestion boxes and autographic registers are distributed in all departments, and suggestions are collected from them twice a week by a representative of the Suggestion and Complaint Committee. Upon the receipt of a suggestion it is given a number, entered in a book provided for that purpose. The secretary of the committee then refers it to the head of the department to which the maker of the suggestion belongs, or to the party most directly interested, not disclosing the name of the suggester. It frequently happens that the suggestion concerns more than one department, in which case it is investigated through all of the departments and its bearing on each considered. The original suggestion is never sent with the correspondence during the investigation, but it is retained in the office of the committee and a copy is made for investigation purposes, or the subject matter is embodied in the correspondence.

If, upon investigation, the suggestion proves practicable, it is put into effect and the originator is notified by letter, which authorizes him to receive one dollar from the cashier in payment for the suggestion. If, on the other hand the suggestion is rejected, the author is duly notified.

Where possible the reasons for rejection are given and in either case the suggester is encouraged to try again. At the end of each quarter the best suggestions are selected from those adopted during the three months past, and forty-four quarterly prizes are awarded. The amounts of these prizes vary from time to time. At present the value of the quarterly prizes is $750. Twenty-five prizes aggregating $450 are offered to the employes in making the division. Twelve prizes aggregating $200 are offered to the employes in the office division and seven prizes aggregating $100 are offered to the members of the selling force. The prizes in both the making division and the office include a first and a second prize for foremen, heads of departments and assistants. They are eligible to compete for these prizes only.

The value of the "suggestion system" as carried out in the N. C. R. plant has been demonstrated again and again. The operation of the system involves a large expenditure of money, and the Company paid out in prizes from 1899 to 1904, inclusive, the sum of $12,897. Besides there is the cost of the maintenance of the Complaint and Suggestion Department. In spite of this large outlay, however, the Company has found the suggestion system one of its best paying investments. Suggestions are being made continually which result in the cutting down of expenses or doing away with needless labor and the constant improvement of the factory's output.

A few examples of the suggestions may prove interesting. In the Indicator Department, where are printed the metal parts of the register which indicate the amount of the transaction recorded, it had been the practice for years to mix a certain kind of ink by stirring them in a bucket, then straining through a cloth. One of the women employes thinking this could be done better and more economically by machine, devised an apparatus, drew the plans and turned them over to the Company. As a result the ink is now quickly and cheaply strained by a machine.

In this same department it was formerly the practice to paste on the indicators paper letters and figures, which were then varnished over. One of the girls suggested that these characters be printed. The suggestion was found practicable and the work is now being done by printing presses, with a great saving of time and labor.

Throughout the factory departments, machinists and helpers and men of all ranks are constantly devising improvements in little parts of the registers, doing away with a needless lot of machine work; punching a hole instead of drilling it, inventing new parts to simplify the mechanism and improving the machines.

In the Typewriting Department the girls are constantly suggesting ways of saving time and labor, and in the office divisions new schemes for counting and recording are constantly being worked out. As one specific instance of how great a saving one suggestion made, it might be well to cite a suggestion recently made by which the expense of supplies for a certain kind of register is reduced nine cents per machine. This means a saving of $1,200 a year at the present time.

The pecuniary value to the company is not the only valuable result of the system. Under its encouragement the employes are taught to think for themselves and become more efficient workers. At the same time the man or woman who has originality is brought to the attention of the management, and in this way is placed in direct line for promotion. The suggestion system has proved an unqualified success at the N. C. R. factory. Its enthusiastic adoption at other plants has been a sincere demonstration as to its value.

THE INVENTOR AND THE BUSINESS MAN.

The combination of the inventor and the business man exists in larger numbers than is generally known. The existence of this condition is due to the fact that the productions of such a combination are perfected and take their place in the market with less of the argument and discussion than is needed where the inventor must bring his ideas to the attention of the business man, who is slow to adopt something that will cost to develop and place on the market. Many business men, says the *Metal Worker*, have just as much enterprise in seeking for new things to attract the buyer as the inventor. They have the advantage, after demonstrating whether or not their new ideas and productions are based on sound principles and would be of practical operation, of knowing whether or not they have the all important commercial value which would warrant the expenditure of marketing them. The inventor, unfortunately, in far too many cases, becomes so inbued with his idea that he is convinced of the value of the completed article; usually he does not possess the commercial sympathy which would tell him in the face of competition and when compared in price with articles in common use his excellent articles have nothing to recommend them to the buyer, who brings a cold business judgment to bear on whatever is brought to his consideration.

Invention is not governed by any monopoly and often the inventor is disgusted that he is not accorded a more genial reception. If he knew, however, that a number of other inventors in different sections had brought out the same idea, that the merits of the case had already been investigated a number of times and that unsuccessful efforts had been made to learn some method of making the invention not only practical but of commercial value he would have more regard for the business man who has little time to give more than a hearing to the first explanation of what the inventor has to offer. The inventor often enters the lists then as a competitor to manufacture and sell his device. Here is a field in which he may be a novice, and even if he is a successful business man in some other line he must of necessity learn the conditions and customs in the line in which he aims to become identified. Here is where many excellent devices have failed to bring in a return equal to the outlay expended upon them and the inventor suffers a loss, for the very reason business men failed to take up with his invention. In the actual test of competition the device is rejected by the buyer. Even when a successful device is invented it is one thing to manufacture it and another thing to sell it. To manufacture profitably, means a clear knowledge of the best methods, processes and equipment and a competent use of them. To sell requires a different kind of talent still, and the importance of the selling organization is not infrequently overlooked, with a resulting disadvantage to the enterprise. The inventor frequently has occasion for his complaint that his invention does not receive proper consideration, but probably as often he receives as much courtesy as the merits of his invention justify.

✤

NEW YORK ROLL WRAPPING PAPER CO., 536 Pearl St., New York, N. Y., have sent us an envelope sized pamphlet, describing and illustrating the "Hopking" Roll Paper Holder and Cutter. They state in presenting their catalogue: "We introduced some years ago the original Paper Holder and Cutter, the Hopking Patent. It has always maintained its precedence; with the improvement in manufacturing facilities incidental to the growth of the business, cost has been lessened and the machine at the same time improves, retaining, however, the original operating principle of the Hopking Patent, the spring by which the knife is always in place, following the roll to the end and doing its work effectively. It is the best cutter manufactured, is low-priced, well and strongly made." Send for catalogue.

Hamilton Rifles

Have a name for absolute safety, accuracy and strength of shooting.

MODEL No. 23 is of the **Bolt Action** type. It is unique. Combines greatest strength with least weight.

"Take Down"

Chambered for .22 Caliber Short or long Rim Fire Cartridges

Prices:
Model 23, $3.00
Model 19, $2.00
Model 15, $1.50

Our Guarantee

protects you against any imperfection in any Hamilton Rifle. Let's put you next to our proposition. Write to-day.

HAMILTON RIFLE CO., Plymouth, Mich.

LANDLORD AND TENANT.

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

No. 8. HOLDING UNDER AN INVALID LEASE, AND HOLDING OVER.

Where the lease attempted to be made is invalid, neither the landlord nor the tenant has any right under it, and it is as if it were never written, so long as the tenant has not taken posession under it. Neither party can go into court and enforce any of its terms.

However, if the tenant has come into possession of the premises under the invalid lease, it will govern the rights of the parties in some particulars, though not in all. For instance, a verbal lease for five years would be invalid, and neither the landlord nor the tenant could enforce its terms, unless the tenant has gone into possession under it. If, however, the tenant has gone into possession under it, the terms of the lease will govern the rights and duties of the parties as to the amount of rent to be paid, the use to be made of the premises, the matter of making repairs, etc.; but the provision as to the length of the term, that is, five years, is of no effect. In such a case the tenancy becomes one from year to year.

There is a still further qualification to the general principle as laid down: If any of the provisions of the lease are inconsistant with a tenancy from year to year, such provisions will not stand. But where a written lease is executed on Sunday, and the lessee enters into possession on that day, the lease is absolutely void for all purposes, and reference cannot be had to the lease in determining the terms of the tenancy; so decided in a Wisconsin case.

A tenancy from year to year under an invalid lease, such as we have described, differs from an ordinary tenancy from year to year in this: It is the rule that where a tenancy is from year to year, the parties must give notice to quit, and the notice is almost universally fixed at six months before the end of the yearly term, unless the lease specifies otherwise; in other words, to end a tenancy from year to year that runs on indefinitely, notice must be given by one party to the other. But in the case of one holding possession under an invalid lease (which the law declares to be a tenancy from year to year notwithstanding its provisions for a stated term), the tenancy terminates at the end of the time fixed by an invalid agreement, *without* any notice to quit.

For instance, suppose I rent you property from year to year for an indefinite time. To terminate the tenancy, notice must be given six months before the end of one of the yearly periods. Now, suppose that I rent you property for five years on a verbal lease. A verbal lease for five years is invalid. But suppose you have taken possession under that invalid lease. The law says that you are a tenant from year to year; but in this case, if you are allowed to remain for five years, it is not necessary that a notice be given six months before the end of the five years in order that the tenancy from year to year terminate then.

In one case a person who cultivated a farm on shares, under a verbal agreement, which was void under the statute, to cultivate it three years more on shares. Even though the agreement itself was invalid for three years, the person making it having entered upon the premises, the Court held that a tenancy from year to year was established.

When a tenant remains in possession of leased premises after the expiration of the term stated in his lease, he is said to "hold over."

Where a tenant holds over, he is bound for another term at the option of the landlord. If the tenancy was from month to month, he is held for another month. If it is from year to year, or for an indefinite period, he is held for another year.

The question of when rent is payable does not fix the length of the term. Where the term was for a year with rent payable monthly, and the party holds on after the year has expired, he is held, not for another month, but for another year.

The right to determine whether a tenant may remain over for another period in case of holding over, belongs to the landlord.

A landlord may, by quietly submitting to the holding over, be taken as agreeing, as where he knows that the tenant is holding over and accepts rent after the term has expired. Once the landlord's consent, either directly or indirectly given, has created a new term, neither landlord nor tenant can thereafter refuse to recognized it as existing. The law fixes the tenant's liability for the holding over, independently of his intentions.

The mere fact that the tenant holds over is not of itself sufficient to make a tenancy from year to year. The landlord must in some way recognize the tenancy, by the acceptance of rent, or otherwise. In an Illinois case it was held that when a tenant held over in order to take possession of certain new premises of the landlord, he was only liable for the time he occupied.

In a New York case, the parties at the time the lease expired were negotiating for occupying another portion of the premises at a different rent. The Court held that the tenant could not be held for another year, if he vacated the premises, under these circumstances, in a reasonable time after the negotiations had failed.

The course open to the landlord in the case of a tenant's holding over and neglecting or refusing to give up possession, is to bring action for ejectment and damages.

The terms of the old lease, in case of a new term by holding over, govern during the new term.

If, when the lease is about to expire, the landlord notifies a tenant that in case he retains possession after the lease expires he will be bound to a new term at increased rent, or on different conditions than what were provided in the original lease, and the tenant actually holds over, the latter is bound for the new term at the increased rent and under the changed conditions.

Where a sub-tenant holds over, his holding over is taken in the law to be the holding over of the tenant himself, his act is taken to be the tenant's own act.

In one case where, at the end of the term, the landlord took possession, but went ahead and collected rent for a series of years from sub-tenants of the original lessee and applied the same towards the payment of the rent due on the original lease, claiming that the lessee's relation had been terminated, a court of equity restored the possession to the tenant, and compelled the landlord to execute a lease of the premises to the lessee on the same terms as the original lease, and to account to the lessee for rents collected from the sub-tenants.

It is a serious question that has given the courts much trouble, whether a sub-tenant's holdover against the will of the tenant should be construed as a holding over by the tenant himself. Cases are conflicting.

Penalties are imposed in some of the states by statute on tenants who hold over without permission; these statutes are so many and various that it would be impossible here to enumerate them.

A mere agreement to give a lease at a future date, does not create a tenancy, nor does it give the prospective tenant the right to possession. Yet, when the prospective tenant is permitted to go into possession under agreement for a lease, a tenancy is thereby created.

In determining what law governs in the matter of leases, it should be borne in mind that the law of the state in which the premises are situated, and not the state where the parties reside or make the contract, governs the rights and liabilities of the parties.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly

New Stores, Incorporations, Etc.

Auburn, N. Y.—T. M. Pomeroy & Co. has been incorporated to deal in Hardware. Capital, $25,000. Incorporators: T. M. Pomeroy, C. I. Avery, R. W. Pomeroy.

Banks, Ore.—The Willis Hardware & Implement Co. has opened up a store.

Buffalo, Kans.—The Buffalo Hardware & Furniture Co. has been incorporated with a capital stock of $10,000.

Englewood, N. J.—Ralph D. Sydecker Co. has been incorporated to deal in Hardware. Capital stock, $5,000; incorporators, Ralph D. Lydecker, Daniel G. Bogart, J. A. C. Johnson.

Ft. Dodge, La.—The Shephard Hardware Co., which recently purchased the stand of the Craft Hardware Co., has been incorporated with the following officers: President, W. A. Shephard; vice-president, F. J. Shephard.

Iuka, Kansas.—The Iuka Hardware Co. has been incorporated; capital, $10,000. Incorporators, W. O. Jackson, W. W. Harvey and others.

Los Angeles, Cal.—The Western Hardware and Arms Co. has been incorporated with the following directors: J. B. Wood, A. Wood, F. C. Richardson, F. I. Richardson and Clarence Wood. The capital stock is $100,000.

Pendleton, Ore.—W. W. Beadley is opening up a new Hardware store.

Portland, Ore.—Columbus Hardware Co. has been incorporated; capital stock, $50,000. The incorporators are John Smith, W. F. Pool and C. A. Jones.

Stamford, Texas.—The White Hardware Co. has been incorporated with a capital stock of $150,000.

Uehling, Neb.—J. J. Close is opening up a Hardware store.

Wayne, Neb.—O. Voget is opening up a Hardware store.

Whitney, Mo.—Packard Hardware Co. has been incorporated with $15,000 capital stock. The incorporators are L. V. Packard, G. M. Counts and W. Mc Mahon.

Changes and Improvements.

Ashland, Neb.—J. C. Wright has sold his Hardware business to McCartney Bros.

Beattie, Kan.—E. C. Potter has purchased the Hardware and implement business of Potter & Wuester.

Beattie, Kans.—Wm. Wuester has succeeded to the Hardware business of Potter & Wuester.

Bedford, Ia.— Martin & Stephens have been succeeded in the Hardware and furniture business by Stephens & Taylor.

Bloomfield, Neb.—H. Bayer has purchased the stock of Hardware, etc., of H. Blanchard.

Buffalo, Mo.—W. & H. P. Smithpater have purchased the business of the Buffalo Hardware Co.

Centreville, S. D.—Creighton & Son have succeeded to the Hardware business of Jackson & Creighton.

Clarksville, Tex.—F. F. Marable has purchased the business of the J. B. Barry Hardware Co.

Cravette, Ark.—C. E. Thomas has sold his Hardware business to J. T. Oswalt.

Elkhorn, Neb.—J. C. Seefus has purchased the Hardware store of E. A. Doyle.

Ewing, Neb.—Kay Brothers have sold their Hardware business to E. L. Davis.

Falls City, Neb.—J. C. Tanner has purchased the Hardware business of Alexander Mayer, and will take charge February 1.

Glasgow, Mo.—A. & B. Heying have succeeded Ben Heying in the Hardware business

Grafton, Neb.—J. E. Menzie has sold his Hardware store to Emil Kugel.

Hillsboro, Ore.—Mamkin & Wall have purchased the Hardware business of A. C. Archibald, in Hillsboro, Ore.

Hillyard, Wash.—J. M. Bunker has sold his Hardware store to N. B. Childs.

Homer, Neb.—Schuett & Schlepp have purchased the business of the Homer Hardware & Lumber Co.

Hooker, S. D.—E. J. Satter has succeeded to the entire Hardware business of Satter & Hanson.

Huntington Beach, Cal.—The Hardware business formerly owned by John Gillespie and later by V. E. Phelp, has now been taken over by the Huntington Beach Hardware Co., in which F. C. Spradling and V. E. Phelp are Stockholders.

Ida Grove, Ia.—C. F. Nelson has purchased the Hardware business of Wm. Colvin & Son.

Keley, Kans.—Hoyt & Green have sold out their stock of Hardware, etc., to Hang & Stueven.

Lebanon, Neb.—I. Overstake has succeeded to the Hardware and furniture business of Moore & Overstake.

Long Island, Kan.—Rhoades Bros. have purchased the Hardware and implement business of Joseph Weeks & Co.

Los Angeles, Cal.—F. A. Marcotte has sold his Hardware and Grocery business to J. L. Bond.

Macks Creek, Mo.—W. H. Searon has purchased the Hardware business of H. D. Bonner.

Malone, Tex.—Weeks & Tate have succeeded to the Hardware business of Weeks & Weeks.

Marceline, Mo.—Guy W. Bigger has been succeeded in business by Thomas Guy Bigger Hardware Co.

Massena, Ia.—W. H. Langworthy has purchased the Hardware and implement business of W. C. McCordy.

Milford, Tex.—The Jones Hardware Co. has sold its business to the Key-Adams Hardware Co.

Miles Station, Tex.—Calwell & Rogers have been succeeded in the Hardware and harness business by Voss & Rogers.

Mounds, I. T.—The Noel Hardware Co. has succeeded to the business of the Mounds Supply Co.

Plainview, Neb.—F. W. Ebinger has purchased the business of the Vrooman Hardware Co.

Okmulgee, I. T.—Price & Foraker have purchased the Hardware and implement business of Beckman & Galloway.

Pleasanton, Kan.—D. A. Crooker has sold his Hardware business to Robert Pierce.

Porter, I. T.—Sutton Bros. have sold their business to the Talley Hardware Co.

Prairie Mill, Mo.—L. E. McAdams has sold his Hardware and furniture business to Wright & Talkington.

Prague, Neb.—J. I. Plasak & Co. have sold their Hardware business to Broz Bros.

Pratte, S. D.—J. E. Taylor & Co. have succeeded to the business of the Taylor-Nelson Hardware Co.

Preston, Ida.—Fellows Bros. have succeeded to the Hardware business of Curtis & Fellows Bros.

Sedgwick, Colo.—I. H. Wallace has purchased the Hardware business of G. A. Waddington, in Sedgwick, Colo.

Scota, Neb.—Mrs. M. J. Wright has sold her business to the Brethauer Hardware Co.

Westboro, Mo.—Gordon & Uttwitz have been succeeded in the Hardware business by O. S. Uttwitz.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Boston, Mass.—Marston Stove Co. has been incorporated to deal in stoves, etc.; capital, $5,000. President, L. L. Flood, treasurer and clerk, H. E. Stowe.

Farmington, N. H.—Frank W. Coburn & Son are erecting a plant for the manufacture of knives.

Fitchburg, Mass.—Simonds File Co. has been incorporated to manufacture and deal in files, hack saws, etc.; capital $50,000. President, Daniel Simonds; treasurer A. E. Cully.

Millbury, Mass.—Benjamin O. Paine is erecting a shop for the manufacture of edge tools.

Marshalltown, Ia.—The Marshalltown Trowel Co. has been incorporated. Capital $30,000.

Momence, Ill.—The American Company, manufacturers of sewing machines, fishing reels, flatirons, etc., are erecting a factory. Capital stock, $25,000.

New Brunswick, N. J.—The Union Refrigerating Co., has been incorporated. Capital $100,000. The incorporators are clerks in the employ of Johnson & Johnson, of this city, and whose interests are back of the new enterprise, which is to take over the plant and patents of the New Brunswick Refrigerating Company.

New York, N. Y.—The Federation Hardware Tool Co., has been incorporated with $150,000 capital. Directors: G. G. Stephenson, D. J. Wagner, G. A. Clement.

New York, N. Y.—The Wolfsmouth Tool and Specialty Co. has been incorporated with $5,000 capital. Directors: F. R. Morse, F. C. Barney and Richard Moldenke.

North Milwaukee, Wis.—The N. & T. Avery Co., Limited, of Birmingham Eng., are erecting an immense factory for the manufacture of scales of every sort, and will endeavor to compete with the Fairbanks Co.

Samson, Ala.—The Samson Mfg. Co. has been incorporated to manufacture and sell sash doors blinds, etc. Capital stock, $12,000. The incorporators are J. J. Morris, W. B. Sellers, C. L. Gaulding, P. L. Gaulding, F. J. White, Mrs. Donie Manard and Mrs. Callie Shepherd.

Taunton, Mass.—Anthony & Cushman Tack Co. has been incorporated. Capital stock, $76,000. President and treasurer, R. Anthony; clerk, Alfred B. Hodges. These together with Jas. Y. Anthony are the directors.

Worcester, Mass.—The Unique Stove Co. has been incorporated; capital stock, $50,000. President, Eli Belisle; treasurer, Joseph G. Lamotte; clerk, John B. Lamotte.

Changes and Improvements.

Albion, N. Y.—The Standard Stamping Co. has been organized for the purpose of acquiring the property of the Standard Stamping Co., formerly of Buffalo, N. Y., and increasing the capital to take care of its expanding business.

Baltimore, Md.—The Enterprise Wire Works is erecting a new structure which will be one story and will measure 60x165 feet.

Brightwood, Mass.—The Baush machine tool company has started to build a 40 by 60 foot brick addition to its foundry. This is made necessary through the increase of the foundry business of the company. The addition will give greater capacity for the core department, and will not call for the employment of any more men. The cost of the increased building will be $5,000, but this will also cover the expense of a new electric traveling crane. The addition is to be completed within a month.

Chelsea, Mich.—The Glazier Stove Company is soon to erect a large three-story modern factory building for the manufacture of gasoline stoves and steel ranges. There will also be a new building which will be designated the Welfare department. This building will be given over entirely to the employes and will contain reading rooms, swimming pools, shower baths and a gymnasium.

Detroit, Mich.—The National Cutlery Co. is erecting a new building containing upwards of 40,000 square feet of floor space.

Detroit, Mich.—The National Twist Drill & Tool Co. has recently increased its capital stock from $40,000 to $75,000 for the purpose of placing new machinery in its plant.

Hartford, Conn.—Morris Cohn has sold to Sarah Cohn his interest in the Vienna Nut Company, with all stock, machinery and fixtures in factory.

New York, N. Y.—Sargent & Co. of Nos. 149-153 Leonard Street, have taken the street floor of what was the Hanan Building, on the northeast corner of Leonard and Centre Streets. By cutting through the rear wall of the latter building they have obtained a connected space fronting on Centre street, which, after May 1, next, will be doubled by obtaining possession of the adjoining floor.

Randall, Kan.—J. R. Parker has purchased the Hardware and implement business of Peery & Carroll.

Stephenville, Tex.—H. L. Snapp has purchased the Hardware stock of W. H. Frey.

Tillamook, Ore.—King & Mills, Hardware men, are erecting an addition 20 by 40 feet to their building.

Toledo, O.—The Ohio Steel Wheelbarrow company, having outgrown its present quarters will erect new factory buildings to take care of its rapidly expanding business. The deal has been closed by the company for the purchase of two acres of land on Nebraska avenue at the Lake Shore tracks, and the work of erecting the structures will begin immediately. One of the buildings will cover about 1½ acres. The company will spend in improvements about $20,000 and will about double their present force of 60 men. J. F. Zahm is the president of the concern, which has enjoyed unusual prosperity and has been rapidly expanding since its formation.

Villisca, Ia.—Smith & Sprague have succeeded to the Hardware and furniture business of Smith & McCormack.

Fires.

Berlin, N. H.—The manufacturing plant of the Marston Rake company, a one and one half story frame structure, which was burned about a year ago, was entirely destroyed by fire recently. The loss was $5,000, and the insurance on the place amounted to $3,200. It was owned jointly by Fremont Everest and Carl C. Sanders, who succeeded Henry Marston in its operation.

Roxbury, Mass.—The Tremont Mfg. Co was recently burned to the ground, causing a loss of about $30,000.

LOYALTY TO YOUR FIRM.

How often have you heard, in the social hour, a remark passed by some young person derogatory of the firm that employs him. "I work for that skin-flint company—Brown Bros. They're as hard on you as they can be. I believe they'd split a cent in two, rather than add it on to your salary."

And the crowd titters over the jesting judgment passed upon Brown Brothers by one of the young men who pretends to work for them.

We know not what salary the jester is receiving, but almost any sum is a little too high. Unless he has a clear understanding of his own situation with reference to the financial interests of the firm, he should refrain from passing any such kind of public judgment, and least of all when he is the only representative of his firm in the society.

The difference between the ten-dollar-a-week men and those whose salaries are double and trible is as much a question of loyalty as one of ability. The employee who goes to his daily work in a disgruntled way—the man who is always ready to say a mean word about his firm, should not expect a raise. No workman can do a good job for a master he hates.

If you don't like your job, get out. Quit dragging your feet around the office from pay day to pay day. Stop kicking at the harness; if you can't enjoy the pull with the rest of the tandem, drop out.

Be loyal to your firm; if you can't be, do find another firm. But first see if you are earning your salary. Figure out your actual worth in cents.

And don't think that loyalty is regulated by any eight-hour rule. Stand up for your firm when outside of the office. Work with your firm until you close up your desk and for your firm until you open up again.

Be loyal. No man can hope to command loyalty who has not first been loyal.—*The Business World.*

Hundreds of thousands of people still ride bicycles. The craze has passed, but the demand still exists. It is a steady, legitimate, growing demand; a demand for improved, well built, serviceable wheels; a demand best met with

Pierce Cycles

The rear wheel of all bicycles carries most of the weight of the rider. In the rigid frame, the jar and vibration due to irregular road surfaces are communicated to the body of the rider. In the Pierce Cycle the Cushion Frame absorbs this vibration and the rider is free from any inconvenience caused by roughness of the road. By examinining the Pierce catalogue, which is now ready for distribution to the trade, anyone will understand the value of the Pierce Cushion Frame construction.

The Pierce is the pioneer. Since 1897 it has been the choice of discriminating riders. Its Cushion Frame, Spring Fork and Coaster Brake are exclusive Pierce features. These, together with its high standard of mechanical construction, make the Pierce the best seller on the market. Arrange for an agency for 1906.

The George N. Pierce Company

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Buffalo, N. Y.—The Cleveland Cycle & Auto Company has been incorporated. Directors: James Mac Naughton, F. Louis Du Broy and M. D. Ashford.

Mt. Pleasant, Ia.—S. S. Case who recently sold his Hardware stock on the west side to L. H. Bailey and his two brothers, has opened up a gun repair shop in the building occupied for many years by W. S. Shepp.

Changes.

Elmira, N. Y.—The City Cycle & Auto Co. has sold out to the Elmira Arms Company.

Santa Rosa, Cal.—The Santa Rosa Cyclery has moved from Mendiceno Street to Fifth Street.

Fires.

Rochester, N. Y.—Fire in automobile and bicycle establishment of Thomas J. Northway did $1,000 worth of damage. It started in enameling oven on second floor of the three-story building, owned by Chauncy Woodworth estate. Automobiles were damaged by water. Materials and tools in repair shop on second and third floors damaged $200, fully covered by insurance. Fire burned through upper floors and damaged building $800.

Washington, D. C.—Fire in the three-story building occupied by Isaac Ketzer's automobile and bicycle store, caused $2,500 worth of damage to stock. The fire originated in the vulcanizing room of the repair shop and spread to two adjoining buildings.

Miscellaneous.

A machine is said to have been invented for manufacturing cotton bicycle tires. They are woven somewhat after the manner of making lampwicks—that is in an endless tube, except that the finished tire is much heavier and of a closer texture. They are said to resist a pressure of 6,000 pounds to the square inch.

✤

A nephew of the Emperor of China and the chief engineer to the Chinese Government are now in England making arrangements for the construction of a great military rifle factory in China.

✤

The Eclipse Machine Co. has almost ready for marketing a new Morrow coaster brake specially designed for use on chain-driven motorcycles. In disclosing the fact, Secretary Webster added that the company were now "going after" the motorcycle end of the business in real earnest, and that the new Morrow is such that it will be pretty hard for the business to get away from them.

✤

The municipal authorities of Paris have voted the sum of 40,000 francs for the equipment of additions to its cycle mounted police. When the additions are made Paris will have a full battalion of bicycle policemen—that is, one thousand men.

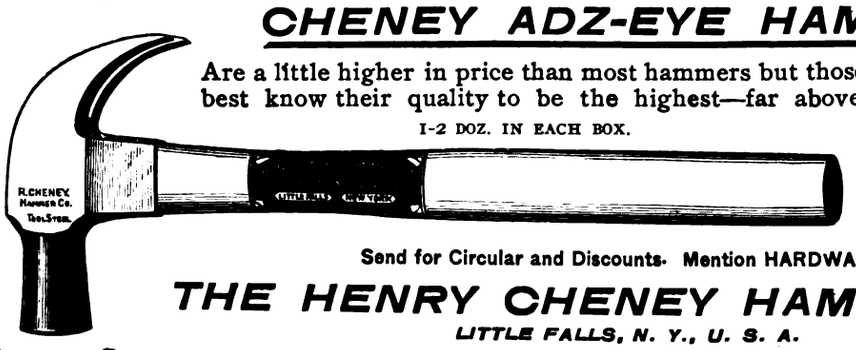
✤

The Union Fire Arms Co., of Toledo, is putting three new guns on the market this season. One is a single trigger, double barrel, hammerless shotgun, the trigger mechanism being the invention of C. F. Lefever. The second is a high grade double barrel, hammerless, built for durability and for close, hard shooting at long range. The third is a repeating shotgun, a very safe and strong gun, the breech mechanism being securely covered and permitting no escape of gas in firing in event of a broken primer or defective shell, and the shells are ejected to the side. The concern claims this gun contains at least seven fewer parts than any other gun on the market.

THE BUILDER'S DEBT TO ELECTRICITY.

There are few problems in daily life which attract as much attention as those relating to our own personal comforts. In the home, these comforts, in a sense, must be provided. In business circles they have not been enjoyed until recently. The building trades have given an immense impetus through the advent of electricity. The rise in real estate values, the greater value of the buildings constructed for business purposes, and the advantages at present in the transaction of all business, reflects great honor upon the initiators of the original movement in this direction. All fields of conservative work are effected but slowly by innovations. The first tall buildings in New York, says *Electricity*, are now dwarfted into insignificance in comparison with those which came later, yet it was considered a risk and a sensation to attempt to break away from the old traditions. England still sticks to them to-day and the traveler in that staid old country sees nothing but low structures in the very heart of the busiest part of London. Tall buildings in New York, which supply the means of comfort to thousands of office workers, could never have come into existence, nor developed into what threatens to be a fixed natural institution, if it were not for influences which give rise to them. These influences were primarily dependent upon the enormous values, as they were considered, asked for small pieces of ground. They were secondarily, the combined advantages arising from the use of steel frames and the introduction of electricity for a host of purposes. Of course the manufacturer of typewriters claims the throne of honor as the business benefactor of mankind. Then follows the telephone company. After these come the elevator concern, the electric light and power company, the electric lamp, annunciator, bell and telegraph company, etc., until the list stretches out to the very sticks and stones of which the building is composed. This is not the attitude, however, which leads to a serious estimate of the greatest influence at work in promoting, on the one hand, the great apartment houses, apartment hotels, and hotels proper; and on the other hand, the remarkable palaces of business, erected in the downtown or commercial districts of every large American city, particularly New York and Chicago.

There are few who would deny that if the choice were to be made by a home seeker between an apartment house without telephones and electric lights and one supplied with all these accessories that, for equal rents or even slightly higher demands, there would be any hesitation in choosing the more modern place.



This is the keynote to the situation. The idea of modernness is associated with the improvements the present age has supplied. Not only must the home at present possess these essentials to a greater or less degree, but the office building without them would be on its face a failure. The builder and the architect have long recognized these facts and they now co-operate with the steam expert, the elevator builder and the electrical expert in supplying just as much and, if possible, a little more than their competitors in the same field. The swiftly moving elevator in our tallest office buildings, called in many instances an express, is dependent upon electric power for the faculty with which it performs its work. The lighting problem of all fine office buildings is emphatically an electric one. The ventilation in many cases belongs to the same category, while the telephone, ticker and signaling devices in the Wall Street district are matters of course. The builder's debt to electricity is as great in some respects as his obligation to those who supply him with the masonry and steel for the gigantic monoliths his ingenuity successfully constructs.

HAVE ONE PRICE AND STICK TO IT.

It is an assertion frequently made that an article has two prices, what it is worth and what it will fetch. Under certain circumstances this may be the case, as, for instance, at a forced bankruptcy sale where goods may be sold at one-half of their value, but it is a bad commentary on a merchant, when business is normal, to hear it stated of him that he has two prices for his goods, what he asks and what he takes for them. Such a man soon gets well known, and, for this reason, even when he asks what is a fair price on an article, he rarely succeeds in getting it, because customers, knowing how he can be beaten down in his prices, will not buy from him until he has made some concession in the price. How much better it would have been had he taken a decided stand at the first and refuse to lower his price, even though he lost the sale by so doing. As some compensation for this he would have gained the respect of the community at large, and he would have found that by degrees, provided that he adhered to his decision to have only one price, he was drawing the trade of the most desirable customers in the town and locality. People like to deal with a man of this kind because the feel that all his customers will be treated alike and no favors or concessions will be granted to one more than to another. This applies to harnessmakers just as much as to other merchants, and should be an encouragement to those weak-kneed members of the trade who are always making unnecessary concessions to a customer for fear of losing a sale. If your goods are worth the price you ask for them, don't be bull-dozed into taking less and thus wronging yourself and your family and doing the trade in general an immeasurable injury.—*Canadian Harness and Carriage Journal.*

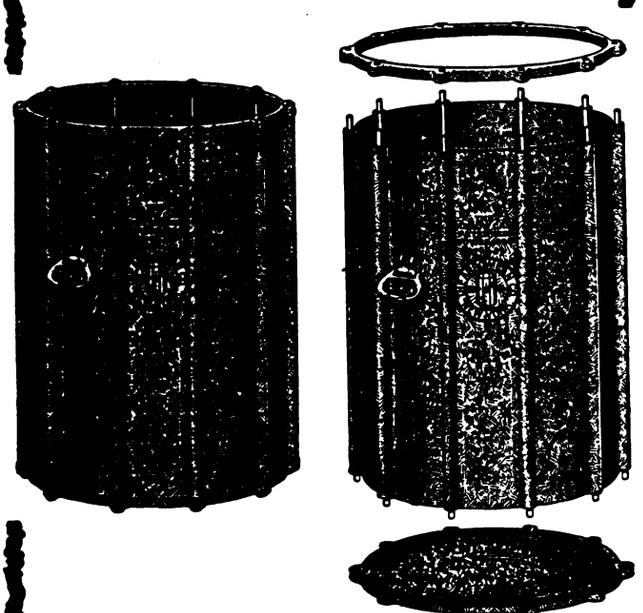
CHENEY ADZ-EYE HAMMERS

Are a little higher in price than most hammers but those who demand the best know their quality to be the highest—far above the price asked.

I-2 DOZ. IN EACH BOX.

Made of "Crucible Cast Steel." Fully Warranted.



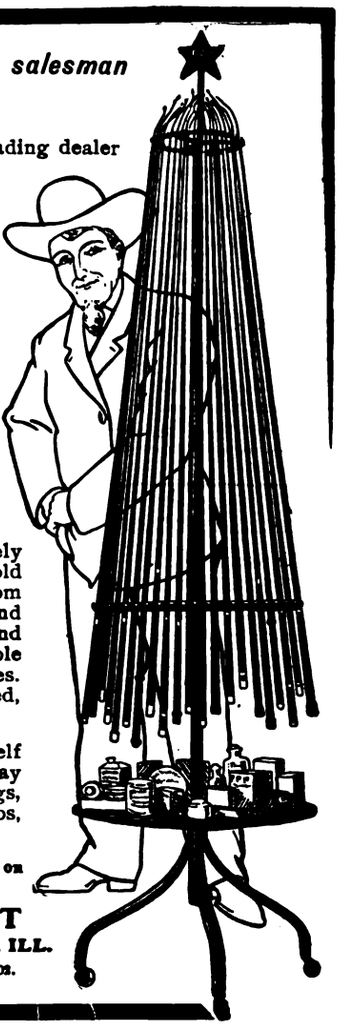
Send for Circular and Discounts. Mention HARDWARE.

THE HENRY CHENEY HAMMER CO.

LITTLE FALLS, N. Y., U. S. A.

The Arrow Can

Fireproof for ashes—Odorless for garbage. Note **its construction**—it's mechanically perfect and the **most durable.** With or without cover.



That's why it sells so well. Send for circular and prices. Mention HARDWARE.

The ARROW CAN CO.
35 WARREN ST. NEW YORK

"The best silent salesman I ever saw,"

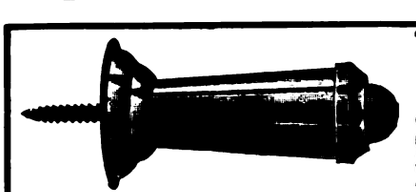
writes W. L. Skinner a leading dealer of Dunkirk, Ind., in a letter commending the

Best Portable Revolving Whip Rack and Display Stand.

It brings the whips out where they are seen and displays them in such an attractive manner that they catch the customer's eye at once.

The stand is durably made of steel, handsomely enamelled in Blue with Gold trimmings. It holds from ¼ to 1½ gross of whips and keeps them straight and elastic. Hight adjustable from 8 ft. to 9 ft. 10 inches. Weight 80 lbs. Boxed, 100 lbs.

The Revolving Shelf makes an attractive display of Greases, Oils, Dressings, Liniments, Brushes, Combs, etc.



Catalog with Prices mailed on request.

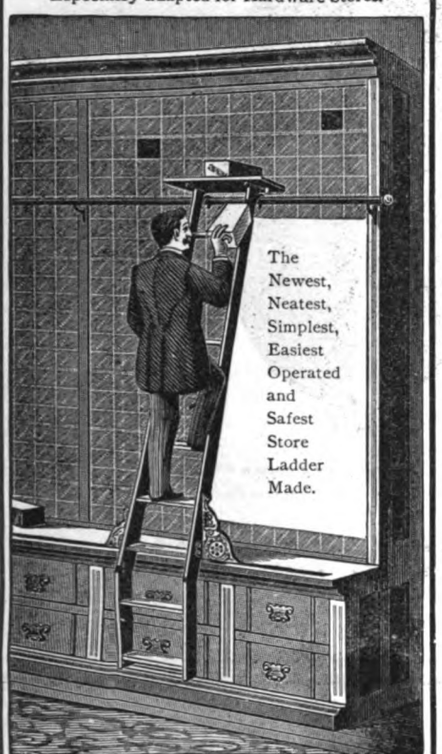
We Help Dealers Sell Blount Door Checks

TO push a line or not to push a line—that's the question. It's often decided in the negative because the Dealer has not time to study up plans — no time to mould the shot. In selling Yale & Towne Blount Door Checks, we furnish the AMMUNITION—booklets, blotters, folders, seals, envelopes, display cards, and a crisp little story called "The Peacemakers"—most of them imprinted with your name and address.

We lay the plans—a little booklet, "Suggestions for Selling" tells just WHAT to do and HOW to do it. YOUR part is to pull the trigger.



We help you ADVERTISE in newspapers too—send you electrotypes of advertisements that SELL goods—or write you special advertisements if you wish—furnish you street car cards, etc. All this is FREE if you write and ask for it.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CORRUGATED PATTERN.

CAPEWELL HORSE NAILS ARE THE LEADING NAILS OF THE WORLD AND THE BEST

PLATE PATTERN.

READVILLE, MASS., SEPT. 25, 1905.

THE CAPEWELL HORSE NAIL CO.,

Gentlemen:—Audubon Boy, 1:59¼, was shod in our blacksmith shop on the morning of September 22, 1905 (when he broke his record and equalled the world's record for mile pacing without wind shield), by our blacksmith, and he used your nails which always give us perfect satisfaction on trotters, pacers, light driving horses,—and on our few draught horses they give the same results.

Yours truly,
BITHER & PALMER.

Made By

CHATILLON SPRING SCALES.

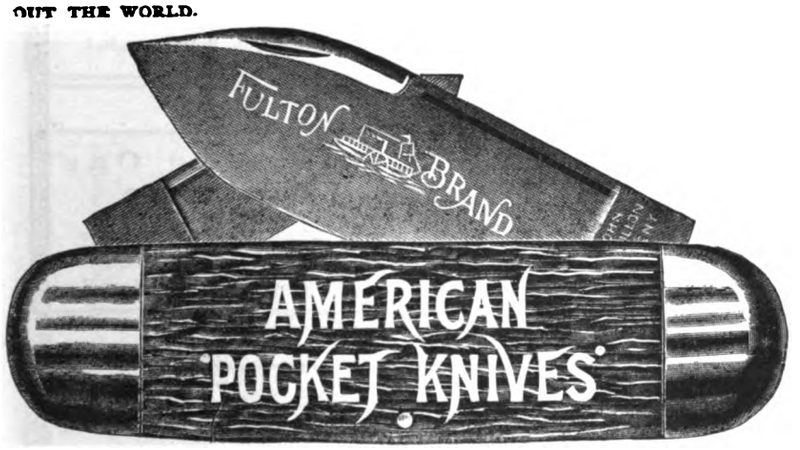
OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

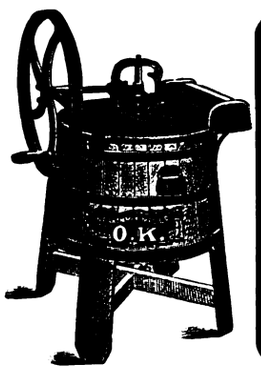
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

The best equipped factory, the best advertised product.

We make a few articles, in large quantities, make them better than any one else does, and we tell everybody about them.

We *know* we have the right principle in our "one-motion" Peerless Iceland Freezer and we've put up a new factory adequately equipped for turning out this freezer in great numbers.

Peerless Iceland Freezer

Our advertising—covering *every bit of freezer-selling territory* in the United States—gives an impulse, as strong as it is steady, to Peerless Iceland sales.

Every woman in the country interested in her home knows about the Peerless Iceland and believes in it. It's "the freezer the cook likes"—the freezer the *housekeeper* wants when she goes into your store.

Dana Iceless Refrigerator

For the window. No ice bill. A refrigerator that takes up no floor space and is run without ice eight months in the year.

Dana Mop Wringer

wrings the mop dry in five seconds. You stand in a natural position—both feet rest firmly on the floor.

Tub is well made, very strong and extra braced with heavy, flat iron, rust proof hoops. The rollers are of solid maple and never stick. The latest, the simplest and the best mop wringer on the market.

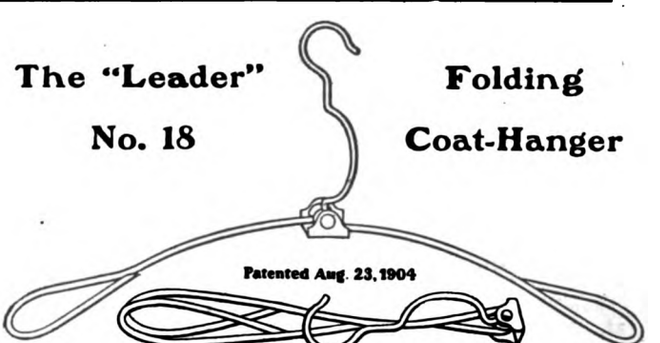
The Dana plant is fire-proof; we can *guarantee* delivery as promised. *Everything* about it is *modern*—selling organization and all.

Both jobber and dealer make a good profit on the Dana line.

Your jobber will be around soon. *Ask him.*

10 Warren Street, New York. **The Dana Mfg. Co.** Cincinnati.

Automobile Cycle Skate



Our newest model. [illegible] size, extension 10 to 12 ins., ball bearings, 5-in. rubber tired wheels, metal parts sheet steel, finely nickel plated. Retail $10.00 per pair. With 4-in. wheel, $7.50 per pair.

Every dealer in Hardware, Sporting Goods, etc., will find it profitable to sell our line of Cycle Skates, as they appeal to both young and old, being adapted for use in Skating Rinks or on smooth sidewalks. Write for catalogue and trade discounts.

Cycle Skate and Sporting Goods Co.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—If you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

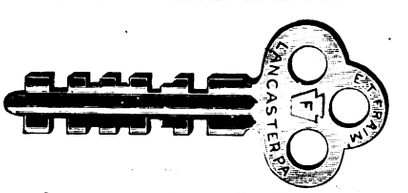
Guard Your Profits!

You cannot be too careful in the selection of your line of Padlocks and Night Latches for next year.

There are only two kinds: The profitable – the profitless. The latter are dust collectors on your shelves. They eat up the profits while you wait for them to "round up" the dollars you're after.

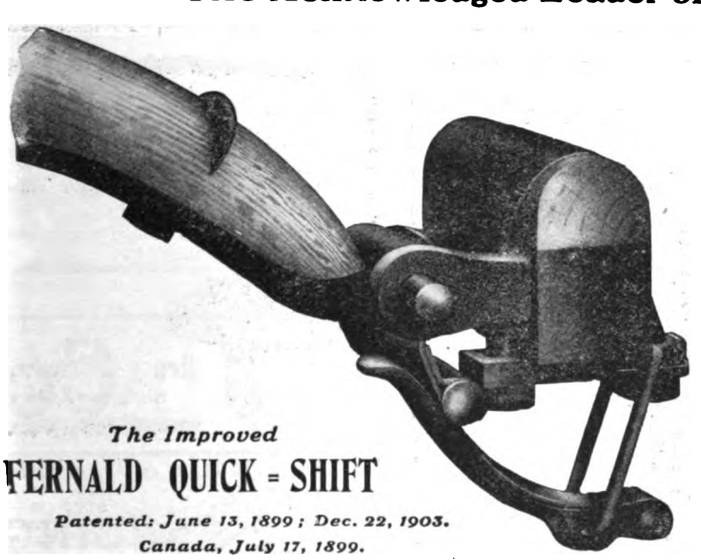
It is otherwise with



Keystone Padlocks
and Night Latches

Five hundred varieties to choose from—lively sellers, all of them,—because made of the best possible material and down-to-date in every respect.

Try a sample order of our *No. 464 Armoured Steel Padlock.* It has solid bronze trimmings, bronze metal top and cap with black steel shackle and case. Two nickel-plated corrugated keys with it. *Let's put you next to our 1906 proposition.*



KEYSTONE LOCK WORKS,

AUTO LAMPS

That Give LIGHT and Plenty Of It

When you buy Auto Lamps, it isn't the appearance and price alone that is to be considered.

THE remarkable light produced from the HAM COLD BLAST AUTO LAMPS make them easily distinguishable from all other oil lamps and it is light that is dependable, too, as these lamps are ABSOLUTELY WIND PROOF AND WILL NOT JAR OUT. The makers of the Ham lamps have been engaged in the manufacture of oil burning outside lamps for thirty-five years and in the Auto Lamps they have embodied all their best patents on combustion.

It's easy to convince yourself of the superiority of the Ham Cold Blast Auto Lamps. Light a half a dozen of the leading oil lamps, including a Ham, and without any hesitation you'll pick the Ham as the brightest as it is so superior,

In the Scale of Durability

Coes' New "Hammer Handle"

Model is as strong as Coes "Steel Handle" and 30 per cent. stronger than any other Wrench made.

It is the best balanced, smoothest, and best finished wood-handle Wrench.

The "Hammer Handle" is the largest "one-handed" Wrench ever made. The handle is heavier, made of hard wood—heavier than has ever been put on a Wrench before.

It fills the hand—no gripping power is lost.

There's nothing so pleasing to the hard-working merchant as

The Jingle of Profits

at the end of the week. Coes' Wrenches are full of profit for the dealer, because mechanics everywhere "swear by" them—not at them. That's the reason why Coes Wrenches

Never "Queer" the Dealer

Don't take our word for this statement, but make a test.

---

15 in. size now ready; 10 in., 12 in., 18 in. and 21 in. sizes will be ready soon.

"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No.....

That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.

It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

Y., will, as before, cover the Eastern, New England and Southern States.

✤

Wm. T. Butler, who is well known in the Hardware trade, starts for the Pacific coast to represent the H. W. Johns-Manville Company. His headquarters will be at San Francisco with branches at Los Angeles, Cal., and Seattle, Washington. Many Hardware dealers will no doubt regret Mr. Butler's leaving, as he was extremely popular throughout the state.

✤

G. E. Hall, "Hall's Mineral Machine Oil," 211 Centre Street, New York, furnished for the Christmas dinner of his friends and customers, a holiday remembrance in the shape of a huge plum pudding, with which the sentiment accompanying the same was, "May you receive as gifts the things you most desire and may the day be as it should the most enjoyable one of all the year to you."

✤

The Michigan Stove Co., Detroit, Mich., celebrated the holiday season by making their recipients happy by presenting them with a perpetual lead pencil, carrying a fine point, and made in the shape of a wire nail with barbed or rather corrugated trimmings, nicely plated and of great utility.

✤

Fairbanks, Morse & Company, Chicago, Ill., with branches in several parts of the country (manufacturers of all railway supplies), have favored us with their Catalogue 101A, which contains very full and complete descriptions and excellent illustrations of their Sheffield Gasoline Motor Cars for railroad work. They claim that with the Inspection Motor Cars officials can make very quick and frequent inspections with comfort, and at less than it would cost to "fire up" either a locomotive or inspection engine. That they save time and annoyance to officials, also expense of locomotive and crew, and that they are more easily and quickly started or stopped. Further information will be gladly sent to interested parties upon request.

✤

Henry Pearl & Sons Co., 74 Murray St. New York, have just acquired the sole agency for the Double Acting Rixson Door Check which is destined to become a formidable competitor with other checks already on the market several years and achieved an enviable reputation. These taken in connection with their other Specialties of Norton's Door Check and Spring, Storm Door Check, Gate and Gate Check and Spring will make this old established Company headquarters for door closing devices with a full stock that will command attention.

✤

The Star Electric Fuse Works of Wilkes-Barre, Pa., which is a branch of a large German concern, and is manufacturing the patent match-head exploders and fuses for about two years, have during the last summer taken the first place among exploders and fuse manufacturers in the United States. Star Exploders manufactured by this concern have been used on a great number of big grading jobs and on several submarine works, and have given excellent satisfaction.

✤

Gem Cutlery Co., 34 Reade Street, New York City, have issued a new catalogue of their Gem Safety Razor, Fancy Sets and supplies, together with a new trade discount, which will be in effect for the year 1906, as all former prices have been withdrawn. It will be to the advantage of every dealer to make immediate application for these prices.

MINNESOTA RETAIL HARDWARE ASSOCIATION.

The tenth annual Convention of the Minnesota Retail Hardware Association will be held at Hotel Nicollet, Minneapolis, February 28, March 1st and 2nd next. Annual meeting of the Retail Hardware Fire Insurance Co. on Thursday March 1 at same location.

ARE YOU ONE?

The dealer who does not cultivate the sale of foot warmers, or carriage heaters, as they are known to the trade, is certainly missing part of some good business that is easy to get. These heaters are made so handsome that they are quite ornamental. They are also very strong and durable. Ventilators are provided, so that the heat may be regulated, and the prepared carbon they burn supplies warmth in good quantity and for a long period. This is the month to push this business. If you haven't a supply, you will find mention of some in our advertising pages. It is not hard to teach people to use these goods. They are a real necessity.

ORGANIZING A CAMPAIGN FOR INCREASED USE OF THE BICYCLE.

The Manufacturers and Jobbers of Bicycles are organizing a campaign for an increased use of the bicycle and have had printed a four-page booklet giving a few reasons why the bicycle should be ridden. Premiums are also offered of $50.00, $25.00 and $10.00 respectively for the first, second and third best reasons, in addition to those already printed, why the bicycle should be ridden, and $1.00 will be paid for each subsequent reason used. The additional reasons will be published in the next lot of booklets. One million or more booklets when completed will be distributed broadcast through the United States by jobbers, retail dealers and bicycle clubs. The committee to decide upon the reasons selected will consist of three well-known manufacturers, two jobbers and the secretary. The work will be in charge of a committee of manufacturers and jobbers, the next meeting of which will be held January 16, 1906, at the office of the secretary, A. M. Scheffey, No. 2 Hudson street, New York.

IOWA HARDWARE MUTUAL INSURANCE ASSOCIATION.

The Annual Meeting of the Iowa Hardware Mutual Insurance Association takes place on January 12th, at Mason City, Iowa. Following this annual meeting of this association will be the Annual Meeting of the Board of Directors. At this meeting the new dividend or rebate for 1906 expirations wil be declared. Indications are that the present rebate of 25 per cent. will be largely increased. Since its organization the Association has written nearly one and one half millions of insurance and has returned to policy holders upwards of $5,000.00 in cash checks. The February rebates just sent out amounted to more than Four Hundred Dollars ($400.00). A full report of the Insurance Department will be made at the Hardware Association Meeting by Vice-President L. Lindenberg of Dubuque.

LOUIS ERNST & SON.

Louis Ernst & Son, Rochester, N. Y., who are noted for the style of their New Year's reminders, have recently issued a card folder of six pages which does credit to the concern. A portrait of the founder of the house ornaments the first page of the folder, with their address, and the dates 1856-1906. Then three pages of the card are filled with reminiscent matter, which, after referring to the death of Mr. Louis Ernst in 1892 at the age of 67, gracefully closes as follows: "Many happy memories come to us of those with whom we have for years transacted and continue to transact business, and we submit this brief resume of the past, full of gratitude for the many courtesies received, and with confidence that our usefulness to one another will grow with the advancing years. It is with great pleasure, therefore, that we extend to you the season's greetings and wish you likewise great future success."

CAN'T PAY BONUSES TO MANUFACTURERS.

It appears by a decision of the Appellate Court that Indiana cities will be prevented from giving bonuses to manufacturing companies for locating factories, the court holding that a city has no right to take money raised by taxation and devote it to such purposes. The court says that the benefit resulting to a town by this establishment of manufactories is not different in kind from the benefit arising from the establishment and operation of grocery stores. The manufacturer, merchant, mechanic and laborer are equal promoters of the public good and equally entitled to public aid.

"No line can be drawn in favor of one of them to the exclusion of the others, and recognition of the right thus to distribute money procured by taxation would subject municipalities to importunities and impositions innumerable," says the court.

JANUARY 10, 1906

Editorial Trade Review

The trade generally is full of hope regarding the future in every way, the belief prevailing that the successful trade conditions which have had such a long continuance will be enjoyed most thoroughly during 1900, providing nothing of a radical nature disturbs the markets to create the slightest feeling of doubt and uncertainty. Rarely indeed does the commercial year open with so many harbingers of good times, conveying the lessons of success attained and pointing out paths of peace in the immediate future.

The manufacturers are already receiving orders in a volume that indicates the inspiration with which they are making preparations, and thus early in the season they know their facilities will be taxed to the utmost.

The tone of the market is a strong one, and what changes there are seem to be the stiffening quotations that indicate an advance in price, this being the only anticipation. The advances are comparatively slight, representing the changes in the raw material in most cases, and the desire of the manufacturers to be at least on a level with the market. They are increasing their facilities to meet orders that will doubtless be heavy, for the whole industrial world is prepared for a season of great activity with a feeling of greatest confidence that is rarely felt in the industrial field at so early a date.

The trade generally has experienced a heavy holiday trade, from the effect of which they are slowly recovering; they have learned during its continuance that a number of lines can safely be added to their assortments that will prove potent factors of a successful trade in the future in an all around stock.

This is the time to look through the stocks of the retailers, while they are taking inventories, finding all slow moving goods and bringing them out in the sunlight for the purpose of pushing the sale of them. They are contemplating plans of organizing a more active campaign in the way of sales than has ever before seemed necessary to formulate. These now occupy the brain of the dealer whose persistent opposition to a catalogue house competition is made to understand it can only be eliminated entirely when he himself gets out and hustles. The dealer himself has to fight aggressively to maintain his commercial independence.

The stocks throughout the country are known to be extremely low, for the dealers, as the season drew near its close, made demands upon them for any goods that could be used to complete orders; and feeling certain that the trade of the future will bear good fruit for the careful buyer, it will be found that there is scarcely a line of goods that is unadvisable to buy. No delay being advisable about the placing of orders so as to get the goods in season for an early trade, everything in the way of Spring goods it is safe to stock up on, the outlook for the immediate future for business is like enough to be an exceedingly propitious one.

The sales of Hardware during 1905 have surpassed all expectations in almost every line, and that of Builders' Hardware was one of the most important. In consequence of the erection of the countless number of new houses of every description, there were created demands that were impossible to supply fully; and the same prosperous conditions will be prevalent during 1906, making it a line that promises a trade full of possibilities, while all signs point to a large volume of business in the Spring which cannot help but prove an inspiration to the buyer.

Manufacturers in augmenting their ability to fill orders promptly are taking no chances, for should there be any lessening demand, greater attention can be given to our largely increasing export trade. The recent advance in prices of raw material is felt in many lines, indicating a higher range of values in manufactures to follow in due season.

Collections during the last six months have been unusually good, especially throughout the West, enjoying as it does at the present time an independent financial position. The immense crops at remunerative prices have so happily paid all the debts of the producer and leave an encouraging surplus with which to foster new business.

THE HARDWARE CONVENTIONS.

The season is now with us when Retail Hardware Associations hold their conventions in so many States, shedding new light upon the problems that confront them, seeking their solutions and making known by definite language being used for the purpose what troubles beset them in the trade they love so well. Let us hope in the many meetings that will be held within the next three months peace and harmony may prevail in all their discussions and the labors of each and all in convention assembled shall be given to the upholding of this dignified trade; always important, but never so grand and imposing in strength of purpose and numbers of its members as at the present time.

THE HARD TASK.

Here is a simple motto that a successful business man claims has done more in helping him through the drudgery of a busy day than anything else; "Do the hard thing first."

If the morning mail brings in a lot of letters to be answered, don't spend time evading the hard ones and picking out the easy ones; take up the hardest of the lot at once while you are fresh for the task and answer it. The next one will not be so hard and it will seem all the easier because of this victory over yourself. Besides, there will be no haunting spectres of "worse to come" ahead to half distract the mind.

The same rule applies to other tasks. Take care of the hard ones; the easy ones will do to fill in at the corners. With the hard part done the day's work is well in hand; you are master of it and better than all as a stimulant, you are conscious of a kingly feeling in your own self mastery.

PERSONALITY IN SALESMANSHIP.

Every man, whatever his vocation or his circumstances, is at some time the patron of a Hardware store and is at all times interested in some article of Hardware. The interest may be latent but it is there and it is up to us to make it active.

Whenever a man comes into our store, even though he asks for something that we do not handle, we should always bear in mind that he may be interested in something that we do carry if we can only hit upon the right thing and bring the two together. If we really have nothing that should appeal to him there is something radically wrong with our stock; if we fail to interest him in what is worthy of his interest there is something wrong with us. Rarely, indeed, perhaps never, is the trouble entirely with the man himself. It is safe to say that in a fairly stocked Hardware store there is always something of interest to every man if it is properly put before him. Here is the first point, then, where the personality of the seller comes into play, in so transmitting his own enthusiasm to the possible customer as to lead the latter's interest up to the desire of possession.

Frequently men take an interest in what is shown them but desire to "Look around a little," bargain hunting. That often means a lost sale but it should always be an object lesson to us. In the first place we have probably fallen short of the highest standard of salesmanship or else our man's confidence in us would be so great that he would not think to go farther but would come to a decision in our favor, then and there. Still, if he goes, we have a chance with him, providing we have been able to give him a better impression all around than our competitors can do. They will do their best, we may be certain; the question is, can they do better than we can? Is their personality more convincing, more masterful? If there is a weak spot in us they will make the most of it, not by calling particular attention to it or to us, if they are wise, but by making their own case doubly strong at that particular point. An old salesman used to claim that he could make a fair living selling goods on the blunders of his predecessors. It is up to us, then, to leave as few rat-holes as possible in both our business management and salesmanship. Certainly if our competitors are not making use of all our own weak points they are missing golden opportunities and we are profiting by their incompetency rather than by our own ability. If the man who goes to them comes back and buys of us it looks as if we had in some way made the best impression; if he purchases elsewhere it proves that some one else is our superior in stock of goods, prices or, more likely than all, personality; the ability to put into it that last vital energy that produces an order. This is step two; not bigger than the first step but—how many fail here just for lack of that last vital energy and pull up in the ranks of the "almost."

It is not enough to excuse ourselves for the lost sale on the ground that the last fellow always makes the best impression. He need not if we only made a *lasting* impression; it is up to us and not to him. The personality of some men does not extend beyond the range of their voices; that is the kind of men who have reason to fear competition. Others seemingly *have* no personality until the fight is hot; that they stand out from their competitors like a sore thumb in cold weather. They are leaders of men and makers of trade. An hour with one of these is time well spent.

Not long ago the writer waited for some time in the outer office of a business friend for an interview, wondering as he did so that one with such high business standing would spend so long a time talking generalities with a possible client during business hours. The explanation was simple enough when it was made. "I got his confidence; now he may visit as many of my competitors as he pleases, he will come back to me." The result was as he said.

It wasn't the stories he told that won the battle but the personality he put into them. The man had gained a confidence in his solid worth, while listening to his idle talk, that subsequent salesmen could not overthrow; not in what he said, but in the man who said it; the man behind the gun. It is human nature to study human nature and the man who can stand the test of careful study is pretty well advanced along the highway toward success.

Let us not then, whitewash the mention of any sale we fail to make with mild terms, as "want of success," etc. Just call it "failure," pure and simple, for that is what it is, and it is almost surely a failure brought about by some lack in the realm over which we have control; ourselves or some fault within the limits of our own walls. Not that we should expect to make a sale to every man who enters the store every time he comes in; that would be unreasonable. But every time he comes in we can bring him a little nearer to the purchasing point even though not a word is said about sales. We can win his confidence, his friendship. We can arouse his interest along directions that we may later turn to good advantage. We can throw our own personality into our talks and render him the more willing to listen to and be influenced by our judgment. We can study, in the midst of that story, the thing or things that oftenest attract his eye and make it easy for him to investigate in the direction of his thoughts without appearing to. We can pave the way by various inconspicuous attentions and over it all we can throw the mantle of our own personality until it becomes so much a part of the intended purchase that the same article will seem a little incomplete if purchased of another.

Now, just a word about the men who don't come into the store at all; men that we know, perhaps, either personally or by reputation. Why don't they come? They buy Hardware in some form; be sure of that. What do they buy? Where do they buy it? Why? Are not our prices right? Are not our goods right? Is something wrong with our salesmanship? If so, what is it? If not, what is it? Somewhere we are at fault, a little behind our competitors; better find out just where it is.

Some one is saying that all this is impracticable; that the other fellow would be doing the same thing and would be no further in the lead. Granted. Nevertheless, this leadership by aiming at perfection is practical as long as one has arrived there. Let the other fellow try as hard as he pleases; it is up to us to get ahead of him and keep ahead. If we cannot do it that shows that he is the better man and proves the earlier assertion that the fault is in ourselves. If we succeed over him we need not worry; we are in his lead; let us keep there. If he is the successful one we have no time to kick and growl; work is the thing. Anyway, we are not down and out until we think we are. There is no such thing as a real failure in life until a man loses confidence in himself; then his own personality goes back on him. He cannot influence; he drifts. Then, and then only, he is pretty nearly on the brink of the last ditch.

MAKING THE HARDWARE STORE ATTRACTIVE TO WOMEN.

Not one woman in ten knows what the Hardware store does—or should—contain. Of course, most women know that it is the headquarters for stoves, plows and nails. If there happens to be a sportsman in the family, guns and ammunition are added to the feminine inventory. But as woman rarely has occasion to invest even in a razor or jack knife, the notion once formed stands little chance of being overthrown.

Should some special purchase require her to enter, it is with a feeling of uneasiness—akin to that of entering a country barroom. Possibly there is nothing of reassurance within. The proprietor meets her with grimy hands, evidently leaving with reluctance the farmer with whom he was dickering on a harrow. His hesitating manner induced by his uncouth personal appearance makes the fair purchaser more than ever feel herself out of place. The purchase hurriedly made, she scuds out as quickly as possible, neither looking to right or left for bargains, and gives a sigh of relief that Hardwareman and plowman are free to continue their trade.

He who would retain women customers finds that with basin, soap and towel at hand, he can quickly render himself presentable. No one can make a success of salesmanship when his general demeanor suggests a continual apology for himself, he is ill at ease, and the feeling is contagious. While there is rough work connected with sales, there is no necessity for uncouth appearance.

A neatly kept room is another attraction. Shining stoves are universally admired. Even rough farm implements, neatly arranged, are attractive. Cleanliness is the keynote. Freedom from tobacco juice and rustic remarks are essentials. Loungers who habitually inspect customers and the goods purchased are not conducive toward building up the feminine trade.

If goods liable to attract her are all packed away in boxes, to be shown only as called for, she will continue to believe the Hardwareman has little in her line. However, if he exerts himself, just a little, to have her see the merits of a new roaster, meat chopper, or cherry stoner, this opinion is quickly and permanently changed. There are countless little household articles which, when once used, are adopted as necessities. The show window is a good place to introduce them to the public; but a personal talk is better.

The woman who finds a neat and orderly store, polite salesman, evidence that she is welcome, and that in many lines the goods are of such nature as to interest her directly, will quickly avail herself of the opportunity to profit by investment. And her leisure for investigation is often greater than that of her business-engrossed husband.

✤

If falsehood had, like truth, but one face only, we should be upon better terms; for we should then take the contrary to what the liar says for certain truth; but the reverse of truth hath a hundred figures, and a field indefinite without bound or limit.—*Montaigne.*

WHAT OF THE FUTURE?

VIEWS OF LEADING MANUFACTURERS.

Desiring to obtain the views of some of the active manufacturers as to the prosperous look borne by 1905, and whether it was possible to guarantee its continuance during the coming year, we took the liberty of asking several of them their opinion on the subject in the important branches of the trade in which they were prominent; and we present herewith the replies received from the busy men to whose courtesy we are indebted for them. They present a very conservative state of affairs throughout the trade, in which in the interests of all concerned it is only too evident there will be no boom advances in any of the departments of labor to unsettle the present harmonious conditions of business with which they all seem to be satisfied. The few changes in prices which the enhanced value of some of the metals make necessary will be made as conservatively as possible in order not to stop the eager disposition of buyers that is shown in orders intended to encourage Spring trade.

THE SALE OF HIGH GRADE TOOLS IN 1905.

In answer to a request as to how a prosperous year like the last effected the sale of high grade tools, we have received the following exceedingly suggestive letter from W. M. PRATT, OF GOODELL-PRATT CO., Greenfield, Mass., which will be perused by our readers with an unusual interest. He gives his views in a manner that is as lucid as his subject is intelligent. His remarks on our foreign trade, which on many lines has reached to most encouraging proportions under disadvantages, certainly deserve that consideration by government which reciprocity treaties or the advantages of the dual tariff suggested, under which it could be so largely increased.

Editor HARDWARE:

I am in receipt of your favor, wherein you ask me to give expression to my views on existing conditions as effecting the tool trade. I can assure you that this is a very interesting topic; it is not one however that admits of brevity if we are to give it more than a passing thought.

The year 1905 just closed is, I believe, the largest year in volume the tool trade of this country—and of every other country for that matter—has ever known. The reasons for this great prosperity are not hard to explain, the development of our vast resources and the tremendous improvements undergoing construction, both public and private, have kept labor of every description well employed; all our facilities have been taxed to their utmost and the crying need for these changes and the call for their early completion has made it necessary to call into play and use every conceivable labor saving device that the market afforded.

The effect upon the manufacturers of tools of every description can be admitted without argument. It has required the expenditure of no small amount of "gray matter" to increase their organizations, add to their working forces, be able with reasonable promptness to supply the wants of the trade, and maintain through it all their standards of quality; for no longer is it possible to sell tools for service and use on the merit of low price only.

This call for better tools, well designed, well made and well finished, time savers, and labor savers—tools which shall represent exceptional value in proportion to their cost and return a large interest on the investment, not tools which are constructed with the one idea of offering them to the consuming public at the lowest possible cost regardless of their value and usefulness—is not confined to this country alone, it is echoing in the markets of the world.

In every civilized country where tools are being sold, tools of American manufacture are gaining great prestige, and in the midst of the great prosperity we are enjoying, when we are straining every nerve in an endeavor to keep our productive departments within reasonable distance of the selling end, and when it would be so easy to lay up for ourselves trouble galore should we through laxity impair our standards of quality; we have by creating strong organizations, equipping our plants with perfected machinery, and systemizing their working, been able to not only maintain our standards but to improve them, and it is a matter for no small congratulation that this is the case.

We are now starting in on a new year with conflicting emotions. There is apparently not the slightest indication of any falling off in the volume of business during the next six months, prices of material and labor costs are continually advancing, and despite the great volume of business our margins are exceedingly small; only because of the great volume have we been able to maintain our prices without advance, an advance in the price of mechanics' tools, effecting as it does the pocket book of the working mechanic, is to be avoided if there is any way to avoid it, and no manufacturer of these goods will make an advance until he is absolutely forced into it. And therefore I would repeat once more, the situation is a perplexing one.

I would not be doing justice to this topic if I refrained from mentioning the situation abroad. Our volume of trade in foreign countries on American tools has shown a substantial increase during the past five years, some manufacturers have not given it the attention it deserves, feeling that the home market required the bulk of their attention; the trade, however, is too important to be ignored, it is certainly the part of wisdom to take care of it. We must not expect, however, that we can go on indefinitely increasing the volume of our foreign sales unless the United States somewhat broadens her commercial policy either through reciprocity treaties or by the enactment of a dual tariff which shall admit of the extending of courtesies to those countries that extend courtesies to us. If we attempt to shut everybody out, they will retaliate against us.

Can we afford to have this done? Is not our foreign trade of sufficient account to merit preservation? Too many of us have given this matter altogether too little attention, we have allowed it to run its own course in the great sea of politics when it is a question so vital to the interests of American manufacturers that it deserves a better fate. We are destined to become the great commercial nation among nations, let us shape our policy with this end in view.

W. M. PRATT.

LOUIS H. SCHMITT, OF H. D. SMITH & CO., of Plantsville, Conn., in regard to the sale of mechanics' tools of merit says:

Editor HARDWARE:

"My theory regarding tools has not varied much in the twenty-six years that it has been my pleasure to toil at and in the Hardware business. It is that as the conditions surrounding the mechanic improve, he will want better and better implements to work with, to add to his comfort and skill at work, just as he will want better implements and commodities in his house for his comforts at home. In other words, while it would be folly to question the very evident fact that there is a large and increasing trade in the cheapest of tools—a trade that seems to be more than amply taken care of by manufacturers in this and other countries—there is also a growing and more satisfactory trade in a better grade, which, if salably priced and of distinctive, visible and provable merit, such as those we style our "Perfect Handle," cannot but be successful in a manner satisfactory, both to the producer, the one or more middle men and the consumer. This theory put into practice is working with increasing satisfaction.

LOUIS H. SCHMITT.

C. W. ASBURY, OF THE ENTERPRISE MANUFACTURING CO., Philadelphia, Pa., sums up the situation in a few words, when he remarks that "Business during the past year has certainly been good enough to satisfy anyone, and the picture to be plainly seen in the future is one of loveliness."

THE SALE OF SCREEN GOODS.

The large volume of the Screen business and the way it was handled during such a prosperous year as 1905 is graphically pictured in the following frank letter from one of the leading manufacturers, and exemplifies the necessity that was forced on this otherwise fine and growing industry, of advancing their prices recently in such a pronounced manner. It must be remembered that fewer factories will supply the demand in the immediate future, and that there is danger in overestimating the amount of product possible to the manufacturers engaged in it. As the orders are coming in with confidence it is feared there will be a scarcity of goods in this industry that has already become so important.

From A. J. PHILLIPS CO.

Editor HARDWARE:

In responce to your recent favor asking for a few paraghaphs reviewing the business of Screen Goods for 1905, and asking our opinion as to the year 1906.

Digitized by Google

Beg to advise that the year of 1905 was very unsatisfactory to the manufacturers of Screen Doors and Window Screens. No manufacturer made any money last year and several made considerable losses on the season's business. This unhappy result came from extremely severe competition. Some factories were forced to sell their product for what it would bring. Others were determined to increase their sales without regard to profits, and, of course, no factory would let any of its business get away.

The volume of business was good but there were a full dozen more factories than were necessary to take care of it. The capacity for over production was from 30 to 40 per cent. Especially was this true, because some of the largest and best factories were very conservative, being unwilling to push the sale of their goods at a loss and therefore these plants were not run at anything like their capacity.

From the above it will be gathered that the business reached a crisis. Very few of the smaller concerns were in shape to go on another year. Some *could* not and conservative ones *would* not do so under existing conditions.

With reference to the prospects for the screen business for 1906, as has already been referred to in your columns, the crisis in screen matters made it necessary for the older and stronger manufacturers to co-operate in some manner for their self preservation. The Continental Company, was, therefore, organized to buy, manufacture and sell as many screen goods as possible and the product of the principal factories will be disposed of through this company. Practically all the smaller concerns were more than pleased to dispose of their plants or to co-operate with this company in some form or other.

It is expected that the necessary advances in price will curtail to considerable extent the sales for the coming season. There are four principal reasons why the prices on screens had to be sharply advanced:

First.—They were sold at an actual loss last season.

Second.—Lumber has advanced tremendously.

Third.—The manufacturers wish to make 15 per cent. profit.

Fourth.—The manufacturers wish the jobbers to make a reasonable profit on their lines, enough of a profit so that they are interested in pushing the lines and carrying stocks sufficient to serve the retailer promptly.

While these advances would naturally curtail the demand somewhat and will make the retailer cautious in placing his orders, it must not be forgotten that a number of factories have been closed. It is, therefore, expected that the larger and better equipped factories can supply all the demand and manufacture the goods to the best advantage.

In one way a shortage of goods is threatened. The factories all have large quantities of lumber contracted for and these contracts have been partially filled, but the actual shortage of lumber seems to be holding back the completion of these contracts. It is practically impossible to buy screen door lumber and be sure of prompt deliveries at the present time.

The very prosperous condition of the country, the fact that the holiday season has shown that people have plenty of money and are willing to spend it, lead the screen manufacturers to reasonably hope for and expect a demand for all the goods which it is likely they will be able to furnish.

Wire Cloth has recently been reduced in price and naturally dealers expect that the screen manufacturers will in turn reduce their prices. The lumber situation, however, makes the manufacturers feel the necessity of maintaining the established line of prices and the market on these goods is firm at the present time.

W. B. PHILLIPS.

L. & I. J. WHITE COMPANY, Buffalo, N. Y. reply as follows:

Editor HARDWARE:

Replying to your letter of the 30th ult. we beg to state that year just closed has been one of unusual activity and prosperity in the business world. We believe that the year 1906 has every indication of being as prosperous or even more so than 1905. There seems to be a growing demand for high class grade of goods, especially in the Hardware line, and jobbers are beginning to learn that quality counts for more than price, and many of them are cutting out the cheaper class of goods and substituting the better quality.

The manufacturers are finding it is necessary for them to increase their facilities, and many of them have built new plants or enlarged their old ones, and equipped the same with up-to-date machinery that will enable them to execute their orders more promptly.

While the prices have not been as good as they might have been and the cost of production has been greatly increased, and unless something unforeseen occurs we believe that 1906 will reach a high water mark as a successful business year.

THE L. & I. J. WHITE CO.,
John G. H. Marvin,
President and Treasurer

From KAMPFE BROS., No. 8 Reade Street, New York, the manufacturers of the Star Safety Razor and accessories, we have received the following:

Editor HARDWARE:

In reply to your inquiry of Dec. 30, 1905, asking for our views in regard to the conditions which will result in making 1906 a year of abundant prosperity, we have to report that with us the year 1905 has been very satisfactory. Our sales have been increased over previous years very materially and all indications point to prospects of very satisfactory future business, both domestic and foreign.

Many dealers have learned through being brought in touch with each other at Hardware Dealers' Conventions, etc., and discussing business methods in general that to insure satisfactory results, they must be progressive. This is an age of specialists. Fifty years ago the family doctor did everything from pulling a tooth to curing chicken pox. We now have surgeons, dentists, eye, ear and throat specialists. In law we have the corporation lawyer, the criminal lawyer, patent lawyer, etc. Every profession and line of business has been specialized. The really successful man is he who can concentrate his thought and actions.

The retail hardware dealer, if he studies his possibilities, learns that it is necessary to know as thoroughly as possible every line he sells. As a factor in the completion of a sale, concentrating is necessary. In displaying goods, the same rule applies; a general conglomoration of articles in a display window attract little or no attention and create a desire for ownership. Many dealers are getting out of the old rut and are progressive in their methods. Their sales and profits are increased and more orders for saleable products are received by the manufacturers.

The Star Safety Razor is known as a staple, reliable product and we attribute our increased business largely to the fact that retail dealers are displaying cutlery, increasing their sales and profits thereby and nursing a profitable part of the retail Hardware business, which is the goods they sell at a fair margin of profit and receive cash therefor.

Wishing you a prosperous New Year, we are,

Yours very truly,

KAMPFE BROTHERS.

THE CALDWELL MANUFACTURING COMPANY, Rochester, N. Y., report in a recent letter that:

Editor HARDWARE:

As to the result of our business for the year 1905, we can say that we enjoyed our share of prosperity, which was general throughout the country. There was a good demand for some of our Hardware Specialties, and the outlook for the present year is very promising. The price of raw material has advanced considerably. It is not always wise, however, to advance prices, even though profits may be curtailed somewhat. Unless some unforeseen calamity befalls us, the year upon which we have just entered promises to be quite equal to that just past, in every line of business. The building interests promises well, and if not disturbed by labor troubles, will be very large.

CALDWELL MFG. CO.

THE CRONK & CARRIER MFG. CO., Elmira, N. Y., in reply to a request for their views on the present conditions in trade in the United States state that:

Editor HARDWARE:

"We are, at the present time, covering the entire trade of the United States, and have watched the conditions closely. In our opinion the farmers of this country were never in as prosperous condition as at the present time. In addition to this the large iron and steel industries of the country are consolidated in so strong a manner that they have been able to prevent a regular boom in prices, holding the market at a fairly reasonable price which is entirely different from what it was in former days, when each factory tried to see how high they could put their prices, and in a few months getting them at about double what the material was worth, the result being that they soon commenced declining and all dealers knowing that there would be a great falling off in price, refused to buy anything. At the present time they all feel practically sure of present prices being maintained at least for the first six months of this season. Our own views are that there will not be much of a shrinkage, if any, during the entire year, nor do we look for any large advances. A few lines, like Barn Door Hangers and Rail, that come close to the raw material, must of necessity advance some in price, and other goods in our line we do not anticipate very much change. Prices certainly cannot go lower, and labor is sure to remain high, and as stated above, we do not look for lower prices on raw material. We believe 1906 will at least equal, if not go ahead of 1905, and shall not be surprised if in future years 1906 will be spoken of as the most prosperous year this country has ever had.

THE CRONK & CARRIER MFG. CO.,
C. F. CARRIER, Vice President.

IRON AND STEEL BUSINESS.

From HENRY B. LUPTON, of the OLIVER IRON & STEEL COMPANY, Pittsburgh, Pa., we have received the following in regard to the Iron and Steel business at present, and the prospects of its continuance during 1905.

Editor HARDWARE:

The foundation of all commercial prosperity in this country is the crops. Every section of the country, both East, West and South, seemed especially favored during 1905. The movement of these crops encouraged the railroads to be a greater purchaser of steel and iron products than ever before. With improved road beds, heavier track, stronger bridges and heavier equipment, their demands upon the iron and steel manufacturers have been enormous, and we can see little indication of any let-up in their demands, but, of course, if there should be a failure of crops next Summer there would be a great falling off in the demands for material from the railroads. The great controlling interests in the steel and iron business have done all in their power to prevent any wild inflation of values, for they well know that when prices are pushed to an unnaturally high point, the declines come quickly and very much demoralize conditions.

HENRY B. LUPTON.

JOHN C. SCHMIDT, president of the STANDARD CHAIN COMPANY, Pittsburg, Pa., takes a very optimistic view of the future in the following:

Editor HARDWARE:

Replying to your inquiry asking for an expression of my views as to the outlook for the coming year, I would state that if ever conditions warranted the expectation of excellent business throughout the entire calendar year, those conditions exist now. When you consider the high prices received by the planters of cotton last year, after the decline in price in the fall and winter of 1904 and 1905, which left large stocks unsold at the low prices, the entire South is found to be in a most prosperous condition. In the West, with high prices for corn and tremendous crops, their condition is all that could be hoped for and desired. The tonnage of orders on the books of the U. S. Steel Corporation is reported as greater than ever before. Steel rails alone amount to 2,000,000 tons, or two-thirds of the annual capacity. The conditions a year ago were bright, but this year they are even brighter, because a lager number of the hopes and expectations for the year have been realized. The policy of the large producers of steel products of preventing a run-away market is one of the strongest factory stability, and with conservative management the present prosperity promises a long continuance.

Yours very truly,

JOHN C. SCHMIDT,
President.

THE PIKE MFG. CO., Pike, N. H., say: We are beginning the New Year with an unusually large number of orders booked for January and February shipment, and are anticipating the largest year's business we have ever had. At the same time we would not be greatly surprised if the financial situation became such as to hamper trade to some extent; though with the farm produce now in the hands of farmers, and a generally high price being obtained, we cannot believe that a financial upheaval in Wall Street will affect the general commercial business for any great length of time. Wishing you the compliments of the season, we are,

THE PIKE MANUFACTURING CO.

OHIO HARDWARE ASSOCIATION.

The coming meeting at Canton of the Ohio Hardware Association promises to eclipse any former convention in the way of a program full of practical interest. On Wednesday, Feb. 28th, they will have W. C. Holman—editor of "Salesmanship"—in his lecture on "Hardware Salesmanship." This is a lecture especially prepared for retail Hardware merchants, and is full of practical pointers. Mr. Holman is an expert in his line—has had a wide experience and it will be a great treat to the Hardware merchants to listen to him in his splendid lecture. The great Auditorium Building in which the meeting will be held is ideal for the purpose of a Hardware convention, especially with the exhibit feature added. Space is reported as going very rapidly and the indications now are that they will not only have the largest number of retail Hardware merchants ever assembled in Ohio, but they will have at the same time the largest number of exhibitors ever present at any retail convention. The Canton people are making great preparations for the entertainment of the Hardware visitors. No retail merchant can afford to miss the 1906 convention.

IOWA RETAIL HARDWARE ASSOCIATION.

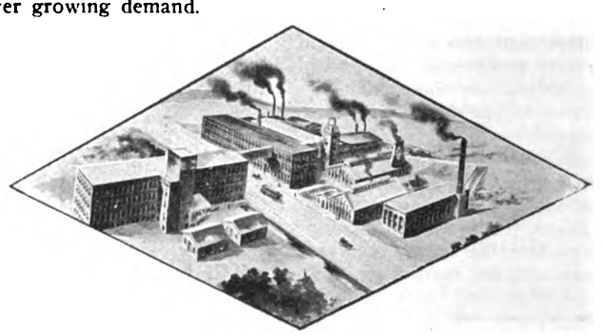
The Eighth Annual Convention, which convenes in Des Moines, February 14, 15 and 16, promises in many ways to be of statewide interest. President Vincent in his announcement in the Official Program, assures the membership that the general discussions will be made a prominent feature of the meeting. This part of the programme is in charge of a special committee consisting of W. M. Orcutt, Sioux City, Chairman; F. R. Currie, Mason City; F. P. Rollinger, Afton; F. B. Woodruff, Knoxville.

Among the special features of the programme will be addresses by President Bogardus of the National Retail Hardware Association and President Wright of the National Hardware Association. Mr. Miles, member of the Joint Committee, will give an illustrated presentation of important facts and figures, using a stereopticon to bring out the prominent features of this address.

Prof. Conway MacMillan will give an illustrated lecture on "The Advertisement." He is an advertising expert and this feature of the programme promises to be of great value to the Association.

Another new feature of the programme will be the School of Practical Salesmanship, conducted by some of the best known Hardware people of the State. The various subjects presented will be placed upon the platform, thus making the presentation as realistic as possible. Manufacturers, jobbers, traveling salesmen, as well as Hardware merchants will be invited to take part in the discussions. The following topics and speakers are announced:

STOVES—C. F. Schmidt, Marshalltown.
FURNACES—J. F. Doty, West Liberty.
HAY TOOLS—C. E. Haas, LeMars.
PAINTS—S. R. Miles, Mason City.
BUILDERS' HARDWARE—H. S. Vincent, Ft. Dodge.
FIELD FENCE—L. C. Abbott, Marshalltown.



The Association will be entertained one evening by the Des Moines Hardware Club.

Another new departure of the Convention will be the Exhibits, which are to be under the direct auspices of the Association officers, as referred to by us in last issue.

The Iowa Association now numbers about six hundred members and a large addition of new names is promised at the Annual Meeting.

THE HOME OF NEW DEPARTURES.

Having already a large and up-to-date plant for the manufacture of Rotary Door Bells and Push Button Door Bells, as well as New Departure Coaster Brakes, the New Departure Company of Bristol, Conn., is adding to its present facilities by a new and spacious building, equipped with the latest machinery for turning out its product in still larger quantities to meet the ever growing demand.

THE HOME OF NEW DEPARTURES

The demand for New Departure Brakes has so grown in England and Continental Europe, that this company had to establish a factory in Berlin, Germany, as well as a branch office to handle their business abroad more expeditiously.

The New Departure Company's name is fitly chosen. Their Door Bells and Push Button Door Bells are, indeed, a radical departure from any other rotary door bells on the market. They can be fitted to any door or casing. They do away with batteries or wiring, and, if properly put up, need no attention.

Another great advantage of New Departures is the material from which they are made. Instead of being made from iron or steel, they are made from bronze, the most suitable material to stand out-door exposure indefinitely giving therefore lasting satisfaction to the users.

New Departures are not only well made, they are well advertised. The Company spares no pains in supplying both jobber and dealer with attractive, up-to-date literature for generous distribution; their New Departure Coaster Brakes and Door Bell Hangers are particularly striking. All advertising literature is furnished the trade, with the name of each dealer imprinted, free of charge.

PROFIT MAKING LINES

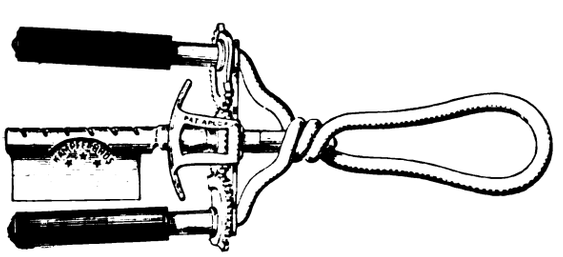
THE STAR SAFETY RAZOR AND OTHER DEVICES.

"There is no better way to judge the future except by the past." —*Daniel Webster.*

Such a test is applicable to both men and things. It finds application to Safety Razors in general—to the Star Safety Razor in particular.

Placed on the market twenty-six years ago, it is the pioneer of all safety shaving devices. It has over five million users.

Ever since 1886 the Star Safety Razor has carried away the Highest Awards; at the Mechanics Institute, 1886; at Paris in 1900; Pan-American 1901; St. Louis Exposition 1904; Portland Exposition 1905; and at the American Institute where it received three medals.

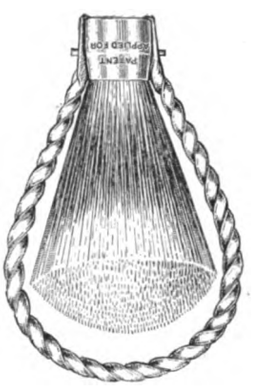


THE STAR SAFETY RAZOR.

Oliver Wendell Holmes pays it a glorious tribute in "Our One Hundred Days in Europe" where he speakes of the Star Safety:

STAR BLADE.

"It proved to be a most valued daily companion, useful at all times, never more so than when the winds were blowing hard and the ship was struggling with the waves."



STAR STROPPING DEVICE

He compares it with a "reaping machine" which does its work with thoroughness, rapidity, security and facility. The use of the "Star" had transformed shaving for him from an "irksome task" to a "pleasant amusement" and that the Star enabled him to shave with "reckless boldness."

STAR BLADES.

Star Blades are hand-forged from high grade special refined bar steel. Each blade is hardened and tempered individually. They are concaved and honed by hand on scientific principles; this is the old fashioned process, it cannot be improved upon. In addition to this, the Star Safety Razor Blade is a magnet in itself—will never irritate the skin and will retain a keen cutting edge; age improves its keenness and cutting qualities.

Besides manufacturing the Star Safety Razor, Kampfe Bros. are putting on the market the Star Interchangeable Razor, the Star Stropping Device, the Star Diagonal Grooved Leather Strop as well as the Star Safety Corn Razor, each of which show the same thoroughness in construction, fineness of finish and quality as characterizes the Star Safety Razor.

FOLDING LATHER BRUSH.

No. 32 A. This badger hair folding brush can be hung up to remove all moisture from the bristles, or condensed for the convenience of travelers.

THE REPAIR DEPARTMENT.

which Kamfe Bros. maintain grinds, polishes, hones and sets Star Blades and effects and other repairs to "Star" Shaving devices, which makes this department indispensable to dealers whose customers' Safeties, etc., are in need of repairs.

STAR DISPLAY CABINET.

✤

A cheerful temper, joined with innocence, will make beauty attractive, knowledge delightful, and wit good-natured. It will lighten sickness, povery and affliction; convert ignorance into amiable simplicity, and render deformity itself agreeable.—*Addison.*

HOW TO HANDLE HARDWARE AND PAINTS PROFITABLY.

The primary object of all in engaging in business is to make money. That's the chief aim and the goal of man's ambition. We cannot all be Rockefellers, neither would we want to, but with intelligence, determination, aggressiveness, progressiveness and concentrating our efforts on the lines we handle, we can achieve success; there's no doubt of it whatever.

The intelligent Hardware dealer of the twentieth century realizes that Hardware and paints make one of the best paying combinations known, in fact the two businesses go hand in hand. The average citizen of to-day has been educated to believe that where he buys his Hardware, he can also purchase his paints, and in view of this fact it behooves the Hardware man who is not handling paint in connection with his other lines to think, and think deeply, on this subject.

This article is specially written for those who do not carry paints, to point out to them the opportunities which a paint line offers for increasing the income and at the same time furnishing a profitable diversion from the dry routine of the ordinary Hardware store.

The ready mixed paints of to-day are not what they were thirty or thirty-five years ago. There are a number of reliable brands on the market that reflect great credit upon the manufacturers, and as mixed paints are no longer a novelty but staple merchandise, why not incorporate them in your business and reap the benefit of the profit from their sale? It comes strictly within your province to handle these goods. The public expect you to carry them in stock and it is to your interest to do so.

Before stocking up with paint, however, you should make comparisons, delve into the subject, turn on the searchlight, get positive facts and find out what advertised brands offer the greatest advantages. Buy the paint that appeals to you as being the best absolutely, after the evidence or reasons why have been given. Don't be deceived by the alluring and tempting offers of the amateur and inexperienced manufacturer who promises big things in order to effect a lodgment of his goods. Don't take any chances but get material made by a responsible and reputable manufacturer.

While there are some good brands on the market, there are numerous others which instead of helping to build up a lucrative paint business will positively drag you down; therefore, extreme care is necessary in seeing that you get only reliable material.

The wise man realizes that he can only buy one hundred cents worth for a dollar, and if anybody offers you more than this for your money, drop him like you would a hot potato. It is up to you to make a good selection in order that you may build up a large paint trade, and you can do it if you will use a little judgment. The "apparel," you know, "oft proclaims the man," and the paint a dealer handles will either make or debase his reputation.

Modernism demands that you keep abreast of the times, and if you wish to be successful, you must concentrate your efforts on seeing that you get nothing but the best paint—that which will please and satisfy your trade, for a satisfied customer is the best advertisment any one can have. He tells his friends and refers them to you and they in turn tell theirs and so it goes *ad. lib.*, hence as a man is judged more or less by the company he keeps, so is your business judged by the kind of goods you handle.

The Lucas Tinted Gloss Paint has been on the market for over thirty years with ever increasing sales and if it did not possess those necessary essentials that go to make up the ideal paint, it would never have survived. To-day it occupies a well-merited position as a Beautifier, Preserver and Protector of any property to which it may be applied.

We cannot too strongly recommend it to careful buyers or those who are desirous of getting the very best that science, knowledge and skill can suggest as being the most durable. It is made from the choicest materials and absolutely pure linseed oil and mixed in such a manner as to insure the greatest degree of permanency. We challenge any one to produce a better article, either hand or machine mixed.

There is absolute safety in buying this brand because back of it is a reputable and responsible house.

JOHN LUCAS & Co.
Philadelphia, New York and Chicago.

"CHARLIE" WIELAND.

Charles Wieland, 147-149 Chambers Street, New York, is noted as being one of the largest handlers of discarded patterns of any goods in the Hardware line, or of so-called "Seconds," that is to be found in the Hardware wholesale trade. Mr. Wieland makes a specialty of cleaning out a manufacturer's stock of obsolete patterns no matter how large may be the stock; making a job lot of goods; and controlling as he does the greatest outlet for making sales, easily disposes of every stock of goods thus acquired. Scarcely a Hardware dealer in any of the states and Canada visit New York that doesn't make it his duty to call upon "Charlie Wieland," who invariably has something that he can sell at a good profit. The business was established in 1882 under the most primitive conditions in Grand Street near the East River. It increased in importance rapidly and was moved to the Bowery, then growing larger as his fame increased he moved to his present address, until at present it is contained in two buildings, a total of 16 floors, many of which run the entire length of the block to 129-131 Reade Street. No stock is now too large for Mr. Wieland to handle if offered by the manufacturer low enough in price to be absorbed, as his facilities for disposing of goods by catalogues and road salesmen to Hardware dealers—jobbers, as well as retailers—is unsurpassed.

MILLIONS OF CALENDARS.

In January everybody is on the lookout for one of those free calendars with which, during the month, the mails are crowded. In Philadelphia 12,000,000 calendars are made annually for free distribution. In New York 25,000,000 are made. Some 40,000,000, altogether, are manufactured and distributed, as advertisements, over the United States every year.

There are a half dozen firms in this country (one in Newark and another one in Philadelphia) that all the year through make nothing but calendars. Then there are countless printing, lithographing and engraving firms that carry on calendar-making as a side line. Over $10,000,000 worth of calendars are given away annually, and these range in cost from $10 a thousand to $500 a thousand. Life insurance companies have been the most lavish distributors, and there is one such company that gives out every year 4,000,000 calendars. A maker said yesterday:

"I have an annual output of 1,500,000 calendars. I sell these to the jobbers, who sell them in their turn to the consumers—that is, to the butchers, millers, grocers and so forth, who distribute them as an advertisement to their patrons. I make half-tone and colored calendars. The designs on them are of a pleasing but general nature, as you see. Here is a picture of a snow scene. Here is a modern man-of-war. Here, again, is a pretty girl. These would serve as calendars for the advertisement of any kind of business. Underneath the pictures are blank spaces, for the insertion of a name, address and puff.

"Such calendars as these, not in any sense made to order, are the cheapest on the market. They cost from $10 a thousand up to about $75. Of a general nature, as I say, they are suited to any purchaser. Here, though, is a calendar that the country newspaper would tend to buy, because there is a picture on it of a bright lad selling a paper to a girl. Country newspapers are excellent customers. They give many a 10,000 lot order.

"And here," said the dealer, "is an idea of my own—the religious half-tone calendar, I brought it out last year, and it had a good sale in the West."

The calendar was a very religious one. The crucifixion occupied one panel, the annunciation another, and a host of angels the third.

"It's an original idea, the religious half tone. It has sold very well indeed among the undertaking trade, said the dealer.

A maker of calendars to order said:

"Insurance companies and brewers get the most expensive calendars. The industrial companies get particularly expensive ones. They give them away to the people whom they insure on the instalment plan, at the rate, you know, of 10 or 20 cents a week. Those people prize the calendars, and make them the chief ornaments of their little parlors.

New York and Philadelphia are the leading calendar-making towns of the country, and Coshocton, O., comes next. Coshocton is a town where advertising novelties are made, a town of clean, neat factories that produce wooden rulers, memorandum books, tin signs, banners and calendars. Coshocton turns out 4,000,000 calendars a year.

"In this business 90 per cent. of the calendars made are for free distribution. The calendars without advertisements, that are sold in the stores, scarcely count. I suppose that in Philadelphia during the Christmas holidays some $10,000 worth were sold against millions that were given away as advertisements.

"There is practically but one kind of calendars made, the panel, with the pad of the months set in a prominent place on it. This is the most convenient calendar, and nothing in the way of an advertisement could beat it. The owner of this calendar has before him, from the beginning to the end of the year, the name of the firm who gave him it, and daily finds himself looking at this name.

ALWAYS A YEAR AHEAD.

"The calendar business is always a year ahead of the times. I am just completing my line of samples for 1907, and my salesmen will start out to sell the 1907 calendars in March. The business requires plenty of capital and plenty of storage room, for, though

Digitized by Google

I shall be making calendars all this year, I shall have to hold them for delivery until December, and payment on them will not be due me until next year. That is everywhere the rule.

"The business has offered for some time a good field to art students. These young men and women have learned that the lithographers are always on the lookout for good designs for calendars, and that they pay good prices. Young artists can't always be painting on canvas, nor can they always be making magazine illustrations, for, though their work may be really excellent, the painting and illustrating field is overcrowded—the supply exceeds the demand. Some of my best calendars for 1907 were made by art students, who have found in this work a very pleasant way of supporting themselves until the expected time when they will be famous as painters and illustrators.

BUSINESS IS 30 YEARS OLD.

The distribution of calendars for advertising purposes began thirty years ago in a small way. Previous to that time almanacs had been distributed by the great patent medicine firms. The almanac fashion was started in America by Benjamin Franklin, whose "Poor Richard's Almanac" was not, however, given away, but sold. Some ingenious medicine man got the idea from "Poor Richard" of the great advertisement a free almanac would be to him; he put the idea in execution; others followed him and then, by degrees, everybody came to giving away calandars instead of almanacs. Thus the father of the present huge calendar business was, in a sense, Benjamin Franklin, with his "Poor Richard's Almanac."

RETAIL HARDWARE DEALERS' ASSOCIATIONS.

Annual Meetings in January and February.

INLAND EMPIRE IMPLEMENT AND HARDWARE DEALER'S ASSN:
President, C. L. Butterfield, Moscow, Idaho.
First Vice-president, E. E. Lucas, Davenport, Wash.

President, Taylor Frier, Louisiana.
Vice-President, Wm. H. Hahn, St. Louis.
Secretary-Treasurer, Frederick Neudorff, St. Joseph.
Annual meeting, Hannibal, Mo., February 20 and 21.

COLORADO RETAIL HARDWARE ASSOCIATION:
President, A. B. Meservey, Colorado Springs.
Vice-President, Adolph Unfug, Walsenburg.
Secretary-Treasurer, Davis Barkley, Fort Collins.
Annual meeting at Adams Hotel, Denver, Feb. 7 and 8.

WIRE NOTES OF UNKNOWN EUROPE.

In far-away Montenegro the great trade road to the capital, Cetigne, is noted for the vast quantities of wire which the heavy wagons bear up the road, and into the interior.

Over Bosnia, which, less than thirty years ago, was more benighted than is Turkey to-day the telegraph wire now stretches, even along such lonely trails as that from Benjaluka to Rijeka.

At Budapest American "flycatchers" are advertised by Hardware stores, and these are essentially bottles, built up of wire.

At the great storage elevators, on the outskirts of this city, wire composes one of the leading articles of stock.

Near Belgrades in Servia, in the hop-fields, there are placed what seem to be telegraph poles, and these are joined by heavy wires from ground to top, for the vines to twine upon.

At times of public demonstrations, processions and the like, at Belgrade, cables are not stretched along the sidewalks to hold back the crowd, but, instead, cordons of the military, in single file alternate with equal stretches of the populace at the curb.

OUR CANADIAN LETTER

By Our Special Correspondent.

TORONTO, DEC. 30, 1905.

THE YEAR'S BUSINESS

Hardware jobbers are busy stock-taking, most of the travelers having been taken off the road about a week before Christmas. Many houses endeavored to commence stock-taking betore Christmas but few were able to do so this year on account of the heavy business transacted right up to the holiday. Trade was affected somewhat by the open fall and lack of sleighing but there are few who have complaints to make so great was the volume of business transacted. With the possible exception ot stoves, merchants throughout Ontario wil carry over much lighter stocks of goods than for several years past, and this in the face of one of the best years Canadian jobbers of Hardware have ever experienced. It is too early to quote any figures but it is safe to say that in no previous year has a larger trade been done in all lines of shelf and heavy Hardware as during the past season.

In Toronto, Winnipeg and Vancouver the amount of building done has been enormous; each of these cities experiencing a building boom, behind which, however, there appears to be no reason to look for a reaction as the establishment of industrial plants and the influx of immigrants into New Ontario, Manitoba and the Northwest Provinces is sufficient to warrant the enormous construction record. In Montreal and Eastern Canada there has been a steady growth, also, while in the west the smaller towns and cities have almost as great an expansion to show as Winnipeg.

Outside the large cities the plumbing trade in Canada is practically in the hands of Hardware merchants and this has been the largest year's trade ever done in plumbers' supplies. Roughing in work is still going on and there remains enough finishing work to do on inside jobs to keep the trade busy until Spring opens. Many classes of material have been very scarce owing to the heavy demand.

The Paint Manufacturers also report the greatest year's business on record. Buying has kept up to the present, with a slight falling off just before Christmas. The establishment of a lead corroding works at Montreal this year and the imposition of an increased duty on white lead, with the rapid rise in the lead market, has made the trade look for higher prices in 1906 and the wise retailers have been laying in large stocks.

Reports from the Stove Manufacturers are not as satisfactory. While most of the founders have done a larger trade than in former years, some produced more stoves than they were able to sell, retailers finding the open fall a poor one for business. One large Toronto manufacturer reports that he will carry over about $20,000 more manufactured stock than in any season for five years past. An important factor in the Canadian stove trade is the competition of American manufacturers for the Northwest trade. Founders in Chicago and St. Louis can produce cheaper and ship at a closer rate to Winnipeg than producers in Eastern Canada and as there are thousands of American settlers in the Northwestern Provinces, the sale of American stoves in that market is such a menace to the Canadian trade that there is a growing demand for an increase in the duty from 25 to 35 per cent.

The Sporting Goods trade also shows a satisfactory increase, stocks of fishing tackle and shooting materials in the jobbers' hands to be carried over being very small. American rods and baits have found an increasing demand in Canada, while American guns, rifles and athletic goods meet with a larger sale every year. In Canada there has been a revival in tobogganning and snowshoeing, and the sale of these goods this season has been very large.

OUTLOOK FOR COMING YEAR.

The outlook for trade in 1906 is bright, as the large amount of railroad building in hand and the many new industries being established in various parts of the country means heavy buying of Hardware lines.

One impediment to the trade is the taxes imposed upon travelers by the various provincial governments in order to raise funds for their depleted treasuries. The $25 tax charged travelers doing business in Prince Edward Island has proved annoying, but as the market is small there has not been a loud outcry against it. During the past year, however, British Columbia and Quebec have passed laws charging licenses and the opposition to this new legislation has been very strong. British Columbia charges $50 every six months for any traveler who does not reside in the provinces, representatives of Eastern Canadian houses being taxed as well as United States concerns. Quebec, on the other hand, charges $300 per year, the assessment being levied only on representatives of non-Canadian companies who have not established a permanent office in Quebec. These taxes have been universally condemned by the travelers' associations, manufacturers and wholesalers' organizations, etc., but the Dominion government has not disallowed this legislation, although it is clearly in restraint of trade between the provinces.

The great impetus given the mining industry through Canada by the discovery of new fields and the development of the steel rail industries at Cape Breton and the "Soo," also means much to the Hardware trade. The discovery of rich silver and cobalt ores in New Ontario and the opening up of this country with railroads has provided an enlarged market for Toronto and Montreal jobbers. A new smelter is under way at Sudbury and another is proposed at Cobalt.

At Sydney, N. S., the Dominion Iron and Steel Company has just completed an order for 25,000 tons of steel rails. Their mill has been in operation for 21 months, turning out an average of 7,000 tons of pig iron monthly and receiving $223,000 in bounties from the Dominion Government in that time. The Lake Superior Corporation's plant of the "Soo" is also busy, having about 125,000 tons of rails under contract. A new steel rail mill is to be established in British Columbia next summer. Car building is also being done on a large scale. The Canada Car Company recently opened a million-dollar plant at Montreal and the Simplex Railway Equipment Company has just been organized to establish a $500.000-plant at the same place. Besides these there are several older established concerns making locomotives and cars.

THE EXPANSION OF TRADE.

Higher prices for flaxseed has allowed the Canadian crushing mills to resume operations. The low price of linseed oil a year ago caused all the plants to close down.

The Fairbanks-Morse Canadian Manufacturing Company's plant in Toronto is nearing completion and the coming summer will see a large production of their goods.

The Disston Saw Company are also building a large factory in Toronto and will have it in operation in a few months.

The Capewell Horse Nail Company established a plant in Toronto a year ago and recently purchased the Maritime Nail works at St. John, N. B. The manager of the latter plant, M. Eben Perkins, has now resigned, however, in order to establish a new plant which will probably be located at St. John.

Sargent & Company, New Haven, Conn., are announced as looking for a site in Ontario to locate a $2,000.000 plant for the manufacture of builders' hardware and specialties.

A representative of the Independent Hardware Company, of Chicago, is looking for a site for a factory at Stratford, Ont.

The Patent Roofing Company, Lafayette, Indiana, are organizing a branch company at Brantford, Ont., where it is proposed to establish a factory.

The Banwell-Hoxie Wire Fence Company, a branch of a Michigan concern, has installed a plant in a new factory at Hamilton. The company is capitalized at $100.000.

The Carriage Mountings Company, Toronto, have branched out into the manufacture of nickel plated bath room fixtures.

The Waderlow Iron Works, Leamington, Ont., have commenced the manufacture of valves. Some of those interested were formerly with the Lunkemheimer Company of Cincinnati.

The Winnipeg Paint and Glass Company, and G. F. Stephens & Co., paint manufacturers, Winnipeg, are building branch warehouses at Calgary, Alberta.

The Plymouth Binder Twine Company have commenced work on their new million-dollar plant at Willard, Ont.

These are only a few of the recent industrial expansions connected with the Hardware trade. The putting into operation of the "Dumping Clause" of the Canadian tariff is undoubtedly the reason for much of the move on the part of American manufacturers to establish branch plants in Canada. In one case, however, the characteristic enterprise of American captains of industry was absent when the Shovel Manufacturers of the United States, according to Special Agent C. M. Peppar of the U. S. Government, accepted a cash bonus to stay out of the Canadian market. The Canadian manufacturers for this payment had the field to themselves and by making their brands popular have now made it practically impossible for United States competitors

Digitized by Google

to get a share of the business. The product of the two Canadian shovel factories at Hamilton and Peterboro, Ont., will be on the market this season.

NEWS OF HARDWARE TRADE.

The recent death of Mr. Fred W. Morse, of the Miller-Morse Hardware Company, Winnipeg, one of the best known jobbers and commercial men in Western Canada, was particularly sad, he being only about 45 years of age. Mr. Morse had been overseeing the work of constructing a new warehouse and overwork brought on heart trouble.

Mr. J. H. Lyons, for the past nine years with Sydney, Sheppard & Co., enameled ware manufacturers of Buffalo, has accepted a position on the traveling staff of Messrs. M. and L. Samuel, Benjamin & Company. This firm's warehouses were burned out in the disastrous fire of April, 1904, and they have recently moved into a newly-built warehouse.

The Collins Manufacturing Company, Toronto, have put on the market a combined snow and ash sifter, the spoon of the shovel being a wire screen. It is meeting with a fine sale. The metal ash sifters made by C. N. Cutts & Co., Toronto Junction, are being carried in stock by dealers in all parts of Canada.

A new soldering machine has been invented by F. L. H. Sims, of the Siche Gas Company, Toronto. The new machine runs back and forth on a metal track, distributing the solder evenly and allowing a boy to turn out hundreds of articles each hour.

Mr. Pelig Howland, head of the wholesale Hardware firm of H. S. Howland Sons & Company, Toronto, returned a fortnight ago from a trip throughout Western Canada and the States. He reports that the Western business is being done more on a cash basis than in the past and trade has been very satisfactory in most districts. In an interview at Kansas City he was credited with saying that he intended establishing a branch of his business at Denver. This was a misstatement as, if a branch is to be established anywhere, it will be in the Canadian Northwest.

TRADE ORGANIZATIONS.

Much interest is being taken in the organization of trade associations in Canada. There is no strong retailers' associations anywhere outside of Manitoba and the Northwest Provinces, where an association was formed in the autumn of 1904 on similar lines to those in the United States. So far, however, the association has not adopted the Mutual Fire Insurance feature, although a committee will report upon the advisability of doing so at the coming convention at Winnipeg. The Western Retail Hardware Association maintains a permanent secretary, J. W. McRobie, of Winnipeg, who has covered nearly every portion of the three provinces of Manitoba, Saskatchewan and Alberta, enrolling about 90 per cent. of the trade into the Association's membership.

There is a strong movement in Ontario to form a similar association of retail Hardware men and a preliminary convention is to be held in April. With the trade unorganized the price-cutting evil grows steadily worse; selling direct to building contractors by jobbers is rampant, and each individual dealer is at the mercy of the railway and insurance corporations. With an association the credit system would be regulated and a collection department established.

The wholesale and manufacturing branches of the trade have been well organized, jobbing associations existing in Ontario and Quebec, the Maritime Provinces and British Columbia.

"COMBINE" INVESTIGATIONS.

During the past summer there has been much controversy between the Master Plumbers and the Plumbing Supply Association. In April last one supply house was charged with refusing to sell goods to a builder. The case was held in abeyance in the courts and the Supply Association, under threat of the abrogation of the duty on plumbing materials by the Dominion Government, broke the agreement they had been working under not to sell goods to any but members of the Master Plumbers' Association. Internal troubles then caused several of the latter body to resign but on doing so the Journeymen's Union, working in agreement with the Masters, called out all union men from the seceder's shops. The case finally got into court, a charge of conspiracy being laid against the officers of the Union, the Master Plumbers and the Supply Association. After passing through the police court four cases were tried by a judge, all the accused being found guilty and fines of from $250 to $500 being imposed upon the individuals and $5,000 each upon the Master Plumbers and Central Supply Association. In addition to this, further charges were laid against the entire membership of these two bodies and about 120 of the 160 indicted have been committed for trial in January. Other charges of fraud are being pressed against various master plumbers who added certain amounts to tenders on jobs they secured, the extra sum being divided up amongst the unsuccessful tenderers for the contract. The whole plumbing trade in Toronto has been demoralized by the trials.

During the course of the plumbers' investigation the Prosecuting Attorney, in search of evidence, raided the offices of James Hardy, secretary of the Canadian Wholesale Hardware Association, who is also secretary of thirty or forty trade associations of manufacturers, and at one time was secretary of the Plumbing Supply Association. This brought the entire Hardware trade within the sphere of the court and the daily newspapers were full of sensational articles regarding combines in this, that and the other branch of manufacture. Finally, the matter, after being allowed to drag along until the plumbers had been convicted, simmered down to specific charges being made against the members of the Canada Tack Manufacturers' Association, with the promise that in the event of conviction about thirty other associations would be proceeded against.

The case against the tack manufacturers came up in the Toronto Police Court on December 28, and, after the minute books had been put in evidence and identified by witnesses, the investigation was adjourned until after New Year. The information sworn out charged "That James Hardy and Thomas Jenkins, both of Toronto; E. J. Fry, J. Mowat, J. C. Robertson, W. Bruckoff and E. Perkins, of the Portland Rolling Mills Co., St. John; H. M. Blacklock, A. H. Huff, W. McMaster and A. F. McPherson, Montreal Rolling Mills Co., Limited, Montreal; F. W. Knowlton, United Shoe Machinery Co., Montreal; F. H. Whitton, the Ontario Tack Co., Hamilton; Jas. H. Peck, T. Edmund Peck, W. T. Cummings, E. Sinclair and M. A. Irwin, of Peck-Benny Co., Montreal; Jas. Pender, St. John; W. W. Near, the Pillow Hersey Co., Guelph; G. Boyd, G. A. McAlgy and R. Hersey, Pillow Hersey Co., Montreal; in the years of our Lord, 1892 to 1905 at the city of Toronto, did conspire, combine and arrange, the one with the other, and others of them, and with the Portland Rolling Mills Co., Peck Benny Co., Pillow Hersey Co., Montreal Rolling Mills Co., the Ontario Tack Co., the United Shoe Machinery Co., Jas. Pender & Co., and W. T. Woodall, and other persons and corporations to the complainant unknown, to duly limit the facilities for producing, manufacturing, supplying and dealing in tacks."

In the course of the preliminary examination the charges were dropped against W. W. Near, M. A. Irwin and R. T. Sinclair, employes of the Pillow-Hersey Company; J. Mowatt, now in British Columbia; James H. Peck, dead; A. F. McPherson, not served; R. Hersey, in Chicago; E. Perkins, in Massachusetts, dead.

While there is no parallel between the cases against the plumbers and the Hardware men, the bringing of the latter into court has caused a commotion in the Hardware trade. The jobbers and manufacturers feel that it is an outrage to bring them hundreds of miles to appear in a police court to answer trivial charges. From the inception of commerce men have banded together in order to secure a living profit and so they will do until the end despite the efforts of imitators of Attorney Jerome. On the other hand, many retailers welcome the investigation, believing that it will clear the air. One complains that in order to get the loyalty discount of 12½ per cent., he had to buy $500 worth of tacks when his requirements were only for $300 worth.

The outcome of the investigation will be looked forward to with interest by all interested in the Hardware trade.

"TAKE OFF YOUR HAT TO THE MYERS."

Few phrases in connection with the business have been so thoroughly advertised during the past year as the one quoted above. The cut illustrates the heading of a large poster gotten out by F. E. Myers & Bro., Ashland, Ohio, and which so effectively and impressively carries out the phrase that we show it

here. The Myers & Bro., annually, with the compliments of the season, mail to all their customers a catalogue poster on which is delineated all the cuts shown in the complete catalogue, and by its hanging up in the store frequently enables the dealer to supply a want from some of his agricultural friends and make an extra profit. It is one of the few posters distributed by the manufacturer that may be relied upon to stimulate trade. The reader of HARDWARE who failed to receive one should write to the above address and obtain one.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

EMBEZZLEMENT.

QUESTION.—If an employee is given a $200 note to have discounted and goes to the bank, discounts it and then wrongfully keeps the money, is he guilty of theft?

REPLY.—Not by the common law, because every larceny or theft involved a wrongful interference with possessions, and the employer never had possession of the cash obtained by the employee from the discount of the note. But by statute in the various states the taking of property under such circumstances by a clerk or employee is made criminal and is described by the technical name of embezzlement. Some states, such as New York, recognize no distinction between embezzlement and larceny, and in these states the employee would be guilty of larceny.

HUSBAND AND WIFE—TENANCY BY THE ENTIRETY.

QUESTION.—Lands were deeded in the State of New York to A and B, husband and wife. The deed did not state what their respective shares were to be. How do they own the land?

REPLY.—They own it as tenants by the entirety. By this technical expression is meant that each is considered as owning the whole of the land, so that in the event of the death of either, his or her interest vests in the other by survivorship. This is because at the common law husband and wife are considered as legally one person. But during their joint lives they are entitled to share equally in the use or proceeds of the land. If the husband should sell his interest in the property during his wife's lifetime, the purchaser would be a tenant in common with the wife. If the husband should die before the wife, however, under such circumstances, she would get all the land by the principle of survivorship, and the purchaser's title would be defeated.

CRIMINAL LIBEL—TRUTH AS A DEFENSE.

QUESTION.—Can a man be held criminally liable for publishing scurrilous or offensive things about another? Is he excused if they are true?

REPLY.—If the publication is only verbal, the speaker is not generally criminally liable. But if the words are written or printed and their natural tendency is to hold up to public hatred, contempt or ridicule the person against whom they are addressed, then their publication constitutes the offense of criminal libel. The common law was that the truth of the charge was no defense of a criminal prosecution for libel. This rule has been generally changed in the United States, and it is frequently enacted by statute in the several states, as in New York, that the truth of the words written is a defense to a charge of criminal libel, if they were published with good motives and for justifiable ends, but not otherwise.

SALE OF WATCH—BUYER GETS NO BETTER TITLE THAN SELLER HAS.

QUESTION.—"A" loaned his watch to "B". "C", a friend of "B's", seeing it on day when "B" had taken it out to see what time it was, admired it and asked "B" what he would take for it. "B" said $100 and "C" bought it and paid him that amount, honestly believing that "B" owned it. "A" learning that "C" had the watch, demanded it of him, but "C" refused to give it up. Who is entitled to it?

ANSWER.—"A" is entitled to the watch. This case comes within the rule that an individual can sell or transfer no better title to property than he has. It is well established that a person to whom property has been loaned and who has possession of it, cannot give a good title thereto to a purchaser, although the latter acts in good faith and parts with value, without knowledge of the want of title of his vendor, or that third persons have claims upon the property. There are some exceptions to this rule in case of cash or negotiable instruments, but the case you state does not come within any of the exceptions.

✥

Visitor—Don't you wish you had a little brother, Bobby?

Bobby—Well, 'long about peach-time I think one little boy in a family is enough; but 'long about spanking-time there ought to be two of us.

RECENT TRADE PUBLICATIONS.

CRANDALL CUTLERY CO., Bradford, Pa., have recently published an exceedingly interesting and instructive brochure which contains illustrations and descriptions of a very complete line of Shears, Scissors, Razors, Pocket Knives, Razor Strops, and Dog Collars. They state that Crandall Shears and Scissors are so well known as to need no introduction, and that each article branded "Crandall," is the best they make, fully warranted and exchangeable if not perfectly satisfactory. In regard to their Razors they call attention to the fact that the blades are hand hammered on an anvil from S. & C. Wardlow English steel and hand finished throughout, and are honed and set ready for use. The blades of all their Pocket Knives are completed with the "Radium Electric" finish which they claim gives them a superior finish to any on the market and also places them in condition so that they will not rust or tarnish. For further information, prices, etc., write for this very interesting and useful catalogue.

THE DAVID MAYDOLE HAMMER CO., Norwich, N. Y., are presenting to the trade an exceedingly artistic catalogue of the Maydole Hammers. They state that since 1901, when the last edition of this catalogue was issued, they have greatly enlarged their works, increased their manufacturing facilities in all departments, and added many new numbers to the variety of Hammers listed then, the regular line now comprising thirty-four styles, sizes and finishes. They call attention to the fact that the Maydole Hammers, first manufactured over sixty years ago, still hold their justly earned and unrivaled reputation for superior quality and excellence in all respects, and it is their firm and steadfast purpose, now as in the past, that, through the utmost painstaking and care in manufacturing their goods, the name Maydole shall continue to represent the highest quality in Hammers. The catalogue is profusely illustrated with very fine cuts and contains carefully prepared Alphabetical and Numerical Indexes. Copy will be gladly sent to interested parties upon request.

RICHARD ECCLES COMPANY, Auburn, N. Y., have favored us with an eighty-page illustrated catalogue and price list of Carriage and Wagon Makers' Forged Irons. The catalogue is finely printed on excellent quality paper and contains a large number of very carefully prepared illustrations. Prices and detailed descriptions are given of all the parts and the book cannot fail to interest anyone giving same a careful perusal. They state as follows: "We always have on hand a large stock of all the goods shown in the catalogue, ready to ship promptly on receipt of order. We also make many pieces which are not shown in the catalogue, and are constantly adding to our line; also a great variety of Special Forgings, and would be pleased to quote on any Forging desired." Write for catalogue.

THE LORILLARD REFRIGERATOR COMPANY, 23 West 34th Street, New York City, N. Y., are distributing to the trade a very attractive pamphlet, describing, illustrating and pricing the Lorillard Refrigerators, which they claim are used exclusively in all leading hotels, clubs, institutions, families and the United States Navy. The Lorillard goods, including Family Refrigerators of several styles and sizes, Combination, Butlers' Pantry, Office or Nursery, Ice Cream, Cut Meat, and Wine Refrigerators, are constructed to meet the present demand of housekeepers and hotel and restaurant proprietors that every department of their establishment should conform to modern sanitary laws. In introducing these goods to their patrons they state as follows: "The Lorillard Refrigerator is recognized and accepted by all the leading architects and sanitary experts as the only practically perfect Refrigerator now constructed. It is the perfection due to twenty-five years close application and study to the science of refrigeration." Catalogue may be had free upon request.

ALUMINUM & WHITE METAL GOODS MANUFACTURING CO., 336 Broadway, New York, N. Y., are issuing a very interesting and attractive pamphlet of Advertising Novelties and Specialties in Aluminum, Brass, Nickel, Etc., which is their Catalogue No. 6. They state as follows: "Aluminum Novelties are especially adapted for souvenir purposes, because of the reasonable and artistic ways in which they may be marked in a manner suitable to any locality. Goods are made up hand-decorated, hand-engraved or printed, and if you send us a photo of any subject we will reproduce it on any flat article." A large number of articles are listed in the Index under the following headings: "Stationery," "Jewelry," "Toilet Articles," "Sporting Goods," "Smokers' Articles," "Druggist and Bar Supplies" and "Household Articles." Catalogue may be had upon request.

RECENT TRADE PUBLICATIONS.

TROW & HOLDEN, Barre, Vermont, are presenting to the trade an exceedingly attractive catalogue of Granite Tools, which is finely gotten up and artistically illustrated. They state in introducing the book: "This business was established in 1885. It is now the largest concern in this country exclusively devoted to the manufacture of Granite Cutters' Tools. It has been our constant aim to produce the best tools possible to make. To do this has meant continual endeavor to keep in advance of the times, to lead our competitors. The position we now occupy in the trade is ample evidence of our success in these efforts. Our energies are still exerted to maintain this position, and to increase our leadership." The catalogue is a handsome production and great care and pains have been taken in its preparation, warranting a careful perusal by anyone. If you are interested in Granite Tools of any description the manufacturers will gladly furnish information regarding same.

CYCLE SKATE & SPORTING GOODS CO., 37 Park Street, New York, N. Y., have recently issued a very attractive catalogue of their Cycle Skates, a copy of which has been sent us. They state their new Cycle Skates are made with frames of best cold rolled steel, which may be extended to the exact length required. The flanges that hold the rubber tire in place are secured to the threaded ball-bearing hubs by locknuts, thus making it possible to replace the rubber tires with ease. Descriptions and illustrations are given of their Girls' Half Clamp, Boys' All Clamp and Boys' Half Clamp Skates and also to their new racing skate which is the Automobile Cycle Skate. Catalogue will be gladly mailed to interested parties.

THE WHITE MOUNTAIN FREEZER CO., Nashua, N. H., have recently sent us a very attractive little booklet which is their illustrated catalogue of Ice Cream Freezers. They claim there is no feature of merit in any freezer made that has not been embodied in the White Mountain, and that the triple motion induced by the peculiar construction of the mechanism keeps the cream constantly moving and insures every particle being smoothly and evenly frozen. The catalogue is well illustrated and price lists of parts for each style freezer are also given. A few pages are devoted to describing and illustrating the Arctic Freezer, which they state is the best in the world, next to the White Mountain, and is made to sell to those who won't pay for the best. A copy of this most interesting and handy catalogue may be had upon request.

THE MICHIGAN STOVE CO., Detroit, Mich., have presented us with a very interesting and instructive pamphlet entitled "The Truth About Stoves," which is published with a view to familiarizing the reader with the important features of the "Garland" Stoves and Ranges. The book opens with an interesting article on "Heat" and this introduces the reader to the subject of Stoves in general and finally to the superior qualities of the "Garland." Attention is called to the "Expert Advice Department," opened up by this company, to aid prospective buyers in their choice of a suitable stove or range, as they have 1250 different styles, making a choice a somewhat difficult task. They state that all their literature is free, and that the Advice Department will give information free of charge. Send at once for a catalogue and take advantage of this excellent opportunity.

G. E. HALL, 211 Centre Street, New York, N. Y., has sent us a set of blotters which serve as very effective advertisers of Hall's Mineral Machine Oil. A circular accompanying the blotters states that a free sample of this oil in a neat faucet can will be supplied free of charge and there is no doubt as to its being found entirely satisfactory. It is guaranteed not to gum, and will thoroughly and properly lubricate shafting, electro motors, printing presses, sewing machines, and all ordinary machinery. Further information regarding this and other oils, also Engineers' Supplies, will be gladly furnished for the asking.

THE WHITE MOP WRINGER CO., Fultonville, N. Y., have mailed us a unique little pamphlet describing and illustrating the use of their high grade Mop Wringers. They state that the Wringer may be instantly and easily attached to any pail or removed, and that so little effort is required for wringing that a child can easily perform the work. Catalogue may be obtained for the asking.

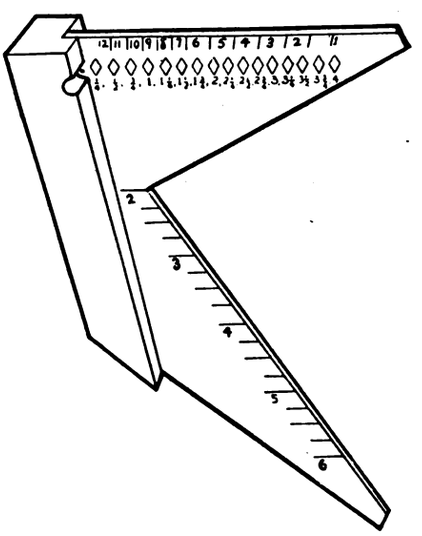
PORTER SCREEN MANUFACTURING CO., Burlington, Vermont, makers of high grade Screen Doors and Adjustable Window Screens, have favored us with a copy of their handsomely illustrated catalogue for 1906 which is exceedingly artistic and elegant in every respect. They state that in the manufacture of their goods they use only designs, material and finish of such worth as will continue to make the quality of Porter Screens, the standard of screen quality. Selected and kiln-dried pine is used exclusively for doors; Vermont birch and maple for windows, and only the best wire cloth from reputable makers is used. Each high grade door is sanded and smoothed after assembling—the inside edges of the panels are chamfered—the edges of wire cloth are covered with raised mouldings mitred at the corners.

A copy of this very handsome catalogue will be gladly sent to those interested in the above line of goods.

MAST, FOOS & COMPANY, Springfield, Ohio, are presenting to the trade their Catalogue No. 27, illustrating and describing the Imperial Wind Mill and Galvanized Steel Towers. The catalogue covers 56 pages and contains numerous illustrations in regard to which they state: "The half-tone cuts used are all made from photographs of the goods, which show them as they actually appear, and we think a careful perusal of these pages should convince the reader that The Imperial is without a peer." They warrant Imperial Wind Mills to be carefully made of first-class material, and when properly erected, oiled and cared for, capable of doing as good work as any Wind Mill of its class. They also warrant Imperial Steel Towers to be capable of sustaining the mill for which it is intended, and if properly erected, not to buckle or blow over, unless the anchorage gives way. For further information, prices, etc., write for this very interesting and useful catalogue.

A. J. REACH COMPANY, Philadelphia, Pa., have sent us their Spring and Summer Sports Catalogue for 1906, which shows part of the very complete line of Sporting Goods manufactured by this company. They state in regard to their products: "No one can make better goods than we, and we intend that all our customers and patrons shall have absolute confidence in them, in every way, by first showing that confidence ourselves." They offer to furnish their retail catalogues free, imprinted with the dealer's name, in any quantity that can be distributed judiciously; also any of the electrotypes listed in this catalogue, provided a stock of The Reach Goods is also ordered. Write for further information.

THE BERGER MANUFACTURING CO., Canton, Ohio, have sent us an attractive little circular, which has been prepared for the purpose of bringing into prominence their Sheet Metal Goods, illustrations of which are shown. This company manufactures everything in the way of Steel Office Equipment and Filing Devices; also Ornamental Bank, Office, Library and Vault Fixtures. If interested in Sheet Metal Goods for either interior or exterior use, write for special catalogues as follows: Metal Furniture and Filing Devices, Catalogue No. 3; Steel Sectional Cabinets, Catalogue No. 4; Metal Ceilings and Side Walls, Catalogue No. 6B; Multiplex Fire-Proofing, Catalogue No. 9; Roofing, Siding and Special Work, Catalogue No. 10; Architectural Work, Cornices, Metal Windows, Etc., Catalogue No. 11; Metal Tiling and Fittings, Catalogue No. 12.



THE STANDARD SCALE & SUPPLY CO., Pittsburgh, Pa., manufacturers of "The Standard" Scales, have favored us with their latest production, which is a very carefully prepared illustrated price list of 128 pages. The book contains a descriptive index, a Telegraph Code and Index of Scales by Number, and several pages are devoted to descriptions of "A Few of the Special Modification of Scales Not Listed in the Catalogue." The catalogue is profusely illustrated, showing Portable Platform Scales, Leather Dealers' Scales, Dairy, Grocery, Salt Meat and Fish, Wheelbarrow, Rolling Mill, Iron Warehouse, Packing House, Stock, Dump, and Railroad Depot and Railroad Track Scales, besides many other scales for divers' purposes, all adapted to the standards of all nations. The catalogue will repay a careful perusal and is well worth having, and if you have not received a copy the manufacturers will be glad to mail you one upon request. Ask for their Illustrated Price List No. 8.

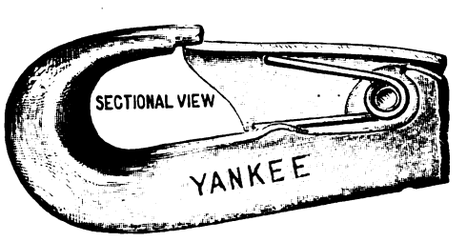
NEW GOODS AND SPECIALTIES.

THE NEW UNIVERSAL SQUARE.

The Duby and Shinn Manufacturing Co., New York City, wish to call attention to an improvement in their square, which combines the two lines of diamond holes into one line, and to explain the effect of the change. It is an improvement, inasmuch as it corrects a slight discrepancy in the measurement of the circle, which was the case with the old style. Also the new style will be found more useful in marking off a straight line at every eighth or quarter inch. This can be done very neatly and accurately by placing the pencil in the diamond corner and

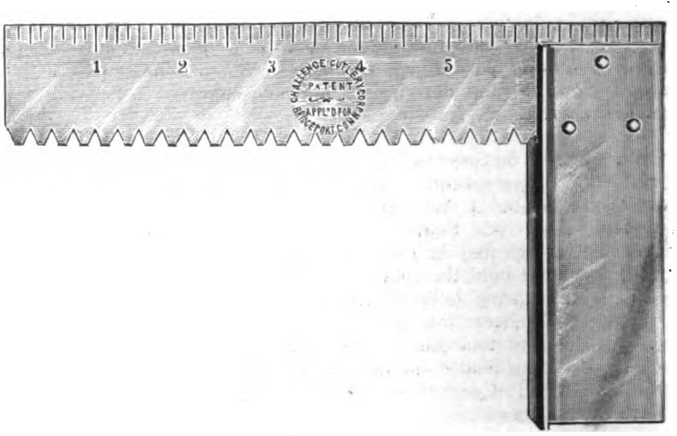


THE NEW UNIVERSAL SQUARE.

making a dot, instead of the old method of placing a rule on a line and marking off measurements from it. They also wish to call the attention of the trade to their relief from the past small output of their squares, in consequence of their original shop and equipment, being so small, as not to enable them even to cope with the demand from local houses. The company has changed their factory quarters, and now have a fully equipped plant well under way with a thoroughly experienced tool maker in charge and a force of experienced tool makers as assistants, so they are now ready for stock orders, guaranteeing not more than two weeks delay to make shipments of same. Any mechanic who purchases a square and finds it "out" in any detail, is asked to return it, either through his dealer or direct, and receive a perfect one in its place. This is a standing guarantee.

COVERT'S YANKEE SNAP.

Progression has always been the aim of the Covert Manufacturing Co., of Troy, N. Y., and the superiority of their goods is the best evidence of their successful efforts. Every article manufactured by them has its own special merits. One of the most



COVERT'S YANKEE SNAP.

important improvements in their line of goods is the Brass Lever Spring, used exclusively in their "Yankee" Snaps. The sectional view of the body and hook of one of their "Yankee" Snaps accompanying this article illustrates and demonstrates the practical advantages of this great improvement. It is claimed that no other Snap manufactured possesses this invaluable feature. It is practically indestructible, and will remain unimpaired as long as the Snap lasts.

FOX'S GAUGE SQUARE.

Wiebusch & Hilger, Ltd., 9-15 Murray Street, New York, sole agents for the Challenge Cutlery Corporation, Bridgeport, Conn., have just brought out Fox's All Steel Patent Try Square No. 5, with Wiatt's Patent Gauge Edge on the inner edge of the blade. The square is pressed from sheet steel polished and nickel plated, and is made by machinery specially constructed to give absolute accuracy to it inside and out. This tool can with equal advantage be used either as a carpenter's ordinary try square or as a gauge thus serving the purpose of two tools. The

FOX'S GAUGE SQUARE.

indentations on the lower edge do not in any way interfere with the blade being used for a try square, when the gauge feature is not wanted. To use as a gauge the head of the square is pressed against the edge of the material to be marked, and drawn along that edge. A pencil or scratch awl having been inserted in the indentation which gives the distance of the material to be measured follows the travel of the square, thus marking a line giving the width to be measured. The Fox's Gauge Square No. 5 is made with the blade 6 inches in length only, but should the demand call for other lengths these will be added to the line later. The tool can be sold by the retailer at a popular price, notwithstanding its finish and accuracy.

THE FINDLAY "HATCHETAXE."

The Findlay Axe & Tool Co., Findlay, Ohio, for whom Wiebusch & Hilger, Ltd., 9 Murray Street New York, are sales agents, are placing before the Hardware trade the "Hatchetaxe"

THE FINDLAY "HATCHETAXE."

of which we give an illustration. It is an exceedingly handy tool, made up as a combination hatchet, axe and hammer. The head and blade are tempered and the blade is refined by hand

Digitized by Google

hammering, and then is carefully tempered and tested. It is so constructed that it cannot be broken under the eye, and the eye being longer than in an ordinary hatchet, holds the handle much more firmly. The driving point is a safe distance from the claw, affording protection to the latter. It has a broad hardened head, making it an excellent spike and nail driver. All sizes have a claw on the head. This feature in the large sizes is an advantage over an axe and makes it a combined cutting, driving and drawing tool. Having a beveled bit it is particularly suitable for splitting wood. Because of the straight bevel bit it is easily sharpened. These tools are all made of high-grade materials by skilled workmen, and are designed to be retailed at popular prices. They have what is called the Radium finish in red poll, gold bronze and polished blade, and furnished in sizes 1, 2, 3 and 4, which weigh respectively 1½, 1¾ 2¼ and 2¾ pounds. The Dadz finish is red poll, black blade and polished bevels, being furnished in sizes 1 to 7, inclusive, and weighing, respectively, 1½, 1¾, 2¼, 2¾, 3½, 4 and 4½ pounds.

PIKE DESK SOUVENIR SHARPENING STONE.

The Pike Manufacturing Company, Pike, N. H., have gotten out a neat and useful souvenir in the shape of a Sharpening Stone for the desk, of which we give an illustration. This is adapted to serve a double purpose as the case is a miniature representation of Pike's Oilstone Selling Assortment Cabinet; the Oilstone assortment come in boxes Nos. 1, 2 and 3, and the Scythe Stone assortment in Boxes A and B. In the souvenir box is mounted a small stone large enough for sharpening a pocket knife. The case is finished in cherry or mahogany with hinged cover. On the top is shown the company's trade mark by transfer, done very neatly.

PIKE DESK SOUVENIR SHARPENING STONE.

MILBRADT ROLLING STEP LADDER, NO. 1.

The Ebbing Manufacturing Co., 1436-42 North Eighth Street, St. Louis, Mo., having succeeded to the business of G. A. Milbradt & Co., are now the sole manufacturers of their Rolling Step Ladders, which have been on the market for the last twenty years, becoming more popular with the trade each year. We illustrate their Ladder, Figure No. 1. All Ladders that suspend from a track similar to their No. 1 have attached to the top two hook-shaped irons in which run two smoothly turned wheels; and as these Ladders run either on a wood or steel track, iron wheels are used and run noiselessly on a wood track, and paper-filled wheels are used to run noiselessly on the steel track. These Ladders also have attached near the lower end, two fork-shaped irons in which run two rubber rollers, usually against the edge of base shelf. When base shelf is of sufficient width, these fork-shaped irons are made short so as to allow the Ladders to run close to it as shown in the illustration; but when the base shelf is narrow, they are made in any length necessary to hold the lower end of Ladders out a proper distance to make them convenient to climb; and when the lower end of Ladders needs to hang out more than nine inches from the base shelf, swinging arms are used. These ladders are all made to order and to fit each particular place. They are made of oak lumber and of the most artistic and neatest style, handsomely finished, durable and perfectly safe as they cannot jump the track. They take up the least possible space, run noiselessly and so easily either empty or with operator upon them that it is claimed a slight push will propel a Ladder the length of an ordinary store. All the Milbradt Ladders have an extra wide shelf at the top which offers great convenience in handling stock, and all iron work on Ladders as well as the brackets to hold up steel track is made from malleable iron with aluminum finish, which increases their durability.

MILBRADT ROLLING STEP LADDER NO. 1.

THE PORTER CHOPPING KNIFE AND COOKIE CUTTER.

The Watson-Porter-Watson Co., Ltd., Unadilla, Mich., are placing on the market the Chopping Knife, Cookie and Biscuit Cutter Combined designed for mincing salads, slaw, mince-meat, potatoes, &c. Having a circular blade. it has a much greater cutting edge than the old style straight bladed knives. This knife cuts its entire circumference in the ordinary wooden bowl or on flat surface. The blade being vertical will not clog or choke up, and the circle of the blade is not so large but that it is a practical Cookie and Biscuit Cutter. It is provided with a tempered steel blade and malleable iron shanks, heavily tinned, plain hardwood handle, substantially fitted into shanks.

CHOPPING KNIFE AND COOKIE CUTTER.

COMMERCIAL RELATIONS WITH THE UNITED KINGDOM.

Trade of the United States with the United Kingdom in the fiscal year 1905 aggregated practically 700 million dollars and formed more than one-fourth of our total foreign commerce. Figures just presented by the Department of Commerce and Labor through its Bureau of Statistics show that the exports from the United States to the United Kingdom in 1905 aggregated 523 million dollars out of a total of 1,518 millions, and thus formed 34 per cent. or practically one-third of our total exports; imports from the United Kingdom aggregated 176 millions out of a total importation of 1,117 millions, and thus formed about 16 per cent., or practically one-sixth of our total imports.

On both the import and export sides of the account our trade with the United Kingdom is larger than with any other country. The imports from that country, as already indicated, were 170 millions, against 118 millions from Germany, 100 millions from Brazil, 90 millions from France, 86 millions from Cuba, 62 millions from Canada, 52 millions from Japan, and 46 millions from Mexico. The exports to the United Kingdom were 523 millions, against 194 millions to Germany, 141 millions to Canada, 76 millions to France, 73 millions to Netherlands, 53 millions to China, 52 millions to Japan, and 46 millions to Mexico.

Comparing conditions of our trade with the United Kingdom in 1905 with those of 1895, the imports from that country have grown from 159 million dollars in 1895 to 176 millions in 1904, an increase of 17 millions, or a little over 10 per cent., while exports to that country have grown from 387 millions in 1895 to 523 millions in 1905, an increase of 136 millions, or about 35 per cent.

The principal articles which form our enormous trade with the United Kingdom are chiefly manufacturers' materials and manufactures on the import side, and foodstuffs, manufacturers' materials, and manufactures on the export side. While the United Kingdom is not a large producer of raw material for use in manufacturing, at least in excess of her own requirements, she exports considerable quantities of material of this character drawn from other parts of the world, especially from her colonies. Of our imports of raw wool, which in 1905 amounted to 46 million dollars, about 17 millions was drawn from the United Kingdom; of our imports of pig tin, which in 1905 amounted to 23 million dollars, about 12 millions was drawn from the United Kingdom; of hides and skins our imports from the United Kingdom in 1905 were nearly 7 million dollars in value; of india rubber a little more than 7 millions; of jute, flax and hemp nearly 2 million dollars; of raw cotton, chiefly Egyptian, nearly a million dollars; of cabinet woods practically a million dollars, while diamonds and other precious stones imported from that country amounted to 9 million dollars.

Among the importations of foodstuffs about 1½ million dollars' worth of tea was from the United Kingdom, about a half million dollars' worth of coffee, and one-third of a million dollars' worth of cocoa. Of finished manufactures, which form a larger share of the imports from Great Britain than do any other class, the most important are manufactures of cotton, manufactures of fibers, manufactures of iron and steel, and manufactures of wool. Even of cotton cloths, this cotton producing and manufacturing country imported in the fiscal year 1905 more than 6 million dollars' worth from the United Kingdom, which presumably bought from the United States practically all of the cotton contained therein, and after transforming it into manufactures sent the finished product back to us, while of other classes of cotton manufactures, such as laces, edgings, embroideries, threads, etc., the total imports from the United Kingdom are even greater than those of cotton cloth alone, being 8 million dollars in value. Of fiber manufactures, of which our imports last year amounted to 40 million dollars, fully one-half was drawn from the United Kingdom, including 11 million dollars of linen cloths, 4 million dollars worth of burlaps woven from jute yarn produced in India, and 2 million dollars worth of linen handkerchiefs.

The next largest group of manufactured articles drawn from the United Kingdom is composed of various products of iron and steel, a large proportion being in a partially manufactured form for further use in manufacturing, especially pig iron, 2½ million dollars; ingots, blooms and bars, 1¼ millions; wire and wire rods, over a half million dollars, and sheet iron or steel, while tin plates amounted to 4¼ million dollars in 1905 against 12 million dollars in 1895. Woolen goods are next in importance in the list of manufactures imported from the United Kingdom, and included in 1905 over 2¼ million dollars' worth of cloths, and 5⅓ million dollars' worth of materials designated as "women's and children's dress goods," while other miscellaneous manufactures of wool brought the amount from the United Kingdom up to fully one-half of our total imports of woolen goods, which last year aggregated about 18 million dollars.

Foodstuffs, manufacturers' materials, and manufactures form the principal items in the grand total of 523 million dollars' worth of merchandise exported from the United States to the United Kingdom in 1905. Under the head of foodstuffs are included wheat, flour, corn, oats, meats, butter, cheese, cattle, sheep, canned salmon, and fruits. Under the head of manufacturers' materials by far the most important item is cotton, and to this should be added leaf tobacco, lumber and timber. Under the classification manufactures, the most important items of export to the United Kingdom are copper, 14 million dollars' worth; mineral oil, 15 millions; leather and manufactures thereof, 15 millions; and various manufactures of iron and steel amounting to over 21 million dollars. The principal foodstuffs sent to the United Kingdom during the year were cattle, valued at nearly 37 million dollars; flour, 11½ millions; wheat, 3½ millions; corn, nearly 18 millions; fruits, 6½ millions; fresh beef, 22 millions; canned beef, 4 millions; bacon, 21 millions; hams, 19½ millions; pork, 7 millions; lard, 17½ millions; and butter and cheese, a little less than 1 million dollars each. Of manufacturers' materials sent to that country during the year, cotton is, as already indicated, by far the largest item, amounting to 176 million dollars in value, while leaf tobacco amounted to 9½ million dollars, lumber 5½ millions, and timber nearly 4 millions.

Of manufactures sent to the United Kingdom during the year, copper amounted to over 14 million dollars; upper leather for use in manufacturing boots and shoes, 11 millions; sole leather, 4½ millions; boots and shoes, about 2 millions; mineral oil, 14 millions; instruments and apparatus for scientific purposes, including electrical appliances, 2⅔ millions; Builders' Hardware, including locks, hinges, tools and saws, over 2 millions; electrical machinery, over 1 million dollars; sewing machines, 1¼ million dollars; typewriters, 1½ million dollars; cars, carriages, and other vehicles, about 2 million dollars; agricultural implements, over 1 million dollars; paper, 2¼ million dollars, and paraffin, 4½ million dollars; while of articles not classified by the Bureau of Statistics as foodstuffs, manufacturers' materials, or manufactures, there were sent to the United Kingdom 3½ million dollars' worth of oil cake, nearly 4 millions of turpentine, nearly 2 millions of rosin, and about 1 million dollars' worth of cottonseed oil.

The above figures relate solely to the trade of the United States with the United Kingdom, which term includes England, Scotland and Ireland. The exports of the United States to all British territory in 1905 amounted to 740 million dollars, and formed 48.7 per cent. of our total exports, and the imports from all British territory amounted to 321 million dollars, and formed 28.7 per cent. of our total imports. The figures of the United Kingdom show that imports from the United States in 1904 formed 21.6 per cent. of her total imports and that exports to the United States formed 10.6 per cent. of her total exports. The United Kingdom imports twice as much merchandise from the United States as from any other country of the world and as much as from all her colonies combined, but her exports to India, and in some years to Germany, are larger than those to the United States. Of the total imports of the United Kingdom from all parts of the world, 42 per cent. is foodstuffs, 33 per cent. raw materials for use in manufacturing, and 25 per cent. manufactures. Of her total exports of domestic products to all parts of the world 82 per cent. is manufactures.

A PEAN TO TEXAS.

Did you ever stop to think that you can bake your bread from Texas flour, cover it with Texas molasses and butter, eat Texas rice and roll it in Texas ham gravy, have Texas oats for breakfast, Texas beef roast for your dinner, Texas fruit and vegetables on your table at all times, sweeten your coffee with Texas sugar and top off your meal with a Texas grown and made cigar? Well, you can. In addition you can have your chickens and eggs and plenty to sell to the poor fellow who lives in the city. Now you can eat home grown canteloupes and watermelons, peaches, grapes and plums. You can now get Texas grown blackberries, strawberries and dewberries. And if you exercise a little energy and good judgment you can have plenty of luscious ham and sausage this winter and some to sell. You can pick your cotton in Texas made sacks made of Texas cotton, and when our men of means wake up to the opportunities for manufacturing the great cotton crop of this State you can wear Texas made clothes. You can even have Texas made wines, whiskies and beers, but the less you have of the latter and the more you have of the former the better off you'll be both in purse and health. This is not a temperance sermon. It is an appeal to Texans to use Texas made goods and live off that which their own State produces. Take out coffee and your tea, and every Texan could live comfortably at home from the food products grown in his own State.—*Waxahachie Enterprise.*

WITH OUR CORRESPONDENTS

THE CLEVELAND TRADE.

Wonderful is the natural adjective when one attempts to express an opinion on the general prospertiy of the country and city, or of firms and individuals, and the solid reason for the continuance of prospertiy are manifest on every side. Every month makes new records in amounts of sales, payments are excellent and everybody believes in improvement in 1906. Labor is all employed at good wages and more could be used if obtainable. Banks are paying good dividends and increasing their surplus. There is a great increase in population and they all seem to be buying Christmas presents. There is a crowd of people, carriages, automobiles and street cars that interferes with getting about.

The urgent demand for new school rooms to house the children testify to the increase of population. In the history of Cleveland there never has been such evidence of growth. If other cities

HON. C. B. LOCKWOOD

have equal evidence of increase the country is making prodigious advance. Wonderful is not an exaggerated expression to describe it. In finances the millionaires have so increased that there is an apprehension of danger, but the general prosperity is keeping the comparison on the usual plane. Civic pride is manifesting itself in providing public parks, free baths and farm homes for all who need the city's care. A plan to group the public buildings costing twenty to thirty millions is well under way, so that the next generation will see what the "city beautiful" means.

The Union Railroad Depot, City Hall, County Court House, Public Library and City Armory, with the U. S. Postoffice, on a plateau overlooking the lake, will make this a unique city, and bear enduring testimony to the civic pride of the present generation. Manufacturing makes a solid basis for the city's prosperity and it is increasing and enlarging as never before. In merchandising we are unequaled in some lines and excelled in few. It will be impossible to increase the buildings without an increase of labor. At no time in the city's history were there so many fine buildings in the course of erection. Business and power blocks, apartment houses and family hotels and private homes are being erected on all the principal streets. Business of all kinds seems to be rapidly increasing.

This is the Hardware center of the middle West as it is in Hardware manufacturing. Machine tools made here are used round the world. The Chamber of Commerce has fifteen hundred members who are not entirely devoted to money making and own their own buildings, and the Union Club have a home not excelled on the Continent. No port in America owns a larger fleet of vessels. Here the ore and coal meet for use and distribution. In the near future, a million happy, prosperous and contented people will make this their home. We are building for the future, with an optimism that is marvelous. We are glad in the consciousness that ours is only a part of the growth of the Republic. Our public schools are the pride of the city. More money is spent and more pupils in attendance in proportion to other cities. Our public libraries have fine buildings in different sections of the city, our street car service is second to no city in the union, and graft has no place in the city government.

We have an art school that owns its own building, and are about erecting a Museum of Art, for which a lot and money is already provided. The Young Men's Christian Association have a fine building, and the Young Womens' Christian Association are erecting one, for which the funds are already provided. Fourteen hundred acres of land have already been purchased by the city, upon which cottages are being erected for the poor, a workhouse for the criminal class, a home for the inebriates and consumptives where they can be employed on the land. Also a farm on which is employed the truant boys, where they work and study and are kept from the temptations of the city. The Western Reserve University, including Adelbert College, College for Women, Medical and Dental Schools and Case School of Applied Science, are sending out hundreds of men and women to do the world's work. It is bewildering to attempt to enumerate the things that promote the welfare, and to describe them would require the vocabulary of a Shakespeare.

To feel that Cleveland is only a small part in the wonderful progress of our country, that Pittsburg, Philadelphia, Chicago, Boston and New York, are a part of it, fills the heart with pride. The outlook for the special lines of business that bring prosperity to Cleveland is remarkably good for 1900. Transportation lines on the lakes are elated by the prospect. The fact is, there is not a cloud as large as a man's hand anywhere, and the flattering prospect for good crops makes optimism universal. The speculative element in business has disappeared, and every one in business is so occupied that they have little time for anything else.

The 50 to 60 per cent. increase in the amounts of orders above those they had in January, 1905, indicates excessive activity in the large manufacturing plants and the sale already made of 90 per cent. of the anticipated output of ore is surprising testimony of the expectation of the furnaces. Although there are expectations in the advance of prices, there is good reason for believing that no radical advance will be encouraged by those who control the majority in the output of iron and steel. Time was when effort was made to recoup serious losses at the first opportunity and no one thought of attempting to prevent extreme prices, but the power to prevent booms fortunately includes the power to prevent pauperizing, and the men in control are adverse to either, as one is sure to produce the other. This is the great gain of combined action that does not depend upon gentlemanly agreements. The consensus of opinion in place of the individual, has power to control and this prevents radical action. The past due panic must wait, and business can very well afford to have it delayed to a far future. The principle of getting all you can out of a customer the first deal is being displaced by an effort to aid him in a success that will make him a permanent customer.

Organization has done much to improve business ethics. What ever may be our creeds, we deny by our action that men are totally depraved. One-half of the work of our Chamber of Commerce is devoted to the betterment of facilities for the comfort and conveniences of the people. And the leadership of the Associated Charity Organization there is a marked advance in the method of charity work. The poor are searched out in their homes and given aid and counsel. Some of the churches are nursing and trying to separate the dogmas that separate them from the rest of the people. They will be more useful when they all learn the fundamental truth, that character fixes destiny, in all worlds; that sincerity, sympathy and generosity need no label to make them religious. Instead of chagrin at the lack of one is amazed at the magnificent benevolence of the people and the future residents will know that the present generation were not entirely devoted to money getting. Perhaps this may seem egotistic. Well, that is better than pessimism and a habit of being sorry for one's self.

THE PITTSBURG TRADE.

It is a well known fact among observers of business conditions that Pig Iron is the business barometer, and that the demand for it foretells the demand for other commodities.

This being the case, Pittsburg, as the center of the Iron Industry is the leader of public opinion as to business conditions, and it is to Pittsburg forecasters must look when making up their opinions as to the coming year.

For a year past there has been a steadily increasing demand for Pig Iron, until it has now fully overtaken the supply with all furnaces running to their capacity. This demand exceeds two million tons per month, twenty-four million tons per year, a figure not dreamed of a few years ago; an average of over 600 pounds of iron to each man, woman and child of our population. This immense quantity is being readily absorbed by the country at prices from 25 to 50 per cent. over those of eighteen months ago. There are indications of higher prices but the large interests favor conservative management with steady prices, rather than the violent and frequent fluctuations of former times, and will do their best to prevent excessive advances.

GEORGE B. LOGAN.

Forty per cent. of the demand for iron and steel comes from the railroaders and the prosperity of three large consumers is shown by the fact that the capacity of the rail mills for 1906 is already contracted for

Pittsburg is the center of the window glass industry which reaches large proportions In plate glass the largest concern has recently announced an increase of five million dollars to its capital to build additional factories to take care of the increased business. In blown glass for ordinary window sizes a great saving in cost of production has been effected by the use of mechanical blowers. These are now working successfully in the larger factories and old-style blowing will have to go. Tableware and lamp chimneys are also important branches of the glass industry.

Coal and coke are a constituted part of the steel industry and share in its activity. These interests have been doing very well for the past six months, scarcity of cars being the only drawback. Their only obstacle to a good year's business is the fear of labor troubles when the present contract with the men expires next spring. The men secured a material advance in wages two years ago and for fully half the time since then the companies made no money. It is hoped the labor leaders will not press for a further advance this year as it would tend to check the prevailing prosperous conditions.

The crops of 1905 were bounteous and brought the growers good prices. This money is now in the hands of the people and will be spent for improvements in their homes, barns and for other necessities and luxuries. New enterprises will be undertaken to still further develop our great West and South. All this will need the products of our mills and will keep the wheels turning busily all through the year.

As to the mercantile end of it, when manufacturers are busy they put money into circulation through the hands of their employees and this finds its way into the merchant's till. We have observed, however, that after a period of depression, such as we had in 1904, it takes from six to twelve months after prosperity reaches the manufacturers to arrive at the counter of the merchant. This waiting period has now passed and merchants are now enjoying a good trade. I can see no reason why 1906 should not be a prosperous year for the merchant and fully believe it will be.

Wishing you and your readers a Happy New Year and an abundant share in the coming prosperity, I remain,

LOGAN-GREGG HARDWARE CO.
GEORGE B. LOGAN, *Pres.*

THE CHICAGO TRADE.

The conditions that at present prevail in the Western country of which Chicago is conceded to be the commercial center, is most flattering. All classes of business men unite in the statement that the new year will open with the brightest prospects. Farmers have been blessed with bountiful crops—Cattle, Grains, Hay, Pork, and other farm products have readily sold at high prices. Money has been accumulated by all classes, which is being used as a rule, in legitimate channels. An evidence of that is the fact that farmers are adding new farms to their holdings and are at present in many sections loaners of money instead of borrowers, and are adding improvements in the way of new houses, new barns, new fences, etc., etc.

Small cities and villages are keeping pace in the line of improvements in the way of new telephone and trolley lines, new buildings and new roads, so that a wonderful change for the better is very apparent.

A Chicago daily newspaper has just published some carefully prepared statistics in which they state as follows:

"The equivalent of forty-seven solid miles of buildings, single frontage, costing approximately $62,000,000—a record exceeded only by the phenomenal activity of 1892, the year preceding the World's Fair—represents the colossal building operations in Chicago during the year now closing.

There is no question but that during the years 1890, 1891 and 1892, Chicagoans became too optimistic because of the prominence given in the World's Fair. Real estate and building both had a

J. B. NELLEGAR

pronounced boom and after these years followed several dull years in building operations. The past three years, however, have showed a steady, sure increase and the present figures of sixty-two millions in the value of buildings erected the present year are nearly double what the building operations foot up for 1903.

Notwithstanding the high price for labor, materials, and one of the most protracted and disturbing labor troubles in the City's history, the teamsters' strike, building has forged ahead at a tremendous rate with architects and contractors already busy on future work, so that at no time before has the future of Chicago looked so promising.

Railroads are expanding at a tremendous rate; equipment is very scarce; notably freight cars in particular. Steel rails have not advanced but are very firmly held and sold far ahead into next year. Railroad stocks are much higher. They are paying good dividends and are using up iron and steel at a rate heretofore never dreamed of.

We argue from the amount of raw and finished material being used at present and bought for future delivery in the steel and iron markets. That manufactured Hardware is going to be scarce during the early months of the new year and advances in many goods sure to follow.

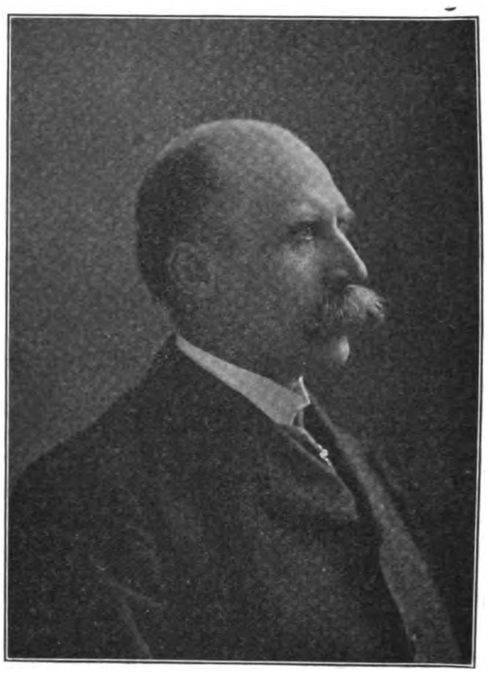
Digitized by Google

As a firm we have been making active preparations for an enlarged Hardware business. We have fortified an already large stock by purchasing liberal supplies for future delivery. We have confidence in the present values of iron and steel and finished products. We have engaged additional salesmen for both city and country; also have almost completed a large 1200-page catalogue, showing late up-to-date illustrations of new goods in cutlery, guns, builders' hardware, farming implements and house furnishing goods. As a result of the above we confidently hope and expect, to secure some of the good orders that we feel the merchants of the West and Northwest are at this time in a position to give.

We enter the New Year full of enthusiasm, feeling certain that our representatives will be able to take advantage of the bright prospects for the new year and secure their share of the prosperity our entire country is at present enjoying.

WELLS & NELLEGAR CO.

THE COLUMBUS TRADE.



On looking over conditions of the year closing, we find more encouraging symptoms than discouraging. Trade has been very good all through the year and good orders booked for Spring shipment. Mail orders are numerous, indicating that dealers are not overstocked. Prices have held pretty firm throughout the year with a few exceptions. Cast and wrought iron products have advanced steadily, but by easy stages. Metals are all high, and it is explained in two ways; an unusual demand and a falling off in supply. The first reason is no doubt valid, but the latter is somewhat doubtful. This is also true of cotton products. The more cotton grown the higher the price. Cotton growers have turned manipulators. He seems to know a good thing when he sees it and is "cottoning" his nest. If there is danger of too large a crop, neglect it, corner it or as a last resort, burn it. Anything to keep the price up. Indications point to higher prices on Builders' Hardware for 1906. I believe there is reason for advances on some of the cheaper grades of goods, but doubt if there is necessity for any advance on the better grades. Hardware is a small item in the cost of a building, but judging by the way a builder shops around, you would conclude it was the largest item of cost in a building. This has been the banner year for building in Columbus. Sky scrapers are getting as thick as telephone poles. Several are already under contract for next year. With land selling as high as $3,000 per foot front it is necessary to go "higher up" and not so "wide out."

Our memorial hall is complete, and will be dedicated soon. It is a credit to our city and was badly needed.

Our dam is finished, but it was a dam slow job. Money is now filtering in our new filteration plant, but we hope it will soon be watered. Graft has been rampant in our country for no one knows how long. So far, the experts have found over one hundred thousand dollars that have gone wrong. Gratted fruit as a rule is good, but the kind of graft we have been up against is the kind that puckers and leaves a bad taste in your mouth. However, it grew until you could see it and swat it on the head, and as Uncle Hiram said, it has been "Swat." It was all done through ignorance, so the offenders would have the public believe. Some have already disgorged and the rest will no doubt have to. One of the offenders had the nerve to seek a government position, but President Roosevelt could not see the propriety of appointing a man who had made a mistake when there were others who could be found. It certainly meets the approval of the general public. Our city is infested with a lot of has been office holders who seem to think the public owes them a political job during their life. They value their services higher than the public does. This is a strange world. If a poor devil steals a ham to keep his family from starving or a bucket of coal to keep them from freezing, and is caught, he goes to the work house. If he steals over $35 worth he goes to the penitentiary; but public officials, insurance officials and others can steal or misappropriate (which in plain English is stealing) thousands or hundreds of thousands of dollars of the public's money, and all they have to do is to disgorge as little as the court compels them to. A thief is a thief whether he steals a ham or the public's money, and the same penalty should apply to both classes.

The outlook for next year is encouraging. Farmers have large crops and are finding a ready market at good prices. Manufacturers have all, and in many instances more than they can do. In conversation with one of our manufacturers to-day, he said that one of their big customers wanted to contract for material for five years ahead. Price to be based on present cost of pig iron with a proviso that if it advances or declines $2.00 per ton, the schedule is to be changed. The object of the customer is to be assured of material when he needs it. This certainly shows confidence in a demand for the finished product.

Unskilled labor has been well employed through the year. Our city has been practically free from labor troubles. I have been trying to imagine what will happen if Congress passes the Parcels Post Bill. Part of the year some R. F. D. trips are made on horse back, owing to bad roads. Ohio, like any other State, has a good many mud roads, and at times the bottom drops out. If Uncle Sam is going into the draying business, it will be well to wait for better roads. Imagine if you please, a mail carrier with a one-horse vehicle hauling manure forks, shovels, pumps, wheelbarrows, sheet iron stoves, boilers, express wagons, dry goods, groceries, hams, roosters or any other old thing. Wouldn't he have a dandy time? And how it would dig into Uncle Sam's pocket book. Advocates of the measure will say that these are ridiculous improbabilities. I say they are not, as one of the bills is drafted. None of the articles mentioned are out of the bounds of the "Henry" Bill, and most of them would come within the limit of the "Hearst" Bill. Think of delivering one pound, eight or ten miles in the country, for two cents; 30 pounds for ten cents, 60 pounds for fifteen cents, 100 pounds for twenty cents and 200 pounds for twenty-five cents. Now I am just six feet high and weigh less than two hundred pounds, so I could be sent by mail to San Francisco or any other part of the United States for twenty-five cents. The restrictions for unmailable matter are, poisons, explosives, inflamable substances or substances that exhale a bad odor. I believe I would pass inspection, so I don't see why I can't have a tag tied to me, with a twenty-five cent stamp attached and send me along with a jug of molasses, case of lard, bull pup, Billy goat or any other article not weighing over 200 pounds, and not more than six feet long. Before the bill passes, I hope some kind hearted Congressman will amend it so as to provide for feeding the animals both two and four legged. If I decide to go by mail, I can put a doughnut and a sack of peanuts into my pocket and get along all right. The Billy goat can eat anything from stove pipe to lace curtains, but think of the bull pup. I will bet my interest in Lawson's frenzied finance schemes that Uncle Sam will have more than eleven millions deficit next year, if either of the bills pass. I don't believe Congressmen can be hoodwinked by the promoters. At any rate I hope not. You can't get goods delivered a half dozen squares over good streets for the price the proposed bills ask the government to carry for thousands of miles by rail, and then any place up to ten miles over country roads. The men behind the gun are hoping to be able to distribute goods at almost no cost in order to reach trade they cannot reach in any other way. If Congress will pass a one-cent postage law, it will benefit everybody and increase the postal revenue, while the Parcels Post Bill would bankrupt anybody but Uncle Sam, and it would give him a hard jolt. I wish everybody a prosperous New Year.

J. H. SMITH.

THE DAVENPORT TRADE.

The year 1905 has been peculiar to any former year within my memory, in this, that there has been less change in values and more changes in conditions and business methods. The market have been unusually steady and the departures from the old and trfied principles of distributing goods have been many, and evidently the end is not yet.

How the old and conservative dealers, whether wholesale or retail, are to meet these radical changes is a question difficult to answer. Shall we fight fire with fire? Must we depart from the principles given us in the "Sermon on the Mount" and again exact, as of old, an eye for an eye and a tooth for a tooth? Our people, from highest to lowest, from the richest to the poorest, although admitting they are enjoying the most phenomenal period of prosperity ever known in this or any other country, seem more and more inclined to be discontented, more ambitious for gain and have less regard for the way it is obtained, more exacting and tyrannical towards one another, more selfish, exhibiting less regard for the other fellow, apparently ignoring the Golden Rule and are less particular—not to say dishonest—than ever. The trend of the times is towards greater concentration of wealth and the power which follows. It has been said that pride goeth before a fall; if this is true, and I believe it is, there is to be, and possibly in the near future, the greatest acrobatic tumble ever known. In fact, who has ever seen such lofty tumbling from high places as has been witnessed during the present year; from palace to prison, from large checks to stripes most horrible to contemplate. As sure as there is a God in Israel, the proud but dishonest people may be sure their sins will find them out: but enough of preaching, notwithstanding the great need of it at the present time.

COL. J. R. NUTTING.

1906 promises much better things for the careful, economical and conservative element of society than 1905, which will have passed into history before this is in print. These promises are based upon the immense crops that have been harvested and carefully secured; the output of the mines and increasing transportation facilities. The crops are commanding satisfactory prices, ores are higher and rates of freight are lower. We are at peace with ourselves and all the world beside.

The Isthmian (Roosevelt) Canal is being constructed and will surely be finished soon. Other vast improvements are being made and many more contemplated. Locally, the Illinois & Mississippi—familiarly known as the Hennepin Canal—is rapidly approaching completion, connecting the Mississippi River at Davenport, with Lake Michigan and other great lakes and the St. Lawrence River as well as the Hudson through the Western Canal.

We are quite ready and willing to say good-bye to 1905 and to welcome with bright hopes 1906.

SICKLES, PRESTON & NUTTING.

THE OMAHA TRADE.

Omaha has done the largest business in 1905 that has ever been handled. All the jobbers have materially increased their sales and handled a fair estimate of the general increase according to the best reports would be 20 per cent. The Omaha Grain Exchange, which has been in existence only two years, will handle during the present year 35,000,000 bushels of grain and anticipates in 1906 to double that record. There are erected and in course of construction fifteen elevators with a capacity of 5,500,000 bushels and in 1905 Omaha stood second in the United States as a primary corn market. The condition of the farmers was never

W. S. WRIGHT.

better. The 1905 crop was larger, the price higher than has maintained for several years and general conditions could hardly be improved on. Naturally the hardware prospects will follow the crops and assure us for 1906 a satisfactory volume of business. At the present time conditions are such that in the West it is not possible to discover a cloud on the horizon or anything to indicate a break of present prosperity.

WRIGHT & WILHELMY CO.

THE PHILADELPHIA TRADE.

Philadelphia has but little reason to complain of the business of 1905, which from all accounts has been a record breaker, even going beyond 1904 which also made a new record.

All of the mills and factories have been steadily busy with the exception, perhaps, of some of the cotton Mills who have been sorely perplexed by reason of the uncertainty attached to the high price of cotton which has made manufacturing rather more exciting than profitable; this, however, is only an incident and the cotton manufacturers will doubtless soon accustom themselves to the new conditions. From all appearances the Holiday trade has been enormous, as the people seem to have money and have spent it freely.

Building has also been on a most expensive scale. The number of dwelling houses erected in Philadelphia during the year 1905 being some 9700 and this does not include Stores, Mills, Factories and Office Buildings. Labor was probably never more generally employed than it is to-day and at present there is no apparent reason why these conditions should not continue.

Agricultural conditions have also been quite satisfactory as farming products have brought high prices and while crops have not been abnormally large, the higher values have doubtless benefited the farmers greatly and the New Year opens with promise.

An extensive correspondence with manufacturers reveals a most surprising unanimity of optimistic opinions and there is a general belief that the present conditions are likely to remain for some time. One manufacturer alludes to the fact that prosperity makes high price money and high price goods, but, justly claims that cheap money almost invariably means hard times for every one and cheap money is no advantage if it cannot be obtained.

Digitized by Google

As for the Hardware trade there are several questions of interest to be discussed during the coming year and perhaps one of the most interesting is the question of the proposed Parcels Post. Some recent rulings by the Post Office Department appear to indicate that this proposition meets with favor at Washington, but, we are quite sure that the retail dealers of the country not only in Hardware but in other lines will be almost a unit against it. The consumer may perhaps view the matter in another light, but, if he will be perfectly fair and ask himself how he would like to see the local retailer wiped out and whether he would wish to buy all of his goods by mail without seeing samples we think there would then be a different answer to the question, particularly if the consumer should ask where he would get the credit necessary to tide him

JAMES H. RITTER.

over a hard winter or a failure of crops. The importance and benefit of credit conferred by the retailers in carrying their customers have hardly been sufficiently appreciated, and yet if this matter of credit were eliminated and all trade was put on a cash basis, no one would be more quick to complain than those very consumers who are clamoring for a Parcels Post so they may be able to purchase direct by mail from distant Catalogue Houses. We trust this question of Parcels Post will receive the consideration it deserves and we believe that the interests of the country are best served where the consumer can inspect goods before buying them and he can only do this satisfactorily in purchasing from his local retailer.

If not too late we should like to take this opportunity of wishing all of your readers a Happy and Prosperous New Year, in which we trust HARDWARE may have a part.

Respectfully yours,

BIDDLE HARDWARE CO.

J. H. Ritter.

THE MISSOURI RETAIL HARDWARE ASSOCIATION.

The next annual meeting of the Retail Hardware Dealers' Association of Missouri will be held at Hannibal, Mo., February 20th and 21st.

UNDERHILL, CLINCH & COMPANY.

The wholesale Hardware business of Underhill, Clinch & Co., 94-96 Chambers Street, New York, was recently incorporated, this method being adopted by the Company to provide for a continuation of a successful business which would not be disturbed by the death or disability of any of the parties interested. The company dates back to the original establishment of a half century ago in 1856, and by the incorporation will suffer no change in the conduct of the business. The directors are F. E. Underhill, A. D. Clinch and G. T. Adams, and the continued growth and prosperity of the signally successful career of this well-known house, will be viewed with pleasure by its myriad of friends.

FIREARMS—FOR 1905 AND 1906.

We are indebted to our old correspondent C. F. M. for his views on the progressive trade about which he discourses.

The year just closed has been one of the most satisfactory ever experienced by the Firearms manufacturers of the United States taken as a whole. A few items are not quite as they should be, especially single barrel guns which are sold by manufacturer, jobber and retailer generally at less than cost, counting expense of doing business, and no change for the better in sight.

As I read the signs of the times, 1906 will be equally good, but there are indications of an over production. In common revolvers the members of the "pistol pool" could supply 50 per cent. more than the market will take. The demand is cut down at home by absurd state laws, many of which, when introduced were intended for graft, the member drafting the bill expecting to be "persuaded" to withdraw the same. Proper state regulation would be welcomed by all, but a majority of the bills introduced would work the opposite of what was intended.

Thirty years ago nearly all shotguns used in this country were imported, in 1905 it was the reverse, and the cheap Belgian article will soon be driven out of the market, as has been the Flobert, the home manufacturers producing lower priced goods every year and of a much better quality than the foreign article and the severe competition among the American makers threatens to soon make them non-profitable goods. Too many new factories starting up and the older ones rapidly expanding and the export field is decidedly limited for various reasons among which are:

The restrictions regarding the purchase and owning firearms in many countries like India and South Africa and the red tape thrown around the seller makes it almost prohibitory.

American makers are handicapped in competing with German and Belgian manufacturers, because of the difference in wages of about 5 to 1, i. e. a foreign gun maker does the same amount of work (but not as well) for 50c. as the American workman who gets $2.50.

Again the foreign manufacturer will make up a special pattern of 50 or 100 guns and make no additional charge therefore. Thus supplying the fads and fancies of every buyer in every country, while the home manufacturer cannot afford to do this except on quantity orders, that are greater than any foreigner will specify for.

In Repeating rifles two or three factories have had practically the whole world as their field, the foreigner in the past having cut little figure in repeating arms except for military purposes, but 1906 will see two new makers competing for their share of the business.

The single shot rifle trade has been largely in the hands of one large manufacturer but a dozen small makers have of late started up until the trade among the smaller ones is so cut up that some will certainly come to grief.

Ten years ago 150,000 Flobert rifles were imported into this country, in 1905 less than 10,000 and 1906 will not reach 6,000 while this country is doing a fair export trade on this class of arms, thus in one decade turning the balance in our favor from large inporters to reasonable exporters.

All in all 1906 promises very good for firearms manufacturers in general, the only trouble is that there are too many in the field and others blindly seeking to enter, which means the survival of the fittest, but those who are conservative and have an established reputation will find December 31st, 1906, showing the balance on the right side. C. F. M.

♣

THE GEORGE P. CLARK COMPANY, Windsor Locks, Conn., have presented us with three very interesting catalogues, one of which is a very full and complete catalogue of Hand, Platform and Special Trucks, Patent Rubber and Iron Wheel Truck Casters, Etc. They state that they have recently doubled the capacity of their plant, and are thoroughly equipped with the latest and most improved machinery for the production of everything in the line of trucks. They devote particular attention to the construction of Special Trucks for any purpose, and offer to furnish prompt estimate on receipt of sketch or description of what is wanted. They claim that all their manufactures are of best material and workmanship. The catalogue is profusely illustrated and contains a very carefully prepared Index of Style Numbers, also an Alphabetical Index. We are also in receipt of a neat little pamphlet entitled "Burden Bearers," which contains numerous illustrations of Specialties for Butchers, Rendering Houses and Soap Manufacturers, and a very interesting folder bringing to the attention of the trade a few Trucks that are especially adapted for use in Printing Establishments. If you desire further information in regard to these lines write to The George P. Clark Company, and same will be gladly and promptly sent.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

A QUESTION OF IDENTITY.

There seems to be a fallacy among some dealers that for them to push an advertised article will cause them to lose their identity in the locality. This is entirely erroneous. If you will take up your morning paper and read the advertisement of any one of your large stores, you will find that they give special prominence to advertised articles.

They do this because they realize that although everybody in their city who might possibly buy goods of them does not know them; they all know of the advertised article. They realize at the same time, that it is of much importance to proclaim the fact that they stock these advertised articles which are so well-known in their community. Whether a woman has ever been in John Smith's or John Jones' store makes no difference. If she wants to buy JAP-A-LAC or some other advertised article, she will go to whichever store keeps it, as soon as she knows they keep it. Neither Jones nor Smith lose identity in a case of this kind; they thus get an opportunity of making a *permanent customer* out of this woman.

Thousands of customers are diverted from one store to another every day in the year because of some particular article they can get in one store and not another. A store that keeps the articles which are most in demand, is therefore the largest gainer of this floating trade. We believe you are sharp enough to not let the trade float, if you once get hold of it. You can lose nothing by the experiment which we now suggest.

JAP-A-LAC is known by almost every magazine reader in your community. Put your JAP-A-LAC in your window, keep it near the front of the store, advertise the fact that you keep JAP-A-LAC, and see what will happen. By doing this you will identify yourself with the best known article of the kind made. You will secure a great many new customers. You will give no excuse to your old customers for going to some other store for JAP-A-LAC, and we think there will be no question of identity after you finish the experiment.

PUSH JAP-A-LAC

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 18, 1905.

394,570. SAW SWAGING DEVICE. Levi G. Harris, Cadillac, Mich.
394,590. LANTERN FRAME. Charlie I. Mitchell, Chicago, Ill.
394,605. LOCK HINGE. William P. Patton, Harrisburg, Pa.
394,604. NAIL DRIVING IMPLEMENT. John Patton, New York.
394,644. HOLDER FOR WINDOW SHADE BRACKETS. Abram B. Dunkle, Steelton, Pa.
394,646. WASHING MACHINE. Charles Harmons, Sheldon, Ill.
394,651. ADJUSTABLE SCREEN DOOR. William Hughes, Minerva, Ohio.
394,658. BROOM HANDLE. Hugh Moore, Mauch Chunk, Pa.
394,659. POTATO DIGGER. Josephus N. Mundell, Hart, Mich.
394,685. LATCH. Simon H. Fether, Pettysville, Ohio.
394,692. HOE. John M. Hefner, Marietta, Tex.
394,737. SHADE FIXTURE. Max Thiel, Philadelphia, Pa.
394,756. NAIL EXTRACTOR. George J. Capewell, Cheshire, Conn.
394,788. LOCK HINGE. Louis W. Nimschke, New York, N. Y.
394,913. WASHING MACHINE. W. J. Davidson, Ronald, Va.
394,934. CARPET STRETCHER AND TACKER. Henry B. Pitner, La Porte, Ind.
394,936. SASH FASTENER. John J. Reed, Lyons, Iowa.

PATENTS ISSUED DECEMBER 19, 1905.

807,454. SAW AND CHISEL GUMMER. Burt F. Froney, Jacobsville, Mich.
807,618. WRENCH. John H. Hobson, Mattoon, Ill.
807,643. CLAW OR TOOL FOR DRAWING NAILS OR SPIKES. George E. Ely, San Diego, Cal.
807,690. SAD IRON. William B. Shermann, Providence, R. I.
807,706. BED CLOTHES FASTENER. George A. Allen, Sterling, Ill.
807,742. WOODEN SPADE. Hermann F. T. Hopmann, Schloss, Fasoltsberg, near Gratz, Austria Hungary.
807,785. PADLOCK. Frank Soley, Philadelphia, Pa.
807,808. KNOB LOCK. Oliver C. Call, Springfield, Mass.
807,852. DOOR CHECK. Charles McGinnis, El Paso, Texas.
807,877. PADLOCK. Frank Soley, Philadelphia, Pa.
807,879. TOOL CONSTRUCTION. James M. Sullivan, Chicago, Ill.
807,886. WINDOW SHADE FIXTURE. George C. Vergason, Binghamton, N. Y.
807,900. WASHING MACHINE. Ernest L. Batley, Newark, N. J.
807,931. DOOR CHECK. Oscar Hull, Kaylor, Pa.
807,944. WINDOW FIXTURE. Nellie M. Landis, McKees Rocks, Pa.

PATENTS EXPIRED DECEMBER 25, 1905.

394,949. LATCH. Herman Ansher and Bruno F. Spranger, Aurora, Ill.
395,084. WASHING MACHINE. Louis Simon, Chicago, Ill.
395,103. FISHING SPOON. James Wood, Rochester, N. Y.
395,131. PORTABLE STOVE OR RANGE. Thos. A. Graff, Pittsburgh, Pa.
395,196. HINGE. W. Andrew, Cincinnati, Ohio.

PATENTS ISSUED DECEMBER 26, 1905.

808,123. CARPET STRETCHER AND TACKER. S. Tattrie and J. Schmidt, Lebanon, Ill.
808,124. STEP LADDER. J. S. Tilley, Watervliet, N. Y.
808,126. SPRING HINGE. C. S. Van Wagoner and LeDru R. Pomeroy, Cleveland, Ohio.
808,138. HINGE. A. R. Carroll, Joliet, Ill.
808,165. HINGE. I. N. Morford, McLean, Ill.
808,175. WASHING MACHINE. D. Stuck, Bay City, Mich.
808,185. CURTAIN FIXTURE. W. E. Batchelder, Lynn, Mass.
808,206. DIFFERENTIAL PLIERS. J. L. Knight, National Military Home, Kan.
808,245. WOOD BORING IMPLEMENT. J. Lund, San Francisco, Cal.
808,252. MOBILE STEP LADDER. J. S. Padon, West Plains, Mo.
808,250. WRENCH. B. F. Nedrow, Anacortes, Wash.
808,304. CLOTHES PIN. F. H. Perry, West Medford, Mass.
808,316. WEATHER STRIP. W. H. Taylor, Denver, Colo.
808,376. DOOR LATCH ATTACHMENT. J. S. Johnson, San Francisco, Cal.
808,380. WASHING MACHINE. T. E. Jones, Chicago, Ill.
808,400. WINDOW SCREEN. R. Parsons, Philadelphia, Pa.
808,414. SHADE FASTENER. F. Weilert, New York, N. Y.
808,428. SAD IRON. A. T. Beach, New York, N. Y.
808,434. LAWN MOWER SHARPENER. J. Chesbro, Oneonta, N. Y.
808,470. PUNCHING TOOL. T. McGrath, New York, N. Y.
808,603. WRENCH. J. T. Fetzer, Columbiana, Ohio.

REVIEW OF THE MARKETS.

WIRE NAILS: For January and February delivery, the mills have been booking the greatest amount of orders from jobbers to date. The market is a strong one and there is undoubtedly a feeling in the trade that we shall hear of an advance in prices before long. Already the complaint is made that a shortage of cars delays shipment in a number of cases, which is augmented by a scarcity of steel as well. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, sixty days or 2 per cent. discount for cash in ten days. Car loads to jobbers, $1.80; car loads to retailers, $1.85.

New York.—With the exception of orders given for delivery during the next two months, the trade locally has been affected by the holiday demand for other goods, and the Wire Nail market has for immediate delivery been a slow one. Quotations for small lots from store continues at $2.05.

CUT NAILS: By restricting the output of Cut Nails to meet only the actual sales, manufacturers have prevented any heaping up of stock in the warehouses. The demand has been quite moderate as regards quantity. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.70 base; for less than carload lots, $1.75. For carload lots on dock New York, $1.85; for less than carload lot, $1.90. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—The policy of restricting the supply to meet only the demands for immediate use prevails in this market. The quotations for small lots from store are based on $1.95 to $2.00 per keg.

BARB WIRE: With a demand that is moderately good, but the way of new business exceedingly light, the mills are busy on the delivery of orders previously contracted for, stock being accumulated for the anticipated heavy demand for Spring shipments. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.10	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: Fence manufacturers are very liberal in ordering and the heavy specifications that are received by the mills daily, show that the orders for Spring will be correspondingly large. Specifications on contracts come forward in a manner indicating stocks are low; and the outlook altogether is a good one indeed. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days. Jobbers in carload lots, $1.65. Retailers in carload lots, $1.70. The foregoing prices are for base numbers 6 to 9. Other numbers, plain and galvanized wire, take the usual advances.

HATCHETS: At the recent quarterly meeting of the Hatchet Association the old prices—represented by a discount of 50 per cent.—were reaffirmed, with the usual rebates to the different buyers as classified. The condition previously prevailing of restricting purchases to the associated manufacturers in order to obtain rebate, was withdrawn, so that purchasers may now buy where they please.

BUILDERS' HARDWARE: The leading manufacturers of Builders' Hardware have withdrawn prices on these goods existing prior to January 1, 1906, and have advanced prices approximately 10 per cent., there being some greater advances on some special goods. On contract goods the manufacturers announce that until February 1, 1906, orders will be accepted based on schedule estimates furnished manufacturers prior to January 1, 1906, provided that each order covers a complete specification for the goods and states the name and location of buildings for which the goods are intended. On and after February 1, 1906, all schedule estimates then outstanding will be abrogated and no further schedule orders will be accepted except on the basis of January 1, 1906, prices.

RUSSELL & ERWIN MANUFACTURING CO.: Russell & Erwin Manufacturing Company, New Britain and New York, has made a number of advances on staple lines. One circular advances Chisels, Drawing Knives and certain Auger Bits about 10 per cent. Another circular, covering five pages, relates to an advance of approximately 10 per cent. on Builders' Hardware under date of January 1, 1906. Japanned Tumbler Padlocks, Padlocks in sets, with Master Key, and Padlock Keys are also advanced 10 per cent. The company likewise has withdrawn prices on Builders' Hardware in force prior to January 1, 1906, and advanced the line on an average 10 per cent.

HENRY DISSTON & SONS: Under date January 1, 1906, Henry Disston & Sons, Philadelphia, issue a new discount sheet, in which a number of changes in discount are announced.

MACHINE BOLTS: The only change in Bolt prices made by the association at its monthly meeting recently was a 5 per cent. advance in Machine Bolts ⅜ x 4 and larger. The market on these sizes may now be represented by discounts of 65 to 65 and 5 per cent.

NUT LIST PRICES: A change in Nut list prices was made by the association, to go into effect January 1, as follows: The base sizes of H. P. Nuts, U. S. S. Square and Hexagon and C. P. Nuts, Plain and Chamfered Square and Hexagon, both U. S. S. and manufacturers' S., are all advanced 20 cents per 100 pounds. The base sizes H. P. Manufacturers' S. and H. P. Narrow Gauge are advanced 10 cents per 100 pounds. This applies to both Blank and Tapped Nuts.

The lists on Nuts for 1-inch and 1⅛ inch Bolts has been changed to read as follows:

	Blank.	Tapped.
United States Standard List, Square	$8.40	$ 8.80 per 100 lbs.
United States Standard List, Hexagon	9.90	10.50 per 100 lbs.
Manufacturers' Standard List, Square	8.30	8.70 per 100 lbs.
Manufacturers' Standard List, Hexagon	9.80	10.40 per 100 lbs.

COLD PUNCHED NUTS: The associated manufacturers have advanced the price of Cold Punched Nuts 10 cents per 100 on Square, Plain and C. and T. and 15 cents on Hexagon. The present market for fair retail buyers may be represented as follows:

	Off list.
Cold Punched Plain Square Nuts, blank or tapped	$4.90
Cold Punched Plain Hexagon Nuts, blank or tapped	5.30
Cold Punched C. & T. Square Nuts, blank or tapped	5.20
Cold Punched C. & T. Hexagon Nuts, blank or tapped	5.90

WROUGHT IRON WASHERS: A higher range of prices is now ruling on Wrought Iron Washers, a fair quotation on less than carload lots being 5.70 off list.

SHOT: An advance in the price of Shot is announced under date of the 21st ult., following being the present quotations. Terms, net cash, 30 days, or 2 per cent. discount for cash in 10 days:

	Per 25-lb. bag.
Drop Shot, sizes smaller than B	$1.80
Drop Shot, B and larger sizes	2.05
Buck and Chilled Shot	2.05
Dust Shot	2.25

On orders of ton lots and upwards, shipped at one time, 10 cents per bag of 25 pounds will be allowed.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12½
B Quality Manila	11½
Pure Sisal, 7-16 and larger	9½
No. 2 Sisal, 7-16 and larger	8

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.

In lots of less than 5 barrels..... 39 cents per gallon.
In lots of 5 barrels or more..... 38 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil ..... 62 cents per gallon.

THE SAN FRANCISCO TRADE.

Since my last news letter to HARDWARE, the day of peace on earth and good will toward men and the opening of 1906, has been observed with true American fervor, with especial grace and fervor because among other things their country has been instrumental in making peace and stopping the most fearful war of all the ages. And this is the annual time we Californians especially feel we are far separated from our kin and countrymen. Deserts broad and wide mountains divide us from them, and while the brief but lengthening day is here saluted at its beginning by the intense of flowers and bloom unsmitten by winter, they are shivering in the blast and cold, yet the day's cheer is upon all. In the abundance of our good feeling we wish that all the world were here, or that upon it were the same winterless bloom that garlands on Christmas and New Year and the balm that makes even poverty lighter and hardship less and the day's cheer brighter. But this sort of talk it not what I'm here for, so I'll proceed to say:

President H. C. Bennett of the California State Retail Hardware Association has written a New Year's letter to every non-member of the association throughout the State, thinking, presumably, that they are fully conversant with the object of the association. In this letter he says:

Association work commenced seven years ago by a body of Hardware merchants of the Sacramento Valley, meeting at Marysville, and formed the Pacific Retail Hardware Association. This was soon followed by the San Francisco association, and others later on, until to-day there are ten associations throughout California. Some four years ago the various associations saw that "in unity there is strength," and formed the present State association. The work accomplished and benefits derived show to all its members the wisdom of such a step.

Before the existence of our association the whole trade was a "go-as-you-please" affair. Goods were wholesaled at retail prices and conditions were such that the profits were lost to the retailer. This has now ceased, thanks to association work.

About the first thing taken up after we were formed was to try and get a profit on staples. Nails and wire were the first step. After retailers had been selling nails for twenty-five years at about cost a fair profit has since been maintained. The same can be said of wire, iron pipe, horseshoes, rope wagons, farm implements and many other lines handled by retailers. On each and every one of these items mentioned a fair share of the profit between the manufacturer and the consumer is now possible.

My opinion is that the share of the profits from the sale of any line mentioned would compensate the retailer a hundred times over every year the small amount he is called upon to pay his association. But I cannot go into every detail showing how in the past we have helped retailers, but I want to say that the wholesale dealers have always been more than pleased to meet our executive officers and adjust differences as they have arisen, which, without an association, often would be impossible. Among other things, we are working energetically to successfully combat catalogue house competition. So far, California Hardware merchants have not suffered like their Eastern brothers, but slowly and surely it is coming, and we are working harder each year to offset it.

And the parcels post bill (which allows carrying 15 pounds for 12 cents, and, if allowed to become a law would work great hardships to us in California) has had much attention from our association as well as all retail Hardware associations of the whole country, and solely by united efforts has it been prevented from becoming a law.

We keep our members by sending them market changes the same day they occur, on nails, rope, wire, pipe, horseshoes, iron, etc. This one feature alone is worth more than one's dues; and by joining us you have the privilege of insuring in any of the Hardware Mutual Insurance Companies, a saving to you on you insurance of about 35 per cent. And there are many other benefits. By joining your local association you become a member of the State Association, which is not ormed to help any particular part of the State or person, but all retail Hardware dealers in California, and I ask that all non-members think seriously of joining with us, now 600 strong.

C. H. Philpott has withdrawn from the management of both the Hardware firm of C. H. Philpott & Co., and the sporting goods house known as the Olympic Arms Company. The new manager is J. H. M. Thayer, who for many years was connected with Frye, Phipps & Co., of Boston, one of the largest Hardware jobbing houses in New England.

Hardware road men are responsible for the following interesting news notes: The Ritzville Trading Company has bought J. H. Newton's Hardware store at Cunningham, Wash.; Kunz & Kramer have succeeded Hughes & Kunz, Hardware, at Elmira, Wash.; Crosby & Grunwald have succeeded Crosby and Parkins, agricultural implements, Grangeville, Idaho; P. E. Wallin has succeeded the Hoverson-Kass Hardware Co. at Ferndale, Wash.; the American Falls Hardware Co. has opened a store at American Falls, Idaho; R. C. Dyer has purchased the Willis Hardware Company, Madera, Cal.; the S. H. Morse Hardware Co. has succeeded the Morse-Watkins Hardware Co. at Tacoma; the West Coast Stamping Co. has been incorporated at Tacoma for $100,000, to manufacture tinware; A. B. Kepner will open a Hardware store this month at Eugene, Ore., and January 15 Brenson & Marx will start a Hardware store at Coeur d'Alene, Idaho. INDUSTRIAL PRESS ASSOCIATION.

HOW WISS SHEARS ARE MADE

Perhaps some of the operations necessary to make a pair of good shears may interest you.

Most of the shears made in the United States are "steel laid," that is they are made of a piece of malleable iron moulded to fit the hand, to which a plate of high grade crucible steel is welded. The process of making shears out of steel and iron combined was made possible by Seth Boyden, of Newark, N. J., who

WELDING.

in 1829, produced iron castings, now called malleable iron, to which very high grade steel can be welded.

This American process of making shears is recognized as the very best, especially when applied to shears which are required for heavy work, such as cutting cloth and fabrics of all kinds.

HARDENING.

To-day in England, and for that matter throughout the entire world, you will find a pair of American shears in every tailor shop, or wherever shears are needed for heavy work. Sheffield, England, for centuries was looked upon as the home of good cutlery. To-day J. Wiss & Sons Co. supply the leading cutlers

GRINDING.

in Sheffield with genuine American shears, bearing the trade mark:

J. WISS & SONS, NEWARK, N. J., U. S A.

They take the malleable iron blade and attach to it a steel plate. After both have been heated to a certain temperature they are placed under a very powerful antomatic hammer which welds the two parts into one solid mass. The surplus metal is then removed under special dies, giving the blades of the shear their correct shape.

The screw holes are next drilled. Although this may seem a trivial operation, still it is necessary that these holes be perfected to the *thousandth part of an inch*, or else the shear will never work satisfactorily.

The next process is that of hardening, which requires great skill and care. This is done by heating each blade to a fixed degree and then plunging it into a tank of fresh running water. This is one of the most difficult operations in shear making. One of their greatest secrets is the process by which each blade is hardened absolutely like every other, so that when two blades

ASSEMBLING.

are put together one will not be harder than the other; otherwise the harder blade will cut into the softer one, spoiling its edge until it looks like a saw.

They now have a blade hardened as hard as glass—so hard that it would break if struck lightly. Then comes the tempering process, which consists of plunging the blade into a secret solution—which gives the blade the exact toughness required. Their methods are such that they have absolute uniformity each and every time. After this operation each Wiss blade is closely inspected before further work is done to it—making it possible for them to say every Wiss shear is perfectly tempered.

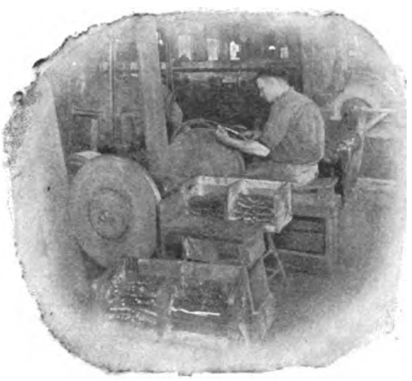
The hardening and tempering process has left the blades warped and crooked, and now they must be "peened" (that is, straightened) into shape. This operation necessitates marvelous skill and accuracy. The blade is placed on an anvil and

PEENING.

given thousands of light taps with a small hammer to get it in proper shape. The least misjudgment and the blade is ruined.

The blade is still a very crude affair, but in the grinding room it loses its rough appearance on grind stones varying in size from fifteen inches to six feet in diameter.

Until this stage the parts have been treated separately, but now they are paired and screwed together, and the handles and blades are put in perfect shape and form.



They now have a complete pair of shears still to be polished, then nickel plated or japanned, and then finished.

To make absolutely sure that no defect of any kind has been overlooked by department inspectors, a complete and final test is

Digitized by Google

made. Should the slightest imperfection be discovered that shear is instantly discarded, and no shear or scissors that fails to successfully pass every inspection is ever sold with the name "Wiss" stamped on it.

They make over 450 different kinds of shears and scissors—all the way from the dainty little embroidery scissors three inches

POLISHING.

long to the largest tailor shears. They make different shears for each special purpose—for the household, for tailors, for barbers, for buttonhole makers, for candy makers, for paperhangers, for bankers to have on their desks and clip their coupons, for

FINISHING.

horse clipping, for dental use, for tinsmiths, for grape cultivators, for orange growers, for nurserymen, for general pruning, for glove makers, and in fact for every use for which shears and scissors are needed.

HOLD THEIR BANQUET.

Officers and Traveling Men of Bissell Carpet Sweeper Company Meet.

The annual banquet of the Bissell Carpet Sweeper Company to its traveling representatives took place on the evening of December 28th at the Hotel Pantlind in Grand Rapids, Mich., and was one of the finest and most enjoyable ever given by this company.

To the strains of sweet music the banqueters entered the dining hall at 6.30. Twenty-four were seated at the tables, and it can be said of the menu, that it represented the highest type of the culinary art. At the side of each plate was a handsome knife, beautifully engraved with the monogram of the guest, which was given to the men as a little souvenir from the company. The decorations, though simple, were highly artistic, and exemplified the taste for which the Pantlind is famous.

R. E. Shanahan, general manager of the company, acted as toastmaster, and after a feature of his address that brought out a happy vein of merriment and good humor was the reading of what purported to be extracts from letters from the company to the different salesmen, leaving it for the men to guess who the salesman was addressed, the only cue to this being the character of the letter, dealing as it might with some peculiarity or prom-

R. E. SHANAHAN.

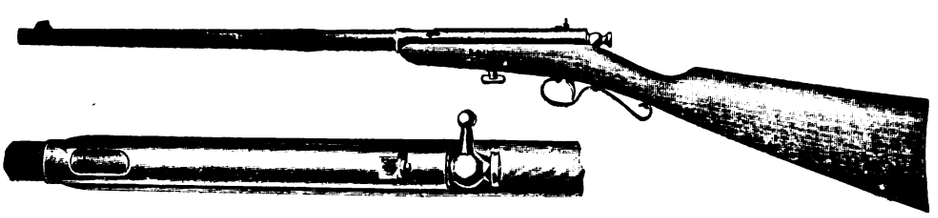
inent characteristic of the man it was intended to indicate. Happy informal talks were made by several present, and the universal feeling expressed was that the company was not doing business to-day who treated its employees with greater respect, with a greater spirit of brotherhood, than the Bissell. Some of its men have represented this company on the road for twenty-five years. The Bissell company is no less distinguished for the liberality of its policy towards its employes than for the high character of its representatives on the road, as no finer body of men are to be found than those selling the Bissell sweeper.

A peculiarly pleasant feature of the banquet was the presentation of a handsome silver loving cup to Mr. Pantlind as a testimonial from the Bissell company, and its representatives of their deep appreciation for all the courtesies he had extended to them during the many years the company's men have been stopping at his hotel.

Mr. Shanahan made an earnest presentation speech, and Mr. Pantlind, though much affected, made a happy response.

The evening's festivities closed with a fine exihibition of the magic art by Mr. Adams.

(Concluded on Page 46.)



Hamilton Rifles

Have a name for absolute safety, accuracy and strength of shooting.

MODEL NO. 23 is of the **Bolt Action** type. It is unique. Combines greatest strength with least weight.

A Happy and Prosperous New Year

TO ALL FRIENDS OF THE

Star Safety Razor

BEST IN THE WORLD

PRICE $1.50

Kampfe Bros. protect the dealer's profits. license the sale and use of Star Safety Razors and Supplies only when sold to the public at a price not less than the retail prices as printed in our catalogue.

Kampfe Brothers are ORIGINATORS, not Imitators. The phenomenal success of the Star Safety Razor has caused imitators and infringers to spring up like mushrooms. As a flock of sheep will follow the bell sheep, so have the copying inventors followed Kampfe Brothers, without knowing the secret of the leaders' success, "EXPERIENCE combined with PRACTICABILITY," and as a result—A PERFECT TOOL.

Our business has been built up entirely through the merit of the Star Safety Razor. The user of the Star is our best advertiser and is constantly commending it to others.

A Sample Tribute from Thousands of Testimonials

COLORADO SPRINGS, COLO., March 10th, 1905.

KAMPFE BROTHERS, New York City.

Dear Sir:—I am sending in this mail my fifteen year old Star Safety with two blades to be honed and adjusted. I enclose herewith 50c. and 4c. postage.

For a short time after Christmas a present of a.....safety that required "no honing or stropping" tempted me away from the Star, but if you will kindly fix up the "old reliable" and return it soon, I will not be tempted any more. Very sincerely yours,

19 E. San Miguel St. CHAS. B. MOORE.

The Star Blade is hand-forged in the old fashion way; will hold an edge and make shaving a pleasure.

(Continued from Page 44.)

The following were present: R. E. Shanahan, secretary and general manager of the company; T. W. Williams, vice-president; F. M. Deane, assistant treasurer; J. W. Shanahan, superintendent; M. R. Bissell, Jr., W. E. Gill, C. H. Bass, J. J. Van Leuven, C. B. Howard, E. H. Hudson, C. C. Woodruff, J. S. Knox, G. H. Robinson, T. M. Roche, J. H. Porter, L. F. Bauer, C. A. Withey, J. M. Bennett, J. Wilbur Warner, J. A. Collins, E. H. Finnegan, George W. Thayer, F. H. Califf, W. B. Waggoner.

PATENTED ELECTRIC EXPLODERS AND OTHER BLASTING SUPPLIES.

The Star Electric Fuse Works of Wilkes-Barre, Pa., which is a branch of a large German concern, and is manufacturing the patent match-head exploders and fuses for about two years, have during the last summer taken the first place among exploders and fuse manufacturers in the United States. Star Exploders manufactured by this concern have been used on a great number of big grading jobs and on several submarine works, and have given excellent satisfaction.

As two of the most remarkable blasts which have ever been fired, we would like to mention the big submarine blasts at the United States Navy Yard, Portsmouth, N. H., which was fired on the 22nd of July. On this blast 900 Star Submarine Exploders were fired as one shot, blowing up 50 tons of dynamite and making a great success in removing Henderson Point.

The biggest dry blast on record, which was fired August 22nd on the Pennsylvania Railroad work in Lancaster County, was also fired with Star Exploders. There were 1600 exploders fired as one shot, blowing up 225 tons of explosives, and removing 240,000 cubic yards of solid rock.

Anyone who has done blasting will realize what it means to fire *as one shot* 1600 exploders, especially when they are between 40 and 100 feet long, as those used by the Penna. R. R. Co. in Lancaster County.

Through these two successful blasts mentioned, Star Electric Fuse works has come to the front and has shown what they can do better than others because of the patented match-head construction. The secret is that the patents of the Star Electric Fuse Works permit making the match separate from the wires and therefore enable this company to test and guarantee the absolute even resistance of the platinum wire bridges, which is a necessity if a large number of shots is to be fired at a time. The Star exploders are in appearance exactly like others.

The readers of HARDWARE will certainly be most interested in this new exploder, because on the strength of above mentioned immense results, an easy sale will be obtained of the goods manufactured by the Star Electric Fuse Works.

This concern also puts an improved Pushdown Battery on the market which has great advantages over the other makes. We wish to mention that the case is practically moisture-proof, that one of the pole screws is insulated in a hard rubber box, and that other improvements are provided which insure good work of the batteries under any conditions. The price of these batteries is not higher than other makes, but the improvements are such that we would recommend each Hardware dealer to keep a stock of these improved batteries on hand.

Other Blasting Supplies manufactured by the Star Electric Fuse Works are Tape Fuse, Gutta Percha Fuse, Blasting Caps, Testing Instruments, etc. which have the reputation of giving excellent satisfaction at prices certainly no higher than other makes.

Twenty years experience are standing behind the German concern and are a guarantee for the reliablity of the goods they manufacture.

At the St. Louis Exposition in 1904, the highest prize for Electric Fuses and Apparatus was awarded to the Star Electric Fuse Works of Wilkes-Barre.

TOO MANY ELECTRICIANS.

"For the past half-century," says *The Record and Guide,* "it has been common enough to hear of the overcrowded state of every profession, with, however, the salving statement that there is always room 1or the best men at the top. In the architectural profession the same story is told, and even the comparatively new profession of electrical engineering is similarly branded. Technical colleges all over the country are turning out embryo electrical engineers by the thousand every year. A large part of the student's time has been given to the study of dynamo design, although the chances are that very few indeed will ever need to remember a single formula they learnt, and fewer still could design a satisfactory dynamo for any given output. It does not seem to be recognized that the real dynamo designers form a very small portion to the total number of electrical engineers; and now that fair sizes of motors and dynamos are fairly standardized the proportion will be smaller still in the future. Again a technical graduate would, without hesitation, undertake to design an electrical railroad system complete from the power house to the cars yet he would fail to get out an arrangement for driving a pump or a machinery tool by motor. It is said, truly said, that you cannot teach a man experience. But it is equally true that an engineer with a long experience in the practice of his profession will prove a more helpful teacher to engineering students than one whose experience does not extend beyond the four walls of the college laboratory. This fact is well recognized in America, where professors are chosen for their practical experience as much as for their academic careers. Even, however, if our technical college training were perfect, it appears to be the fact that the supply of electrical engineers has overtaken the demand, and they are now a glut on the market. An advertisement for an experienced man, at a salary far too low for the experience demanded, will call forth replies from scores, even hundreds of men with excellent credentials, prepared to go to the ends of the earth in order to earn a bare living. It is difficult to suggest a remedy for this state of things. It is not as though electrical engineering were the only overcrowded profession; all branches of engineering are in the same case, as are also the medical and legal professions. The supply of technically-trained men now far exceeds the demand, and the salaries obtainable for responsible positions are very often far less than those of the workmen occupying subordinate positions.

The bicycle business this year has been the largest since the decline of the craze. Next year the demand will be even greater. This present growing demand is not for the freakish or the cheaply-constructed vehicles which flooded the market in the boom days. It is for wheels of proven merit.

Pierce Spring Forks in conjunction with the Cushion Frame gives the highest luxury to be obtained in cycling. These two constructions work together in entire harmony and neither one is complete without the other. Examine this in the Pierce 1906 catalogue which will be furnished upon application.

Pierce Cycles

have maintained their high standard of mechanical excellence from the beginning. Every change has been for the benefit of the rider. The cushion frame, spring forks and coaster brake of the 1906 Pierce give it precedence over all others. Consider now the advisability of a Pierce agency.

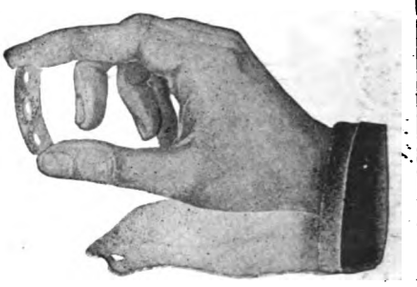
The Gillette Safety Razor--

Has the FIRST, and only NEW idea in RAZOR BLADES for OVER FOUR HUNDRED YEARS



Exact Size Complete Razor.

Although on the market for less than two years, the **Gillette Safety Razor,** judging alone by actual sales, is to-day used, appreciated and endorsed by *more* enthusiastic, discriminating shavers during this time than *all* of *the rest* of the so-called safety razor purchasers in the same period.

There is a reason for the success of the **Gillette Safety Razor.**

It is as *different* from other *so-called* safety razors as *other so-called* safety razors are from the old-fashioned razor.

The dealer who handles the **Gillette Razor** makes *liberal* profits, for the fixed retail price of $5.00 for a set *is*, and *will* be *maintained* under U. S. Patent laws, thus assuring every dealer a full profit.

The blades are as thin as paper, as hard as flint, as tough and flexible as whalebone.

The Gillette Safety Razor is made by *automatic machinery insuring perfection* and *uniformity* in every detail and a never varying quality which is so often found in the old-fashioned hand-make razors and blades.

The Gillette's Advantages

Our manufacturing facilities have been increased recently to meet the enormous and growing demand for the **Gillette Razor,** and this demand proves that it will certainly pay YOU to investigate at once the many advantages that are now offered in handling this phenomenal shaving device which is the talk of the civilized world.

Remember -- The Gillette while having *many imitations*, has no direct competitor, *is in a class by itself*, is here to stay, and its patents will be fully protected and all infringements on its rights will be prosecuted.

TWELVE BLADES.

TWENTY-FOUR SHARP EDGES

A Paying Proposition

No shaving proposition to-day offers you the inducements that the Gillette does.

Write to-day for further particulars and do not allow yourself to be persuaded to do otherwise by other *so-called* safety razors that have been put on the market, due solely to the phenomenal success of the **Gillette Safety Razor.**

Gillette Sales Co., 1104 TIMES BUILDING, BROADWAY, NEW YORK CITY.

Digitized by Google

Are You A Gillette Safety Razor Dealer?

Then you will receive the benefit of the enormous advertising plans that are now being worked out, embracing Magazine publicity, Signboards, extensive catalog distribution, and in fact, *every known* and *up-to-date* method in the science of advertising.

By our publicity methods we are interesting and appealing to *millions* of shavers *every* month.

We are *spending more money* in *making known* the unique advantages of the **Gillette Safety Razor** than is being spent by all the combined, *so-called* safety razor manufacturers in the country, which benefits every Gillette dealer.

That this advertising is producing the desired results is a fact which we will prove to every **Gillette** dealer to his entire satisfaction.

If you are not selling the GILLETTE SAFETY RAZOR, Get into line, for once in it, means you are there to stay.

The "Gillette" cannot be put together in any way bu the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see **Gillette** advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us, has resulted in your name not being on our list of dealers.

ADDRESS TO DAY.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bartlett, Tex.—Ed. Rowntree has engaged in the Hardware business.

Fremont, Neb.—The Holloway Hardware Co. has been incorporated with the following incorporators: George W. E. Dorsey, Louis F. Holloway, Edward Benton, Henry B. Treat and Charles F. Dodge.

Granger, Wash.—J. H. Abbott has engaged in the Hardware business.

Jefferson City, Mo.—Monett Hardware Co. has been incorporated with $5,000 capital. Incorporators—S. W. Pierce, D. C. Marbut, W. O. Batson, A. T. Bramer and others.

Laurel, Miss.—Laurel Hardware Co. has been incorporated with a capital stock of $30,000. Incorporators: F. M. Meek, W. H. Chambliss and others.

New York, N. Y.—Underhill, Clinch & Co. has been incorporated to deal in Hardware. Capital, $135,000. Directors, G. T. Adams, J. M. Gilmore and J. P. Elder.

Okalona, La.—Parchman Brothers Hardware Co. has been incorporated with a capital stock of $30,000. C. Y. Parchman and others are the incorporators.

Omaha, Neb.—A. L. Skinner Co. has been incorporated with capital stock of $10,000, to deal in agricultural implements, Hardware, etc. The incorporators are George N. Peck, John Hoss and Albert L. Skinner.

Oxford Junction, Ia.—Floyd Newcomb has recently opened a Hardware store.

Port Chester, N. Y.—Ericsson-Eddy Co. has been incorporated with $25,000 capital. Directors—E. A. Ericsson, H. A. Eddy and W. A. Williamson.

Raleigh, N. C.—The Murray Hardware Company has been incorporated to do a general wholesale and retail Hardware business. Capital stock, $10,000. Incorporators, A. M. Brittain, J. V. Brittain, L. W. Brittain, G. S. Harson, and C. A. Webb.

Raymond, Wash.—Wilson & Robinson have opened a new Hardware store.

San Angelo, Tex.—Hagelstein Hardware Co. has been incorporated. Capital stock, $20,000. The incorporators are Henry Hagelstein, S. A. Hodges and E. L. Hagelstein.

Saxton, Pa.—The Saxton Hardware and Handle Co. has been incorporated with $10,000 capital stock.

St. Louis, Mo.—Brueggemann Hardware Co. has been incorporated with $15,000 capital. Incorporators are; Wm. H. Brueggemann, Oscar O. Schlobohmand, M. A. Brueggemann.

Thomas, Okla.—Thomas Hardware Co. has been incorporated with $6,000 capital. Incorporators—H. Smith, G. H. Evans and G. A. Shaw.

Yonkers, N. Y.—Leander K. Wood has started up a Hardware store which has been stocked with a full line of Hardware for builders, mechanics and housekeepers.

Changes and Improvements.

Benton, Ia.—S. Short has purchased the Hardware business of D. V. Earley.

Birmingham, Ala.—The More & Handley Hardware Co. is erecting a new building to replace the structure recently destroyed by fire.

Buffalo, Mo.—The Davison-Butler Hardware Co. has succeeded to the business of the Davison-Edgar Hardware Co.

Burlington, Ia.—Nichols & Rankin Co. has sold their branch store in Raritan, Ill. to Perry Cooper.

Castlewood, S. D.—T. Mellor & Son have been succeeded in the Hardware business by H. S. Mellor.

Colville, Wash.—The Hunt Hardware Co. has succeeded to the business of E. H. Heifner.

Crab Orchard, Neb.—Murphy & Cavanaugh have sold their Hardware business to Deulen & Redmond.

De Kalb, Mo.—W. W. Whittington has purchased the business of the Cogdell Hardware & Implement Co.

Duluth, Minn.—The capital stock of the Marshall-Wells Hardware Co. has been increased $300,000, which makes the company now the third largest Hardware house in the United States. The capital stock is now $2,400,000.

Estancia, N. M.—L. Hughes has purchased the interest of P. E. Dunlavey in the Hardware firm of Dunlavey and Garnett.

Everly, Ia.—M. M. Wilkins has sold his Hardware store to F. W. Jenks.

Godley, Tex.—S. H. Ray has succeeded to the Hardware business of Sylvester & Ray.

Harrington, Kan.—A. E. Kneeland has disposed of his business to the Harrington Hardware Co., which continues at the old stand.

Italy, Tex.—Bracken & Hillebrand have sold their interest in the Italy Hardware & Furniture Co. to Mr. Cheatham.

Kirion, Kan.—C. P. Barber has sold his Hardware business to Gray & Stagg.

Lexington, Ky.—Allen G. Prewitt and Oliver Howell have purchased the Hardware and implement business of Blount, Nunnelley & Priest and will take possession at once. The deal involves $15,000.

Lincoln, Mo.—Hunt Bros. have been succeeded in the Hardware business by Jos. Hunt.

Maywood, Mo.—Gerkie Bros. have succeeded to the Hardware and implement business of Gerkie Bros. & Quest.

Mobile, Ala.—The capital stock of the Young Hardware Co. has been increased from $75,000 to $150,000.

Mt. Pleasant, Mich.—The Foster Furniture & Hardware Co. has erected a new three-story block on the site of their old building which was destroyed by fire.

Oakland, Ia.—F Jones has purchased the Hardware and implement business of T. E. Huff.

Paradise, Tex.—T. J. Morton has been succeeded in the Hardware and furniture business by Morton & Wood.

Parkersburg, W. Va.—The Chancellor Hardware Co. is erecting a large brick building.

Platte City, Mo.—J. M. Elgin has sold his Hardware business to Ben Hamm.

Reading, Pa.—Hoff Bros., Hardware dealers, have occupied their remodelled buildings, the improvements in which have made a practically new structure. The store room has been enlarged, and now has a frontage of 30 feet and a depth of 150 feet. It is well lighted, and from the first floor to ceiling the height is 15 feet.

Shenandoah, Ia.—Rankin & Botre have purchased the Hardware business of J. A. Schwarzentraub.

Spokane, Wash.—The Holley-Mason Hardware Co. is erecting a new building at a cost of approximately $150,000. The building will have a frontage of 142 feet on one street and a depth of 150 feet on another, and will be six stories high. There is also nearing completion an annex to this main structure, which is two stories high and measures 100x142 feet. The total floor space in both buildings will be 168,000 square feet.

Springfield, Me.—C. E. Trevitt has purchased the Hardware store of J. T. Murray & Son.

Fires.

Gardner, Mass.—A fire in the J. W. Davis Hardware store did damage estimated at over $24,000. Loss fully covered by insurance.

Gardner, Me.—The Vannah Hardware Co. was badly damaged by fire recently, the loss being well covered by insurance.

Houston, Tex.—The stock and building of the Bering-Cortes Hardware Co., were destroyed by fire recently, with a loss of about $60,000, of which a little more than half was covered by insurance. Plans are being drawn for a new fire proof building, which will be four or five stories high and equipped with all the latest appointments.

Hunnewell, Kan.—Fire recently destroyed the building and stock of the Ross Ellery Hardware store.

Massena, Ia.—John H. Yarger has sustained a fire loss in his Hardware and general store amounting to $2,500. Insurance, $1,000.

Moultrie, Ga.—Farmers' Hardware Supply Co. was recently damaged by fire to the extent of $2,000. Loss almost entirely covered by insurance.

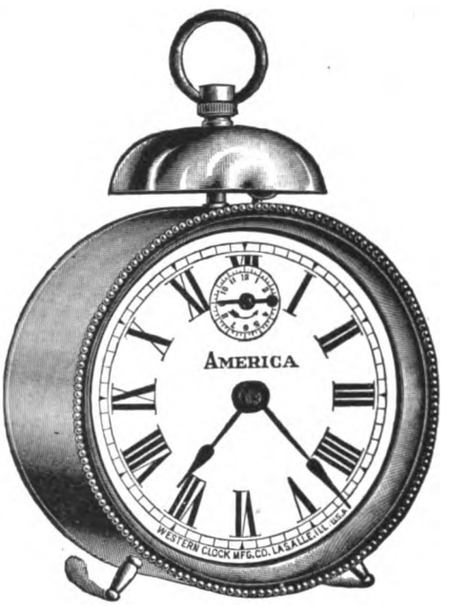
THE VITAL PART

of any razor strop is the quality of the leather fibre. If too coarse it will give the finest razor a saw edge and draw its temper—if too loose and open grained it will mat down to a glassy uneven surface that rounds the edge.



GIBFORD'S RED—E—FOR USE RAZOR STROPS

are made of the finest horse hide and calf skin for the sharpening and finishing strops and they must pass a rigid examination as to grain and strength of the leather fibre before they are sent to the factory where they are put through the patented process of treatment, which brings out that quality that gives the smooth, keen shaving edge to a razor.

Your razor counter isn't complete without RED-E-FOR USE razor strops. Try a sample dozen. Your jobber sells them.

GIBFORD MFG. CO.
ADRIAN, MICH.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

BISSELL'S
"CYCO" BEARING

CUT NO. 359 FURNISHED FREE TO DEALERS UPON REQUEST.

Is the sweeper of quality, reputation, and acknowledged superiority. Every one knows something about the Bissell sweeper, and that's why it sells itself. You don't have to waste valuable time trying to convince customers that the Bissell is the best sweeper on the market, for they know it.

Over 9,000,000 homes scattered throughout the world, are swept by the Bissell, and twenty-four different nations recognize it as the best sweeper made. Bissell's "Cyco" Bearing Sweeper is clearly distinctive and beyond comparison in points of mechanism, finish, saleability and profit paying qualities to the dealer. It is the ONLY sweeper ever placed on the market under a sound, sincere system of fixed retail prices, that guarantees to the dealer a good profit.

BISSELL CARPET SWEEPER CO., GRAND RAPIDS, MICH.

(Largest sweeper makers in the world. Established 1876.)

Branches: New York, 25 Warren St.; London, 38 Wilson St., Finsbury Sq; Toronto, 18 Pearl St., Paris, 42 Rue des Vinaigriers.

New York, N. Y.—The Empire Specialty Tool Company has been incorporated. Capital $100,000; directors: E. D. Woods, G. A. Larizke, New York; W. A. Hyle, Syracuse.

New York, N. Y.—The Onondaga Whisk Broom Works has been incorporated. Capital, $5,000; directors: W. A. Shepard, C. B. Fowler, W. R. Dorman.

New York, N. Y.—U. J. Ulery Co. has been incorporated to manufacture cutlery, razor strops, etc.; capital, $30,000. Incorporators: U. J. Ulery, A. Stolz, E. G. Kaufman, W. R. Greene, G. Z. Myers.

Pleasantville, N. Y.—Cornell Lumber Co. has been incorporated to manufacture Hardware. Capital, $30,000. Directors, Stephen Wood Cornell, Albert See, William Cornell.

Port Chester, N. Y.—Ericsson-Eddy Co. has been incorporated to manufacture Hardware. Capital, $25,000. Incorporators: E. A. Ericsson, H. A. Eddy, W. A. Williamson.

Rockport, Mass.—Cape Ann Tool Co. has been incorporated with $16,000 capital stock. Incorporators: Wm. R. Hastings, J. F. Hawkridge and J. J. Dean.

Seattle, Wash.—Washington stove Works have been incorporated with $100,000 capital. Incorporators: T. A. Buckley, W. H. Whipple and Wm. Kingsley.

Shelbyville, Ind.—The Vandergrift-Conger Wrench factory has been incorporated.

St. Louis, Mo.—The Acme Handle Co. has been incorporated with $15,000 capital stock. Incorporators—W. D Geggers, L. G. Blackmer, James Milne and J. E. Fuffield.

Texarkana, Tex.—The Post Pipe Co. has been incorporated with a capital of $125,000 to build, equip and operate a sewer pipe manufacturing plant. The officers of the company will be: L. W. Post, president; L. R. Blackmer, vice-president; J. T. Wallace 2d vice-president; G. R. Payne, secretary and treasurer; and M. P. Post, superintendent.

Wheeling, W. Va.—The Wheeling Enameled Iron Company has been formed by C. W. Franzheim, president of the Wheeling Potteries Company; W. A. Isett, George W. Franzheim, George Blackham and other prominent manufacturers and business men. The company will manufacture heavy enameled iron ware. The company has taken over the plant of the Wheeling Heating and Ventilating Company at Elm Grove, a suburb of Wheeling. C. W. Franzheim is president of the new concern; M. Isett, vice-president; G. W. Franzheim, secretary, and Mr. Blackham, general manager.

Changes and Improvements.

Bridgeport, Conn.—The Bullard Machine Tool Co. has increased its capital stock from $250,000 to $500,000.

Detroit, Mich.—The Art Stove Co. is erecting a new six-story brick warehouse. The structure when completed will be capable of accommodating 30,000 stoves. It is to be about 100 feet long by 90 feet wide. This latest addition to the Art Stove Co.'s plant is one of several material ones made within the last six or seven years. In that time the main plant has been enlarged, the foundry room materially increased, and fine new engines installed, the whole of the improvements far more than doubling the capacity of the plant.

Dixon, Ill.—The Clipper Lawnmower Co. is building a new factory.

Freeport, Ill.—The Arcade Mfg. Co. has purchased property for the enlargement of the plant in order to meet the brisk demand for their Hardware products.

Louisville, Ky.—Louisville Tin & Stove Co. has acquired a site 158x210 feet for the purpose of erecting a brick building of five stories and about 100x200 feet in extent. The price paid for the two lots comprising the site was about $11,000 and the plant will cost about $50,000. The location affords the company access to convenient railroad tracks and affords ample space.

Milwaukee, Wis.—The Gender & Paeschke Mfg Co. is erecting an addition 80x210 feet for the accomodation of its growing enamel ware business.

Newark, N. J.—J. O. Wiss & Sons Co. are erecting a four-story addition to meet the increasing demand for Wiss shears and scissors.

New Britain, Conn.—The Stanley Works is about to erect a new machine shop.

Nyack, N. Y.—The John Wennstrom's Sons Co., manufacturers of mechanical tools and electrical appliances, is erecting a new building which will be about 100 feet in length.

Springfield, Mo.—The Wood-Evertz Stove Co.'s plant has recently been doubled in its capacity by the building of a one-story brick addition to the main building. It is 30x150 feet and cost the sum of $5,000 including the equipment. In order to successfully compete with other large manufacturing plants of a similar nature, the capital stock was recently increased from $50,000 to $100,000.

Syracuse, N. Y.—A four-story extension, 80x120 feet, has recently been completed by the Syracuse Chilled Plow Company.

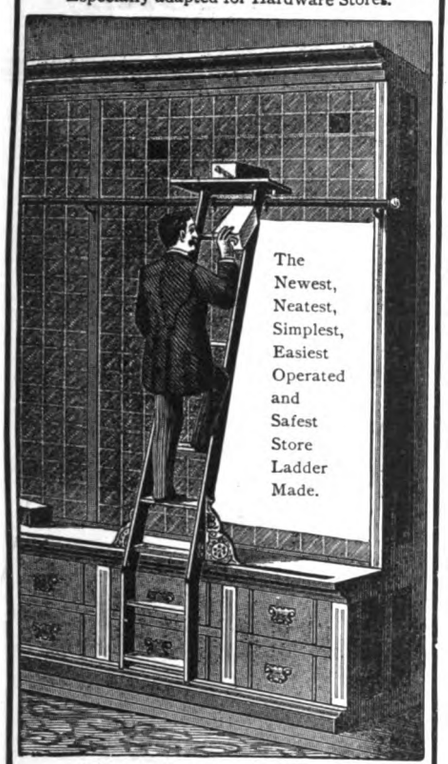
Syracuse, N. Y.—The Schillinger Stove Co. has recently purchased of James E. Newell and Levi S. Chapman their business block for a consideration of $21,000 to be used as a show building.

Waterbury, Conn.—The Plume & Atwood Mfg. Co. is erecting an addition to its brass goods plant.

Worcester, Mass.—The Coes Wrench Co. is building an addition 42x50 feet to its knife shop. It will be one story with a monitor roof, and will be used for a grinding room by I oring Coes & Co., incorporated. It will be equiped with $8,000 worth of new special machinery, part of which will be built in the company's machine shop.

Fires.

Lebanon, N. H.—The Marston Rake Co.'s factory was recently destroyed by fire. Loss, $5,000, mostly covered by insurance.



Trenton, N. J.—The Trenton Hardware Mfg. Co. has been destroyed by fire—the second plant within a year. The loss aggregates $25,000.

Petersburg, Ind.—Fire has destroyed the William H. Limp Hardware store and the Read & Snyder Hardware store. Limp loss, $11,000; Read & Snyder, $15,000.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Homer, N. Y.—The Baker Gear Company, recently incorporated, is to soon establish a plant here, taking part of the Phœnix Hardware Mfg. Company's plant. The stockholders are Frank Baker, James R. Morrison and John E. Walrath of Syracuse, and E. H. Hastings and son, Robert Hastings of Homer. The capital stock is $70,000. The articles to be manufactured at first are a patent steering gear for automobiles and other automobile attachments patented by Mr. Baker, who, it is expected, will move to Homer and act as manager of the company. The Phœnix Company will manufacture the gears, etc., until the gear company have time to get their own shops in running order.

Portland, Me.—The Snow-Webster Automobile Co. has been incorporated for the pupose of manufacturing, dealing in, exporting and importing all kinds of vehicles operated by steam, gasoline, electric or other power, etc., with $10,000 capital stock. The officers are: President, Frank S. Webster of Newton, Mass.; treasurer, Louis A. Webster of Newton, Mass.

Rome, Ga.—The Rome Sporting Goods Co. has been incorporated to conduct a retail store and repair shop.

Stryker, O.—The Stryker Boat, Ore & Lumber Co., has been incorporated with $50,000 capital stock.

Toledo, O.—The Toledo Interlocked Co. has been incorporated at $150,000 to manufacture a line of sporting goods, among which will be bowling balls. Joseph M. Grasser, secretary and treasurer of the concern, has invented and had patented a process for making such balls from wood fiber. The balls are made almost as hard as granite, it being impossible to hack them with an axe without greatly dulling the instrument. Edward J. Marshall, president of the company, and Harold Frazer, vice-president, with Theodore F. MacMannus and George Raab, comprise the board of directors.

Traverse City, Mich.—The Traverse City Motor Boat Co. has been incorporated for manufacturing purposes. The company has an authorized capital stock of $10,000.

Worcester, Mass.—Hurst sporting goods company has been incorporated. President, Albert E. Hurst; treasurer, Charles S. Hurst; clerk, Arthur C. Twombly; capital stock, $10,000.

Changes.

Binghamton, N. Y.—W. C. Lippe is about to move his business to Elmira Heights and will erect a motor cycle factory there as his present facilities are being outgrown.

Boston, Mass.—The enlargement of the William Read and Sons store on Washington street makes one of the largest and most desirable sporting goods houses in the city. This firm carries a complete line of athletic and sporting goods.

Chicago, Ill.—James L. Van Uxem has terminated an honorable business career, in the sporting goods line, extending over a period of 35 years, by selling out his entire stock, fixtures and good will to the Bullard & Gormley Co., 78-80 Randolph street.

New York, N. Y.—Frank L. Slazenger is about to remove from his present quarters at 6 East 15th St. to 8 West 28th St., where he will have better accomodations for conducting his rapidly increasing business. The new location is very convenient, being readily accessible by surface, elevated and subway roads.

Norwich, Conn.—The Thames Arms Co. has changed owners, its former officers retiring from the company and the following board elected to represent the new concern: President, D. R. Harvey, Boston; vice-president, Edwin C. Harrington, Worcester; secretary and treasurer, George F. Brooks, Worcester; additional director George W. Harvey, Boston. The Harveys are officers of the Iver Johnson Sporting Goods Co., Boston, while Brooks and Harrington represent the Harrington & Richardson Arms Co.

Toledo, O.—The Dominion Automobile Co., organized last summer and backed by McKenzie and Mann and other leading Canadian financiers, will take over the selling end of the automobile branch of the Canada Cycle and Motor Co. The latter company will continue to manufacture, but all their output of automobiles will be handled by the Dominion Co., which has secured the Canadian agencies for many European and American manufacturers and will locate branch agencies at Montreal, Ottawa, Winnipeg and Hamilton.

Toledo, Ohio.—The Union Fire Arms Company has fully decided to build an addition to its present plant that will more than double its capacity. The volume of business for the past year has made it necessary that the plant be enlarged, and with this purpose in view, the company has purchased a lot, 210 feet long and 60 feet wide, on which will be erected the additional building, which will add more than 25,000 square feet of floor space to about 20,000 square feet now occupied.

York, Pa.—Y. P. Swartz has recently moved into a new building, more centrally located than the old and with about four times the amount of floor space, and can now claim to have the finest exclusive sporting goods store in the state, exclusive of Philadelphia and Pittsburgh. Mr. Swartz dropped out of the retail bicycle trade some three years since, though he continued wholesale cycle sundries. With his present ample room, and in view of the renewed interest in bicycles, he will again enter the retail field.

Fires and Explosions.

Birmington, Ala.—The Birmingham Gun & Key Co. recently suffered an $800 loss by fire.

Boyle, Ala.—An explosion in the mixing house of the Du Pont Powder Works resulted in the loss of five lives.

Emporium, Pa.—The Keystone Powder Co.'s mixing house exploded, killing nine persons. The building was totally destroyed.

Falls Junction, O.—There was an explosion recently in the Austin Cartridge Company's plant which wrecked the works.

Niagara Falls, N. Y.—The sporting goods store of J. & G. Rae recently sustained a loss of about $25,000 by fire.

St. Cloud, Minn.—The gunmaking and repairing shop of John Hedlund was recently destroyed by fire.

Washington, D. C.—The New York Cycle Co. has recently sustained a $2,000 loss by fire.

Miscellaneous.

E. M. Moss, proprietor of a bicycle and sporting goods establishment at Hopkinsville, Ky., has filed a petition in bankruptcy; liabilities $3,600, resources claimed to aggregate $5,000.

Several French inventors are working at the levocyclette, or bicycle, in which levers are substituted for cranks; and Dr. Matthien, of the French Touring Club, considers that the hill-climbing machine of the future will be one with practical combination of pedalling by direct propulsion, to permit of mounting the steepest gradient slowly, and a loose wheel, to permit of descending rapidly with the body at rest.

The dates announced for the National Motor Boat and Sportsman's Show are Febuary 20 to March 8, inclusive, to be held, as in other years, at Madison Square Garden, New York City. There are indications that this will be the best show of the kind ever held in this country, applications for space having been made by nearly all the former exhibitors and many new ones as well.

The Lobdell & Bailey Mfg. Co., of Onaway, Mich., not only produces a large share of the wooden bicycle rims used in the United States, but has a branch factory in France, some twenty miles from Paris. Four years ago the company supplied six per cent of the rims used in France, and at the present time the company is supplying 56 per cent. A French manufacturing company pays so small a real estate tax that it is insignificant; he is taxed only on his profits and then the tax is a moderate one, so that manufacturing is encouraged throughout the French republic. The company has been supplying Germany with bicycle rims from the French factory; the wood for these rims being shipped from Onaway, Mich., in suitable sizes. Their German trade is now increasing steadily and the company is contemplating removing some American machinery to that country and setting up a factory.

The sporting goods firm of Kerr, Rolph & Co., Baltimore, Md., has dissolved by mutual consent of the partners, John S. Kerr, William Parvis Rolph and James Archer Spellman. The first mentioned partner has associated with himself Allen C. Chase and Walter T. Harvey, and will continue the business under the old firm name.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

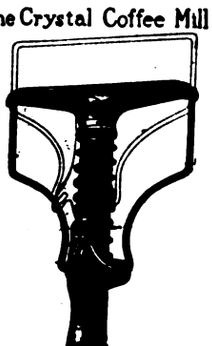
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

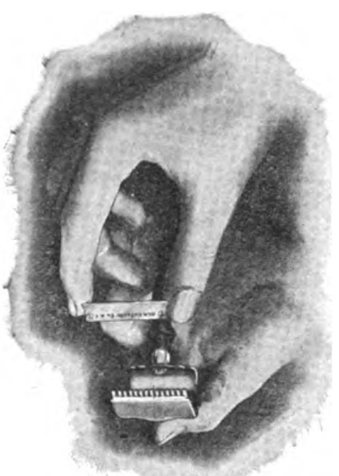
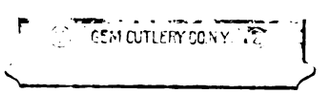
A Wave of Enthusiasm

Has been created by the Greatest Little Barber in the shaving world—**The Zinn Automatic Razor.**



Portland, Ore., Dec. 28, '05
Messrs. The Gem Cutlery Co.,
34 Reade St,, New York.
Gentlemen:—Your "Zinn" Razor is all right. I have been shaving with it every day since I received it and am well pleased with the work. I thought that I had just the right razor when I bought the advertised two-edge Safety, but I must confess that the "Zinn" is away ahead and is so well poised that it makes shaving a luxury.
Yours truly,
A. C. Going, Pres.
The Loewenberg & Going Co.

This testimonial is only one of thousands—conclusive proof that the Zinn is all we claim for it.



The ZINN
Automatic Razor

Is the Razor with the Always Keen Blades. Twenty-four of them—so thin that 200 of them are only an inch thick! So hard that they cut glass; so sharp that no whiskers are too tough for the Zinn.

The Zinn effects a great saving in shaving--that's why it has made friends fast and--fast friends.

Show a Customer a Zinn Blade

He will buy a Zinn Razor

No Honing! No Stropping! No Dissatisfaction!

That's why its sales are so phenomenal and your profits, Mr. Dealer, so quick and sure—the very reason why you should

Share in ZINN PROFITS in 1906

We are advertising it everywhere. We furnish you with advertising literature.

We protect you against cut prices.

Send for our 1906 proposition to-day—

Don't wait till to-morrow!

The 4 Big Lawn Mowers

Our Style A Is the Only ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers. Three others—Style E, K and C—belong to the same combination.

STYLE A

In each, the revolving cutters are without bar in centre have large, long bearings, and are the most satisfactory Lawn Mowers to sell. We have others shown in 1906 Catalogue. You ought to have a copy and see how complete our line is!

The Philadelphia Lawn Mower Co.

3101-09 Chestnut St., Philadelphia, Pa., U. S. A.

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

THE EBBING MANUFACTURING CO.

400 N. 8th St. - ST. LOUIS, MO.

WISS

"STIELWELD" SHEARS

The Process

Over five hundred distinct operations are required to make the Wiss "Stielweld" Shears. This illustration shows a blade ready for the first "Stielweld" process—our own process—which is largely responsible for the wonderful cutting edge of the Wiss shear.

This hand points to the tough frame which enables the Wiss "Stielweld" Shears to stand the hardest of strains without breaking.

This hand points to a piece of the finest crucible steel, which welded to the frame gives a cutting surface of such perfect temper that it is possible for the Wiss shears to stay sharp longer than any other.

These two parts are forged into one—forever one. They can never be separated. Both are there to do their work—the backing giving strength and toughness; the steel its marvelous cutting quality.

This is one of the unique processes which have made Wiss "Stielweld" Shears most famous and given them a large sale throughout the whole world, even in Sheffield, the home of English cutlery.

On the blade beside the screw is stamped this trade mark

J. WISS & SONS NEWARK N.J. U.S.A.

It identifies the genuine and the best shears made—wherever bought

If "Wiss" is not there, don't take chances—go to another store.

The Result

This shows how a Wiss "Stielweld" blade looks after it has been shaped, tempered, ground and polished ready to go into the hands of the "adjuster."

He sees to it that the blades *match* to a hair's breadth, that they cut *clean* from heel to point, and are so joined that they never work loose.

That's why tailors and dressmakers everywhere prefer Wiss "Stielweld" Shears—that never disappoint, never pinch or chew the cloth, no matter whether you are cutting the thinnest of silks or the heaviest woolens.

If tailors and dressmakers who live by their shears adopt the "Wiss" as standard, they are a safe purchase by *you* for your use.

For over fifty years we have made Wiss Shears and Scissors the best that brains and money can put together, so that

WE GUARANTEE every article bearing our trade mark to be perfect in workmanship. If unsatisfactory for any reason, your dealer will exchange it or we will.

The name "Wiss" on the blade is your guide.

Please Send To-day for Our Free Book "Pointed Sharpness"

which illustrates and describes the process of making shears and scissors—gives pictures and prices on 150 styles, from a dainty pair of embroidery scissors up to the largest tailor shears.

Your dealer probably sells the Wiss (most *good* dealers do), but if he does not, do not accept an imitation—send us his name and try another store.

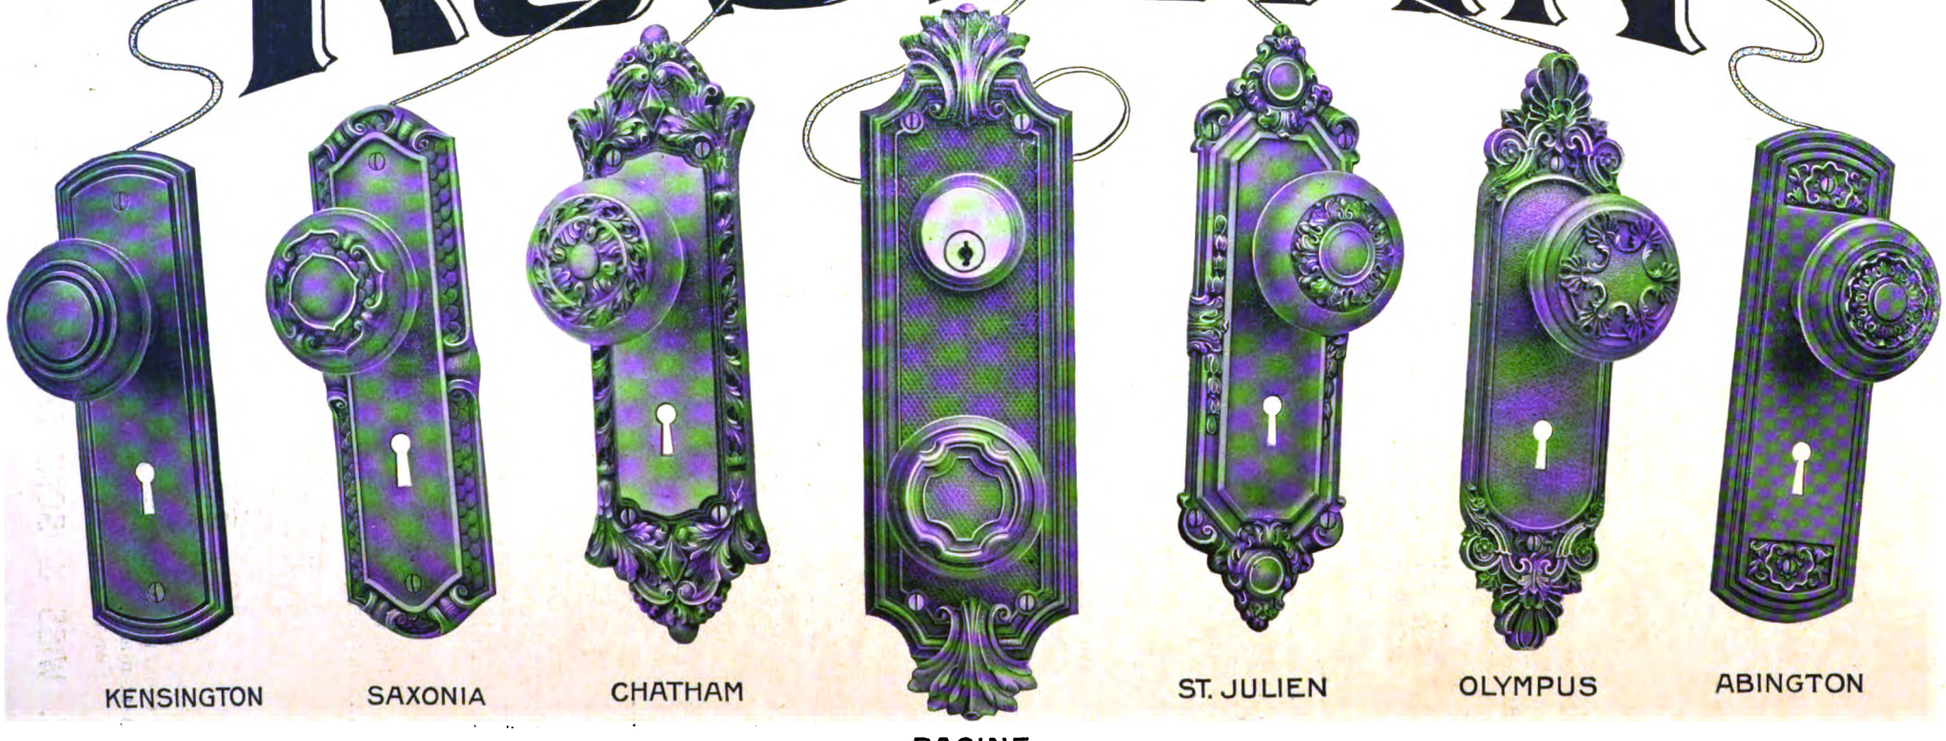
J. WISS & SONS CO., 13-39 Littleton Avenue, NEWARK, N. J., U. S. A.

Proof of a Wiss Advertisement for February

During the coming year the Wiss line will be extensively advertised in the best and largest publications in the country as follows:

Ladies' Home Journal
Delineator
Woman's Home Companion
Ladies' World
McCall's Magazine
Harper's Bazaar
Good Housekeeping
Munsey's

These publications are read by over Twenty-five Million people every month. If you put in your stock the Wiss line of Shears, Scissors, Razors, Tinner Snips, Pruning Shears, etc., you will have the help of our advertising. Wiss goods are the best made, and Wiss prices no higher than you are paying for the average shear.



Send for our catalogue, prices and Individual Advertising Plan. Write to-day.

A Few Words About Padlocks

Fig. 1

¶ The statement that "appearances are deceptive" is particularly true of a Padlock. Its merits depend chiefly on its interior construction—not on external appearance.

¶ For example, our Yale-Standard line of Padlocks, of which two sizes (Figures 1 and 2) are here shown, has been extensively imitated. This imitation has been *external* only and for the purpose of making them *sell.*

Fig. 2

¶ How different the *internal* construction is, is shown by the two illustrations. Figure 3 is a section of an *imitation* of the Yale-Standard Padlock and Figure 4 a section of the *genuine.* Note the points of difference: In the genuine the bolt is guarded by *four* double-acting lever tumblers; in the imitation the key-way is *open—no tumblers at all* —and only a single ward. A novice can pick the imitation with a wire.

¶ The working parts of the genuine are enclosed in a sturdy case which affords maximum resistance to violence; the imitation has a case of light construction which naturally does not offer much resistance to force. ¶ For *highest* security the Yale Pin-Tumbler Padlock No. 850 should be used, or the No. 851 if wanted in series controlled by a master key, this lock representing the highest grade of workmanship and security. ¶ The next in quality are the *Yale-Standard Padlocks*, the line of which is extensive, ranging from 1 to 3 inches in size. These also are of solid bronze and possess high security. (*See description above.*)

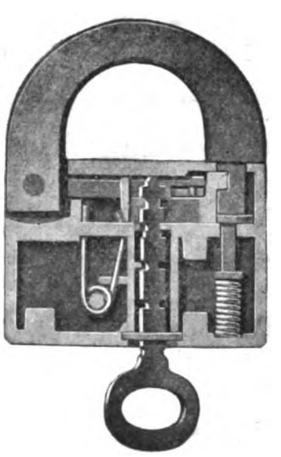

Fig. 3.

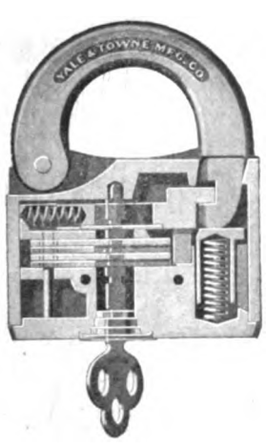

Fig. 4

Every Padlock in the Yale & Towne line is honestly good of its kind. The line includes padlocks ranging in retail price from 10c. to $2.00, but all are designed with equal care, are made of the proper material and have the best security of which their character and cost admit.

Write for further information and ask us for some ideas that will help to sell padlocks.

SCREEN DOORS AND WINDOW SCREENS

Announcement to the Retail Trade.

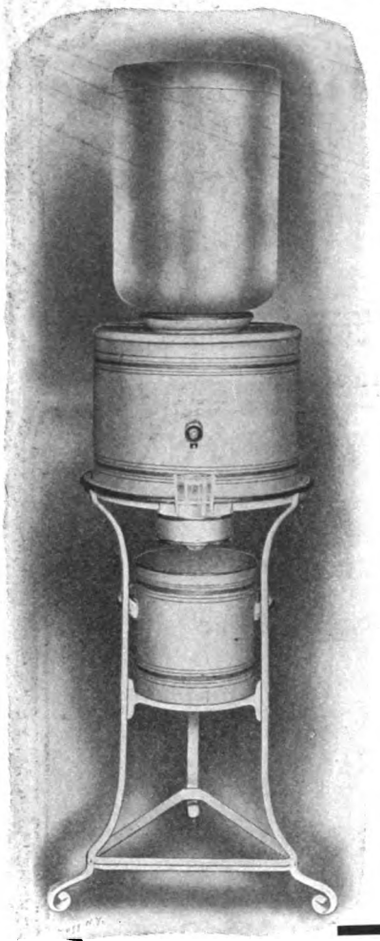
The Continental Company has purchased the product of the following well known factories:

The Wabash Screen Door Co.,
The Owosso Manufacturing Co.,
Porter Screen Manufacturing Co.,
Philadelphia Screen Mfg. Co.,
The A. J. Phillips Co.,
The Queen Anne Screen Mfg. Co.,
Schumacher & Leighley, Hartville, Ohio.
Cortland Door & Window Screen Co., Cortland, N. Y.
Horseheads Screen Door Co., Horseheads, N. Y.
Bachman Bros,, Reigelsville, Pa.
American Screen Door Co., Adrian, Mich.
American Screen Door Co., Ironton, Mo.
Hart Manufacturing Co., Greenville, Ohio.
Columbia Manufacturing Co., Antigo, Wis.

Only the largest and best equipped factories will be operated this season. These goods may be had through the Jobbing Trade throughout the United States.

Prices are considerably higher than last year, for the reason that the goods were then sold at an actual loss and also because the advance in lumber has been so severe. It is true that wire cloth is enough cheaper to making a saving of thirty cents per dozen doors, but lumber has advanced enough to make the extra *cost* this year exceed $1.25 per doz., and it is still advancing, *and is practically unobtainable.*

Retailers are safe in buying at present prices, they will not go down while the present lumber situation continues. Retailers should not delay placing specifications with their Jobbers until after distribution cars have gone forward from the factories; these distribution cars save a great deal of freight.



The present prices are not high as compared with the prices of other goods,—they are high only as compared with the ruinous prices of a year or so back.

Consumers are not going without Screens because they cost a few cents more. Mechanics and farmers were never in better shape to buy goods. Retailers should investigate and act promptly.

WAYNE WASHERS SOLD Up to the Present Time

And increasing at the rate of 300 per day.—What more evidence do you want to convince you that Wayne Washers are the best to sell?

WE Know it's a "WINNER"

Because it possesses everything to make it a "WINNER"

FIRST—It has fewer parts in its construction than any other rotary, and Every one knows the fewer parts there are in the construction of any machine, the easier it will work and the less liability there is to wear and get out of order.

WAYNE WASHERS
Klean Klothes

The appearance of the "WINNER" is different than any other machine upon the market. The tub is finished in the natural wood, with green bronze hoops, green enamel hand wheel, and the gearing in gold bronze; the combination making the most beautiful appearing machine upon the market. We are also using a special preparation in connection with the finishing of our tub—which holds the varnish to the surface and retains the lustre for all time. You will not find this finish on any other washing machine made.

We also use the detachable stave leg, which does away with the necessity of throwing away the entire machine in case the leg becomes broken.

Simplicity—Quality—Appearance—Good Value for your Money, are all possessions of the "WINNER". Order a sample from our jobber or direct from us, and we will leave the rest to you and the "WINNER".

WAYNE MANUFACTURING CO., St. Louis, Mo.

A Square Deal

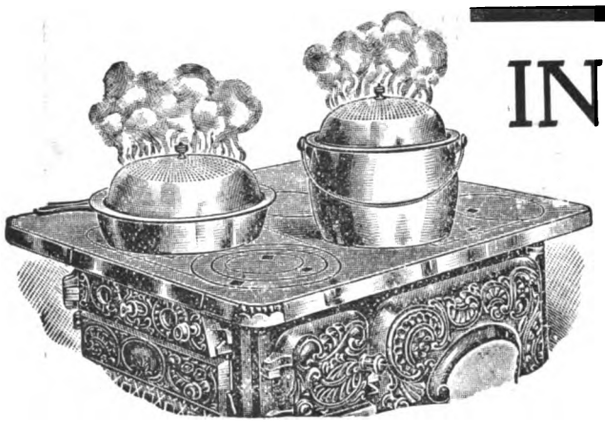
— FOR —

Square Dealers

Square dealers, we take it, are those who try to give their customers goods that are "square" — honest all through. For forty years we have been giving all dealers the "square deal."

We make all the "ENTERPRISE" hardware specialties just as good as we know how—then we go out and tell the public, of all the world, about their merits. Square Dealers *distribute* them — they are already *sold*. Just ahead is the big demand for

"ENTERPRISE"



Meat and Food Choppers and "ENTERPRISE" Sausage Stuffers, Lard and Fruit Presses. They are being widely advertised now to the public. Write for our literature about them, including our new catalogue of all the "ENTERPRISE" specialties. Get ready for the biggest season you have ever seen on "ENTERPRISE" goods. We are ready. Get your share.

Increase your sale of "Enterprise" Meat and Food Choppers by using our new booklet: "The Cook, Her Critic and—". We will send you a supply of these on request.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

CORRUGATED PATTERN.

CAPEWELL HORSE NAILS ARE THE LEADING NAILS OF THE WORLD AND THE BEST

PLATE PATTERN.

READVILLE, MASS., SEPT. 25, 1905.

THE CAPEWELL HORSE NAIL CO.,
Gentlemen:—Audubon Boy, 1:59¼, was shod in our blacksmith shop on the morning of September 22, 1905 (when he broke his record and equalled the world's record for mile pacing without wind shield), by our blacksmith, and he used your nails which always give us perfect satisfaction on trotters, pacers, light driving horses,—and on our few draught horses they give the same results.

Yours truly,
BITHER & PALMER.

Made By

The **CAPEWELL HORSE NAIL CO., Hartford, Conn.**

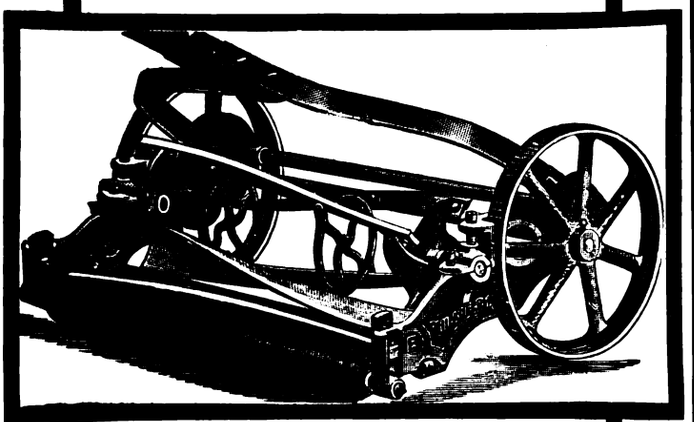
The Wiederhold Inverted Light

LIGHT COMPLETE
Price $1.50
GLOBE REMOVED

The Best--Because

It never flashes back, blackens mantels nor smokes. Does not flicker.
It's ornamental, durable and gives
50 Per Cent. More Light
at less cost for gas and mantels. Fits any fixture—burns all kinds of gas.
Mark: Its Rays Are Downward.
We want a representative in every town. Write us.
The WIEDERHOLD LIGHT CO.
96 Warren St., New York



Comparisons Are Odious

to the imitator. We always invite the most careful investigation of the merits of
American Automatic Lighting Systems
Cost for cost the "*Automatic*" will give better results than any other system on the market. Why? Because they consume less fuel per candle power: They require no hand regulating and will not flicker, buzz, smoke nor smell. All parts are interchangeable, so repairs may be quickly made if necessary.
Before you purchase a lighting system write us for estimates.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

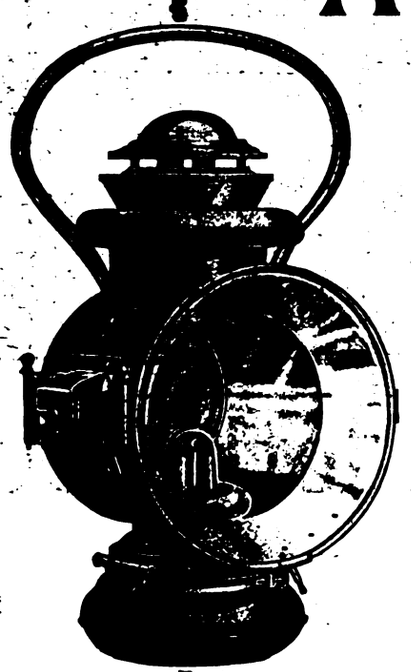
Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.



¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—If you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

J. D. WARREN MANUFACTURING CO.
900 Masonic Temple, Chicago

AUTO LAMPS

That Give LIGHT and Plenty Of It

When you buy Auto Lamps, it isn't the appearance and price alone that is to be considered.

THE remarkable light produced from the HAM COLD BLAST AUTO LAMPS make them easily distinguishable from all other oil lamps and it is light that is dependable, too, as these lamps are ABSOLUTELY WIND PROOF AND WILL NOT JAR OUT. The makers of the Ham lamps have been engaged in the manufacture of oil burning outside lamps for thirty-five years and in the Auto Lamps they have embodied all their best patents on combustion.

It's easy to convince yourself of the superiority of the Ham Cold Blast Auto Lamps. Light a half a dozen of the leading oil lamps, including a Ham, and without any hesitation you'll pick the Ham as the brightest as it is so superior.

See Exhibit at Automobile Show.

Write for Booklet and Prices.

We Help You Sell

The Iwan Post Hole Auger

and Other Goods of Our Manufacture

This advertisement is being carried in 50 of the best agricultural journals this winter and spring and is bringing us many inquiries.

We refer ALL inquiries to the hardware merchants, giving you notice and an opportunity to sell Mr. Farmer the best post hole auger on earth, and besides bringing him to your store, enabling you to sell him other goods.

The Iwan Auger Gives You More Profit Than Any Two or Three Augers or Diggers of Inferior Quality

You'll be surprised how much demand there is for a *really good* post hole auger, if you take up the sale of this popular tool, and now is the time to try it.

CUTTING

All hides vary in thickness and quality. The leather from over the hips and back of the animal being thicker and more evenly grained than any other part of the hide.

This leather only is used in making

GIBFORD'S

RED-E-FOR USE

RAZOR STROPS

and in cutting it great care is taken that each strop shall be of one unvarying quality and thickness so that it will not stretch or become uneven with use.

There is but one quality of leather in all **Red-E-For Use Razor Strops** (and that is the best). The difference in price is due to size and trimmings. We wouldn't injure the reputation of our strops by putting shoddy leather in our low priced goods.

Write for Catalog. Sold by all Jobbers.

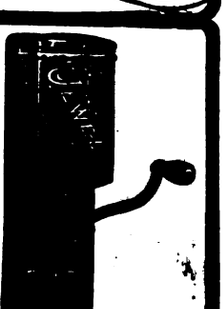
GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

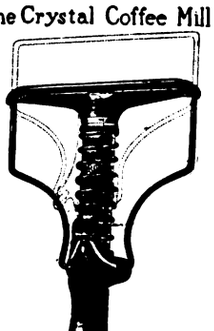
will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.



We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

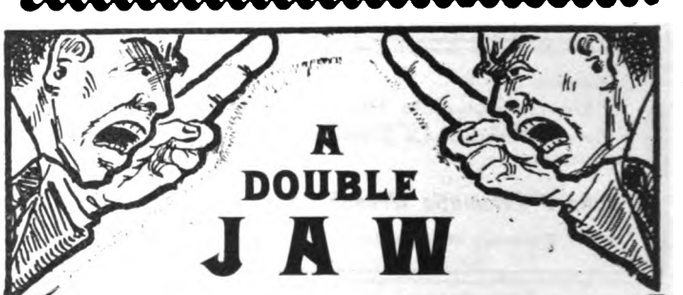
"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No.....



That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.

It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

HARDWARE

From the enumeration figures reported to the Legislature, by the Secretary of the State, it appears that the population of the State is 8,067,308, which total includes 1,004,320 aliens, or 12.4 per cent. In the last enumeration the aliens, made up 11.1 per cent of the total population of 6,513,349. There are in New York city 788,520 aliens, which fact will make a decided difference in the number of representatives in the Legislature to be apportioned to the city, since aliens are not included in the population entitled to representation.

✤

L. W. STEWART, who has called on the Hardware jobbing trade in the Middle West for several years, representing J. C. McCarty & Co. of New York City, has commenced business for himself as a Hardware manufacturers' agent. Mr. Stewart will cover personally all his old territory and include as well the States of New York and Pennsylvania. He will represent the Dana Manufacturing Co., Cincinnati; the H. C. Track Company, Cleveland; Ohio Tool Company, Columbus; and the Avery Stamping Company, Cleveland. His office will be 1206 Mercantile Library Building, Cincinnati, Ohio.

✤

THE ANTHONY FENCE COMPANY, Tecumseh, Mich., through the local sale of $70,000 worth of additional stock will retain its factory at Tecumseh. The company had outgrown its quarters and was casting about for inducements which would permit of expansion in the business. The disposition of the stock in Tecumseh holds the factory at the place. The company will now increase its plant to a ten-loom factory and will build a $25,000 addition in the spring. Electrical power will be used and a complete machine shop equipment for repair purposes will be installed. The company is sending out souvenir pins showing the tie in its Fence. One is in the form of a hat pin and the other a scarf pin.

✤

THE NASHUA TILL COMPANY, Nashua, N. H., manufacturers of Patent Alarm Cash Drawers, Adjustable Nickel Plated Show Case Brackets, and other Specialties, have issued a very interesting twenty-page pamphlet describing, illustrating and pricing their goods, in regard to which they state: "In presenting our price list of our Money Drawers, Adjustable Show Case Brackets, etc., we wish to remind you that for durability and convenience they have no equal. We should be pleased to have intending purchasers examine and compare our goods with other makes, and will promptly give any required information about them." They also claim that all of their many different styles of Drawers are made of the best materials obtainable and for real convenience and durability and service they have no equal. The little booklet will repay a careful perusal, and will be found handy and instructive. Send for one.

✤

THE GOODWIN & KINTZ CO., Winsted, Conn., manufacturers of Fine Metal Goods, have sent us their No. 25 Supplement which they state is to be used in connection with their Catalogue No: 24 recently issued. The Supplement is a twelve-page folder, measuring 13x11 inches, and describes, prices and illustrates their Clocks, Vases, Candelabra, Candlesticks, Bronzes and Premium Goods. They have made this Supplement very interesting, showing many new designs, and the illustrations are unusually fine. For further information along these and other lines manufactured by this company write for catalogues.

✤

F. E. Myers & Bro., Ashland, Ohio, the report of whose fire has been grossly exaggerated, state that it was confined entirely to their storage building. Their factory is still entire and all the material saved. The shops are running and shipments will not be delayed over one week.

✤

There appears to exist a greater desire to live long than to live well! Measure by man's desires, he cannot live long enough; measure by his good deeds and he has not lived long enough; measure by his evil deeds, and he has lived too long.—ZIMMERMAN.

✤

The *Journal of Commerce* points out in its article on "New Year Prospects," that the chief source of possible danger is in the over-extension of credit, saying, "There is also danger in an over-expansion of credit, reckless speculation and imprudent banking, which no wealth of resources or capacity for production could avert."

SICKELS, PRESTON & NUTTING.

In accordance with what has become an annual custom, Sickels, Preston & Nutting Co., of Davenport, Iowa, distributed to their friends and customers one of the most artistic collections of reproduction by color photography, a number of "Modern Paintings," as original in character as we have yet seen among trade souvenirs. The collection consists of "Roara of the Hills", by F. H. Morse; "Summer Woods in Virginia", by Lamasure; "Her Birthday", by Louis Moeller, N. A.; "Early Morning in Virginia", by Lamasure; "Reverie", by Blenner, and "A Summer Vacation", by Edson.

THE BURDETT & WILLIAMS COMPANY.

The Burdett & Williams Company, Boston, Mass., has decided to close its Dock Square branch store, which has been a Hardware store since 1797. The present owners have occupied the site since April 1, 1860, and when the doors were closed December 31 a tenancy of 46½ years had been ended. In 1860 the new firm of Burdett & Williams bought out Otis Vinal, who had occupied the store for 20 years. The Burdett & Williams Company established its present commodious store, 4 High Street, corner of Summer Street, in 1901, and since that time the Dock Square store has been conducted as a branch. Charles A. Burdett and Joseph Williams, the original partners, are still active heads of the business. James A. Monroe was admitted to the firm in 1886 and Joseph H. Williams in 1900. The business was incorporated in 1901.

MARGUERITE THE MAGNIFICENT.

E. C. Atkins & Co., Inc., Indianapolis, Ind., recently issued what they design for a New Year's greeting to their customers and which they have denominated "Marguerite," and which in its entirety forms a very happy and appropriate expression of their good will and contentment, to impress upon the mind of the recipient that "Atkins Saws are the finest on earth." It is an extremely handsome lithograph of a beautiful young woman, posed in such a position that one of her arms and graceful hand is witnessed in a modest manner to form the prettiest picture one could possibly conceive, completing "a feast of loveliness fit to win the passion of immortal Jove." As a production of merit it is in the highest style of lithographic art; the colors harmoniously blending to leave the impression intended to be created, and is worthy of an appropriate frame that would do justice to it. Copies of this picture, without lettering, can be obtained by sending 50 cents to E. C. Atkins & Co., at the above address.

VON LENGERKE & DETMOLD'S NEW STORE.

VON LENGERKE & DETMOLD, 318 Broadway, New York, are engaged in the removal of their stock to a new location at 349 Fifth avenue located opposite the Waldorf-Astoria Hotel. The building is a new and fine one. The street floor has been handsomely fitted up with mahogany and glass showcases, electrically lighted, and mahogany cabinet work to match, for carrying stock in drawers, closets, &c. Full lines of Sportsmen's Supplies will be carried in stock, including Guns, Fishing Tackle, Athletic Goods, Automobile Sundries, Fine Leather Goods for both sexes, Cameras and Photographers' Supplies, Boats, &c.; both wholesale and retail trade will be indulged in.

LIVERIGHT BROTHERS.

Arthur K. and Benjamin K. Liveright of the firm of Mayer & Co., Philadelphia, Pa., manufacturers of Gold Medal Files and Rasps, have purchased the interest of the late Harry Mayer in that concern and will continue the manufacture of the Gold Medal line of Files and Rasps at the same location, Twentieth and Allegheny avenues, under the firm name of Liveright Brothers. They have recently established a Canadian agency with Beaudoin & Laplame, 447 St. Paul street, Montreal, and another on the Pacific Coast with George F. Eberhard Company, 12 and 14 Drumm Street, San Francisco, in order to expedite the transaction of the business in those territories. The new firm contemplates a number of improvements to the plant at once in order to increase the productive capacity of the works.

✤

Economy is the parent of integrity, of liberty and of ease; and the beauteous sister of temperance, of cheerfulness and health; and profuseness is a cruel and crafty demon that gradually involves her followers in dependence and debts; that is, fetters them with "irons that enter into their souls."—ADVENTURER.

JANUARY 25, 1906

Editorial Trade Review

The business of 1906 may be said to have opened in good shape and is full of vim and vigor. The prospects are certainly good and the views of all concerned are of that hopeful character which is usually denominated optimistic, for all our conclusions gravitate towards successful achievement.

The amount of business already booked in this, the early weeks of the New Year, would indicate the confidence with which the buyers are imbued. It is indeed the most satisfactory opening of a new year that the trade has seen in a long time, with nothing apparently to breed a disappointment; not a cloud in the sky and money to prosecute an excess of business to be had for the asking by any reputable house.

The factories, with anything but excessive stocks of goods with which to supply the general demand, are prepared to run to the fullest extent, for they know if in any case the goods are not already wanted by orders on the books, will soon become absorbed by the wants of the trade.

The present conditions of the market for Iron and Steel, and in fact any sort of raw material that may be mentioned, is as firm and unyielding, as far as prices are concerned, as would warrant a stiff and rigid set of quotations to mark the season's successful opening. Manufacturers are preparing for the future by taking the present moment to enlarge their productive facilities and push to successful completion projected improvements they have had long in contemplation. So that on many lines one may look for an increased output without the fear of over production.

The principal lines of goods have successfully advanced their prices to an appreciable degree in the aggregate, but not to startle the market, now in the full swing of ordering, but merely to confirm the impression prevailing that the market in metals reflects a firmness which the great majority are only too glad to feel. These slight changes are occurring almost daily, and keep in a buying humor more than those few who are figuring on the future.

January is a month for the retailer's inventory, and the bulk of the season's wants will be developed later by the goods that are missing, or light in stock; which the traveler primed and full of close quotations will be on the warpath to quote and secure the orders, which his ability to obtain makes him a favored son of fortune. These active missionaries of trade will find the first three months unusually fruitful and the ground well canvassed will bring its reward, so that the aggregate of all the orders will prove to be a volume of goods gladdening the hearts of the principals at a later date.

The wants and business views of many of the retailers will be greatly stimulated during the continuance of the conventions of their State Associations in the three months now commencing. For the first time a studied preparation has been made by the associations selling space to the manufacturers, in which an exposition of their new goods especially will be brought successfully to their notice. It will prove to be a good thing for all concerned, for the dealer and manufacturer will be brought together on terms of a friendly character and good results cannot but intervene. The many associations that are already in the fields for conventions in February and March will create a period of activity well worth while, and the opportunity of seeing the dealers from the highways and byways of the State will have the effect of enlarging the field of operation of the jobber or his representative in the future.

SUGGESTIONS IN SELLING.

Many a store might well afford to replace its rusty "cannon" stove or cheap lighting fixtures with the very best it has to offer to its customers.

It is a long step in the direction of a sale, for a customer to find the article he is thinking about in daily use by the concern with which he thinks of dealing. It is a still greater advance if he finds it producing the very effect he is himself desirous of obtaining in his own home.

If he is looking for a better system of lighting his parlor it is not enough to demonstrate it to him by means of cheap, dirty fixtures. Even though the light itself is there, the impression of disgust is there with it. The most elegant set of fixtures that can be afforded should be substituted, care always taken that they are kept in perfect working order and, above all, kept clean. Impression as well as demonstration enters into the matter of successful salesmanship.

If the customer's interest is in heaters it is not enough to introduce that new style of burner into an old, broken-down stove, even for purposes of demonstration. That is not the sort of stove he is buying it for, and you insult his pride by the implied suggestion. Bring out instead the best grate or range the place affords and show him the best work there is in the best goods. In other words give him the superlative degree of merit and trust to him to seek for himself as much lower ground as he is interested in finding.

A BUNDLE OF FACTS.

In conversing with an intelligent stranger we listen to his opinion, and respect it,—he may know more than we do; in talking with an old acquaintance we expect him to listen to ours, as we understand his limitations and think we know the most. The following story of how an enterprising Hardware man in Western Pennsylvania made use of this principle of human nature to his own commercial advantage is strictly true.

We will call his name Brown so everyone can feel acquainted with him, and state by way of further introduction that the competition between him and the only other Hardware concern in the place was not mere rivalry; it was war to the knife. In consequence every piece of contract work in which they were interested became such a bone of contention between them that neither could land the job at anything like profit to himself.

When a certain furnace contract of unusual size for that place came up for letting, Brown's rival gave a ruinous price at the outset, and prepared for the fight of his life.

Contrary to his usual tactics, Brown's play was for a fair profit or no deal, and the other fellow got a prompt heart-ache over his needless cut. Brown didn't expect the contract at his own price and did not want it at the price his rival quoted, though he made the pretext of a lively fight, sat at home while he was doing something else.

Rather a good idea in the way of price-cutting came to the writer's attention recently where the contract in competition was a slate roof on a large barn, together with spouting, etc.; the roof complete, in short.

One firm dropped $50 from the original bid, which was not far from the logical bottom price. Instead of following suit the rival in several general conversations, got a good idea what Hardware would be needed on the job and finally, without cutting their former price, agreed to put in free all nails needed on

Digitized by Google

the entire job and certain other lines of Hardware. On the whole, probably the offer was about the same as a drop of $50 reckoned at selling prices but did not by any means represent that amount of cash to the dealer though it did to the consumer.

From the consumer's standpoint, he was getting free goods he would have to have and pay cash for. Probably he was getting a better roof by not having the price cut. He had no definite idea what the Hardware would cost him; probably more than that,—then he was getting it all together with but one contract to bother with.

Aside from $50 in goods not meaning the same as $50 cash to the consumer, this method secured to him the additional contract of the building Hardware as well as of the slating.

By making this standing offer with their roofing jobs, they get and hold a great deal of trade in the regular Hardware line.

In two different school districts, far enough away to be regarded as entirely out of Brown's legitimate field, furnaces of moderate size were to be installed in new buildings. Brown bid on both, his only competitors being the country dealers in the towns themselves who knew no more about furnaces than they could learn by studying the pictures in the catalogues. Everybody knew their limits and whenever one of them did venture an assertion it was not given serious weight. Brown, they did not know, further than that he came in from a distance just on this furnace contract. He was evidently particularly interested in the furnace business and knew a lot about it. Truth to tell, this particular Brown did, and he knew how to tell it with force; still his auditors favored him with their most respectful attention in advance, for the reason he was a stranger and, knowing nothing to the contrary, they accepted him readily as their superior in furnace knowledge. He got both contracts, in each of which he made a fair profit, leaving his home rival to foot the loss on the home job.

With variations, his was repeated several times until some one suddenly awoke to the fact that Brown was getting a much better standing as a furnace expert throughout the surrounding country than seemed logical considering the size of his place. Whenever a country school board wanted something in the furnace line and did not know just what they wanted, it became the fashion to "send for Brown". While it was being installed as a general thing, some one else would become interested in the subject and "have a talk with Brown": In short Brown had won for himself quite a general reputation as a furnace expert and, while he honestly tried to merit the reputation to the best of his ability, it really had been builded upon the principal stated at the opening of this article aided by the fact that most of his pioneer victories were over people who really knew much less about the matter than he knew.

To the writer's personal knowledge Brown did contracts in no less than seven different counties and a secondary result was that owing to the trade he had built up for himself throughout the whole surrounding country it was not long before his home people bowed to the judgment of popularity and accorded him the top shelf in the commercial cupboard. With all the contracts he could handle running after him, he dictated his own prices and there were no more contract losses to be made up out of the store. Neither was his rival a rival any more; Brown had outgrown him. He had dabbled in the old principle of making a specialty at home and then extending it, only he had reversed the old order by going away from home to get his start among people who would give him all the credit that was coming to him instead of regarding him as "just Brown." But after all, his specialty had been, not furnaces, but human nature.

In a similar manner, though somewhat on the reputation and acquaintanceship he had made in furnace work, Brown later added a slating and roofing department to his business and struck out to build up a widely extended trade. In this he was doubly successful for he not only secured fat contracts right and left from people who had come to regard him as "quite a nabob" in the Hardware trade, but through these contracts more and more of the Builders' Hardware trade fell into line. It is not now uncommon for orders for Builders' Hardware to go from towns several times as large and businesslike as his, to Brown, not because he has a better stock, but because of that peculiar pull of his called reputation. Summing it all up, here is what Brown did.

He dropped unprofitable price-cutting. He went among people where familiarity did not breed contempt of his views and opinions. He posed as a specialist and then strained every effort to make good. He climbed up over the heads of people smaller than himself, instead of bruising his own head butting the legs of bigger men. He took up for a side line something that would be sure to carry with it liberal orders on his general stock. He grew as his business grew, always keeping a little in advance of it; and he applied the frailties as well as the strength of human nature to the enrichment of his opportunities just as anyone else may do if keenly alive to the points that may be turned to best account.

Trade Meetings

OHIO HARDWARE ASSOCIATION.

A great many things give evidence to the fact that the Canton Convention will be the biggest and best in the history of the Association. The secretary is receiving a great many letters from members in various parts of the state, giving names of non-members in their town, or vicinity, and stating that they have either spoken to or written them regarding the great Canton Convention. The members also volunteer to do anything in their power to contribute to the success of the meeting.

Traveling salesmen, as usual, will help out in a very enthusiastic and telling manner. Nearly all of the exhibition space in the Auditorium Building is already taken. Firms who have never before given any attention to retail Hardware organizations are preparing to exhibit on a large scale. It is expected by February 27th to have Ohio air highly charged with association enthusiasm.

The number of practical questions that are already being received by the secretary, indicates the interest that is being taken in the coming Convention by Ohio Hardware Merchants. The Question Box will occupy more time than any one feature of the next meeting. W. C. Holman, editor of *"Salesmanship,"* will be at the Convention Wednesday, February 28th, and will deliver a specially prepared lecture on "Hardware Salesmanship." Mr. Holman is a well-known expert on all matters of salesmanship. Ohio Hardware men are very fortunate that they are to have the privilege of hearing and meeting him. Manufacturers and jobbers are rapidly securing space for exhibits in the Auditorium Building. The interest that is being taken in the exhibit feature promises to add largely to the importance of the Canton meeting. Canton citizens are preparing for the comfort and pleasure of the Hardware merchants during their three days' stay—February 27-28, March 1st, 1906.

WISCONSIN RETAIL HARDWARE ASSOCIATION.

We have received the programme for the Tenth Annual Meeting of the Wisconsin Retail Hardware Association which is one of careful preparation and of souvenir proportions. The following information is given in detail. The date of Convention is February 6, 7 and 8, and the place is designated as Milwaukee.

PROGRAMME.

TUESDAY, FEBRUARY 6, 1906.

At Republican Club Room.

1 P. M.—Meeting of Policy Holders of Insurance Company.
3 P. M.—Stereopticon report from Joint Committee of Catalogue Houses.
4 P. M.—Meeting of Executive Committee of Hardware Association.

WEDNESDAY, FEBRUARY 7, 1906.

At West Side Turn Hall.

9 A. M.—Payment of dues and distribution of badges.
10 A M.—President's Address.
Report of Secretary-Treasurer.
Announcement of Reception Committee of twelve.
Question Box. See page 23.
Adjournment.
2 P. M.—Paper on Co-Operative Buying. Henry Grimshaw, Elroy.
Address by N. Kawin, Chicago, "Mail Order Business."
Announcement of Committee on

Transportation	Auditing
Question Box.	Press
Resolutions	Legislation.

3 P. M.—Remarks by visiting delegates.
Address by W. P. Bogardus, President of National Assn., Mt. Vernon, O.
Insurance Talk.
Paper on Plate Glass Insurance, C. A. Dewey, Kenosha.
Question Box.
Adjournment.

THURSDAY, FEBRUARY 8, 1906.

At West Side Turn Hall.

9.00 A. M.—Payment of Dues.
9.30 A. M.—Paper, "Loyalty," H. L. McNamara, Janesville.
10.00 A. M.—Paper, "Benefits of Local Associations," Emil Teitgen, Manitowoc.

Digitized by Google

10.30 A. M.—Report of Delegates to National Association.
Report of Delegate from National Manufacturers Association.
11.00 A. M.—Question Box.
Discussion.
Adjournment.
2.00 P. M.—Report of Committees.
Election of Delegates to National Association.
Election of Officers.
Insurance Talk.
Unfinished Business.
Meeting of new Executive Committee.

THE QUESTION BOX.

These questions are for general discussion as opportunity offers during the sessions of the Convention.

1.—In a general cash and credit business, what percentage of annual sales should be in open accounts on the books, on an average throughout the year?
2.—What is the most effective way to advertise?
3.—Is it good policy to make concessions in prices to farmers' clubs on staple articles?
4.—How is your business affected by the large corporations or so-called "trusts?"
5.—In what ways can we be of benefit to each other between our regular meetings?
6.—Is it more effective to handle and push one brand of goods than to carry several brands?
7.—Does it pay to cut the established price on a standard article in order to hold business?
8.—How can we best work for one cent letter postage?
9.—How far should business courtesy extend between competitors in the same town?
10.—What is a healthy limit for the expense account as compared with total sales; or, what proportion should be figured between the two?
11.—Which brings the most trade, selling price, purchasing price, quality and quantity, location or advertising?
12.—Does it pay to dress show windows in a small town?
13.—Should a merchant sell at the same price to everybody alike, or make different prices to different customers?
14.—Should the selling price of goods be marked in plain figures or in characters?
15—Assuming that every business may be divided in three principal departments, 1, Buying; 2, Selling; 3, Accounting; i. e., office work and collecting, which of these departments can be neglected with the least detriment to the general business?
16.—Should a merchant make his remittance by local check, or bank draft?
17.—Has any good come out of your Hardware Association?
18.—Can every member do something to postpone the parcel postage law; if so, what?
19.—What are the leading characteristics of a good salesman?
20.—Under what obligation is the retailer to the jobber?

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

Ninth Annual Meeting.

PROGRAMME.

TUESDAY, JANUARY 30, 1906.

MORNING SESSION—9.30 A. M.

Reception of Members, Enrollment of new Members, Payment of Dues and Distribution of Badges.
10 A. M.—Convention Called to Order by the President.
Opening Prayer—Rev. John K. Burleson, Grand Forks.
Address of Welcome by Hon Geo. E. Duis, Mayor.
Response for the Association by Prest. H. F. Emery.
Address—E. Y. Sarles, Governor of North Dakota.
Address—"Organization, Salesmanship and Advertising."—Alex W. Crozier, Representative of the National School of Salesmanship, Minneapolis.
NOTE—The Question Box to be found in Convention Hall and in charge of National Secretary M. L. Corey, is for the purpose of depositing questions on topics that will be of interest for the Association to take up. It is the earnest desire of the officers that it will be freely used by those in attendance.

AFTERNOON SESSION—2 P. M.

Opened by W. I. Nolan, Humorist, of Minneapolis
Appointment of Committees.
Talk—"Keep in Touch"—E. L. Millar, Editor Duluth Trade News, Duluth, Minn.
Paper—G. B. Coffin, Chicago, will present a paper prepared by the Paint Grinders Association of the United States on the "Pure Paint Law of North Dakota."
Address—"Pure Paint Law of North Dakota."—Prof. E. F. Ladd, Professor North Dakota Agricultural College and Commissioner in Charge of Pure Paint Law of the State.
Discussion.
Address—M. L. Corey, Secretary National Retail Hardware Association.
Discussion.
Lecture—"Gasoline and Its Effects."—W. G. VanSickle, Chicago.
Discussion.

TUESDAY, JANUARY 30, 1906—EVENING SESSION. ... ...

8:30 p. m., in Commercial Club Rooms.

Stereoptican Lecture, Illustrating Conditions of Extreme Interest to all Retail Hardware Merchants.—By M. L. Corey, Secretary National Retail Hardware Association.
Following the Lecture the Association, assisted by W. I. Nolan, Humorist, (Who was with us at Fargo), will entertain Its Members and Friends at a Social Session.

WEDNESDAY, JANUARY 31, 1906.

MORNING SESSION—9:30 A. M. ... ...

This entire session is assigned to the Jobbers and Manufacturers and will be occupied by them in addresses and general discussion.
During this Session an Address will be delivered by A. C. Bartlett, President, Hibbard, Spencer, Bartlett & Co., Chicago, Subject, "Business Success."

AFTERNOON SESSION—2 P. M. SHARP.

This Session for Retail Hardware Dealers Only.

Annual Report of Secretary.
Report of G. W. Wolbert, Bismarck, Delegate to the National Retail Hardware Association at their Meeting, Minneapolis, 1905.
Paper, "Trade Abuses at Home," P. A. Rognlie, Esmond.
Report of Committees.
Consideration of Committees' Report.
Election of Officers.
Opening of Question Box.
Discussion.
Selection of Next Place of Meeting.
Adjournment.
NOTE—At the close of this Session there will be a short Meeting of the Executive Committee.

RETAIL HARDWARE DEALERS' MUTUAL FIRE INSURANCE COMPANY OF WISCONSIN.

From the following it is easy to see how Secretary-Treasurer Peck has put in his time during 1905. The number of new members obtained for his association and the number who carry insurance in the Insurance Company sufficiently indicate that he has been rendering yeomans service.

REPORT OF AUDITING COMMITTEE DECEMBER 26, 1905.

Cash on hand with Sec.	$ .76	Surplus Dec. 26, '04	$ 3,070.05
Cash with Treasurer	10,927.83	Interest received	110.69
Adjusting expenses	67.59	Bal. Premiums rec'd.	11,340.43
Losses paid	2,839.41	Bills payable	1,526.35
Exchange account	30.57		
Traveling expenses	201.00		
Directors expenses	205.95		
Advertising	25.00		
Printing & stationery	51.15		
Taxes and legal	58.59		
Office expenses	66.49		
Salary account	1,382.00		
Fixtures	110.75		
Postage	80.13

PROFIT MAKING LINES

HORSE GOODS IN AMPLE VARIETY.

A prominent and profit making addition to the regular every day stock of the Hardware dealer can be made of the line of goods manufactured by Frank Miller, 349-351 West Twenty-Sixth Street, New York. They consist of leather dressings and blackings and similar goods which have met with great success wherever introduced and sell readily from a Hardware stock when carried, catering as they do to the owner of horseflesh wherever situated, being suitable for carriages and harness and including shoe dressings in a variety of styles which commend themselves to the Hardware dealer. Some of the styles of packages they have adopted are illustrated here for the benefit of the buyer, further information concerning them being furnished in our advertising columns.

Frank Miller's Axle Oil, a package of which is shown in the illustrations, is claimed to have no equal on the market. It is superior to castor oil, lasts longer, and will not gum. It will not run from the boxes, if properly used, and no climatic changes can affect it. It is put up in pints, quarts, half-gallon cans, gallon cans and upwards.

Another article which has a great sale is Frank Miller's Hoof Dressing, a package of which is also shown in the pictures. It is claimed to be unequaled as a dressing or ointment for the hoofs of horses. It is compounded from the best and purest of materials, and preserves the hoof and prevents it cracking. A brush for the application of the ointment accompanies each package. It is put up in quart cans, half-gallon cans, gallon cans and five-gallon cans.

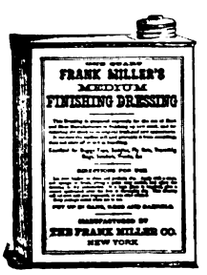
Frank Miller's Harness Dressing is a standard article and is sold extensively, not only for use by private consumers, but to manufacturers of and dealers in harness. It is easily applied, and imparts to the leather of the harness a beautiful soft finish which will neither peel, crack or smut and acts as a preservative of the leather. It is put up in various packages of convenient size.

Another preparation equally well-known, and which has a world-wide reputation for softening and preserving leather, is Frank Miller's Harness Oil. It is put up in tins, containing

from one-half pint up, the smaller sizes being repacked in boxes of dozens for convenient transportation.

No production of the company has won for it a greater reputation than its Frank Miller's Carriage Top Dressing, and there is scarcely a carriage manufacturer in the United States, to say nothing of foreign makers, who does not use it in the finishing of his work. It is also very widely used by owners of carriages. It is a remarkable protector of carriage top leather, and imparts to it an elastic, durable and waterproof gloss, which gives it a wonderfully handsome appearance. It is safe to use on the finest stock, dust will not adhere to any surface finished with it. It is put up in sizes ranging from half a pint to five gallons.

Frank Miller's Harness Composition is a convenient paste for cleaning, oiling and finishing harness at one operation. It is invaluable for stable use, easy to use, and produces most satisfac-



tory results. It is employed in all the best stables of the United States. It is sold in neatly decorated boxes containing one, two and one-quarter, five and ten pounds, and will be packed in cases in any desired quantity.

The last of the articles manufactured for stable use is Frank Miller's Harness Soap, which is black, and should be in the equipment of every first-class stable. It imparts a velvety finish and agreeable softness to the leather, and the perfected processes by which it is produced prevents its rubbing off or soiling the hands, if properly applied. It is also made white, for light or tan har-

nesses, and is put up in cakes, bars, pans, tubs, and boxes in black and white, in three-quarter-pound cakes only.

In addition to the productions mentioned, the Frank Miller Company manufactures a variety of other leather dressing goods, the prominent one of which is the Crown Shoe Dressing. This has no superior as a dressing for the shoes of ladies and children, restoring them to their original attractiveness, besides softening and improving their substance. It is equally effective for the retouching of leather goods, satchels, rubbers, etc., that show signs of wear, and is put up in bottles with wired cork and sponge, which makes it convenient for use at any time. Medium Dressing is similar in its use to the Crown Shoe Dressing, but is made specially for dealers and manufacturers, who find it indispensable for dressing and finishing the uppers of fine calf and grain

shoes, and black leather goods that are shop worn or mouldy, imparting to them a fine gloss that handling does not impair.

Frank Miller's Peerless Shoe Blacking is a staple article at home and abroad, unusual care being taken in its manufacture to use no ingredients injurious to leather, and to put it up in attractive style for the retail trade. The highest award at the Chicago World's Fair, in 1893, was received by the Frank Miller Company for its leather dressings and blackings, and their quality has since been greatly improved.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

EFFECT OF MARRIAGE ON WILL MADE BEFORE MARRIAGE.

QUESTION.—If A and B each make wills and then subsequently marry, does their marriage affect the will of either one made prior to the marriage?

REPLY.—The rule of the common law is that the marriage of an unmarried woman revokes her will made before the marriage. The marriage of the husband and the birth of a child operate to revoke his will, also. In his case the marriage alone was not enough, but it must be followed by the birth of issue. That is the rule in the several states today except so far as it has been changed by the statutes. The New York Statutes provide: "A will executed by an unmarried woman shall be deemed revoked by her subsequent marriage." They also provide that: "11, after the making of any will disposing of the whole estate of the testator, such testator shall marry and have issue of such marriage * * * and the wife or the issue of such marriage shall be living at the death of the testator, such will shall be deemed revoked, unless provision shall have been made for such issue by some settlement, or unless such issue shall be provided for in the will, or in some way mentioned therein, as to show an intention not to make such a provision." Under this latter statute marriage and birth of issue will only revoke the husband's will under the particular circumstances therein stated, namely, where the will disposes of his whole estate and either the wife ar children are living at his death, and the children have not been provided for or expressly excluded from a share of his estate.

FIXTURES—CONFLICTING RIGHTS OF REAL ESTATE MORTGAGE AND CHATTEL MORTGAGE.

QUESTION.—The owner of a large store put counters, shelves and other fixtures into the store, which were attached to the walls and floors of the building, but could not be removed without seriously injuring it. At the time he bought the counters, etc., he gave the seller a chattel mortgage to secure the porchase price, which contained a distinct agreement that they should remain personal property till paid for. Then he mortgaged the building for $2,000 and the mortgagor of the building lent the money on the supposition that his mortgage covered the building and fixtures. They have never been paid for. Can the seller of the counters and shelves enforce his chattel mortgage against the mortgagee of the building?

REPLY—Your question is a mooted one. In New Jersey, where your case apparently arose, the real estate mortgagee would be preferred because he loaned his money upon the assumption that the fixtures were a part of the building. In New Jersey the chattel mortgagee could not enforce his mortgage to the prejudice of the real estate mortgagee. But if the real estate mortgage had been executed first, and the counters and shelves subsequently attached to the building, then the chattel mortgagee would always be preferred. If it arose in Massachusetts the real estate mortgagee would always get the preference.

HIRING AT TWO THOUSAND DOLLARS PER YEAR CONTRACT AT WILL.

QUESTION.—If an employer hires a salesman at a salary of two thousand dollars per year, payable in monthly installments, and the salesman continues on in business for four years, can the employer now discharge him at any time, or does the law regard the contract as a hiring from year to year?

REPLY.—The general rule in this country is that a hiring at so much per week or per month or per year where no period of employment is expressly agreed upon, is simply a hiring at will and can be terminated at any time at the pleasure of either party. If the original hiring had been for the definite term of one year and then the salesman continued on after the expiration of the year without any new contract, then the law would imply that he was hired for another year. But that is not the case. On the facts as you state them the original contract of employment was simply at a yearly salary and the fact that the compensation is estimated on a yearly basis does not change its character from a mere hiring at will.

LIABILITY OF STOREKEEPER TO CUSTOMER FOR PROPERTY STOLEN.

QUESTION.—I went into a clothing store to try on a suit of clothes and laid my vest on a table in the store. The clerk told me it would be perfectly safe there, but when I returned to get it, after trying on the clothes, I found my watch and chain had been stolen. Is the storekeeper responsible?

REPLY.—We think he is unless he can show that he used some care in guarding your property. By keeping a store he invited the public to come there and trade and by permitting you to place your vest and valuables on the table and informing you that they would be safe there, the storekeeper became the custodian of your property and was bound to exercise due care to keep it safely. Of course, if the storekeeper can show that he employed a floorwalker or other employee to take care of his customers' property, and, in spite of the exercise of due care, the property was stolen, he would not be responsible. But the burden is on him to show the exercise of such proper and reasonable care.

PHILADELPHIA HARDWARE MERCHANTS' AND MANUFACTURERS' ASSOCIATION.

The annual meeting of the Hardware Merchants' and Manufacturers Association of Philadelphia was held Tuesday, January 16. After the transaction of the usual amount of routine business the election of officers for the ensuing year was held, resulting in the following: President, John R. Griffith of Shields & Bro.; vice-president, E. S. Jackson of the Miller Lock Company; secretary-treasurer, T. James Fernley; Board of Directors—William W. Supplee, Samuel Disston, Thomas Devlin, John R. Griffith, E. S. Jackson, Charles Z. Tryon, James H. Ritter, Ellcott Fisher and T. James Fernley.

The annual banquet of the association will come off at the Bellevue-Stratford Hotel on Tuesday evening, January 30, and it is expected it will be the largest in point of attendance they have ever held. E. S. Jackson, Joseph J. McCaffrey, J. H. Ritter, Charles Z. Tryon and T. James Fernley are the committee in charge.

NEW YORK STATE ASSOCIATION OF RETAIL HARDWARE DEALERS.

The annual convention of this association, which is to be held at Binghamton February 20-22, it is expected will present tne finest showing of any so far held. The officers are doing their best in an energetic manner to add to the interest and importance of the occasion. One of the principal features of the meeting will be the Question Box, where the members will vie with one another in presenting abstruse questions on trade subjects and seek solutions in short discussions. Ideas in regard to advertising will be exchanged, and those who have profited by efforts of this character are urged to bring specimens of their work that may include newspaper ads., catalogues, booklets, circulars, etc., all of which will be put in shape for members to add to their own experience in this line. This advertising matter together with questions for the Question Box may be sent to any of the members of the committee having charge, namely, L. G. Mattison, Newark; William Fowler, White Plains; and Irving Van Voorhis, Cobleskill.

NEW ENGLAND RETAIL HARDWARE ASSOCIATION.

A meeting of the Executive Committee was held January 9 to prepare for the convention of the New England Retail Hardware Association which will be held at the Hotel Vendome, Boston, March 1 and 2. The advance bulletin will be published by the Executive Committee about February 1 which will contain the programme accompanied by editorial matter and advertisements. A number of guests of the association will be invited, among whom will be included:

Gov. Curtis Guild, Jr., of Massachusetts, and Mayor Fitzgerald of Boston; President W. P. Bogardus and Secretary M. L. Corey, of the National Retail Hardware Association; T. James Fernley, secretary-treasurer of the National Hardware Association; R. R. Williams, Hardware Editor of *The Iron Age;* Philip Corbin, president of the American Hardware Corporation, New Britain, Conn.; Henry R. Towne, president of the Yale & Towne Manufacturing Co., Stamford, Conn.; Howard S. Hart, president of the Russell & Erwin Manufacturing Co., New Britain; J. B. Sargent, Sargent & Co., New Haven, Conn.; William H. Hart, president of the Stanley Works, New Britain; Henry L. Lockwood, president Lockwood Manufacturing Co., South Norfolk, Conn.; M. Harbster, president Reading Hardware Co., Reading, Pa.

The programme, while embracing a general business meeting, Stag Supper, Theatre Party, trip among local Hardware stores, automobile party about Boston, will also include the Annual Ladies' Night. Space will be provided at the Vendome for exhibits by manufacturers, several large rooms having been secured for the purpose.

♣

Aim at perfection in everything, though in most things it is unattainable; however, they who aim at it and persevere will come much nearer to it than those whose laziness and despondency make them give it up as unattainable.—CHESTERFIELD.

BICYCLES AND THE HARDWARE DEALER, No. 1

A PROFITABLE SIDE LINE.

We intend to publish a short series of papers on the above subject with a view of assisting in the campaign already inaugurated to bring the bicycle again into popularity. This is one in which the Hardware dealer should share, by bringing out such salient features as will enable the dealer to talk up the line understandingly as well as interestingly; and in that way pave the way for his full share of trade on this profitable specialty. The articles will be published with the hope of co-operating with the committee already appointed having this object in view to reinstate bicycles among the Hardware trade in a way that cannot but prove effective, as well as inducing greater interest, favor and publicity in the line than ever before.

TO THE HARDWARE DEALER.

With better roads the rule and not the exception, the modern bicycle, which surpasses all other machines for simplicity, lightness, speed and strength, is gaining in public favor and, with the new wave of cycling fever rolling over the country, with better roads everywhere, with new improvements for safety and comfort and ease of riding, the bicycle will probably, for these reasons now remain the favorite with the masses for all time to come.

For the Hardware dealer, this is a specialty line that he can handle to good and excellent advantage in connection with his other business. It is a line that naturally belongs to him and with the addition of an attractive line of Bicycle Sundries, will help him to command new and increased trade, not only on these goods but in his regular line as well. Right now is the time for the up-to-date Hardware dealer to carefully consider this line because every indication points to a second boom this season, and to the alert and progressive dealer, affords a profitable money-making opportunity that he cannot well afford to overlook.

The chief disadvantage of former bicycle riding was the fact that the rider could not stop for any purpose or go back without dismounting. For city or town riding where stoppage is frequently necessitated by the traffic, this perpetual mounting and dismounting was not only tiresome but wearying, so much so, that town and city riding ceased to be a pleasure.

However, with the advent of the Coaster Brake, all this has been overcome. To my mind, no device in Bicycle construction has proven so comfortable or great a saver of energy of the rider as the Coaster Brake. By a simple movement of the foot, a reliable brake is applied, or the coasting device is applied at will, the feet remaining stationary, at rest on the pedals. The Coaster Brake, more than any one thing, has been the means of creating new and revived interest in the bicycle, and in the opinion of the factory managers, more new bicycles will be ridden during the coming season than during any period since 1900, and fortunate, indeed, is the Hardware dealer who grasps this opportunity now, realizing that bicycle profits will be larger and sales much easier to make than later on when competition has greatly increased.

The first appearance of the Bicycle in the United States was in 1819 when Johnston's Pedestrian Curricle was introduced into New York. The excitement it created rapidly spread to Boston, Philadelphia and other large places and many riding schools were opened.

In 1869 the new Velocipede craze was at its height. Rinks and riding schools were opened everywhere but, as was the case of the Hobby Horse in 1819, the "bone-shaker" was found too cumbersome a machine to gain lasting favor and two years later, scarcely any were ridden in this country.

To follow the Bicycle through all the phases of its evolution from that time to now would involve a descriptin of innumerable technicalities. Some brief mention of the many types, however, may prove interesting. The "bone-shaker" was succeeded by Starley's "Ariel," then the "Spider" in which the front wheel was enlarged and the rear wheel reduced; in the latter case so much so, that it was almost identical with the "ordinary" or high bicycle. Wide rims and spokes gave way to the suspension wheel with anti-friction bearings and rubber tires, and for several years the "ordinary" was in general use, varying only in size and the length of the rider and in minor details. Length of limb now became the desideratum of every cyclist, for, other things being equal, the longer the leg, the larger the wheel that could be ridden, and, therefore, the greater the stretch of ground covered at each revolution of the pedals; but great dangers were attached to the use of the ordinary. So easily was the equilibrium of the rider disturbed, that a pebble in his patch would cause him to pitch head foremost over his handle bars, describing a circle of greater or less arc, according to the rate of his progression. Coasting down hill, legs over handle bar, was a favorite diversion, the rider occasionally being found senseless on the highway as a result. Endeavors to devise a machine of sager form, resulted in the appearance of the "Facile," the "Xtraordinary," the "Pony" and the "Kangaroo" types. All these, however, were front drivers.

Toward the end of 1879, however, Lawson's "Safety" saw the glint of day, and though he, himself, did not persevere with his invention, it was the virtual parent of the rear-driver safety, now ridden everywhere; albeit, it was very different in appearance and the cranks were actuated by levers and not a chain, but it lead the way to the appearance of Starley's "Rover." The bicycle, as a modern vehicle of pleasure, has been before the world for about thirty years. Its evolution in the diversity of models may be said to have taken place principally between 1868 and 1885, and its perfection, transformation, and the almost complete extinction of all but one class in the decade, 1885 to 1895.

The first modern bicycles of which we have any authentic record, were imported from England in 1886 and were exhibited in the Centennial Exposition in Philadelphia. The first bicycle built in this country by Col. Pope was a very cumbersome affair, weighing seventy pounds and costing $315.00. The first bicycles were manufactured by the Weed Sewing Machine Company, of Hartford, Conn., and later on, as the demand increased, the Hartford factory, at times, gave employment to more than five thousand workmen.

The developments which converted the Velocipede into the practical bicycle of today may be briefly summed up as the rubber tire, the suspension wheel, the ball bearings, the weldless steel tubing, the wooden rim, the chain gearing and chainless gear and, last but not least, the coaster brake.

A noteworthy fact in connection with the bicycle industry, is that the development of the bicycle was the result of constant experimenting instead of being based on the knowledge of the needs of the industry. While this country took little part in the early development of the Velocipede and Bicycle, it has led the world during the last ten years, not only in the quality and quantity of bicycles produced, but in the improvement and methods of manufacture. Through the ingenuity of American engineers, tools and automatic machines have been invented by the use of which the cost of producing bicycles has been greatly reduced as practically to place the bicycle of to-day within reach of almost everyone.

If riders will study such points as are here dwelt upon and seek to obtain a hygienic position, they will find still greater fascination in the sport of bicycling and much less occasion would be afforded for comment on cramped and awkward poses as well as complaint as to injuriousness of this exercise.

After getting the proper position, the next thing is to acquire the knack of pedalling evenly. This is something that comparatively few bicyclists do and many who have been riding for several years do not know their fault in this respect. They wonder why they have trouble in keeping steady and riding a narrow path. It is simply because their alternate pushes upon the pedals are not even. It is a well known fact that every stroke on one pedal tends to throw the wheel on one side unless it is immediately caught up and thrust with equal force upon the opposite side. If you have ever noticed, oarsmen have the same difficulty to confront, because they are stronger in one arm than in the other. This is also a fact that nearly every person has one leg a trifle longer than the other or, if this is not the case, one is stronger. It would seem from observation that cyclists do not think of these things or if they do, they pay no attention to them. If they did they would begin to correct their uneven pedaling by keeping their minds upon it and equalizing the thrusts of their feet. The wheel, when evenly pedaled, will run in a straight line without any stirring of the handle bars and without a bit of wabbling; whereas, very few riders, indeed, can travel far without touching the bars. A good way of acquiring even pedaling is to begin by seeing with how little touch upon the bars you can ride, relaxing your hold gradually, until you have only a finger tip on the steering apparatus. By persisting at this, you will soon be able to ride with your arms folded, and when you can do this, then you have learned to pedal evenly and correctly, with equal balance on each pedal.

(Concluded on page 32.)

INLAND EMPIRE IMPLEMENT AND HARDWARE ASSOCIATION

The First Annual Convention of the Inland Empire Implement and Hardware Dealers' Association was held at Spokane, Wash., on January 10-12, 1906, at the headquarters and convention hall, of the Hotel Spokane. The meeting was an interesting one in point of attendance, a large number of delegates being present, indicating the interest taken in this their first convention.

WEDNESDAY AFTERNOON SESSION, 2.30 P. M.

The Convention was called to order in the Moorish Room of the Hotel Spokane by President C. L. Butterfield.

An address of welcome was given by Hon. Floyd L. Daggett, Mayor of Spokane, which was responded to by the President, after which the President delivered his Annual Address as follows:

ANNUAL ADDRESS OF PRESIDENT C. L. BUTTERFIELD.

On assembling for our first annual meeting, I feel that we have cause for congratulation on the promotion of those objects for which we organized. Within the year, not only has the membership been increased, but the Washington Hardware and Implement Dealers' Mutual Fire Insurance Association has been successfully launched with every prospect of success. At our June meeting the cordiality between the dealers and competitors was noticeable, and the round of good cheer which is here manifest indicates that the ties of friendship are strengthening.

THE YEAR HAS NOT PASSED WITHOUT ITS TRIALS,

some dealers in their anxiety for business have trespassed at times, upon the trade rights of others, but as we grow in years this will be gradually eliminated in all localities, as it has now been wholly in many places where previously no rights were accorded, and the placing of goods was the main object, whether or not safely sold being of secondary importance.

We are to be congratulated upon the successful work of our Secretary, and the Committee on Insurance are to be congratulated for their efficient service. All your officers have had but one object in view, and have unhesitatingly worked for that end, viz.: The good of the organization and the betterment of trade conditions in our territory. At this time I desire to extend my sincere thanks to each member for his loyal support, and to my fellow officers and members of committees for their valued assistance. There are to be elected at this session four members of the Board of Directors for a three year term, and also officers of the association, excepting the Secretary, who is, according to the by-laws, appointed by the Board of Directors. I bespeak for my successor the loyal and active support of each member in carrying forward the work to the accomplishment of much good, and to the direct profit of the Implement and Hardware business of this new, most fertile, and prosperous section.

I desire to call your attention to a feature which was spoken of at our previous meeting, but has not yet been incorporated among our permanent accomplishments, it is the Exchange.

Any well stocked store will at times accumulate a surplus of certain goods, but the articles that are surplus at one town, may be short at another, and by members listing with the Secretary the goods they would like to be relieved of, they may find a quick market, thereby turning dead stock into live money and by communicating with the Secretary when they need something especially quick, or that possibly may not be obtained from jobbers, they will obtain the wares needed, accommodating customers and receiving the profits of the deal.

We must

KEEP IN MIND THE MAIN LOCAL OBJECTS OF OUR ASSOCIATION,

viz.—Eradicating the losses and leakages of business, discontinuing that which is questionable as a money maker, refraining from selling to doubtful customers other than on good security. To sell closer to cash, to endeavor to get in closer touch with the manufacturers and jobbers, so that they may have confidence in the retail merchant that when times tighten, as they sometimes must, extensions may be granted on terms not onerous that the dealer may continue in business and as times improve work out of his embarrassment rather than going into bankruptcy, and having the stock of goods thrown on the market for sale at what they will bring. To have the relation of the manufacturers and jobbers so closely in touch with the retail interests, that when a stock must be closed out the goods will be taken and resold to dealers handling the same lines, thus protecting the trade against cut prices and demoralized methods.

The active subjects for discussion which are universally receiving the attention of all retail organizations are Catalog Houses, and the subjects of their earnest support, viz.—Parcels Post and the delivery of mail to rural boxes by number. Clothing the Interstate Commerce Commission with increased powers and subjects of traffic, also fair classification, with the right to mix in carlots goods of same material and value. It is through the efforts of such organizations as ours, and those kindred thereto, that the privileges have not been granted for which the

PARASITES OF THE RETAIL TRADE

Catalog Houses have been wishing.

If the Inland Empire dealers, who have been holding aloof from active participation in this association, could but realize the vast amount of gratituitous time and labor which some of the most substantial and brainiest merchants and manufacturers of the country are devoting to these questions of interest to them, I know they would not hesitate longer in deciding to give this association their most cordial support, and in putting their shoulders to the wheel and assisting in carrying it forward to the accomplishment of its purposes. The subject of organization and bringing into closer affiliation of all men in any way handling the same or similar goods is still one which is absorbing the attention of almost any business line, not only have the manufacturers and wholesalers of the same line of goods formed associations for interchange of thought, but they are forming into one central organization to bring their united efforts to bear on matters of legislation and traffic. As you well know, the retailers of every line are meeting with similar intent to our assembling here, and the latest is the "Affiliated Presidents and Secretaries of Trade Organizations" with headquarters in Philadelphia.

Never has the maxim, "Eternal Vigilance is the Price of Power" been more vividly brought to mind than during the past twelve months, and as it is in national, State and municipal affairs, to say nothing of great banking institutions and insurance companies, it comes down to ourselves, where vigilance and watchfulness are necessary that we may keep out the elements which work for the

DEMORALIZATION OF BUSINESS AND RESTRICTION OF PROFITS

below a living basis.

While we are here to criticise the unbusinesslike with endeavor to eliminate the bad, you must not be so pessimistic as to feel that the days of fair profits and the attainment of high commercial success are past, but with the confidence of the optimist look into the future, believing in your individual ability, coupled with the best efforts of this association to bring to yourself greater prosperity and to us credit for the work accomplished. If you are inclined to feel otherwise than buoyant, compare your privileges and conditions with those of the people of any other country. Stop for a moment and calculate the opportunities here in this Inland Empire to those of any other spot in glorious America. Stop to consider that with the advantages which have come to us from the sciences of all the past, and with the knowledge of and assistance of all prior inventions, we are equipped for developing this Empire with its untold wealth of mineral, forestry, and soil, as no other people ever were, we ought to, like boys, just out of school, for their summer vacations, throw up our hats and hurrah for the privilege that is ours of placing of commercially assisting to place this Inland Empire into the place it is destined to take, but to do this each must put some energy to the work. Those who have been watching must come forward and pull, making our organization a strong potent forceful factor in building up commercial America west of the Rockies.

Gentlemen, I thank you.

This was followed by the Secretary's Report, which was a long and thoroughly exhaustive one, of which we give a few extracts:

SECRETARY E. W. EVENSON'S ANNUAL REPORT.

Gentlemen of the Convention:

Seven months have elapsed since we met here in this room for the purpose of being mutually benefited by an interchange of each other's ideas, and experiences in the carrying on of our respective businesses. Since then much has happened to pull us together, more closely in our endeavors to earn a living from our businesses. Much as has happened to pull us together, just as much has happened to pull us apart, if you prefer to interpret the movements of your fellow dealers in that way. Cicero says that "Men were born for the sake of men, that each should assist the other." The members of this association believe in this adage, and if they fail to practice it, I should like to ask that you be not too hasty in condemning them before you look at yourself for a time and see if you cannot discover, at least a portion of the causes that lead to friction with your fellow dealer. During the past seven months your secretary has not done as much road work as he should like to have, nor as much as you members would probably like to have him do. But the organization, incorporation and preparing of the Washington Hardware and Implement Dealers' Mutual Fire Insurance Association has taken up a great deal of the time of your secretary that might otherwise have been used on the road in getting new members for the

Digitized by Google

association. Nevertheless, we spent some time among the members, and I shall endeavor herein to tell you of some of the experiences had in this work. Whenever your secretary has gone into a town wherein all the dealers are members of this association I have found that very little friction, if any existed. Where there has been friction found it has been due to the luke warmness of the dealers towards the association. In such cases it is the rule that your Secretary is usually enlightened by the member telling him of the many underhanded things which his competitor has done, and what an all round rascal he is. I have gone into towns with three dealers in it, and have been told by all of them what an all around rascal each of the other two dealers are. Neither have spoken to the others for years, and all the information any of them have upon the subject of each other's virtues and vices is the information given them very freely by the customer looking for a concession in price. You can readily see the results obtained by relying upon, or following up such information.

In such cases it has been the work of your secretary to get the dealers together and introduce them to one another, and good results usually follow.

On the other hand I have found dealers working like nailers for every dollar's worth of business they could get in an honorable way (which is honorable) and at the same time the best of feeling existed between them and they are always ready to fight a common enemy, through their organization. I should like to say, while dealing with this phase of the association work, that in order to be successful we must have a majority of the retail dealers in their list of membership. I should also like to ask each of you, What have you done to increase membership? To how many fellow dealers have you recommended the association? How many have you asked to join the association? Honest criticism is sought by your Secretary, and in this regard I wish to say that I do not care particularly whether it be favorable or otherwise, so long as it is along practical lines, and is honest.

I regret to say that in this matter I have had but little help from any, and practical help from few. I received suggestions from Mr. Plough one day that have netted the association much in dollars, and I hope, much in usefulness. I also have received some mild roasts well directed, and to the point from the same source. If you would try to do the same thing I am sure our association's usefulness can be increased many fold during the next year.

In passing this I wish simply to state that in my experience with men, I have found it to be the rule that "the other fellow" generally thinks just the same of you as you do of him, so if you would want to avoid friction, it behooves you to think well of the "other fellow."

Becoming angry at your fellow dealer is like spitting at the wind. The wind can be relied upon to fling the spittle back into your face.

There can be but one way in which to get the good from association work, and that is to boost for the association. Speak well of it to every one you meet who is interested in your line of trade.

Not the least of the pleasant incidents of the Secretary's is the receipt of a letter which reads somewhat like this. "We wish to withdraw from the association because so and so does not do thus and so."

I am glad to say that I have received but two such letters during my official life, and these letters have been received after the parties writing them have received a very urgent request to pay their dues.

In passing this I simply wish to state that so far as I am able to observe, this is but a cheap way in which some dealers attempt to avoid paying their dues. Had they stated in time, or at the time the matter came up that things were not going rightly your Secretary could have then taken the matter up, and possibly good could have come out of it to the dealer making the complaint. As it was he preferred to let the matter run open until such time as he could have offered it as an excuse for not paying a debt which, by every code of honor known among business men, he was bound to pay, no matter what happened. As already stated we have but a very few such with whom we have come in contact.

On the whole, I should like to state that the work of your Secretary has been very pleasant, and I should like to thank the many dealers, who have aided me in my work of making the association of value to both retailers and jobbers alike. I should like to thank the jobbers and the manufacturers for their assistance in correcting many minor evils that have crept in. They have supported us loyally in most things, but there is work left for them and I propose with your assistance to put it up to them.

* * * * * *

Now I know that our local friends, the jobbers, will answer that the item of expense, known as case and cartage, is one that has to be born by the goods sold, and if not put in one form it will have to be put in another. In this I quite agree with them, but listen a moment.

Suppose, for example, H. A. Steinkee & Company, a Hardware firm doing a retail business in this city on Division Street, should telephone to a local jobber for ten kegs of nails, they would be delivered to his door free of charge so far as case and cartage is concerned. On the other hand; should a dealer in any of the towns outside of Spokane order that ten kegs, they would be delivered at the depot, and a cartage charge added to the bill, notwithstanding the fact that the depot is about a half mile the shorter haul. I am sure that none of us will begrudge Messrs. Steinkee & Company their good fortune in this matter, but what we do mourn is that fact that such distinction is made, and favoritism shown.

Another practice that has come under the observation of your secretary during the past summer is the practice of manufacturers having lines for transfer in this city, to allow their transfer agents to sell goods from their stocks at retail. Such manufacturers have certainly got the nickle so close to their eyes that they cannot see the dollar behind it. These manufacturers carry the stock, carry the insurance and the taxes on the stock, and in addition to all this they pay the transfer agents a rental for their building.

Bereft of these expenses it can readily be seen that Mr. Transfer Man is in a position to sell goods at retail at prices nearly the cost to you members, and still make good money. Indeed I believe he can sell at the same price you pay, and still show a profit, for what goods he ships from warehouse he is allowed a "transfer charge" and in case he sells these goods at retail he can always collect his Transfer Charge.

We will suppose, by way of illustration, that a dealer in Oakesdale wants a wagon shipped to himself. The "transfer charge" of $2.50 will be added to invoice, and the Oakesdale dealer will be compelled to pay same. Now add to the above, the "cartage charge," and the freight from Spokane to Oakesdale, plus the merchants expense of doing business such as taxes, insurance, etc., and you will have the cost of that wagon at Oakesdale. On the other hand, should that farmer decide to come to Spokane and buy that wagon from the transfer man the cost would be the Oakesdale cost, less the transfer and cartage charges, as well as the insurance, taxes, interest on money invested and all the other items usually entering into a merchant's item of cost. A good profit to any merchant could it but be saved.

* * * * * *

During the past seven months your secretary has written 29 circular letters and sent them to all our members. This is on an average of about one each week. Some of these have gone to non-members in the hope that we might interest them in the association and its work. I have sent out approximately 5,000 pieces of mail matter, and I am satisfied that it has paid. Our association has in good standing at the present time 140 members, and if those here who are in arrears will kindly pay their dues we will have a great many more.

I do not count as members, anyone upon the rolls who is six months in arrears, as the by-laws do not permit me to do so.

In conclusion I wish to thank such members as have given so freely of their time in trying to further the welfare of the association during my official life. To the President, who has at no time been too busy to give up his time and abe council in the association work. To. Mr. Fridaker, our Treasurer, who has never been too busy to give of his time and ability in anything affecting our welfare. Also to Mr. Plough for the many valuable suggestions he has given me. There are others whom I might mention, but no disinterested person has advanced our interests more than Mr. Waggoner. I wish also to thank the traveling men who have aided us in many ways in securing new members. My contact with jobbers and manufacturers has been pleasant, and I have always found them ready and willing to help us in every way possible.

I hope that your deliberations will cover each of the suggestions herein set forth, for they are matters that have come up in the regular way in association work.

Gentlemen, I thank you.

The Treasurer's Report followed and the President appointed the usual Committees, which ended the Session.

THURSDAY MORNING SESSION.

The meeting was called to order at 9:30 A. M., the first duty of the day being the election of officers for the ensuing year, which resulted as follows:

THE ELECTION OF OFFICERS.

President, E. E. Lucas, Davenport, Wash.
First vice-president, R. A. Spiker, Kamiah, Idaho.
Second vice-president, A. Urbolm, Spokane, Washington.
Treasurer, J. R. Fridaker, Spokane, Wash.
Secretary, E. W. Evenson, Spokane, Wash.
Directors (three years) C. L. Butterfield, Moscow, Idaho; E. L. Scott, Oakesdale, Wash.; L. C. Fisher, Sprague, Wash.; F. J. Guth, Odessa, Wash.; A. B. Salman, Wilbur, Wash.

Several reports of Committees followed, when an address was delivered by John R. Stevenson of Pomeroy, Wash., on the subject

IT MAY BE SO.

which was succeeded by a general discussion.

Digitized by Google

THURSDAY AFTERNOON SESSION.

After being called to order at 1:45 P. M. an address was delivered by F. F. Larrabee, of Edwall, on

CATALOGUE HOUSE; WHERE ARE WE AT?

Mr. Larrabee was followed by J. N. Nankervis, of Moscow, who spoke on the subject:

WHO ARE THE REAL BANKERS OF THE INLAND EMPIRE?

followed by J. H. Berge of Davenport on the

MAN UP THE STREET.

W. P. Bogardus, President National Retail Hardware Association, Mount Vernon, Ohio, was down for an address on "What the Association does for you," but being unable to attend sent the following letter which was read by the Secretary.

E. W. EVENSON, Secretary,

Dear Sir:—When your invitation came to me I was rather anxious to come to your meeting and began to make arrangements to that end, but circumstances over which I had no control have arisen to prevent my coming. But I will be glad if this letter which I write you shall in any way stimulate you and help on the good work.

Thirteen years ago thirteen Hardwaremen conscious of an injustice that was being put upon them gathered at Columbus, Ohio, to organize an association to the end that there might be some way developed by which some of the ills they suffered might be lessened, if not done away with entirely. At first what was to be done by organization was rather indistinct, but as time goes on and experience is added to experience the ideas are being clarified and a more perfect knowledge of what we want is coming into view. And as state after state swung into line with the Hardwaremen lined up it became apparent that

A NATIONAL ASSOCIATION WAS NEEDED TO BIND TOGETHER

and make strong the several State Associations. At first these organizations were looked on askance by the jobber as a possible menace to him.

But time has developed the fact that they are a help to the jobbers as well as a retailer, and so we have the Joint Committee of jobbers and retailers. Singly and alone none of us could expect to gain much recognition, but grouped together we hope to accomplish much. We now have twenty-four States affiliated in their association work. What do we expect to do? We hope to stir up your pure minds to some of the conditions that while they may not affect you now, will later on if conditions are not changed.

THE SPIRIT OF COMMERCIALISM IS ABROAD IN THE LAND,

and it is a spirit so utterly selfish that anything that obstructs its onward move is ruthlessly crushed. The rights of others are not considered. In fact, no one has any rights, from the spirit's standpoint, that gets in its way. A condition where commercialism has gone mad, and like the car of Juggernaut moves forward, insensible to and unmoved by the cries of those whom it crushes, and intent organization of the gigantic combinations and trusts and monopolies that are reaching out to control everything, and to this spirit uncurbed and left to run riot under the mistaken idea that the seeker of wealth has no obligations to his fellows has led to the conditions that investigation is bringing forth, to the surface. Conditions are so disgraceful that the blush of shame mantles the cheek of every true American as the story is told. To call a halt on such things.

TO DEMAND THAT MORE HONEST METHODS BE PURSUED.

To insist that the rights of others be recognized, and that every man has his chance. To urge that the rich as well as the poor should be compelled to obey the laws is part of the work that falls to us as American citizens.

These greater things we may not neglect as we move forward in the work of bettering our position as Hardwaremen. To lessen the evils of competition; to encourage a friendly rivalry; to make our lives more pleasant by realizing that we are in business for a living and not to fight our neighbors, and that if we have a right to fight that we will succeed better by fighting with our brother Hardwareman, rather than against him. That we have a common enemy that will take our surplus energy to overcome, and that whatever success we may hope for must come by friendly co-operation rather than antagonism.

To face the evil of Catalog House competition we must unitedly insist that we be treated all alike. That one retailer shall not have an advantage over others.

THAT REBATES AND SPECIAL PRICES BE ABOLISHED.

That the manufacturer must not give some retailers advantages over others so as to build up some few, and break down a great number. That the government of the United States shall not go into collusion with great combinations to the detriment of the public. That the Post Office Department shall not go into the transportation business to the injury of the private citizen. There are some things that require our united effort to remedy. And to this means the better education of the public in their duties to their country and their responsibilities to each other.

There are many things I would like to say to you but time forbids. With regret that I could not come, and many wishes for your success, I am,

Very truly,
W. P. BOGARDUS.

D. F. Anderson of Rosalia, Wash., a prominent and old time merchant in Eastern Washington, could not come, but sent a letter, which the secretary read. It was received with interest.

A fine address was delivered by H. C. Stover of the Stover Carriage Co. of Chicago, which lack of the necessary space prevents us from giving in full.

THE PRESIDENT:—We will now hear from Mr. W. P. Lucas on

OUR MUTUAL FIRE INSURANCE ASSOCIATION.

He was followed by C. A. Loy, of Fairfield, Wash, who spoke on

YOUR MUTUAL FIRE INSURANCE ASSOCIATION.

I have a few facts which will show you what our mutual fire association can do—what has been done in this section of the country. Nearly twenty years ago, while we were still a territory, there was formed what was called the Mutual Fire Insurance Association, in Spokane County, and I will give you the cost of a company which to-day has 250 members. The loss of this organization since 1886 has been $1,531.65.

THE SECRETARY:—In twenty years?

Yes, in twenty years. Now they represent the capital of this organization as something over half a million dollars; I understand this is the real value of the property insured, and one of the members has carried since 1892, from one thousand to $2700 insurance, and he tells me that the largest amount he has paid as an assessment, was one just levied to pay a loss of $500, and was $2.70. In the twenty years it has cost him, with his membership, which is one dollar, and his dues, which are fifty cents per year, and the little expenses which he has contributed to the meetings, $24.45. It seems to me there is quite a little saving there, the same as there will be in our mutual.

Now the average loss per year of this organization has only been $76.58. I said the highest assessment was $2.70, but I find here $4.30 on the thousand in 1899, which was at a time when the membership was exceedingly small, and a number of the members didn't pay their dues, and those who had paid up only were assessed. Property is insured at two-thirds value; if it is a stovepipe risk, they only accept one-half the value, and whenever there is a loss, if they haven't the money in the treasury they call a meeting and make a levy of one mill, I think one mill is the highest, and the members pay it, and if a member doesn't pay up, they run a pen through his name on their register, and that ends his membership, and he cannot get in again.

Gentlemen, we should have at least $400,000 insurance taken at the end of this meeting. We now have about 200 members, and that will average around two thousand dollars to the member, and most of the members are taking the limit of $3,000, and with a great many the only question is whether they can take more. If you have more than one risk, you can take more, so long as they are not in the same block. This protection alone is bound to make our company, as I term it, a success.

Here is another thing that will speak well for this, that is this report of the Northwestern Mutual Fire Insurance Co., of Seattle. It has the heading, "Saves 25 per cent." Now gentlemen, suppose they also save 15 per cent. to agents for getting these premiums, and they pay (the old line companies) more than that, 25 and 30 per cent., now there is 50 per cent. saved, and I would like to know of any of you who would not save 50 per cent. in your business—you would be perfectly willing to do it. I have investigated this matter thoroughly, and I feel that there is no question about its success, that it is absolutely safe, and that no other company can be safer, from the simple fact that the members receive the profits of the company.

Gentlemen, I would like to turn all my money out in that way, if I could reap those results, and I believe every one of the balance of you would be willing to do that. I think we have one of the strongest companies in our State, without any question. I was surprised, more than surprised, to have a gentleman who joined this association come to me and say, "Well, if it hadn't been for the insurance part of this, I concluded to drop out, but I am going to pay up my dues and remain a member of your organization, and that is the reason I am doing it." Now so long as I am a member of your insurance committee, I want you to kick to me if there is anything you think requires it, or anything you don't understand. If you think it is all right, I know you will tell it to your neighbor, and if you think anything can be made better, I want you to tell me. As one of the jobbers told me, our organization is strong enough to do almost anything we want, if we will stand united and all pull together for the one end—success. Gentlemen, I thank you.

FRIDAY MORNING SESSION.

President Lucas called the meeting to order at 10.30 A. M., when a paper was read by Mr. A. C. Tyler, on the subject of

BUYING AND OVER BUYING.

(Continued on page 30.)

RECENT TRADE PUBLICATIONS.

THE H. B. IVES COMPANY, New Haven, Conn., have favored us with a copy of their 1906 Illustrated Catalogue No. 12 of Builders' Hardware Specialties. In presenting the Catalogue they desire to call attention to their increased line of Window Hardware Specialties and revision of list prices, and declare their intention to maintain their reputation for high grade finishes on their entire line. Among the Specialties shown are the following: Ives Patent Sash Locks, The Crescent Sash Fastener, Mortise Striker Plate, The Ives Window Ventilating Locks and Bolts, Ives Patent Window Stop Adjuster, Shutter Knobs, Sash Lifts, Curtain Hooks, Drawer and Door Pulls, Sash Cord and Weight Fasteners, Transom Catches, Mortise Door Bolts, Wrought Metal Door Bolts and Upson's Patent Blind Adjuster and Fastener. The cuts illustrating these Specialties are very clear and the descriptions of each concise and yet comprehensive. If you have not already received one of these very interesting and instructive books, write at once.

BEMIS & CALL HARDWARE AND TOOL COMPANY, Springfield, Mass., have made us the recipients of their exceedingly artistic Catalogue and Price List of Standard Goods. They state in introducing the book as follows: "Our facilities and long experience enable us to furnish goods of superior quality and finish on the most favorable terms, and we shall at all times make it our object to sell our goods as low as we can afford, and shall seek for every consideration that will tend to the improvement and perfection of all goods made by us. All goods manufactured by us are thoroughly inspected." Some of the articles described and illustrated are, Steel Dividers, Steel Compasses, Steel Calipers, Check Punches, Drive Punches, Timber Scribes, Steelyards, "S" Nut Wrench and "S" Pipe Wrench. A Circular enclosed in the catalogue shows the "Merrick's Pattern" Screw Wrenches and describes their construction. The last page of the catalogue contains a Price List of Wrench Parts and an Index on the first page facilitates a ready reference to the contents of the book. The catalogue will be gladly sent to applicants.

SARGENT & COMPANY, New Haven, Conn., represented in New York by Sargent & Company, 149-153 Leonard St., are presenting to the trade their 1906 Catalogue of Spring Balances and Scales. They state that they have greatly enlarged their line since issuing their last catalogue, and have made many improvements in their Balances, each of which is particularly adapted for the use for which it is intended. Among those described, priced and illustrated are the following: Sargent & Co.'s Pocket Spring Balances, Round Spring Balances, Heavy Straight Spring Balances, Warranted Extra Heavy Ice Balances, Warranted Circular Family and Warranted Circular Spring Balances, Scale Beams or Patent Balances. Their line of Scales includes the following: "Old Glory" Warranted Family Scales, Hatch Tea Scales, Hatch Counter Scales, Even Balance Scales, Side-Beam Even Balance Scales, Grocers' Scales, Platform and Portable Platform Scales. The catalogue is exceedingly artistic and is a handsome production worthy a careful perusal by all dealers in this line of goods. If you have not received a copy the manufacturers will be glad to mail you one upon request.

THE D. F. JONES MFG. CO., LTD., Gananoque, Ontario, Canada, have favored us with an exceedingly handsome publication which is their 1906 Price List of Shovels, Spades, Scoops, Draining Tools, Etc. They state in presenting the book to the trade: "Our Shovels and Spades are made from a cast steel bar. The blade and straps are in one piece; not welded or riveted, and are superior both in quality and finish. Our Jones', Burns', Gray's and Old's Brands are made by this process. Every Shovel and Spade blade is stamped. The trade and consumer will, therefore, always be able to detect any imitation." The Price List is finely illustrated and this, together with the very artistic cover which is lettered in gold, makes the book a very attractive and pleasing one. A copy will be sent free upon request, and interested parties will find it a very useful and handy book to select from. Send at once.

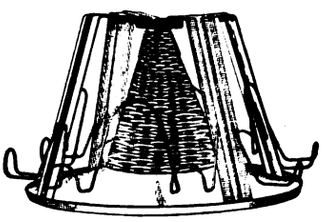
THE EBBING MANUFACTURING CO., successors to G. A. Milbra dt & Co., St. Louis, Mo., have recently published their Catalogue No. 22, which gives very comprehensive descriptions and numerous illustrations of the Milbradt Rolling Step Ladders and Tracks, which they claim are made suitable for all purposes, and can be used on all kinds of shelving. They call attenton to the superiority of their goods as shown in the following extract: "We have manufactured the Milbrandt Rolling Step Ladders for the past twenty years, and it has always been our aim to make the most perfect Rolling Ladders on the market; and the fact that we are now selling more Ladders than all other houses combined, and that we daily receive, unsolicited, the highest recommendations for them, is sufficient evidence to prove that we have succeeded in our object." The catalogue is very attractive in appearance and cannot help but prove interesting to all those desiring to receive a copy of same.

BEALL SHOVEL COMPANY, Alton, Ill., manufacturers of High Grade Steel Shovels and Scoops are presenting to the trade a very attractive and interesting catalogue, in regard to which they state as follows: "We have attempted to give complete price lists as well as illustrations and dimensions of the line of Plain Back (Antrim) and Hollow Back (Cleveland) Shovels, Spades and Scoops we manufacture. Our experience of nearly half a century in manufacturing has enabled us to put on the market a High Grade Steel tool unsurpassed in finish and quality. We solicit a share of your business, guaranteeing every tool." The catalogue is very well arranged and illustrated and will be found valuable to select from. A copy will be gladly and promptly sent to interested parties.

EAGLE COOPERAGE WORKS, Circleville, Ohio, have sent us a very interesting and convincing envelope-sized pamphlet, in which are set forth the many advantages to be found by the use of The Eagle Mop Wringer and Bucket Combined. They state that these Mop Wringers have every feature which could be desired in an article of the kind and that all parts are carefully machined and fitted to a nicety, Every Wringer and Bucket being carefully inspected before leaving the factory. A few pages are devoted to describing the Ohio Mop Head and Detachable Handle, which they claim are unexcelled for simplicity, efficiency, durability and general satisfaction. They are especially designed for use in the Eagle Mop Wringers. The pamphlet will be gladly sent to anyone interested in this line of goods.

PIKE MFG. CO., Pike, N. H., have recently mailed us an envelope sized pamphlet entitled, "Something New from Pike." They state they realize that the average retail dealer is not carrying a complete assortment of Sharpening Stones and that he does not always, perhaps, have the necessary display to induce sales. Believing that an assortment of any class of goods in an attractive display box is preferred by all dealers, and that all up-to-date merchants are constantly on the lookout for improved methods tending to the increase of any part of their business along the lines of sales and profit, they present a way out of the difficulty by offering that which will materially increase trade and profits in sharpening stones, namely, their Assorted Boxes of Oilstones and Scythestones. The pamphlet illustrates and describes these boxes and contains a list of the contents of each, which they guarantee to give satisfaction to every user. Write for further information.

WILEY & RUSSELL MFG CO., Greenfield, Mass., manufacturers of Patent Screw-Cutting and Labor-Saving Machinery and Tools, have recently mailed us a copy of their new catalogue and price list. The little book contains a very complete line of the goods manufactured by this company and each article is clearly illustrated and thoroughly described. They state in introducing the catalogue: "We endeavor to hold ready a most complete stock of regular tools, and to make 'specials' with all possible promptness. Whatever may have formerly been the best practice, no one now doubts the economy of buying taps, dies, and reamers of manufacturers who make them a specialty. Our machinery and appliances are as complete as we can make them, and no pains are spared to insure the greatest accuracy and the highest quality. Our taps are all machine relieved on the most correct principle, and are made of the best steel procurable. We warrant everything we make, both as respects workmanship and quality of material." Write for Catalogue No. 33.



If you suppress the exorbitant love of pleasure and money, idle curiosity, iniquitous pursuits and wanton mirth, what a stillness would there be in the greatest cities! The necessaries of life do not occasion, at most, a third part of the hurry.—BRUYERE

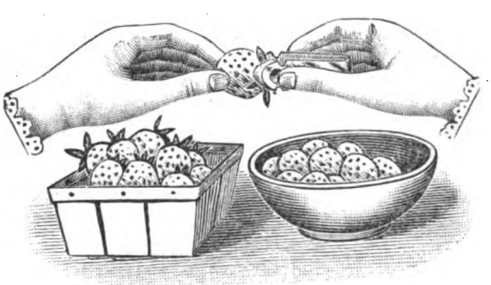
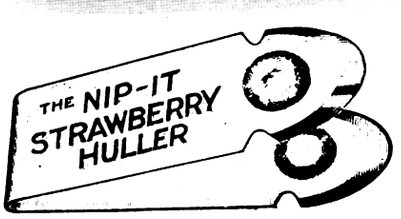
NEW GOODS AND SPECIALTIES.

WIRE CONE TOASTER.

HASKINS & WILLIS, Ann Harbor, Mich., are the manufacturers of the Wire Cone Toaster for Gas or Gasoline Stoves, of which we give an illustration. It will toast five slices at a time and



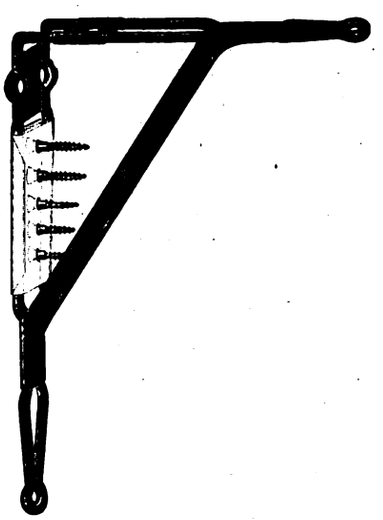


WIRE CONE TOASTER.

is calculated to do the work well. It is provided with a convex bottom and will fit any stove; has a grooved edge which catches the crumbs. The open top makes it possible to toast the fifth slice or heat the tea or coffee pot or plate. It will be found a ready seller when once it is added to your stock.

THE "NIP IT" STRAWBERRY HULLER.

THE WINDSOR STEPHENS & Co., Waltham, Mass., are placing on the market a very useful little novelty which they designate the "Nip It" Strawberry Huller, and of which we give an illustration. It is stamped out of sheet metal neatly nickel plated and polished. They have greatly improved its original form and also its appearance. It is stamped in the proper shape so that when



THE "NIP IT" STRAWBERRY HULLER.

held between the thumb and forefinger berry hulls or bad spots in the berries can be quickly nipped off. It is far superior to any mode of doing the work required by hand as it does not stain the fingers. It can be retailed at a price so moderate that almost every purchaser would buy at least half a dozen so that he can give them away to his friends as a labor saving device, and yet the dealer is protected in a good profit. A sample will be sent to any dealer on request. In advertising this specialty in the future the jobbing trade will be consulted with a view to handling it in large quantities, in which they will find it attractive.

BRADLEY STEEL SHELF BRACKET, IMPROVED.

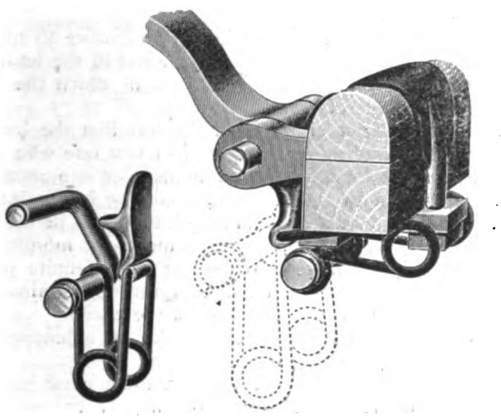
THE ATLAS MANUFACTURING CO., New Haven, Conn., are introducing to the trade a great improvement to the Bradley Steel Shelf Bracket, which we illustrate herewith, it being an entirely new feature. By means of an ingenious device, for which they have applied for a patent, the screws for each bracket are attached to the bracket itself. This method of packing the goods has been found to be a great convenience, especially where a large counter trade is done, the clerk being able to attend to an increased number of sales. Then again it is referred to, the customer will not reach home only to find that the wrong sizes have been put up, or as is often the case, that the screws have been omitted altogether. The bracket is much stronger than it

BRADLEY STEEL SHELF BRACKET, IMPROVED.

looks to the average person, and every mechanic sees at a glance the reason why. A pair of 5x7 will, it is claimed, hold up 300 to 400 lbs. In one test made 925 lbs. were loaded on before the brace collapsed. It is neat and artistic and extra well finished. The japanning is not done in bulk. Each bracket has two coats of tough japan baked on.

"SUMMERS" BUGGY HEATER.

THE SUMMERS BUGGY HEATER CO., Mattoon, Ill., are placing on the market the "Summers" Buggy Heater and Lantern, illustrated. It is a combination Buggy Heater and Lantern. It is simple of construction, being a strong metal case with special oxidized ends perforated. One end has a three-inch double strength crystal glass, so set as to be thoroughly protected. Within the case is a metal fount, which has a capacity of 1½ pints, surmounted by a double convex burner, over which rests a crystal globe with ventilator above. The front is secure-



"SUMMERS" BUGGY HEATER.

ly fastened to prevent rattling or jarring. The case, except the oxidized copper ends, is covered with Scotch sanitary carpet of reversible design. The burner unscrews the same as from a lamp, and the wick is replaced the same as in an ordinary lantern. The fuel employed is kerosene, and the makers assert that it is quick to heat and very economical to operate, as it furnishes both heat and light. It burns with clear flame that gives no odor or smoke. The device is 7x10 inches at the bottom, eight inches high and weighs but five pounds. The broad and heavy base prevents upsetting. It is claimed to burn perfectly even when blankets surround it. It can be used under the feet or placed on the lap for keeping the hands warm. At present it is made in one size only, but more sizes are expected in time for next season

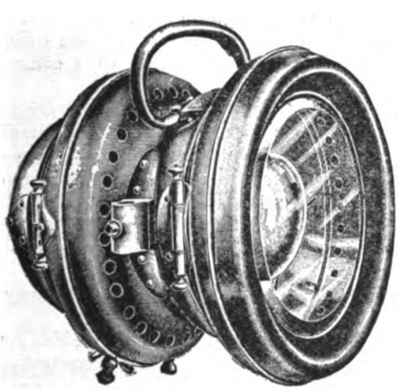
COVEY QUICK SHIFT ANTI RATTLER.

F. E. KOHLER & Co., Canton, Ohio, among the large number of specialties they are making call special attention to the new Quick Shift Anti Rattler here illustrated, and which they have recently placed upon the market. The castings used in its construction are of malleable iron, increasing the durability;

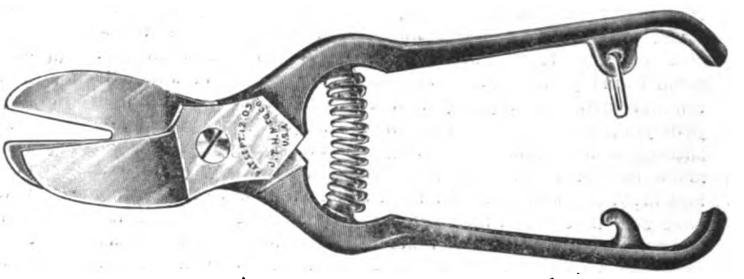


COVEY QUICK SHIFT ANTI RATTLER.

while the steel bolt and springs are of tempered steel wire. At the right of the cut is shown the Anti Rattler attached to axle, with the open position of the spring indicated by the dotted lines. At the left, the spring and malleables are shown in detail. The article is referred to as affording a simple, durable and effective quick shift.

THE "AUTOLYTE" MOTOR CAR LAMP.

A. H. FUNKE, 83 Chambers Street, New York, is the manufacturer of a number of Lamps, which are adapted to the use of Acetylene Gas, to which he has added the "Autolyte" of which we give an illustration. Among the features that are novel in its construction is the fact that no chimney is required, which has a tendency to greatly improve the appearance of the lamp

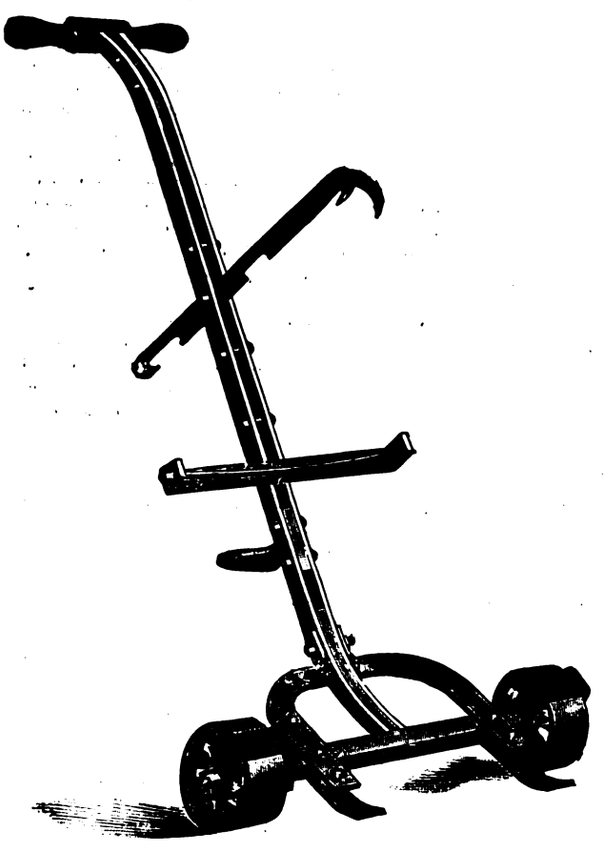


THE "AUTOLYTE" MOTOR CAR LAMP.

and increase its strength. The approximate dimensions over all are; diameter of front 10 inches, front to rear 10½ inches, and height 10½ inches. The Lamp can be furnished with either a parobolic lens in front or provided with a Margin Mirror at back. Such accessory parts as handles, hinges, hinge pins, etc., are of heavy cast brass and made especially for the curves of this lamp and of proper proportion, making the entire construction up-to-date and exceedingly appropriate for the purpose. The supply of Acetylene gas from a separate generator is supplied in the usual manner, through a brass tube under the burner, while the lamp itself is of polished brass and is claimed to be distinctly new and not a copy of anything already on the market.

STEFFA'S SHIELD ORANGE CLIPPER, NO. 67.

WIEBUSCH-HILGER, LTD., 9-15 Murray Street, New York City, as Sole Agents for the J. T. Henry Mfg. Co., are just putting on the market Steffa's Patent "Shield" Orange Clipper, No. 67, illustrated. The feature of this Clipper which distinguishes it from all others is the slotted lower blade. This blade as a result of its construction (which is clearly shown by illustration), acts as a shield to the fruit when the stem of the orange is being cut. It will also be noticed that the lower blade is extended somewhat beyond the point of the upper blade; this prevents the possibility of accidental injury to the fruit by the point of the upper blade cutting the stem. The feature of the central opening in the lower blade is so entirely distinct from any other clipper that has ever been made for the purpose of cutting the stem of the orange that the manufacturers and inventor confidently believe that the "Shield" Orange clipper will eventually supercede the old style entirely. In common with all of the other goods made by the J. T. Henry Mfg. Co. the Steffa



STEFFA'S SHIELD ORANGE CLIPPER, NO. 67.

"Shield" Orange Clipper is of high grade well finished and fitted with exceeding care. The Clippers are 6¼ inches over all; the blades polished showing a high degree of finish, and with japanned handles. They are packed in boxes of one dozen each and in cases containing one gross.

McKINNEY'S IMPROVED BARREL TRUCK.

MCKINNEY MFG. Co., Allegheny, Pa., for whom John H. Graham & Co., 113 Chambers St., New York, are representatives, are introducing to the trade McKinney's improved truck for handling heavy barrels, casks or boxes with ease and rapidity, of which we present an illustration. In any place where such packages are handled it is argued it will pay for itself in a short

MCKINNEY'S IMPROVED BARREL TRUCK.

time as it is claimed one man can do the work of three using the old conventional style of truck. The truck is so constructed for strength and durability that it is practically indestructible; all parts except the wheels being made entirely of spring steel that is calculated to retain its shape while undergoing the roughest usage. The wheels have the latest improved roller bearings, making it possible for one man to move with ease a load of 1,000 pounds and over. The manufacturers state they solicit trial orders, or would be willing to send one on approval to be returned at their expense if not satisfactory, so well satisfied are they that they will not fail to meet every test warranted by the usual conditions.

WENZELMANN HAY RACK CLAMP AND BRACKET.

F. E. MYERS & BRO., Ashland, Ohio, have recently bought out the Hay Rack Clamp and Bracket business, including patents, good will, stock, etc., of the Wenzelmann Mfg. Company, Galesburg, Ill., as announced in the following letter.

To our Friends in the Jobbing Trade.—

Gentlemen: We most respectfully refer you to F. E. Myers & Brother of Ashland, Ohio, who have recently bought our entire Hay Rack Clamp Business with our good-will therefore, also our Hay Rack Patents, patterns, prints and stock of material for Hay Rack Brackets and Clamps. You are undoubtedly familiar with the capacity and business methods of this firm, justifying our recommending them to you with pride, as our successors in the manufacturing and marketing of the Wenzelmann Hay Rack Brackets and Clamps, so thoroughly introduced and favorably known as the most satisfactory device for the purpose ever invented, which recovered by letter Patent and having a trade identity which, as stated, now belongs to the above firm and justifies the consideration we hope you will give them, believing that with their increased facilities and capacity, our transfer and your dealing with them will be satisfactory in every respect.

Very truly yours,
WENZELMANN MFG. CO.

TEN CENT GOODS.

Even the best of merchants in all lines are not always familiar with the possibilities of the five and ten-cent counter or the bargain section.

It is the belief by some merchants that much stuff must be sold at a positive loss in order to make a bargain department attractive. This is the idea held, says *Hardware Trade,* by some of the shoppers, too, and is one reason why the bargain counter is so attractive. But it is an error. It is true that old goods and slow sellers from the regular stock must sometimes be sold at a loss in order to move them, even in the bargain department, but bright, new stock can be sold at a good profit at such prices as will seem to be little less than impossible.

A representative of an eastern paper recently went out to prove this for his own satisfaction, and this is what he found:

A hand saw with a 12-inch blade, tapering from about 2 inches width at the point to about 3 inches at the handle and firmly fixed into a varnished hardwood handle with double screws of brass. The saw blade was made of good spring steel that would not buckle and the teeth were filed and set instead of being stamped out of the blade as the average person would imagine.

Another was a 12-inch spirit level, in a cherry finish, with a nickel-plated spirit plate screwed over the top of the spirit.

A pair of carpenter's pinchers, 7 inches in length, all nickel-plated to prevent rusting and to add to their selling qualities. These have polished jaws and appear to be as near a 40 as a 10 cent value.

Among pieces of enamelware observed were: A lot of four-quart graymottled pudding pans; another lot was of No. 28 basins; three-quart gray saucepans and deep, three-quart stewpans with lips and long handles, lips, and ears for tipping them.

Twenty-five-pound spring balanced scales, equipped with a hook, and having a pan suspended by chains. These scales are accurate and will serve many purposes in the household.

Glass-bulb filters, aluminum trimmed, for attaching to hydrants, equipped with adjusting rubbers and brass non-rusting strainers, and filled with ground silex flint and charcoal for filtering water as drawn.

Towel rollers of three pieces, with nickel-plated fastenings at both ends and made of wood stained and varnished.

Three-piece child's table sets made of metal and retinned.

Galvanized iron scoops with riveted wooden backs and handles, very substantially made.

A heavy, full-polished, nickel-plated, octagon-base hammer with a strong nail claw and black enameled handle.

A carpenter's square, 12x7 inches, in bright, polished steel and marked in eights, quarters, halves and whole inches.

Eighteen-inch japanned waiters, very substantial in appearance and with japan well baked on.

Sheet-iron drip pans with handles at each end wire bound, size, 10x15 inches, and 2½ inches deep.

Ten-inch polished sheet-steel frying pans, with cold handles extra heavy.

Meat cleavers, with 7-inch blades, 3 inches wide and red enameled wood handles.

Each of the articles enumerated can be profitably sold for 10 cents and all appear to be nearer a 25-cent retail value than the price at which they are designed to be sold.

Aren't these a good example of the merits of a bargain department?

POPULAR TALKS ON LAW.

Landlord and Tenant.

No. 9. NOTICE TO QUIT.

In determining what, if any, notice to quit is necessary, reference should be had to the terms of the lease.

When the lease fixes a time for the termination of the tenancy no notice to quit is necessary.

Where the lease is for an indefinite time, notice to quit is required to be given where the parties have not in the lease agreed as to the notice; the statutes of the State in which the property is situated should therefore be consulted.

Indefinite terms arise either from the fact that the lease itself sets no limit to the term, or from the fact that one who has held under a lease made for a fixed term, holds over into another term without the consent of the landlord, becoming in the latter case a tenant from year to year or from month to month, as the original lease was for a year or years or for a month or months.

Where the original lease provides for an indefinite period, it usually provides that notice must be given to terminate; if it does not so provide, then the law fixes the notice.

The law fixing the notice is the same for an indefinite tenancy as for a tenancy by holding over.

Where the term is from year to year, there must be a notice of at least six months before the end of the year, unless otherwise provided by statute.

In case of a tenancy from quarter to quarter, a full quarter's notice is necessary, and in case of a tenancy from month to month, a full month's notice.

It should be thoroughly understood that when renting by the year, even although the rent is payable monthly, one holding over his term is taken as a tenant for another year, and that where the original tenancy is for a quarter, even although the rent is payable monthly, the one holding over is held for another quarter.

If a notice is given to terminate a tenancy in ten days, when it should be a notice of a month, it is held that the notice will be good if the month is allowed to expire before taking proceedings.

A notice to quit is considered as waived if the landlord accepts rent that becomes due after the time set in the notice for the ending of the term.

One who has a mere license is not entitled to notice.

A licensee is one who may be removed at any time at the pleasure of the owner, even although in some cases the owner would be liable for action for damages for breach of a contract of which the license is a part.

A person who occupies premises as an employee of the owner and whose occupation is in furtherance of his employer's business, is a mere licensee. Instances of this are managers of hotels, keepers of toll-gates, employees of mining companies living in the company's cottages, an employee on a farm, even when there is an agreement to work a farm by shares, desk room in another's office, guests in a hotel, boarders in a boarding house, roomers or lodgers.

This is not saying that there may not be a tenancy of a single room.

In general, however, when the landlord resides on the premises, cares for the rooms and has a general control of the premises, there is no tenancy. The relation of landlord and tenant must exist.

Where the owner of the premises has deeded them away, the purchaser should, on giving notice, notify the tenant of a change of ownership.

Where the tenant is in possession under a contract of purchase which he does not fulfill he is not entitled to notice to quit.

Notice to quit is not invalidated by a mistake in the christian name of the tenant, if he or his family on receiving it understood it to be intended for him.

When a term ends at midnight, April 30th, a notice that the tenant quit on May 1st is good.

A tenant who denies his landlord's title and asserts ownership to the property himself, is not entitled to notice.

(To be continued.)

BICYCLES AND THE HARDWARE TRADE.

(Concluded from page 25.)

To those familiar with the business, every indication points to a second boom on bicycles this season, and that the business is sure to develop largely is conceded and a foregone conclusion: still, I am of the opinion that the ground has not been scratched; that if the Hardware trade will take hold of this line and *plow deep,* the harvest will yield profits far in excess of their most sanguine expectations. Those Hardware dealers now already in the bicycle business will reap results from the efforts of those yet to begin and if every Hardware dealer in the country carried bicycles, the demand is enough for all and the trade already established can be enlarged and will certainly result to the advantage of the individual dealer.

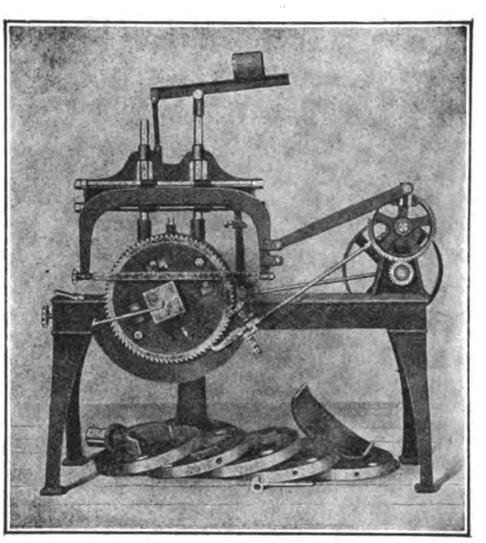
Secretary, Henry Gracey, 235 Powell St., San Francisco.
Annual meeting in March.



NATIONAL RETAIL HARDWARE ASSOCIATION:
President, W. P. Bogardus, Mt. Vernon, Ohio.
Secretary, M. L. Corey, Argos, Ind.
Annual meeting at Chicago, in March.

THE GLOBE POWER HACK SAW.

The West Haven Mfg. Co., Inc., West Haven Conn., are the manufacturers of the Globe Hack Saw of which we give two illustrations. It is a power hack saw, devised for cutting metal off the bar, and is claimed by the makers to be by far the most complete and useful article of its kind. The material is rotated intermittently, and the saw is cutting when the work is stationary, thereby accomplishing its purpose accurately in the shortest possible time. Using a 20 inch Universal Saw Blade this machine will cut steel 6 inches in diameter off the bar in two hours; will cut four inches square off the bar in 38 minutes; will cut 1⅝ inches round off the bar in 5 minutes.

THE GLOBE POWER HACK SAW.

SIDE VIEW.

If all the happiness that is dispersed through the whole race of mankind in this world were drawn together and put into the possession of any single man, it would not make a very happy being. Though, on the contrary, if the miseries of the whole species were fixed in a single person they would make a very miserable one.—ADDISON.

GEO. BORGFELDT & CO.'S SOUVENIR VOLUME.

The Twenty-fifth Anniversary of the house of Geo. Borgfeldt & Company has been happily commemorated by the publishing of an extremely artistic volume in honor of the event. It is indeed a charming souvenir and one that will be preserved not alone for the recollections which it reviews but also for the manner in which the work has been done, as is shown in the tasteful volume before us. From the frontispiece, which is a portrait of the late George Borgfeldt, to its final page it is replete in illustrations which show the greatness of the house it glorifies. The portrait is presented of everyone connected with the house since its establishment; who were in any way instrumental in forwarding the interests of the house, or devoted to the upbuilding of its majestic and unique greatness; those connected with the management having full pages given them, while a number of smaller portraits show the numerous persons who are connected with the parent house and the numerous branches throughout the world which add to its importance. The seventeen departments of the business are shown by a fine view of the department, together with the head of department, embodied in the illustration identifying him with it. The portraits are given, fifty-five in number, of the selling force of the house and a noble array is here presented. The different branches are illustrated by a view of the outside and inside of each, and a portrait of the manager in this manner. Fourteen different branches are shown and the office force and other employees finish the book, until you feel, if a customer of the house that in no house in which you have dealings are you so thoroughly intimate. The work of compiling and printing this volume has been admirably accomplished. It is printed on fine coated paper, without the conventional folio; the single and grouped portraits being surrounded with original artistic design borders, that add greatly to the perfection of the volume; while the whole is presented with a card adorned with a silver monogram and the dates 1881-1906, in which "Geo. Borgfeldt & Co. present their Compliments with the accompaning Souvenir of the Twenty-Fifth Anniversary of the Founding of the House'.'

A "DIAMOND EDGE" SHOW WINDOW.

An attractive display of the Diamond Edge Tools of Norvell & Shapleigh Hardware Co., St. Louis, Mo., is shown in the following illustration which occupied one of the windows of the Frantz Hardware Co. of Enid, O. T. The admirable manner in which the goods are displayed speaks well for the training of the clerks in the store and is evidently a successful exhibition of the resources of the establishment, showing great character and efficiency.

AN ATTRACTIVE WINDOW DISPLAY.

NAMED AFTER "AULD CLOOTIE."

The custom of naming places after his satanic majesty is not confined to this country. Mary Osborne some time ago made a presentation of these titles, or some of them, which exhibit quite a variety and indicate in some instances, the devil's partiality for water. Here is her list as it appeared in American *Notes and Queries*:

At Boroughbridge, in Yorkshire, is a group of remarkable prehistoric monoliths called the Devil's arrows. The Devil's Bit mountains are in the county of Tipperary, near Templemore. A remarkable ancient earthwork near Newmarket, in England, is called the Devil's ditch. An ancient wall across the stewartry of Kirkcudbright is the Devil's dyke. Another devil's dyke is a hill in the South Downs of Sussex, with remains of a prehistoric and probably Celtic hill fort. The Devil's glen is a deep valley of the County Wicklow; Devil's lake is a saline lake (and modern city) of North Dakota. Another Devil's lake is near Baraboo, Wis. The Devil's inkstand is a deep and wonderfully fine crater lake of South Australia. The devil lends his name to form a part of the title of a celebrated cavern of Derbyshire, England. The Devil's punchbowl is an interesting mountain tarn of the county of Kerry. In the Black Hill country of South Dakota is the Devil's tower, an enormous natural obelisk of trachyte, 625 feet high. One of the Fuegian islands is called the Devil's island (54 deg. 58 min. south, 69 deg. 5 min. west). In the same group is a Devil's harbor, on another island. There is another Devil's island off the coast of Maine; another belongs to French Guinea. The Devil's peak is a high mountain of Hayti; there is another in South Africa, and a third (Mount Diabolo) is in California. The Devil's bridge is in the canton of Uri, Switzerland. The Devil's bridge in Cardiganshire is also well known. The Devil's nose is a Canadian Rocky Mountain peak. The Devil's tower is the North-east angle of the works at Gibraltar. Another Devil's lake is in the coast region of Tillamook county, Ore. A Mount Diablo rises near Samana in Santo Domingo. Devil's Bosch is a moutain region of South Africa. Devil's point is very near Cape Town. Devil's river is in Victoria, Australia. The Devil's thumb is on the west coast of Greenland. There is a Devil's den (ominous fact) in a cemetery at Lawrence, Mass. The Devil's back (or limb) is a rock off Boston, Mass. Another rock with the same name is in Muscongus bay, Me. The Maine coast has also a Devil's elbow and three devils' heads. Time fails me to count up the many punch bowls, snuff boxes, chairs, kitchens, fireplaces, etc., which the devil has in this country, to say nothing of Britain, Ireland and the colonies.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

London, Jan. 13th., 1906.

A REVIEW OF THE METAL TRADE.

The prices of raw material influence the rise and fall of manufactured goods very considerably, although labour and other forces have to be taken into consideration when quotations and estimates of cost are ascertained. The steady upward tendency—at first slow, afterwards more pronounced—which went on during 1905, was well maintained throughout the latter portion of the year and the metal markets now show strong tendencies of strengthening. In May the price of pig-iron was 55/-, in October hematite had reached 73/9 per ton. Coal remained low during the year. The British export of rails increased in the early part of 1905 and it has kept steady. The stocks of copper have been gradually lessened until they are now exhausted; chiefly owing to the heavy buying of China. The demand for tin has been on the up-grade and the output has exceeded the production; South Wales manufacturers made a record output of tin-plates in 1905, the home demand alone having consumed about 200,000 tons. Among the industries upon which there have been exceptional calls for metal, the motor industry may be instanced, the growth of this business being very exceptional; ten years ago there were no makers of motor cars in England, to-day it is estimated that £15,000,000 worth of motors are running in this country. Colonial business has improved and has helped the progress of the trade. Australian prosperity is very marked and the buying of manufactured goods by the Hardware merchants of the Federation has had a tendency to stiffen prices. Indian trade is improving. Export business, too, is steady, and some large orders from foreign countries have been received lately. On the whole, trade is good, and there is every prospect of increased prices being maintained, at any rate for some time to come.

DISLOCATED TRADE.

It would seem that there is always an undercurrent of political thought lying dormant throughout British commercial life, and, whenever a General Election occurs this undercurrent is ready to burst forth and more or less dislocate business. The dissolution of the first Parliament of His Majesty King Edward VII took place on the 8th. inst.; writs have been issued for summoning a new Parliament to meet in February, and, at the present moment, the whole of Great Britain is in the throes of a General Election. Although wise manufacturers and merchants are always careful to keep their political opinions in the background, in order that they may not interfere with business relations, it is not so easy for retail Hardwaremen to conceal their opinions. In small towns and country localities it is only in rare instances that the local traders are enabled to exhibit an utter indifference to party politics during election time, and, when the political opinions are freely expressed and public meetings held, often resulting in warfare of words if nothing worse, tradesmen who take prominent part must, more or less, suffer for their opinions; consequently, retail trade during the last week or so has been almost stationary, and for the next few days little will be done in the way of buying and selling. It is fortunate that the General Election is taking place at such an opportune time, the month of January usually being considered one of the quietest months in the year. Party feeling does not do any serious harm as the majority of traders and their customers are on sufficiently friendly terms to allow their difference of opinion to sink rapidly into the background when the excitement of an election is over. By the time this letter reaches its destination the election will be over and the government of this country once more in a settled state.

NEW YEAR'S TRADE

The early weeks of the New Year are usually devoted to settling up affairs, laying plans for future work, and, in many instances, taking stock—a very necessary duty practiced to a much larger extent than formerly. The old fashioned ironmonger regarded stocktaking as an evil to be avoided, and preferred to go on in a more or less uncertain state rather than experience the inconvenience arising from stocktaking; the modern ironmonger knows the importance of periodical investigation; and realizes the opportunities afforded for turning out superfluous stock and discovering errors in buying which have occured in the past, enabling him to avoid such mistakes in future. Some ironmongers are not following the example set by drapers and others and are taking advantage of the quiet weeks after Christmas activity, in order to hold clearance sales and so dispose of superfluous stock and make room for new goods and seasonable specialties.

WINDOW DRESSING.

An English trade journal, of current issue, commences a paragraph on window dressing with the pronouncement "Never have we seen more elaborate displays in the shops and shop windows of dealers than we have seen this Christmas." On several occasions I have alluded to the steady development going on during recent years, bringing ironmongers' windows more in line with those of other traders. The improved appearance of Hardware displays, not only in towns but in comparatively small country villages has been very marked lately. Probably this is due to rebuilding operations and the increased facilities afforded by modern architectural schemes of enlarged and better show windows in which good displays may be made. Apart from the improvements noticeable in general window dressing, some of the effects in artistic windows, especially arranged for Christmas trade, were exceptionally good, and not a few ironmongers made up some excellent models and representations of pictorial scenes on lines very similar to those adopted by American Hardwaremen. The possibilities of smart window dressing by Hardwaremen have been added largely to during the latter times by the rapid introduction of lighter goods in Hardware stocks. Not only is ornamental art metal work extensively sold by ironmongers, but fancy leather goods, ornamental cabinet work as well as glass and china have been very extensively purchased recently; the advantage of handling these goods, so many of which are sold to ready money buyers, are fully appreciated by those who believe in "quick returns and small profits."

AGRICULTURAL HARDWARE.

Those ironmongers dealing in agricultural Hardware have had one more opportunity of examining the latest and best in farm machinery. Last month the annual exhibition of implements and machines, at the Agricultural Hall, London, took place under the auspices of the British Farmers' Club, and implement and machinery manufacturers from all parts of the world were represented; as usual the exhibits of American harvesting machinery being large and prominent. The next important event in the implement and machinery world will be the Royal Show, which is to be held at Darby in June. The Royal Agricultural Society has made a clean sweep of its officials and is now starting again with a series of migratory shows. It is hoped that, under the new management, aided by the enterprise and activity of Thomas McRow, the new secretary of the Royal, agriculturists and manufacturers may have a good time during their visit at the popular Midland town. Derby is well situated and served efficiently with railways; every convenience will be afforded manufacturers and exhibitors and special arrangements made to enable implement agents and farmers to visit the show, so that there appears to be every prospect of a good representative gathering, and, as the general state of trade is tending upward, of some good business being done.

SCREEN DOORS AND WINDOW SCREENS.

It is a fact perhaps not generally known to all the retail trade, that the Continental Company, which is selling the product of nearly all the screen door and window screen factories, has established 602 distribution points throughout the United States. The orders received from retailers by the jobbers, are assembled at the factories in cars which go to these distribution points, and the goods, excepting those for retailers located at these distribution points, are then reshipped to tributary towns and villages. The carload rate of freight from factories is usually less than one-half the cost of freight on less than carloads. By the use of these distribution cars, therefore, the retailer saves from 25 cents to $1.50 per dozen on screen doors and from 10 to 50 cents per dozen on window screens and window screen frames. These cars go forward during the month of February, although additional cars to some points may be made up later, if local demand warrants shipping two cars. Orders should be in the hands of jobbers and forwarded to factories early enough so that the factories have sufficient time to get together the assortment necessary for each car. Notwithstanding the condition of the wire cloth market, lumber conditions are such as to prevent any reduction in the price of screen doors during the present season, and prices on screen goods are very firm. Retailers who do not take advantage of the February distribution cars are losing considerable in freight, as on later shipments they will have to pay freight either from the jobbing center, or from the factories.

REGISTERED TRADE MARK

"WEARS LIKE IRON"

A QUESTION OF IDENTITY.

There seems to be a fallacy among some dealers that for them to push an advertised article will cause them to lose their identity in the locality. This is entirely erroneous. If you will take up your morning paper and read the advertisement of any one of your large stores, you will find that they give special prominence to advertised articles.

They do this because they realize that although everybody in their city who might possibly buy goods of them does not know them; they all know of the advertised article. They realize at the same time, that it is of much importance to proclaim the fact that they stock these advertised articles which are so well-known in their community. Whether a woman has ever been in John Smith's or John Jones' store makes no difference. If she wants to buy JAP-A-LAC or some other advertised article, she will go to whichever store keeps it, as soon as she knows they keep it. Neither Jones nor Smith lose identity in a case of this kind; they thus get an opportunity of making a *permanent customer* out of this woman.

Thousands of customers are diverted from one store to another every day in the year because of some particular article they can get in one store and not another. A store that keeps the articles which are most in demand, is therefore the largest gainer of this floating trade. We believe you are sharp enough to not let the trade float, if you once get hold of it. You can lose nothing by the experiment which we now suggest.

JAP-A-LAC is known by almost every magazine reader in your community. Put your JAP-A-LAC in your window, keep it near the front of the store, advertise the fact that you keep JAP-A-LAC, and see what will happen. By doing this you will identify yourself with the best known article of the kind made. You will secure a great many new customers. You will give no excuse to your old customers for going to some other store for JAP-A-LAC, and we think there will be no question of identity after you finish the experiment.

PUSH JAP-A-LAC

641 ROCKEFELLER BUILDING, CLEVELAND, OHIO.

A NEW INDUSTRY.

A growing industry which bids fair to rank with the large manufacturers of the United States is the new safety razor industry. The Gillette Safety Razor Plant, which is located in Boston, Mass., has become the largest factory devoted exclusively to the manufacture of razors in the world. It employs over six hundred people, and has one of the model business systems of the United States.

This plant is equipped with the most remarkable automatic machinery to be found in the country, and the process in the fusion of the steel used in the Gillette safety razor blades is truly a scientific marvel in steel work. The process frees the steel absolutely from all natural impurities, removing all manganese, sulphur and phosphorus, yet retaining the carbon in just the right proportion. The result of this process leaves the blades flexible and resilient as a Damascus sword. The hardening, tempering, grinding and sharpening of the blades to secure the desired edge is an invention or process which the visitor to the factory looks upon as one of the twentieth century wonders in working steel.

SHOWING FLEXIBILITY OF THE BLADE.

Until this blade was created, it was not thought possible to make steel to possess such a fine degree of tensile strength and perfection; it was looked upon as one of the lost arts. Perhaps the greatest difficulty that has formerly troubled workers in steel has been the tempering of such thin steel without hardening to a degree of useless brittleness. The flexibility of the Gillette blade as shown in the accompanying illustration proves how perfectly the secret and patented process has been developed and accomplished after a long series of experiments.

Another peculiar and interesting feature of this blade is its two cutting edges, keen as lightning, sharpened to perfect uniformity. It has always been considered an unsolved problem to produce a double edged instrument of such thin steel because of the inability to uniformly perfect the edges. The accuracy with which these blades are made by automatic machinery proves that the genius of invention still has undiscovered realms.

POINTED PARAGRAPHS.

A man who is a friend only to himself has but few friends.

An undertaker never complains that he is worked to death.

No woman cares to be a silent partner in a matrimonial firm.

Query: Is the poor man who marries a rich grass widow in clover?

The coat doesn't make the man, but the lawsuit makes the attorney.

There would be no labor troubles if every man had a job on Easy street.

Many a man is unable to stand on his dignity because his wife sits on it.

Don't attempt to belittle others because you feel that they are superior to yourself.

If some men were paid only for what they know they would never possess more than 30 cents.

AWARE OF IT HIMSELF.

"John, here is a newspaper article in 'The Making of a Successful Husband.' What would you call a successful husband?"

"I should say, Maria, that a successful husband is one who can manage his wife without her suspecting the fact."

"Huh! Then you're not a successful husband by a long shot."

"I know it, my dear."—*Chicago News.*

REVIEW OF THE MARKETS.

WIRE NAILS: The advance made by the American Steel & Wire Co., on January 8, of $1 per ton, was anticipated by the trade in general and for several weeks it was thought it would open the New Year. The largest purchasers had liberal orders in the mills upon which they can make requisitions as the season advances. A large volume of business is the feature of the market and the price is held very firm. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight rate to point of delivery, sixty days or 2 per cent. discount for cash in ten days. Car loads to jobbers $1.85; car loads to retailers, $1.90.

New York—The prices on Wire Nails being advanced in accordance with the market, 5 cents a keg, makes a good demand at a quotation for small lots from store on the basis of $2.10 per keg.

CUT NAILS: There was no advance in price to meet the quotations on Wire Nails. The next meeting of the Cut Nail Association will be held on January 31, when it may be done. The demand from the mills has been larger than is usual for the month of January, and the shipments are made with but little delay. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.75 base; for less than carload lots, $1.80. For carload lots on dock New York, $1.90, for less than carload lot, $1.95. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York—The demand is reported as moderate and prices are quite firm. Quotations for small lots from store are on the basis of $1.95 to $2 per keg.

BARB WIRE: The advance of $1 per ton affected all wire products, making prices bear a relative value. Contract orders from the leading jobbers previous to the advance were more prevalent than usual; the demand for Spring trade being a good one, and orders are being booked in a noticeable volume. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.00	$2.30
Retailers, Carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: The specifications on orders previously given by the large Fence Manufacturers form the principal business on which shipments are fairly prompt. New orders are only moderate in amount as the wants of the season were covered by previous orders given at an earlier date. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days. Jobbers in carload lots, $1.70. Retailers in carload lots, $1.75. The foregoing prices are for base numbers 6 to 9. Other numbers, plain and galvanized wire, take the usual advances.

THE WIRE GOODS COMPANY: The Wire Goods Company, Worcester, Mass., has just issued Discount Sheet No. 24, applying to its catalogue No. 5, January, 1903. It gives a line of discounts on the extensive output of Wire Goods manufacturer by the company and also lists and illustrates several of the company's Coat and Hat Hooks, Spring Cotters and Flat Spring Keys, Iron and Brass Wood Screws, Dog Chains, Elastic Steel Door Mats, etc.

BRIGHT WIRE GOODS: The advance in Bright Wire Goods has just been announced, bringing the price up to 90 and 25 per cent. discount to best retail trade, although concessions can be secured by jobbers on desirable orders. Brass Cup Hooks and Brass Screw Hooks have also advanced and are now quoted at 85 and 10 per cent. discount.

SPRING COTTERS AND KEYS: A revised list of Spring Cotters and Flat Spring Keys has been agreed upon by the principal manufacturers. It is subject to discounts ranging from 90 and 50 per cent. to 90 and 50 and 10 and 5 per cent., according to the grading of the purchaser and the size of the order. On the new lists as adopted the larger sizes are considerably advanced.

SHEET ZINC: Under date of January 6 another advance is to be noted in Sheet Zinc, which is now quoted at $8 per 100 pounds, f.o.b. mill, in 600-pound casks, subject to the usual discounts for cash and quantity.

WRINGERS: The American Wringer Company has issued to the trade a new wholesale price list, dated January 1, 1906. General advances are announced, amounting to $1 per dozen on Wringers carrying the one-year guarantee, $1.50 on the three-year and $2 on the five-year Wringers. The manufacturers explain that lists have also been readjusted on the larger sizes to make them correspond more exactly with the variations in manufacturing cost.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12½
B Quality Manila	11½
Pure Sisal, 7-16 and larger	9½
No. 2 Sisal, 7-16 and larger	8

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)	9 @ 9½
Standard (500 feet to the pound)	9 @ 9¼
Standard Manila (550 feet to the pound)	10 @ 10½
Manila (600 feet to the pound)	10 @ 10½
Pure Manila (650 feet to the pound)	13 @ 13¼

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....45 cents per gallon.
In lots of 5 barrels or more.....44 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price only applies to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw. Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.

Calcutta Oil .....65 cents per gallon.

THE PITTSBURGH TRADE.

January started off with a spurt of good business in the jobbing line, and sales in the first two weeks show a large increase over 1905. It is to be hoped that this may be continued through the year. Advances in manufacturers' prices are general, fully one hundred different lines having moved upward within the past two weeks. Most of these advances are based upon higher values of raw material. Retailers will do well to buy their Spring stock early this year.

LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

The New Year opens auspiciously and seldom if ever have we heard more hopeful expressions for the future. If 1906 should turn out one-half as well as its many prophets predict, the result should be most gratifying to all. Of course, the first of the year is a dull time as the effects of the Holiday season are still felt and jobbers' salesmen are at home preparing for the work of the New Year; this usually requires a couple of weeks, but now salesmen are generally on the road and are meeting with a gratifying demand for goods. It is generally recognized that the moderate advance in price made so far is justified by trade conditions, and there is less opposition than might be ordinarily expected, owing to the large demand which has existed for some time, coupled with the fact that there has been little or no inducement for speculative buying. The shelves of dealers are by no means full and goods are bought for immediate sale. In times like these it certainly seems wise to keep stocks fairly well filled as loss of sales by reason of depleted stocks goes very far towards offsetting any possible decline. There is no evidence, however, at present of any decline in price; on the contrary the market is firm and new advances are coming almost daily. It is gratifying to report that collections are improving. The open Winter has caused a falling off in the sale of Winter Goods and we fear some of these may be carried over until next year. On the other hand, dealers report that the unusually mild weather has afforded opportunity for out-door work and the demand for goods and Tools to be used in this way has largely offset the loss of Winter goods. In such times it is a wise man who does all he can towards

reducing his indebtedness. When collections are good and money plenty, that is the time for dealers to make a special effort to get in their out-standing accounts, some of which, perhaps, have been on the books for months, if not years, and many of the dollars saved in this way, may in the light of past experience, be regarded as clear gain, while such collections go a long way in enabling the dealer to pay in turn his own accounts and to put himself on a more sure financial footing.

BIDDLE HARDWARE CO.

CLEVELAND ON CHINESE EXCLUSION.

The boycott of American goods by the Chinese is the natural result of our action towards Chinese citizens. The Sand Hill orators of California were permitted to stampede our National legislature into legislation that was a disgrace to the nation. The fundamental principal upon which the Republic had acted was ignored in the interest of persons, or party, with no regard to the right of Chinese citizens. A decent respect for her own people compelled China to resent it. The moral sense having failed to restrain us they were compelled to appeal to our love of gain, and in doing so they forced the respect of the world. The fallacious argument in support of our policy, deceives nobody. Our ports are open to many people, far inferior to these, and no argument can be, or has been made, to justify our action. Outside of the Chinese Colony in San Francisco, we had no cause of offense from these people. They were law abiding, industrious, cleanly in their habits, and made valuable employees. That they were economical, saved their money, and lived cheaply, was the argument used against them, and the only argument that was true of them as a class. If this justifies our boycotting these people, they are justified in boycotting our goods. Is it strange that our missionaries are not welcome to teach religion, that justifies such action? Or that we should expend millions to save the souls of those, to whom we deny the privilege of an improved care for their bodies? Are they not entitled to the inheritance of the earth as much as they are of heaven, and our anxiety to secure them one, while we deny them the other, is sham piety, that should not command respect from either God of Man. The argument used to justify our action is taken from the code of the highwayman, and is unworthy of a nation calling itself Christian. The writer had several years experience among Chinese residents in the mining section of California, and their example of peaceful, quiet industry, was the only offense they furnished the Sand lot orators, and he has never recovered from a sense of shame for his country on account of the disgrace of the legislation against these people. Compared to our offence against them, the rebuke is very moderate. That might makes right to exclude them from the benefits of this country, would justify us in fencing off heaven to exclusive use, and we are likely to find "China is no joke."

There is no abatement in business activity. It is becoming more and more difficult to fill mail orders as customers expect the same prices as last and stocks bought before the advance are becoming exhausted. No jobber has room enough to carry surplus stocks sufficient to fill orders for a long time, and trade has been so active that stocks have become depleted. Expenses are increased in effort to provide for greatly increased business, more room, more help and more waste are the result. Every jobber is anxious to treat his customers better than his competitor does, and each salesman wants to give his trade a chance to get under cover, so gladness brings trouble, but trouble being only the memory of departed joy, so long as joy predominates, as it does at present, complaints are base. There is very little reason to find fault with present conditions or with the outlook.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. Lockwood, Pres.

THE SAN FRANCISCO TRADE.

Affairs in California are in their usual cheerful and easy condition. Domestic and export trade are active, building operations apparently as large as at any time in recent years, while the growing tendency to extend the Western railroads into the State, and especially into San Francisco, impart a feeling of confidence to all classes. The event of the week in California was the generous rain, which extended all over the State, and imparted a wholly new aspect to the agricultural, mercantile and industrial situation. This soft warm rain means a restoration of pasturage, increased acreage into grain, improved conditions in orchards and vineyards, more power for the mines and electric plants, and in brief is a blessing all around and practically insures another fine year. At this writing California has certainly nothing to complain of as far as the business outlook is concerned. We can now go ahead with our plans with a fair prospect of seeing them succeed later on, and the uncertainty and doubt attendant on the recent long cold and dry weather can be forgotten.

This letter-mailing day for HARDWARE is the day of departure of President Bennett and Secretary Gracey of the California State Retail Hardware Association, and ten other Hardware merchants of San Francisco and Oakland, to the scene of the annual convention of the Pacific Retail Hardware Association at Marysville, 135 miles northeast from this city. The Pacific is the daddy of them all, has in its jurisdiction a number of counties, and all of the other younger twelve Hardware societies of the State look up to it, and with great respect take off their hats when in the presence of the venerable Pacific. J. C. White's name ought to be mentioned right here, for he has always been the energetic and progressive president of the Pacific Association, and is likely to be till his end of time.

(Concluded on page 41.)

He was followed by E. M. Brannick, Northwest, Portland, Oregon, who addressed the Convention on

SALESMEN; THEIR VIRTUES AND THEIR FAULTS.

Mr. President and Gentlemen of the Convention:

I am before you to speak on the subject of traveling salesmen, their faults and their virtues. I feel safe in saying that I am voicing the sentiment of every jobber and manufacturer, that the hardest work he has is, in selecting his employes, is to get good travelers, and there is more care used in their selection by the most successful houses in the country, for when they get good travelers they don't part with them, and they become so identified with each other that it is not wise for them to part. They are chosen for their character, for honesty, integrity, and for the higher characteristics of manhood, and they are always expressed in a good traveler, and I am thankful to say that the good ones are largely in the majority, and when you find a traveler who has been on the road a good many years representing a good house, as a general thing you will find a man of character and reputation, and a man who is worthy of your trust. As proof of that I will mention a few of the great travelers who have risen from the ranks, some of them went out in the country riding a sore backed horse, and some of them walked, anyway, they have gotten there.

I have one of the grandest names here in American history, who has served time as a traveler—I venture to say that there are but few of you here who appreciate the fact that Gen. U. S. Grant carried a grip and sold leather out of Galena, Ill. I heard of a little incident which illustrates how he stood. I was down in Clinton, Iowa, and a fire had occurred in a little town near there, and it burned out a little old landmark of a hotel which had been kept by an old fellow for forty years. Gen. Grant used to stop at this hotel and his name was on the register for several visits, and that register was destroyed in the fire, and the first thing the old landlord said after he recovered from his first shock, was "Damn the hotel, if they had only saved the register; I had Grant's name on there.

There was one characteristic of Gen. Grant which followed him through life and was one of the keynotes of his success, and that was his truthfulness. When you were brought in contact with the man, he immediately gained your confidence; he had honesty, he had integrity, he had truthfulness, and these characteristics, gentlemen, are the foundations of success of every successful traveler. And you can take the heads of a majority of the most successful houses, and you will find an ex-traveler either as proprietor or manager or having an interest in some way, or head of a department; and you will find that ex-travelers are usually there in recognition of their sterling qualities—they have won their way up. I can see here today the faces of many men who a few years ago were carrying the grip, and now they are managers or proprietors or heads of departments and on their way to fame and fortune; and if they didn't have these characteristics, gentlemen, they would not occupy those positions.
tions.

In glancing over the names of the great merchants of the country, there is one whose name will be handed down to posterity—Marshall Field, an ex-traveler. He carreid his grip in Illinois before there were railroads there and rode through the swamps of central Illinois, and there he got his start. And then the name of Spencer, of Hibbard, Spencer & Bartlett, was also a great traveler; I met him one time in Studebaker's store, buying a gift for his daughter, who, by the way, is now Mrs. Marshall Field; at that time she was Mrs. Caton, and we were walking through the showroom, and he saw a Concord buggy and he says, "There, my dear, is a buggy I drove 10,000 miles in," and we shipped those buggies to him before there were railroads in that country; and he bought one buggy that was shipped to Kansas City, in which he drove to the Rio Grande and back again selling goods, and in that way he laid the foundation of his fortune.

Now I could go on, gentlemen, and name name after name that have done likewise. I cannot pass without mentioning Mr. Symonds, of the Symonds Hardware Company, another ex-traveler, who today is reported to be the head of the greatest hardware establishment in the world—I am not prepared to say whether it is or not—but he is a great ex-traveler.

We have good and we have bad travelers, and I have mentioned a few of the good ones. I venture to say that I see before me heretoday young men, who, twenty years hence you will see at the head of vast establishments, and they will work up by their sterling qualities of character. Patience is a great virtue, and I want to say to you that patience in a traveler is necessary; sometimes his patience is strained a little, but if he is a good one he stays by it, and as a general thing, many of them have adopted the old saying, that "He who learns to wait, gains the world," although that may be a little overdrawn.

The traveling salesman goes into the business house with the best intentions in the world—not with the intention of overloading you with goods—if he does that he knows those goods will stare him in the face the next time he comes along; but he will sell you to the best of his judgment as to your wants, and no more; and, if any of you need any help, many of you are located where the banking facilities are very poor, and what do you do? you say to this traveling man, "I have such and such a note coming due, and I want some more goods, and I wish you would carry that note for thirty days," and the salesman says "All right, we will do it," and he writes to the house and the house confirms what he says. They are your friends, and whenever you need assistance they will come to your aid, and to the fullest extent of their power, if you are worthy of it.

GEORGE BOOLE'S ADDRESS.

"A Few Observations" was the subject which followed, which was delivered by George Boole of the Swabacher Hardware Co., Seattle.

Mr. President and Gentlemen:

I am very glad to be here today. Just at the present time we are in the midst of moving and it takes one's whole time, and I was not sure that I could get here. I know you have had a good meeting from what I have heard this day, and I will state a few things about Association work. Everything is not understood by the majority of those attending the meetings here; one thing is that the handling of the situation is left in the hands of a few to be taken care of. As you grow older your Association will still be handled by a few—the rest of you will relax into the routine of life and let those few handle it who will handle it; no matter what we say at our meetings; the work still goes on in the hands of the few.

In 1897, or previous to 1897, the jobbing houses of the Pacific Coast were at loggerheads and would hardly speak to one another; on June 17th, 1897, we formed the Pacific Coast Hardware & Metal Association, which has been running ever since, and which is very thriving, and it has done a great deal of good work and will continue to do so. From that organization, the members of it in the Northwest territory, thinking that they could do better work, at the same time formed a separate organization called the Northwest Jobbers' Association, the merchants of Portland, Tacoma, Seattle and Spokane and we worked in unison with the jobbing interests of San Francisco from a jobbing standpoint. When the jobbers formed their association the retailers thought it was a move to gouge them, but two or three heads are better than one, and the ideas of a dozen men are better than those of one man; and the point I want to make is that the good that comes out is brought out by a number of people, and it can only be brought out by association work. There exists the National Hardware Association and the Pacific Coast Association. They meet annually together; that is, at the same time and in the same place, and in that way things are brought out for discussion and papers read, and the ideas are distributed among us.

The history of the whole Hardware business is that there are very few men who have amassed fortunes, but Hardware men have amassed enough money to live well on and have that part of life which makes it interesting to work. They are enthusiastic and they have been well educated, or else they would go down and have to go out of business, and we know that the failures in the Hardware business are few.

If you will allow me to suggest that you do help your secretary and your executive committee by writing letters that are not in their line of thought, you will enthuse them and your work is bound to go on; but it is not encouraging for those who try to do the work to have everybody lax. I could go on and tell you of incidents that have happened, of misunderstandings that have been straightened out, things that were not true that were untangled, and of men who were brought into prominence, and houses brought into prominence through association work; and I believe you have had enough of association work to bring you to a point where you know it is of some good, and while you may go along slowly and may not see results of this meeting to-morrow, you will think of this meeting in coming weeks—think of getting together at the next meeting and have something you don't like and want fixed up, and if you bring that up—even though you be known as a kicker—yet it will only be a matter of time when you will come together in a general way and become a power; and that cannot be done in any other way except by association work.

I am very pleased to have had your attention; I thank you.

Then W. A. Jones, Associate Editor of the *Weekly Implement Trade Journal*, Kansas City, Mo., was listened to, his address being

RELATION OF THE TRADE PAPER TO THE DEALER.

The relation of the trade paper to the dealer is a subject that is not always thoroughly understood, either by the trade, or by the publishers of the trade paper.

The trade paper that does its duty by its constituency has a difficult and delicate task to perform. Naturally, it must look to the manufacturers and jobbers for its chief financial support, for no trade paper published could exist upon the amount received from subscriptions at least no paper that is of a class worth considering.

For instance, the dollar a year, or even two dollars, asked for subscriptions to any reliable and up-to-date weekly publication, will scarcely cover the cost of paper and postage, to say nothing of heavy bills for special correspondence, salaries of the staff, special articles, cuts and the thousand and one features that make a paper interesting, not to speak of the regular expenses of composition, press work, and binding—figures which would no doubt

America's Foremost Trade Leader

It offers liberal profits, and its quick sales make it a trade winner in all lines . . . .

The best hardware dealers of the United States carry these razors, and the demand is constantly increasing.

Our new combination set, with razor, including soap and brush in silver case, is now ready

The "Gillette" cannot be put together in any way but the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see Gillette advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us, has resulted in your name not being on our list of dealers.

startle the uninitiated, especially if he were obliged to meet the bills. It is therefore dependant upon the advertising which it receives—and much of that also, at heavy expense—to furnish the fuel necessary to keep the machinery moving.

For the above reasons it occasionally happens that some trade publications are inclined to fall into the way of becoming to a greater or less extent manufacturer's organs, rather than catering to the highest and most urgent needs of the retail trade.

However, it is manifest that

THE TRUE POSITION OF THE TRADE JOURNAL

is that of furnishing the news of the trade to the dealers of that particular trade, not only in the way of keeping them posted thoroughly on all the latest novelties manufactured, the new inventions and the trend of the times towards the use of certain classes of machinery and implements, fluctuations of prices of raw materials and of the finished products, the opening of new manufacturing establishments and jobbing houses, etc.; but also particularly of the movements of the dealers themselves, of their efforts at organization to better their trade conditions, of their losses and successes and of their conventions, great and small. To do all this, and to do it well, requires a vast amount of earnest, thorough, intelligent and conscientious effort, of vigilant journalistic watchfulness and of research through extraordinary and difficult channels, of accurate and painstaking work by trained journalists—for but few items of this sort can be gathered through the ordinary channels of news such as are available to the makers of the daily newspaper.

Editorially the conscientious trade journal occupies, oftentimes, the difficult position of arbitrator between two (more or less) hostile factions; for while in many respects the interests of both manufacturer and dealer are similar, if not identical, there are differences which are bound to arise from time to time, and both parties to the controversy naturally turn to the trade paper to express their opinions and defend their position. This as I say, is a delicate position to be placed in, and naturally calls for the wisdom of a Solomon. That occasionally something arises to displease one or the other party is, therefore, to be expected. Then there are the differences among the dealers themselves which not infrequently arise and call for an airing (of course in the trade paper) and each party expects the editor to uphold his side of the controversy. If he were able to do so, he would be in position to win fame and financial profit as a lawyer or a diplomat—perhaps both.

But the editor of

THE TRADE PAPER HAS STILL ANOTHER MISSION,

if he fulfills his duty. He must, week after week, furnish ideas to the trade, no matter how many years of experience his readers may have had nor how resourceful and successful they may have been in their own business. He must advise, council, cheer, and spur them on to better things. Perhaps he may feel it incumbent upon him to "call down" some of them who do not seem to appreciate the possibilities of their own business, and to urge upon them modern and advanced ideas that shall make their own businesses more profitable and pleasant.

Possibly you may think I am exaggerating the difficulties and the importance of the trade paper, but I assure you that these views are borne out by the best in the trade. In fact, the importance to the trade of the trade journal could only fully be realized were the dealrs, by some mischance suddenly and permanently to be deprived of their influence. Of course they could exist without them; so could they exist without the daily paper; without the telephone and telegraph; without the schools and churches, possibly even without the railroads. Our forefathers got along without most of these things and that they were leading comparatively full and worthy lives; and yet we would scarcely be willing to let the old world spin so far backward as to bring us again into that cycle.

SOMEHOW, LIFE WOULD HARDLY BE THE SAME,

after once having been used to these modern conveniences.

In view of all these facts, therefore, it seems to me that the live dealer, having had these matters called to his attention in a way he may possibly never before thought of them, will be better able to appreciate the work the trade paper is endeavoring to do for him; that hereafter he will devote more attention to its news and editorial pages than perhaps he has given in the past; that he will endeavor to co-operate with the editor and the publishers of his favorite paper by sending in items of news and communication on subjects of interest to himself as a dealer and to the trade at large.

Of course the live dealer subscribes and pays for this paper as well as reads it, for he is unwilling to make use of these available helps, which he receives from week to week, at the expense of some one else, for he knows that is not in keeping with his reputation as an honest and thorough business man. In fact, he will usually subscribe for more than one for he realizes that he cannot get too much information upon his business, and that the very small investment he would make, both of money and time, in taking all the principal trade papers in his line, would be without exception the most profitable investment he could possibly make.

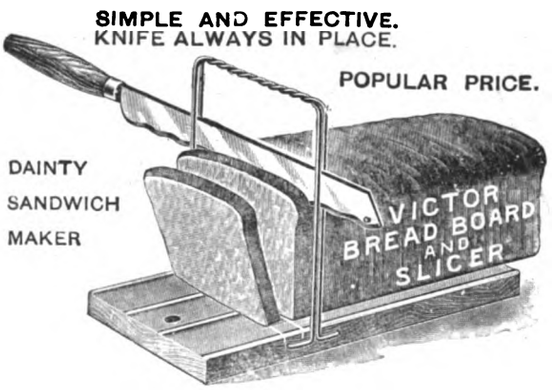
But at any rate, he should be a regular subscriber and a regular and thorough reader of at least the one most nearly meeting his needs in reference to the particular locality in which his lot is cast.

After the usual reports of the Outstanding Committees the meeting adjourned.

Friday evening was devoted to a Banquet and Smoker, in which E. F. Waggoner acted as Toastmaster.

(Concluded from page 38.)

For the next State society's convention, next March, Secretary Gracey tells the writer of this that the association's traveling missionary for the State, F. & B. Dickson, is having remarkable success in getting Hardwaremen throughout the State to pledge themselves in writing that they will attend the next State convention. Mr. Gracey says the outlook now is that there will be fully 500 in attendance.



And, we'd like to say for our growing State, Mr. Martindale is not the only arrival in California. In spite of the Eastern roads booming Cuba as a winter resort and issuing attractive low round-trip rates to Florida and the City of Mexico, first-class winter travel to California this present season is larger than ever. Southern California is crowded with Easterners and they are still pouring into that part of the State. About the end of the month they will begin to move North into this section of California. Such experts on the subject as Messrs. Fee and Horsburg of the Southern Pacific and J. J. Byrne and H. R. Gregory of the Santa Fe, say the travel this winter gives every indication of being the largest in the history of the State. They are confident the winter travel this season will bring here from east of the Rocky Mountains 42,000 people. And in their opinion this large crowd of people—all with some means—will spend a total of $24,000,000, of which the railroads and Pullman Company get $7,000,000. The remaining $17,000,000 will be spent by the tourists within the limits of California for hotel bills and a thousand and one other things that usually confront the traveler. According to the railroad people fully $12,000,000 of the good tourist money will be spent south of the Tehachapi, and the other $5,000,000 in Central and Northern California, the reason being that the tourists spend most of their time in the south and only remain a few days up north while en route back east at the approach of Spring.

J. C. Stubbs, traffic director of the Harriman roads, as chairman of a committee of his Western traffic confreres, causes many a San Francisco and California shipper to first show surprise and then a mixed look of doubt and regret when they hear him say no more passenger passes or passenger half rates are to be given to merchants as an inducement to get their shipments. It is notorious that Stubbs has used free transportation and half rates for years past on this coast to influence shipments he could not otherwise reach. His present decision is the sequel of a recent visit he and other Western railroad men paid to the Interstate Commerce Commission in Washington, on which occasion they promised "to be good." By means of free transportation in years past both the Southern Pacific and Santa Fe have controlled lots of competitive business. This free transportation ran up into hundreds and thousands of dollars annually and hundreds of shippers on the coast have enjoyed those favors.

INDUSTRIAL PRESS ASSOCIATION.

VICTOR BREAD SLICER.

Kus-Kus Specialty Co., 96 Warren Street, New York, is interesting the Hardware and housefurnishing goods trade in the sale of their Victor Bread Slicer which we illustrate herewith.

VICTOR BREAD SLICER.

It consists of a clean handy board with ridges to guide the bread and a strong wire rack which retains a knife with a serrated edge that will cut through the hardest crust. The device is extremely simple; it will cut slices of bread of any desired thickness, and anyone can use it. When not in use the wire rack may be folded back, and the utensil will hang flat against the wall. They are intended to be sold at a moderate price and designed to pay the dealer a good profit. As it is something which every family requires they have proved fast sellers.

✤

There is nothing more universally commended than a fine day; the reason is that people can commend it without envy.—SHENSTONE.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JANUARY 1, 1906.

395,309. ANIMAL TRAP M. J. Bartlett, Providence, R. I.
395,319. RECORDING DOOR LOCK. G. J. Ferguson, Greenville, Tex.
395,393. DISH DRAINER. I. Holzmark, Kansas City, Mo.
395,431. WRENCH. G. E. Franklin, Natick, Mass.
395,450. SCREW DRIVER. C. B. Morgan, Telluride, Colo.
395,489. TUBULAR LANTERN. F. Dietz, New York, N. Y.
395,497. CARPET STRETCHER AND TACK DRIVER. F. Koepp and J. C. Gueth, Pittsburgh, Pa.
395,539. COMBINED CHAIR AND STEP LADDER. C. Bookenheuser, Kenosha, Wis.
395,595. WRENCH. A. K. Spaulding, North Belgarde, Me.
395,596. WASHING MACHINE. G. J. Squires, Aurora, Ill.
395,598. COMBINATION TOOL. A. Wagoner, Columbus, Ohio.
395,618. CORK EXTRACTOR. G. Edwards, Berkeley, Cal.
395,650. WASH BOARD. S. Bingham, Conklingville, N. Y.
395,661. VISE. E. D. Morgan, Delair, N. J.
395,658. VEHICLE TOOL. L. E. Lewis, Hartford, Conn.

PATENTS ISSUED JANUARY 2, 1906.

808,627. KNOB. K. Booth, Philadelphia, Pa.
808,686. WINDOW SCREEN FASTENING. B. C. Rockwell, Perla, Ark.
808,687. CLOTHES PIN. D. R. Rosebrough, Casey, Ill.
808,695. WINDOW SCREEN. S. F. Smith, Freeport, and S. S. Sweet, New York, N. Y.
808,702. ATTACHMENT FOR WASHTUBS. M. W. Story, Indianapolis, Ind.
808,722. SHADE ROLLER. L. T. Rulley, New Haven, Conn.
808,730. COFFEE POT. M. M. DeGrody, St. Louis, Mo.
808,749. SUPPORT FOR SLIDING DOORS. L. Holmer, Limhamm, Sweden.
808,770. LAMP BURNER. W. M. Merchant, Garrison, Iowa.
808,786. POLISHING MACHINE FOR SAD IRONS. O. Tverdahl, Mineral City, Ohio.
808,801. PIPE WRENCH. R. Adams, Toronto, Canada.
808,815. LOCK FOR SASHES. C. B. Conant, Adrian, Mich.
808,861. FRUIT SQUEEZER. D. H. Mosteller, Chicago.
808,954. WRENCH. H. T. Thompson, Flovilla, Ga.
809,062. DOOR CHECK OR FASTENER. C. N. P. Ingalls, Lynn, Mass.
809,152. PIPE WRENCH. G. W. Waitt, San Francisco, Cal.
809,191. COMBINATION TOOL. E. J. LaDuke and I. G. O'Harra, Seattle, Wash.
809,243. MOP HOLDER. H. Bitner, Berwyn, Ill.
809,257. TOOL HOLDER. B. M. W. Hanson, Hartford, Conn.

PATENTS EXPIRED JANUARY 8, 1906.

395,693. DOOR HANGER. R. Clarke, Toronto, Canada.
395,751. DOOR CHECK. J. J. Krom, St. Augustine, Fla.
395,775. CLOTHES DRIER. F. J. French, Miles Grove, Pa.
395,803. TUBULAR LANTERN. O. D. Woodruff, Southington, Conn.
395,864. LANTERN. O. D. Woodruff, Southington, Conn.
395,865. RATCHET WRENCH. C. E. Adams, Chatham, N. Y.
395,889. LAWN MOWER. D. Bearly, New Castle, Ind.
395,895. IRONING BOARD. B. Gude, St. Anthony, Ind.
395,903. CARPET STRETCHER. B. Holden, Geneva, Ohio.
296,017. WRENCH. T. Warren, Centralia, Ill.

PATENTS ISSUED JANUARY 9, 1906.

809,340 WHEELBARROW. Wm. Tasker, Biloxi, Miss.
809,342. LOCK AND LATCH MECHANISM. H. G. Voight, New Britain, Conn.
809,424. LOCK. C. J. Caley and H. G. Voight, New Britain, Conn.
809,425. LOCK AND LATCH FITTINGS. S. J. Caley, New Britain, Conn.
809,448. ADJUSTABLE BRACKETT. S. Kahn, Cadallic, Mich.
809,461. KETTLE AND LID SECURING AND OPERATING MEANS THEREFORE. C. S. Pierce, Duluth, Mich.
809,485. SAW. F. A. Wuest, Lawrenceburg, Ind.
809,508. LANTERN. D. C. Kline, Rochester, N. Y.
809,527. CAN OPENER. H. B. Ray, Bridgeport, Conn.
809,534. LATCH. A Shepard, Plantsville, Conn.
809,544. GATE LATCH. G. Warner, Dearborn, Mont.
809,545. CARPET STRETCHER. S. J. Wever, Sheller, Ill.
809,582. MACHINE FOR PEELING VEGETABLES. H. Robinson, Brooklyn, N. Y.
809,610. DOOR LOCK. C. F. Fringer, Lithia, Va.
809,639. BROILER. J. M. Stokoe, Cleveland, Ohio.
809,673 CAN OPENER. J. W. Davis, Alto, Tex.
809,753. WINDOW SCREEN. E. D. Segar, Randolph, Vt.
809,783. SASH BALANCE. H. A. Crommett, Patten, Me.
809,803. NAIL PULLER. W. F. Hobbs, Bridgeport, Conn.
809,807. SPADE. E. C. Jewett, Eaglegrove, Iowa.
809,838. WRENCH. A. W. Parfitt, New London, Wis.
809,843. BOLT CLIPPER. J. Pulvitt, Alvarado, Tex.
809,858. WRENCH. F. M. Straube, Boulder, Colo.

PATENTS EXPIRED JANUARY 15, 1906.

396,059. SPRINKLING NOZZLE. J. W. Anderson, South Bend, Ind.
396,150. SASH FASTENER. J. C. Erickson, Hadley, Minn.
396,181. WEATHER STRIP. J. Walker, Belleville, Kans.
396,248. GRATE. J. Wakeham and J. Cunningham, Toronto, Ontario, Canada.
396,273. PERMUTATION LOCK. B. J. Douds, Canton, Ohio.
396,286. CORKSCREW. L. S. McWhorter, Chicago, Ill.
396,363. SASH FASTENER. W. T. Morgan, Muncie, Ind.

PATENTS ISSUED JANUARY 16, 1906.

809,926. COMBINED STEP LADDER AND IRONING TABLE. A. L. Alspach, Chicago, Ill.
809,962. WRENCH AND ANALOGOUS ARTICLE. O. A. Lane, Adrian, Mich.
809,990. WINDOW SASH. J. H. Shepherd, Huron, Mich.
809,991. DUSTLESS ATTACHMENT FOR BROOMS. F. Sheridan, Anamosa, Iowa.
810,021. DOOR CHECK. L. Audrieth, New York, N. Y.
810,045. WINDOW LOCK. E. Etenhauser and R. L. Morse, San Jose, Cal.
810,052. HINGE. E. C. Hall, Braintree, Mass.
810,096. PIPE WRENCH. J. H. Vinton, Boston, Mass.
810,110. SASH LOCK. C. M. Evans, Carmichaels, Pa.
810,142. SHADE ROLLER AND CURTAIN POLE SUPPORT. J. Herr, Gibsonburg, Ohio.
810,146. COIL SPRING. E. Hogan, Portland, Ore.
810,147. TRUNK LOCK. J. A. Horne, Stamford, Conn.
810,166. IRONING BOARD. D. Messer, Rochester, N. Y.
810,320. BIT EXTENDER. W. B. Swan, Seymour, Conn.
810,268. CURTAIN FIXTURE. C. E. Dunn, New York, N. Y.
810,278. CURTAIN FIXTURE. C. L. Hopkins, Albany, N. Y.
810,279. SHADE FIXTURE. C. L. Hopikns, Albany, N. Y.
810,288. WRENCH. M. M. LeMay, Leighton, Ala.
810,304. PIPE WRENCH. L. V. Remion, San Bernardino, Cal.
810,340. SPRINGLESS LOCK. H. K. Meis, Lawton, Okla.
810,365. PIPE WRENCH. H. C. Barlow, Goldendale, Wash.

CHANGING THE WINDOW DISPLAY.

Frequent change in the window display is most essential but when you have made a popular hit don't lose the best results from it by changing it too soon. The *first* results come from the people who are attracted by it in passing—where it ends, if the display is taken down too soon. If it remains long enough the second and *best* results begin through the people who are enough interested to tell and bring their friends to look; that is the stage when people get to talking about it, when it possibly is mentioned in the local papers, when people go out of their way to have a look at your window and begin to notice the store itself.

You never can tell in advance how long it will pay to leave a certain display up; that is for the public to decide for you and you must abide by their decision. So long as they keep bringing friends to see it do not disappoint them by its removal. When they begin to look for something new or to glance rather hastily at the window in passing give them something new at once, before the old impression fades away and the interest you have awakened in your window is forgotten.

♦

In little trades more cheats and lying
Are used in selling than in buying;
But in the great, unjuster dealing
Is us'd in buying than in selling.

BUTLER.

♦

All smatterers are more brisk and pert
Than those that understand an art;
As little sparkles shine more bright
Than glowing coals that give them light.

BUTLER.

♦

I am told so many ill things of a man, and I see so few in him that I begin to suspect he has a real but troublesome merit, as being likely to eclipse that of others.—BRUYERE.

BUSINESS ATMOSPHERE.

By NATHANIEL C. FOWLER.*

"I have been announced as an advertising counsellor, and am supposed to know something about publicity. In order that there may be no argument, I admit that I do know about advertising. I believe that I can give you many facts, figures, and theories about publicity; but to do so, I would have to talk about what I know about, and to use truth as an accessory. I don't propose to be handicapped by fact, or to be forced to call upon truth for assistance. I would much rather take a broader subject, one which I know so little about that I would be untroubled by fact, and therefore be permitted to spread myself and to say what I wanted to say irrespective of truth. I know that some of you, if not most of you, will appreciate my natural condition, and I feel that some of you at least, will realize what a fearful thing it is for a man to confine himself to fact and to limit his words to the telling of the truth; consequently, by throwing fact aside, and by forgetting all about truth, I shall place myself in harmony with you, and feel at home.

"However, I will not entirely go back on first principles, and will smuggle in a little advertising here and there.

"Comparatively few of you, as I understand it, are advertisers in a broad advertising sense. Few of you use daily newspapers or the magazines. Your printer's ink advertising is confined to the trade paper, the circular, the catalogue, and the price list. But notwithstanding that you are not, broadly speaking, advertisers, everyone of you is an advertiser, for without advertising you couldn't do business.

"My definition of advertising is that advertising is anything which connects the maker or seller with the buyer. If my definition be correct, then the sign on your store, your counters, your shelves, your letterheads, your salesmen, and the policy of your business are advertising.

"One of the essentials of business, whether one be a wholesaler, a retailer, a canvasser, or a peanut vender, is the policy of the business. That I may go deeper into the psychology of it, I would change the word 'policy' to 'atmosphere,' and for a few moments will talk to you upon the atmosphere of business, that something which is of vital consequence, which stands between no profit at all or moderate profit and the flush of profit. I may venture the statement that not one of you makes or sells any article which I cannot buy at practically the same price, and of practically the same quality, of somebody else. Therefore, you do not compete in quality or in price. You are not monopolists, whether you want to be or not. To sell what you have to sell requires the introduction of something besides the goods themselves, the price, and the salesman. This something is your policy, your individuality, your personality, your method and the atmosphere you create in your factory, your store, and which surrounds your representatives.

"For argument's sake, I assume that each one of you offers the same quality and the same price. I think this is so, and that I need not make this point for argument's sake. Now why is it that John Smith can sell John Jones, and that John Black cannot sell John Jones? The reason for this lies in the fact that John Jones likes John Smith's policy better than he likes the policy of John Black. There is something about the way John Smith does business, something about the atmosphere of his store, the character of his representatives, which appeal to John Jones, and this something, this atmosphere is what consummates the trade.

"I understand that you, in common with other wholesalers, have, or are supposed to have, a definite credit method, with established time discounts. I further understand that many of you, rightly or wrongly, go back upon your own self-made principles. For instance, you sell a bill of goods with a 5 per cent., 30-day discount. The buyer doesn't pay in 30 days. Ten days later, you write him a letter, in which you apologize for asking for money which belongs to you. In another 10 or 20 days you write him again, and repeat the apology. Then you write again and again, with or without result. If the man pays, say in 90 days or in 120 days, he deducts the 5 per cent., 30-day discount, and usually you take it. Your excuse for doing this is because you are afraid of losing the customer. Now, gentlemen, I believe in the cordiality and liberality of business, but I don't believe in the breaking of business principles. If a principle is worthy of establishment, it is worthy of maintenance. True, you may lose a customer by standing by your principle; but I ask you, as business men, is it not better to lose an unprofitable customer—a customer who won't keep his word, and a customer in bad credit—than it is to voluntarily break a principle of business?

"I take it for granted that all of you would maintain this credit principle if you felt that every one of you would do so. If this be so, then you have little confidence in one another. It doesn't speak well for the Credit Men's Association, if its members haven't sufficient confidence in each other to maintain a system of credits admitting of no exception.

"In the first place, I fail to see why it is profitable to sacrifice a profitable principle to keep a bad-paying or a non-paying customer. For my part, I don't believe that you cannot trust one another. I believe that the reason you don't trust each other is because you have never seriously considered a complete and harmonious binding together—an organization standing for more than turtle soup and coffee and cheese. I don't believe that more than a very few of the members of this association would break an agreement, if the agreement became a fundamental by-law of the association, and the few fellows mean enough to break such an agreement of honor, should be punished by being allowed to have all of the poor-paying customers they can get hold of.

"Bad bills have broken more firms than bad business. Getting one's money is essential to the doing of profitable business. I don't believe it pays to continue to do business with a man who will not pay with reasonable promptness, and who refuses to buy of you if he cannot have the 30-day, 5 per cent. discount when he doesn't pay for 90 days. If there is any loss in sticking to principle, it is a temporary loss, a much more apparent than real loss. There is a fundamental principle in everything, even in dishonest business; and the maintenance of that principle pays in the end; while the doing away of that principle means loss, if not a greater disaster. There is more humor among men, and especially among business men, who bind themselves together for business principles, than most of us believe. A business man of success, wether he be honest or dishonest, sticks to the principles of business doing and to the principles of credit, if those principles are made to be a part of broad business policy.

"Co-operation with the clerk and salesman is necessary. Cordiality is essential. But back of it all, and especially in credits, is the necessity of an established and unbroken policy, a policy of realized importance, a policy as solid as the corner stones of trade.

"If what I have said, gentlemen, does not apply to you, it will do you no harm. You have only to pass it along to the poor fellow who needs it."

*An address delivered before the Boston Credit Men's Association, December 12, 1905.

CONNECTICUT HARDWARE ASSOCIATION.

The several committees appointed recently to arrange matters pertaining to the third annual meeting of the Connecticut Hardware Association, to be held in New Haven, February 27 and 28, have outlined somewhat the programme for that event. The headquarters will be at the Hotel Davenport, at which rooms can be secured by those wishing them, and the guests will, in all probability, be accommodated there also. Opening session at 1 o'clock February 27 at Chamber of Commerce rooms, 763 Chapel Street. The regular routine business will be done at this time as well as Election of Officers for the coming year. Address by the National Officers present, the opening of the Question Box, etc. It is hoped that members will be prepared with questions for the box. A question box committee will be appointed at this time to answer the questions, said committee to report the following day, at 6 P. M. Tickets for theatre will be distributed and meeting adjourned to lunch, to meet at 8 P. M. at the theatre, which will conclude the first day. February 28, at 10 A. M.—Business session to care for unfinished business. Report of Question Box Committee. Address by manufacturers present, guests and representatives of trade journals. 1.30 P. M.—The banquet of the meeting will occur, which it is expected will eclipse all previous efforts of the association. A great deal of interest is being displayed by the members in this meeting and it is expected it will be the largest in the history of the association. The following is a list of the committee's serving for the convention: Hotel Accommodations—H. W. Kelley, R. T. Warner, W. A. Warner & Bro. Banquet and Lunches—F. L. Leighton, G. J. Bassett, L. L. Rosenberg. Theatre and Entertainment—R. C. Lightbourn, W. H. Burchell, N. T. Bushnell Co.; Fred. J. Meyers, L. L. Rosenberg & Co. Manufacturers' Exhibits—E. M. Walsh, R. B. Bradley Co.; G. H. Baker, G. H. Baker Co. Reception Committee—F. T. Terry, A. H. Abbe, Irving C. Treat, W. A. Church.

LANDLORD'S GAMBLING LIABILITY.

The United States Supreme Court also affirmed the constitutionality of the Ohio law permitting a third party to sue and recover money lost in gambling, and holding the owner of the property in which the gambling took place liable for the amount won. The case in point was that of Mrs. Belle Trout, who, under the State law, had won the right to recover from William E. Marvin, the owner of the premises in which her husband had lost $3,473 by gambling.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ashland, Ky.—S. J. Morrow & Son have opened up a Hardware store.

Ashland, Neb.—The McCartney Bros. Co. has opened a new Hardware store.

Blackwell, Okla.—The Frank Gould Hardware & Implement Company, capitalized at $10,000, has been incorporated with the following directors: A. H. Velie and George A. Parker of Kansas City, and Frank Gould of Blackwell.

Carrollton, Miss.—The Carrollton Hardware & Implement Co. has been incorporated with $12,000 capital.

Charleston, W. Va.—The Goshorn Hardware Company has been incorporated to do a general Hardware business. Capital, $75,000. Incorporators, W. F. Goshorn, H. D. Goshorn, J. A. deGruyter, W. A. MacCorkle, W. E. Chilton, R. G. Hubbard, L. A. Holly, Wm. Neal and Harrison B. Smith of Charleston, and W. E. Mohler of St. Albany.

Chicago, Ill.—The Trout Hardware Company has been incorporated with $200,000 capital. George W. Trout, president, and A. B. Wilbur, secretary.

St. Paul, Minn.—The Bowman Manufacturing Company has been incorporated with a capital stock of $50,000. The concern will manufacture Hardware specialties. H. J. Gillam, F. B. Fiatt and J. P. Galbraith are the incorporators.

Troy, N. Y.—Watervliet Novelty Company has been incorporated to manufacture ice cream dippers. Capital, $1,000; directors, A. P. Hinstead, J. W. Dorman, F. P. Von Denbergh, Watervliet; F. A. Michael, Troy.

Union, Mo.—Union Handle Company has been incorporated with $3,000 capital stock. Incorporators: George M. Schmitt, Edwin P. Mantels and Henry P. Cuneo.

Changes and Improvements.

Allentown, Pa.—The Allentown Wire Mill, representing an investment of over $2,000,000, is being enlarged under the direction of the new superintendent, J. G. Mustin.

Anniston, Ala.—The City Hardware Co. is erecting a two-story brick building to be used for the extension of the harness manufactory, which has long since outgrown its present compressed quarters. A large lot of new and improved machinery will be purchased and many more men given employment in the plant.

Athol, Mass.—The L. S. Starrett Company, manufacturers of fine mechanical tools, has acquired the three-story wooden mill building, 40x80 feet, known as the William H. Kaufman mill, one-fourth the water rights of Lord's Mill Brook and almost three acres of land fronting on Freedom and South Streets, for the purpose of enlarging its business.

Baltimore, Md.—The Enterprise Wire Works is erecting a one-story building, dimensions 46 by 155 feet 6 inches, and costing $4,500.

Bayonne, N. J.—Edward Ogden, Hardware manufacturer of New York, has recently purchased property here consisting of about 24 lots, having a frontage of 201 feet on the north side of the street and 292 feet on the west, 200 feet on the south and 316 feet on the east, for the purpose of erecting a large factory.

Boston, Mass.—The Gillette Safety Razor Company has started work on an addition to its plant. The building will be brick, will measure 80 by 90 feet and will be five stories high, costing about $50,000.

Bridgeport, Conn.—The Challenge Cutlery Co. has just completed a three-story brick factory building, 50 by 265 feet, and the structure is being equipped with machinery. The concern has finished the installation of a 250 horse power electric plant, with a direct connecting engine and motor in each department. Work will at once be begun on the erection of a forge shop, 30 by 110 feet.

Camillus, N. Y.—Adolph Kastor & Bro. are making extensive improvements at their pocket knife factory. The new building the company is erecting will be 22 by 100 feet in dimension and two stories high.

Chicago, Ill.—The Simonds Manufacturing Company, saw and knife makers, has taken over the business of the Canada Saw Company of Montreal, St. John, Ottawa and Toronto. The new company will be known as the Simonds-Canada Saw Company. More than $250,000 is involved in the merger.

Evansville, Ind.—The Evansville Foundry Association has been purchased for $109,000 by a company composed of M. S. Sountag, George Dauble, William Boetticher and others. Its name has been changed to the Advance Stove Works.

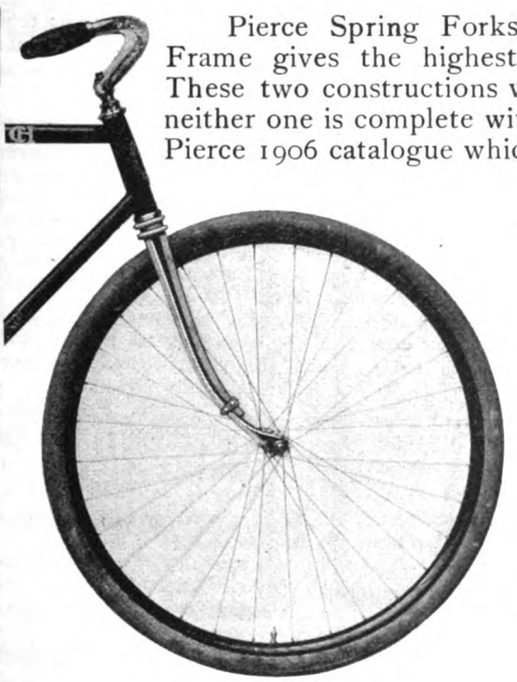
Fairhaven, Mass.—The Atlas Tack Co. has made a number of improvements recently at their factory, the most important of which is the equipment of a hospital room for the use of employees in case of sudden illness. The room has been fitted up at an expense of about $500.

Jacksonville, Fla.—The name of the Diebold Safe & Lock Company has been changed to that of The Franz Safe & Lock Co.

La Crosse, Wis.—Stamping & Tool Co. has increased its capital stock from $10,000 to $25,000.

Lititz, Pa.—At a stockholder's meeting of the J. M. Mast Manufacturing Company held recently the following were elected directors: A. R. Bomberger, N. K. Brubaker, J. C. Brubaker, D. H. Kreiter, N. B. Leaman, A. B. Long, C. B. Risser, J. M. Mast and W. H. Muth. The stockholders also voted to change the present name to that of Animal Trap Company because of the purchase by the J. M. Mast Manufacturing Company of this larger and better known trap manufacturing plant which will be removed here from Abingdon, Ill., as soon as the new factory buildings are completed. The new board reorganized by electing J. M. Mast, president; N. B. Leaman, vice-president; J. C. Brubaker, secretary; N. K. Brubaker, treasurer, and F. W. Shultz, business manager. The capitalization of the corporation, under the new charter, is $150,000, nearly all of which is already subscribed.

Martins' Ferry, O.—The Spencer Baggs Stove Co., owing to the marked and steady increase in business, has purchased two lots for the erection of another large warehouse.



Milwaukee, Wis.—The Western Hardware & Manufacturing Co. has increased its capital from $25,000 to $50.000. L. C. Braecken, president, and John N. Schiffler, secretary.

Philadelphia, Pa.—The manufacturing business of files and rasps, conducted by Mayer & Co., has been taken over by Liveright Brothers.

Digitized by Google

The bicycle business this year has been the largest since the decline of the craze. Next year the demand will be even greater. This present growing demand is not for the freakish or the cheaply-constructed vehicles which flooded the market in the boom days. It is for wheels of proven merit.

Pierce Spring Forks in conjunction with the Cushion Frame gives the highest luxury to be obtained in cycling. These two constructions work together in entire harmony and neither one is complete without the other. Examine this in the Pierce 1906 catalogue which will be furnished upon application.

Pierce Cycles

have maintained their high standard of mechanical excellence from the beginning. Every change has been for the benefit of the rider. The cushion frame, spring forks and coaster brake of the 1906 Pierce give it precedence over all others. Consider now the advisability of a Pierce agency.

The Geo. N. Pierce Company

Buffalo N. Y.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bridgeton, N. J.—The Standard Amusement & Manufacturing Co. has been incorporated with $50,000 capital. One of the numerous things the new company intends to do is to sell and repair cycles. Albert R. McAllister, Clarence Crane and Elmere H. Crane are the incorporators.

Brooklyn, N. Y.—George B. Pieper has opened up a bicycle store at 1205 Bedford Avenue.

Denver, Colo.—The Denver Auto Goods Co. has been incorporated. Capital, $10,000. Directors are: H. O. Cartwright, Smith McKay and J. W. Foster.

Lowell, Mass.—The George E. Wye Co. has been incorporated to deal in sporting goods; capital, $25,000. President, C. E. Stanwood, Highlandville, Mass.; treasurer and clerk, A. H. Bowers, Needham, Mass.

Marysville, Cal.—The A. J. Menz Company has been incorporated with $10,000 capital, by A. J., E. E. and A. J. S. Menz, to conduct a general sporting goods store, and deal in bicycles, firearms, cutlery, ammunitions, etc.; and do a general repair business in these lines.

New York, N. Y.—Eagle Tire Repair Co. has been incorporated; capital, $1,000. Directors—J. G. Battle, Jr., I. J. Reynaud, Glen Ridge, N. J.

Waltham, Mass.—Harding Manufacturing Company has been incorporated to manufacture sporting goods; capital, $30,000; president and treasurer, Hawley Harding; directors, Thomas Murphy, William J. Brannan.

Watertown, N. Y.—The Franklin Arcade Company has been incorporated to deal in sporting goods. The capital is $1,000 and the directors are: John H. Coon, James B. Wise and Jere Coughiln.

Wilmington, Del.—The Bradford Company has been incorporated to manufacture, sell and deal in bicycles, etc. Capital stock, $50,000.

Changes and Improvements.

Meriden, Conn.—The Meriden Firearms Co. has recently purchased the Atlas Gun Company of Ilion, N. Y., which manufactured a small sporting or target rifle. The machinery for the making of the Atlas rifles in this city is now being installed. A number of expert rifle makers from the Winchester factory in New Haven and other rifle shops will be added to the firearms force on account of the acquisition of the Atlas gun. At present something over 350 hands are employed at the firearms plant.

Rutland, Vt.—The Coolidge Cycle Co. sold out to Howley Bros.

Miscellaneous.

At the annual meeting of the Minneapolis Cycle Trade Association on the 2d inst., the following officers were chosen for the ensuing year: President, S. Stevenson; vice-president, W. Edwards; treasurer, O. Fenstermacher; secretary, E. H. Hammer. At the meeting a committee was appointed to wait on the city clerk and urge that cyclepath tags be made ready before the opening of the riding season.

Charles H. Hall has been elected president of the Chicago Motorcycle Club. The other officers chosing at the annual meeting are as follows: Vice-president, Dr. S. W. Fahrney; secretary, Irving R. Hall; treasurer, George H. Gardner; captain, Charles W. Van Sickle; directors, C. H. Hall, S. W. Fahrney, F. E. Yates, Edw. Landgraf and V. Bendix.

✤

E. M. Moss, a dealer in bicycles and sporting goods at Hopkinsville, Ky., has filed a petition in bankruptcy. His liabilities amount to $3,600 while his resources are claimed to aggregate $5,000.

✤

The Haverhill (Mass.) Cycle Club has elected the following officers for the ensuing year: President, Abner Hoyt; vice-president, H. J. MacMonagle; secretary-treasurer, B. F. Bragdon; committee, Daniel Frawley, Thomas Liniment and William Sturgeon.

✤

The Maplewood Sporting Club of Newark, N. J., which pays more attention to cycling, perhaps, than any other form of sport, has elected the following officers for the ensuing year: President, Theodore W. Van Iderstine; vice-president, Emory H. Dare; secretary, William J. Rink; treasurer, Charles P. Edwards; members of board of governors, Frederick H. Allendorf, chairman; Ernest M. Van Iderstine, Chas. C. Barnard, Michael J. Lyons, Jr., and Charles L. De Grasse.

MANCHESTER, England—Agent established 25 years is desirous of representing Manufacturers of articles suitable for the Hardware Trade (Whole connection only). First Class references. Will be over to New York in February to complete arrangements. Address "D700" W. H. Smith & Son, Advertising Agents, Blackfriars, Manchester, England.

YOUNG, thorough, Hardware man, having traveled a number of years, but now managing a corporation in the West, desires to return East and represent factory manufacturing anything in the line. Willing to travel anywhere. Best of references given. Address Reference c/o HARDWARE.

AN EXPERT Cutlery and Specialty man having renowned reputation on the Pacific coast as salesman, but now with man'f'g. Hardware corporation West, desires to return East and represent the manufacturers direct to the jobbers or large retailers. Willing to travel anywhere; best of references given. Address Expert c/o HARDWARE.

For Sale.

FOR SALE.—In prosperous New Jersey farming town an old established Hardware general business which greatly increased last year. Well equipped buildings and clean stock which would inventory about $8,500. Would rent buildings. Owner wishes to return to country. Address Retire, care of HARDWARE, 307 Broadway, N. Y.

To Practical Men

We are offering a portion of the capital stock of a manufacturing company, incorporated in June, 1905—sold within sixty days one-half of its stock. Under original plan the remainder is now offered. The article manufactured is a long sought for combination of two of the most universally used time-saving devices—your office has one and perhaps both—you consider it unquestionably the most important feature of your equipment. If you believe a proposition can bring enormous returns and still be safe, give us a call—if you are sceptical, call anyway and be convinced—we'll get your endorsement.

Stock placed in lots of $500 to $5000 on satisfactory payments. No water—no leaks—no freezing out of small investors. A square deal all around; every cent received devoted to actual manufacture. As traders in practical articles you will grasp its business possibilities at a glance—as experts you will enjoy its beautiful mechanism and perfect proportions. The Company will stand the closest investigation; all questions cheerfully answered. Call and see the machine in operation or write for Prospectus. DO IT NOW.

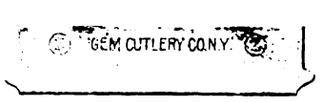
A Wave of Enthusiasm

Has been created by the Greatest Little Barber in the shaving world—**The Zinn Automatic Razor.**

Portland, Ore., Dec. 28, '05
Messrs. The Gem Cutlery Co.,
34 Reade St,, New York.
Gentlemen:—Your "Zinn" Razor is all right. I have been shaving with it every day since I received it and am well pleased with the work. I thought that I had just the right razor when I bought the advertised two-edge Safety, but I must confess that the "Zinn" is away ahead and is so well poised that it makes shaving a luxury.
Yours truly,
A. C. Going, Pres.
The Loewenberg & Going Co.

This testimonial is only one of thousands—conclusive proof that the Zinn is all we claim for it. ∴ ∴ ∴ ∴ ∴



The ZINN
Automatic Razor

Is the Razor with the Always Keen Blades. Twenty-four of them—so thin that 200 of them are only an inch thick! So hard that they cut glass; so sharp that no whiskers are too tough for the Zinn.

The Zinn effects a great saving in shaving--that's why it has made friends fast and--fast friends.

Show a Customer a Zinn Blade

He will buy a Zinn Razor

No Honing! No Stropping! No Dissatisfaction!

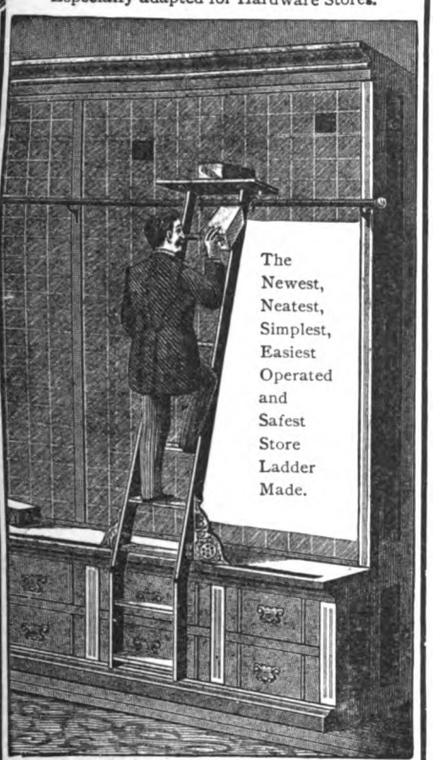
That's why its sales are so phenomenal and your profits, Mr. Dealer, so quick and sure—the very reason why you should

Share in ZINN PROFITS in 1906

We are advertising it everywhere. We furnish you with advertising literature.

We protect you against cut prices.

Send for our 1906 proposition to-day—



Don't wait till to-morrow!

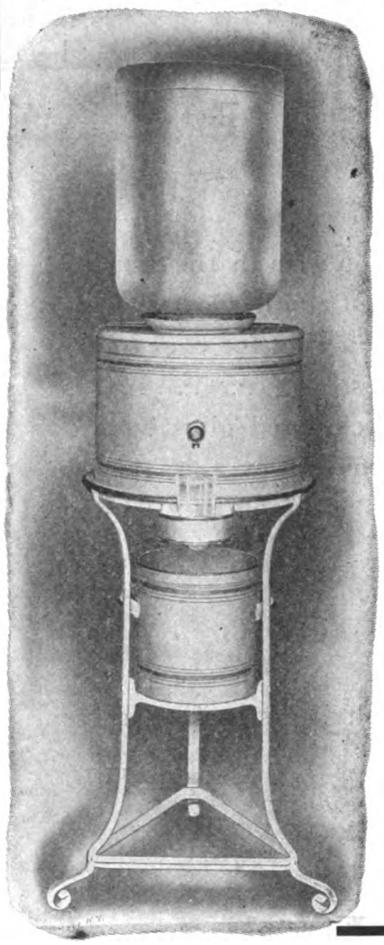
LOOK

each ad. in the face. It is a salesman. If you doubt his words, write to the firm he represents. If you believe him—write anyway.
Always Mention "HARDWARE" for having "put you wise."

SCHOFIELD'S ACME DUST PAN

Never spills dust and dirt as ordinary dust pans do. It can be pressed so snugly to the floor (without stooping) that every particle of dust is taken up. When raised the dust is dumped in the pocket, allowing the pan to be carried without spilling the contents.



It is made of steel and will outlast ten ordinary pans.
It's a time and labor saver for the housewife and a money maker for you. **Retails for 25c.**
Your Jobber sells them. Order a sample doz. to-day.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

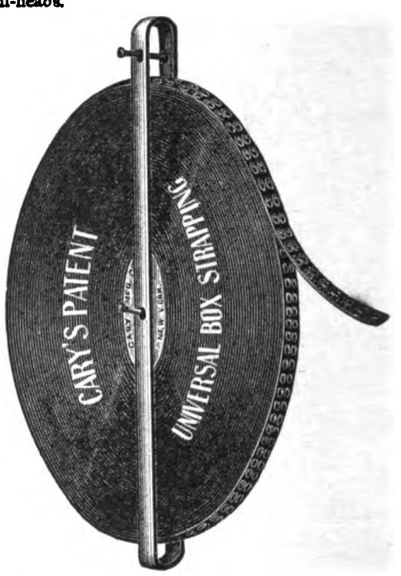
Rose Water Coolers

Having greatly increased our facilities, we are now willing to offer

Rose Water Coolers

for sale through Hardware Dealers.



Merit and price have made their demand enormous.

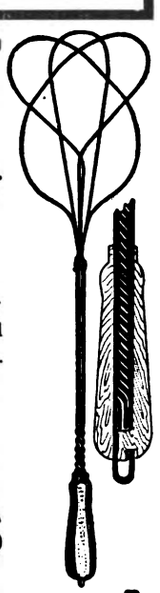
Send for circular and prices to-day

Rose Mfg. Co.
505-13 W. 50th St.,
NEW YORK

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: ½, ⅝, ¾ and 1 inch.
Patented in all countries.



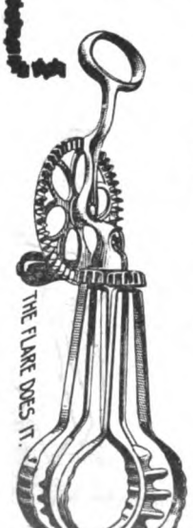
CARY MFG. CO,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

"CLEANER"

Rug and Carpet Beater

made from

The Best Furniture Spring Steel



Beats everything: clothing, upholstered furniture, mattresses, robes, rugs, carpets.

Warranted not to break off at handle, nor to become loose or come off.

Beats all others as a profitable seller.

HOLT'S

Dover Egg Beater

beats eggs in 20 seconds—four times faster than the best hand whipper, lighter and stiffer.

***The* Flare Does It.**

Ours is one-third larger than others.

Four sizes.

Over 23 tons of 15 and 25c. sizes sold in England since July 1904.

Send for circular and prices.

Mention HARDWARE.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

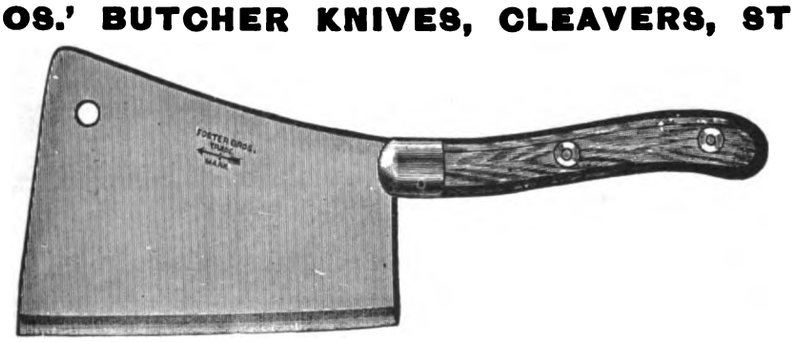
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

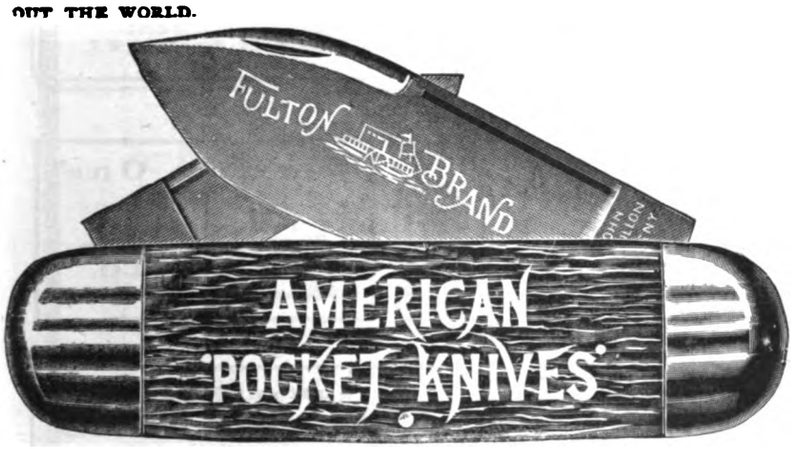


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

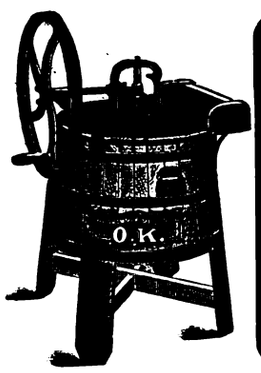
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

1,500,000

WAYNE WASHERS SOLD Up to the Present Time

And increasing at the rate of 300 per day.—What more evidence do you want to convince you that Wayne Washers are the best to sell?

WE Know it's a "WINNER"

Because it possesses everything to make it a "WINNER"

FIRST—It has fewer parts in its construction than any other rotary, and Every one knows the fewer parts there are in the construction of any machine, the easier it will work and the less liability there is to wear and get out of order.

WAYNE WASHERS
Klean Klothes

The appearance of the "WINNER" is different than any other machine upon the market. The tub is finished in the natural wood, with green bronze hoops, green enamel hand wheel, and the gearing in gold bronze; the combination making the most beautiful appearing machine upon the market. We are also using a special preparation in connection with the finishing of our tub—which holds the varnish to the surface and retains the lustre for all time. You will not find this finish on any other washing machine made.

We also use the detachable stave leg, which does away with the necessity of throwing away the entire machine in case the leg becomes broken.

Simplicity—Quality—Appearance—Good Value for your Money, are all possessions of the "WINNER". Order a sample from our jobber or direct from us, and we will leave the rest to you and the "WINNER".

WAYNE MANUFACTURING CO., St. Louis, Mo.

GLOBE REMOVED

The Best--Because

It never flashes back, blackens mantels nor smokes. Does not flicker.

It's ornamental, durable and gives

50 Per Cent. More Light

at less cost for gas and mantels. Fits any fixture—burns all kinds of gas.

Mark: Its Rays Are Downward.

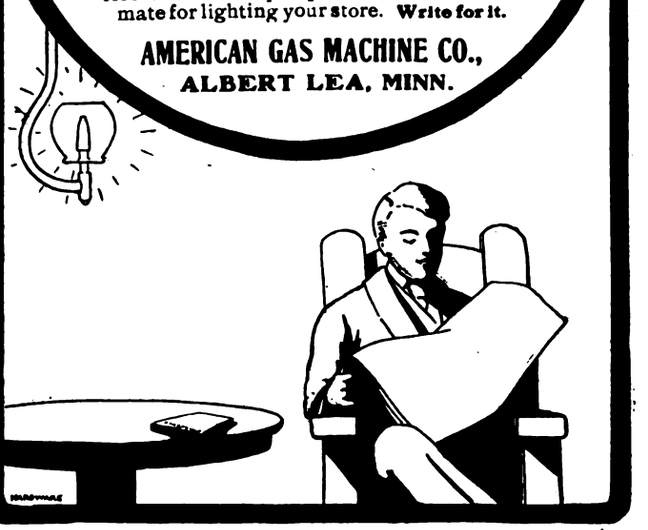
We want a representative in every town. Write us.

The WIEDERHOLD LIGHT CO.

96 Warren St., New York

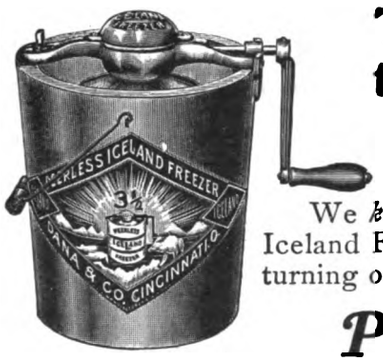
A Roadable Light

for home use must combine great power and whiteness with an absence of glare and irritation.



The American Automatic Lighting System

fulfills this requirement. It floods the room with a restful light that brings out every detail of print or sewing. It is safe, reliable, simple and economical. Regulates itself automatically.



Hardware Dealers throughout the country are making handsome profits selling these machines to their customers. You will be interested in our prospectus—and an estimate for lighting your store. **Write for it.**

AMERICAN GAS MACHINE CO.,

ALBERT LEA, MINN.

Digitized by Google

The best equipped factory, the best advertised product.

We make a few articles, in large quantities, make them better than any one else does, and we tell everybody about them.

We *know* we have the right principle in our "one-motion" Peerless Iceland Freezer and we've put up a new factory adequately equipped for turning out this freezer in great numbers.

Peerless Iceland Freezer

Our advertising—covering *every bit of freezer-selling territory* in the United States—gives an impulse, as strong as it is steady, to Peerless Iceland sales.

Every woman in the country interested in her home knows about the Peerless Iceland and believes in it. It's "the freezer the cook likes"—the freezer the *housekeeper* wants when she goes into your store.

Dana Iceless Refrigerator

For the window. No ice bill. A refrigerator that takes up no floor space and is run without ice eight months in the year.

Dana Mop Wringer

wrings the mop dry in five seconds. You stand in a natural position—both feet rest firmly on the floor.

Tub is well made, very strong and extra braced with heavy, flat iron, rust proof hoops. The rollers are of solid maple and never stick. The latest, the simplest and the best mop wringer on the market.

The Dana plant is fire-proof; we can *guarantee* delivery as promised. *Everything* about it is *modern*—selling organization and all.

Both jobber and dealer make a good profit on the Dana line.

Your jobber will be around soon. *Ask him.*

10 Warren Street, New York. **The Dana Mfg. Co.** Cincinnati.

SUPERIORITY

L. & I. J. White Co.'s Edge Tools have been marketed for nearly three quarters of a century.

It requires, therefore, no second glance to determine their superiority over any others on the market.

Thousands of skilled mechanics use them to-day because their fathers used them before them.

If you are not handling White's Edge Tools—is not that a good reason why you should?

Get our catalog to-day.

SCREEN DOORS AND WINDOW SCREENS

TO THE RETAIL TRADE

THE CONTINENTAL COMPANY has established 602 Carload Distribution Points in the United States. Many Jobbers also have their private Distribution Points for cars including only their own customers orders.

Jobbers forward their customers' specifications to the factories, where all the orders for localities are assembled and shipped in Distribution Cars.

These Distribution Cars save an immense amount of money to the trade, as Jobbers deliver the goods to the distribution points.

All orders for Distribution Cars should now be in, to enable factories to get out the necessary assortments and ship their cars in time for the Spring trade.

Have you sent in your order to your Jobber? You will save money and time by doing so at once. The following brands of goods may be had in these Distribution Cars:

The Porter Screen Mfg. Company.
The Queen Anne Screen Company.
Philadelphia Screen Mfg Company.
The Owosso Manufacturing Company.
The Wabash Screen Door Company.
The A. J. Phillips Company.

The Exclusive Agency

for the sale of our IMPROVED ACME WASHER is offered to live progressive dealers in territory where we don't have agents. The details of

OUR PLAN OF SALE

will be sent you upon request. Its principal features are 1, a liberal margin of profit; 2, no competition and therefore no unfair price cutting; 3, a positive binding guarantee that the machine will do all we claim; 4, a complete plan for co-operating with our agents in making sales to the consumer; and 5, an expensive and elaborate national advertising campaign. (See below.)

(NOTE—In writing for our Plan of Sale, we shall appreciate it if you will state whether you sell any other washers, and if so, what make, and also about how many machines you may be able to dispose of per year.)

Read the Advertisement Shown Here

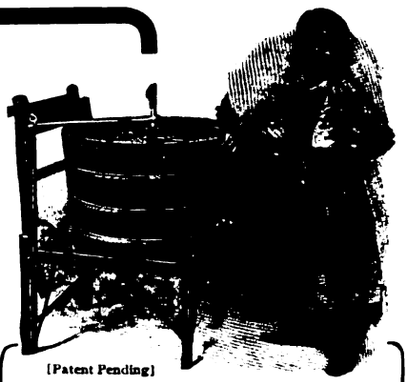
particularly the offer in the lower part. It is not only extremely fair and liberal to the consumer, but it also shows clearly that we are spending money to create a demand for our machine, and we shall fill this demand through the legitimate channels of trade, that is, through the store of the retail dealer. This advertisement, measuring 7 inches, is the smallest we are using. Our space runs from this size up to 19 inches in most of the higher priced magazines. In fact, we are spending upwards of

$50,000 IN ADVERTISING

At the present time we are using the February, March and April issues of the following leading publications:

Ladies' Home Journal	Delineator
McCall's Magazine	Woman's Home Companion
Ladies' World	Saturday Evening Post
Collier's Weekly	Everybody's Magazine
Harper's Bazar	Good Housekeeping

Men and Women



and 16 others, with a circulation of

Over 10,000,000 Copies Per Issue

WRITE TO-DAY FOR OUR PLAN

If you are not interested in Washing Machines, you can doubtless handle our line of Wringers and our Acme Wringer Mop. Prices and terms on application. Write to day.

ACME WASHING MACHINE COMPANY
COLUMBUS, OHIO

[Patent Pending]

The Improved
Acme Washer

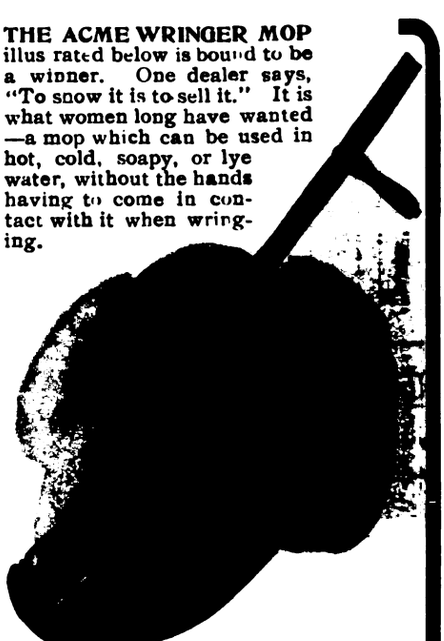
will wash thoroughly and perfectly clean anything, from the finest piece of lace to the heaviest blanket, without tearing a thread or breaking a button. In fact, there is nothing in the way of washing which can be done by hand or with any other machine which cannot be done better, more easily and more rapidly with the **Improved Acme Washer.**

Besides being made of the very best materials, handsomely finished in natural wood, it has a number of

SPECIAL FEATURES

not found on any other machine. These consist of: **1, a Movable Wringer Stand,** which brings the wringer directly over the tub, so that all the water falls back into the tub, instead of on the floor. (The wringer need never be taken off.) **2,** the **Hinged Lid,** which is practically steam-tight, prevents the water from splashing over. This is merely raised up and leaned back against the handle, so that all the suds must drain into the tub. **3,** the **Extension Stand** holds the basket, or rinsing tub, close to and on a level with the machine, so that the clothes cannot fall on the floor, and no stooping is necessary. **4, No Iron Post** runs through the machine to rust and stain or tear the clothes.

There are many other good points about the **Acme,** all described in detail in our little booklet entitled "Wash-day Comfort." This is **free** for the asking. May we send you a copy?



IS THIS A FAIR OFFER?

If you will write us that you are interested, we will give you the name of the dealer in your town who handles the **Improved Acme Washer.** You can see the machine at his store and learn all about it before you buy it. If you buy it, it is with the understanding that any time within 30 days, if the machine is not in every way satisfactory, he will take it away and give you back your money. He will do this cheerfully and readily, because our guarantee to him protects him against loss. You risk nothing but a two-cent postage stamp to mail us your letter.

Write To-day—even if you are not just ready to buy or even try a machine; in that case let us send the **little booklet**—remember, it's **FREE**—**write to-day!** Address

ACME WASHING MACHINE COMPANY
2511 S. High Street, Columbus, Ohio

THE ACME WRINGER MOP illustrated below is bound to be a winner. One dealer says, "To snow it is to sell it." It is what women long have wanted—a mop which can be used in hot, cold, soapy, or lye water, without the hands having to come in contact with it when wringing.

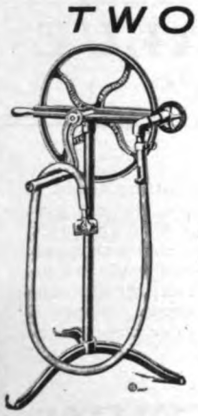
WE'RE STILL AFTER YOUR TRADE.

We have created a demand for "Bristol" Steel Fishing Rods in your city.

We want you to fill it.

We have arranged a discount for dealers that will enable you to roll up a mighty nice profit and at the same time sell our Rods at low prices.

And we are referring all inquiries to you.



If you want to please us and please your customers, put in a nice assortment of "Bristol" Rods. When you see how easy they sell and how much profit they carry you will find that you have also pleased yourself.

If you have not heard from us by mail, please send in your name which will be placed on our list. By so doing you will get the benefit of our advertising matter issued from time to time, helping you to sell more of our Rods.

Our Rods are the ORIGINAL Steel Fishing Rods. We have been making them for over sixteen years. Look for our name and trade-mark "Bristol" on every reel seat. They are absolutely guaranteed to be free from defect in material and workmanship.

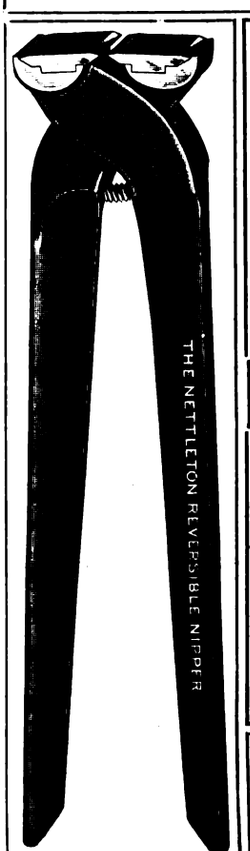
"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No. . . . .

That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.



It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

Send for Catalogue No. 17 T

CHARLES WEILAND'S NEW CATALOGUE.

Charles Weiland. 147-149 Chambers Street. New York. has just issued his net price catalogue for 1906, which is now ready for delivery. He will send the same by express prepaid on application. This is said to be the largest net price wholesale catalogue printed in the United States. of Hardware, Cutlery and House Furnishing goods, also including a full line of Steel goods. As Mr. Weiland's special offering is Mechanics' Tools of the best quality he is confident goods are offered at lower prices than any other Jobber carrying a similar line.

ONE OF THE LATEST CALENDARS.

The Slatington-Bangor Slate Syndicate, Slatington, Pa., Miners, Shippers and Exporters of Roofing Slate, have sent us a mammoth hanging calendar calculated to surpass in size anything else in the office, in which it is a very useful addition. It is printed in two colors, blue and red, and amply fulfills its mission—that of advertising the business of the publisher who sends it.

THE STANLEY CALENDAR.

The Stanley Works, New Britain, Conn., and 77 Chambers Street, New York, issued their usual calendar for this year, in which the Stanley maiden is made a prominent feature. It is a reproduction of a fine painting by Horace T. Carpenter and reflects great credit on the artistic manner in which it is presented. The Advertising Department have not absorbed all the blank space with type matter, but the calendar is one that would adorn the parlor of a palatial mansion and not be found inappropriate.

F. E. MYERS & BRO.

F. E. Myers & Brother, Ashland, Ohio, have written us in regard to the recent fire which visited them and which in the reports was greatly exaggerated. saying: "Since the fire we have placed large additional specification and had provided for same for spring requirements in advance so that we are in position to supply our trade in due time, and have our entire producing department under operation, some of which is already running, enabling us to make shipments by the middle of the last of the week. We have several hundred men at work throughout the factory and cleaning up the debris, and with the facilities we have, the anticipation made and the insurance, are most fortunate under the circumstances."

THE HUNTING GIRL CALENDAR.

The Oneida Community. Ltd., has issued a Calendar for 1906 that is surely a characteristic one. The Hunting Girl sallies forth in quest for game with her two dogs and carrying her favorite rifle. She looks as though she meant to find it by the time the day is over. She shows up well in her hunting costume, which is in pleasant contrast with the snow which covers the ground. The picture and calendar are surrounded by the Oneida trap and chains in subdued colors, bringing the picture out prominently and making the entire outfit a very effective bit of advertising.

L. & I. J. WHITE.

The business of the L. & I. J. White Co., Buffalo, N. Y., has grown so considerably during the past year that instead of having only a branch office in Chicago. have moved into larger quarters at 315 Dearborn St., Chicago, with an entrance at the rear of the building, 54 Plymouth St., and will carry a large stock of machine, paper and lithograph knives. Their edge tool business will be handled from the Main Office at Buffalo.

CHANGE OF LOCATION.

Frederick Neudorff, secretary-treasurer of the Missouri Retail Hardware Association, with office in St. Joseph, Missouri, announces that the meeting place of the Missouri Retail Hardware Association has been changed to Kansas City. It had previously been decided to meet at Hannibal. The dates, February 20 and 21, are unchanged. The headquarters will probably be the Coats House.

THE OSGOOD SCALE CO.

At the annual meeting of the stockholders of the Osgood Scale Company, held late yesterday afternoon, officers were elected as follows: President, J. W. Sturtevant; vice-president, L. A. Osgood; secretary and treasurer, O. J. Fowler. In addition to the officers named, the directors are A. J. Parsons and C. F. Hotchkiss.

WATERVILLE CUTLERY CO.

The annual report of the Waterville Cutlery Co. gives the names of its officers for the year as follows: President and treasurer, George J. Babcock; vice-president, William H. Kenney, Milwaukee, Wis.; secretary, Elton E. Hotchkiss; directors. George J. Babcock, William H. Kenney, Emilie L. Babcock, Winfred M. Hall, Elton E. Hotchkiss.

"3 IN ONE" SURPASSING THE RECORD.

J. Noah H. Slee, head of the manufacturing concern that manufactures and markets "3 in One" Oil, has just been elected a member of the New York Chamber of Commerce. As everyone knows, this is the leading commercial body of Greater Gotham, and is composed of the principal men in every line of commercial activity. While Mr. Slee is a very busy man manufacturing and marketing "3 in One" Oil, he still has time enough to be public spirited and progressive in the interests of the community in which he lives and works, and the whole country as well. The sales of "3 in One" are increasing every day at a faster rate than ever before. If the present gait continues, 1906 will surpass every record. That Mr. Slee is in earnest in his desire to place "3 in One" in the hands of every sportsman and gun owner in the country is certainly evidenced by the fact that they offer in all their advertising to send generous samples free of cost to anyone who asks.

A. & H. BARNETT CO.

G. & H. Barnett Co., "Black Diamond File Works," Philadelphia, Pa., because of the unprecedented demand at home and abroad for their product, the Black Diamond Files and Rasps, have found it impossible to keep pace with trade requirements without very largely increasing their already extensive plant. Some months ago the management purchased considerable additional real estate adjoining their works, enabling them to erect a number of buildings in which to accommodate more machinery, and to build large additions to present buildings that would give them the desired increased capacity. These improvements and enlargements have been going on throughout the past year and have now been completed, resulting in a vastly larger daily production, which it is hoped will enable them to more promptly fill all orders that may be placed with them. The wisdom of this move has been fully vindicated, from the fact that even with the aid of their increased capacity, they are at the present time finding it extremely difficult to keep up with the demands of the trade for "Black Diamond" Files, and we are informed that they are now several weeks behind on their orders. Present indications seem to insure that the enlarged capacity of their factory will be strained to its utmost to take satisfactory care of the spring trade.

J. D. WARREN MFG. CO.

In a letter recently issued to the trade, by J. D. Warren Mfg. Co., Chicago, we extract the following, being of importance to Hardwaremen.

"Our New Price List of August 1st, 1905. is an average reduction of 15 per cent. from ours of one year ago, dated September 1st. 1904, securing through the installation of machinery made especially for us. We will assume all responsibility for any orders you send us of Cabinets and Bases matching together correctly in length, height and depth, and forming true alignment—lengthwise and up and down with each other, and no need fear any error being made in giving an order.

We now have ready the most complete, convenient and practical method of selling the Warren Shelving that we have ever devised, consisting of sixty or more of our latest designs of Cabinets, Bases and Counters, including our World's Fair Patterns, with the latest Net Price affixed to each one, enabling instant estimating the cost, and anyone can select Shelving to suit his own wishes, as every design is illustrated separately and described so that he can choose according to his own idea of kind and cost from $1.50 per lineal foot and up, for each pattern, arranging them in line as he wishes them and then enter the number of the Cabinets and Bases selected in the blank spaces of the order sheet in consecutive form, stating on which side of the store as you enter, the Shelving is to be placed. Always use our printed orders with outlines."

FEBRUARY 10, 1906

Editorial Trade Review

This should be the dullest time in the year and yet all reports speak of trade being of large volume, in some cases the finest January in years. The demand on every hand seems to promise a continuance of the prosperous tendencies of trade in which both the manufacturer and the merchant may rejoice with a full heart.

The few days of cold weather we have had lately may have helped to lighten stock on skates and sleds, snow shovels and similar goods that need some weather of this character in which to reduce stock, for it means a good long period of time to carry it over to next winter if we fail to have an active demand set in in favor of such sales now.

The principal benefit for a Hardwareman to derive from such an open winter is the fact that during its prevalence all outdoor activities can be continued, when at other times they have been held up by the continuance of frigid conditions; in many cases buildings have helped to get nearer a finished condition and without this customary interruption.

Dealers generally are suddenly awakened to their wants in the nature of Spring goods and following the good advice given them freely orders are going forward for lines of goods that are usually left until a month later. There is, however, a confidence felt in buying just now that cannot be called speculative by any means, as it is more to fill conventional wants that urgent orders are forwarded and early shipment hoped for.

Prices are still hugging the positive advances of a small percentage so that buying is not checked and the manufacturer is permitted an opportunity to level up his costs and revise his lists of prices; marking down those that are abnormally out of proportion to actual cost and putting those individual items up where they belong that a marked discount has sold at a figure too low.

Large concerns are making steady increases of capital, some as great as fifty per cent., and productions will increase in a way that will make the dealer feel no permanent scarcity of goods is possible in the immediate future. The increase in financial resources and the enlarged production needs the employment of more labor and very generally is felt the scarcity of that kind of material which manufacturers find impossible to get already educated to his wants.

The regular stocks of all dealers were so depleted last season by making the nearest thing answer for what was really wanted, on account of the non-delivery of subsequent orders sent for and not filled, that goods are fearfully understocked in all that is usually carried over, and the wants of the dealer are consequently very keen; so that jobbers, especially in the west and southwest, are in receipt of orders for general stock larger and better assorted, in greater volume, than ever. The prosperous trend of business without cessation has made optimists of all in the trade and the ease of the buyer on goods that go rapidly into consumption, may encourage an era of buying in which over-production may ensue and a sudden stop to free buying of consumers may bring a feeling of dismay to the trade that is unknown to-day.

The condition of the iron and steel market is felt throughout the territory in which the market has influence. It is so largely sold ahead that some orders cannot be touched for nearly two months or more; especially is this true in what is usually regarded as raw material. There are various phases of heavy goods, goods in which labor is not a large percentage of the cost that is seriously affected by a five per cent. to a ten per cent. rise in price.

The conservative views of some manufacturers in not advancing prices to a pronounced pitch, and resisting all temptation beyond a very small percentage, is exceedingly gratifying. In the present state of the market it would be welcomed by the whole jobbing trade who have already got their orders in and would like the extra profit which this sort of thing always produces. The present prosperous conditions of the entire trade can only continue by keeping prices down to a reasonable level and banking on the wisdom that is not led astray by imprudence.

COURTESY TO THE COMMERCIAL MAN.

If there is one man on earth more than all others that the retailer cannot afford to offend it is the drummer, providing, of course, the latter is a man who knows his place and keeps it; if not his influence is nil and he will soon cease to be a drummer.

Aside from the value of the commercial man as a trade barometer and a source of information on new goods, he is meeting Hardwaremen, both wholesale and retail, constantly and has more influence with every branch of the trade in a day than the local dealer has in a life time. How easy then it is for him, consciously or otherwise, to communicate elsewhere certain personal impressions, and of course these would be most likely to come to mind at the places where they would be of the most interest, and where they would consequently do the most good or harm.

Politeness is always a profitable quality, but lack of courtesy to the commercial man may be considered almost in the nature of a calamity if he chooses to resent the mistreatment and use his power.

Take it as a rule, the retailer who is prompt in meeting his bills and who stands in well with the commercial men has a pretty good stand-in with the entire Hardware trade so far as it is ever likely to affect his own business.

DIG IN.

A good many surprises await the man who occasionally digs in to the bottom of things, whether it is the scrap iron pile, the bin of odds and ends, or the affairs of his own office, but for the man who prefers a prosperous business to surprises the habit of digging to the bottom as he goes along is far ahead of spasmodic enterprise in that direction. Too often we consider only the surface of matters of seemingly secondary importance without going into the real depth of them and finding out their possible importance. Even though they are somewhat secondary in their own nature, a business is really made up of so many secondary details that not to know more than the surface of them is to have but a superficial knowledge of the whole business. Get at the under side of things as they come along; don't stop at the surface. Know more about your books than the footings. Dig in and see whether the showing is properly obtained or if there is a dangerous under-current. Don't be satisfied with general reports of salesmen; dig in and find out the true facts. The fact that a certain line of goods is not selling may not mean that it is not salable. Find out why it does not sell; if because there really is no place for it or because people do not understand its value and haven't had a chance to find out. Accepting reports is only surface knowledge; the real vital facts, the *why* of your entire business lies below the surface. Dig in and get it.

THE OFFICE BAROMETER.

No one is quicker to read the trend of things commercial from the "Old Man's" face than is the office boy, partly because of his natural shrewdness in reading character and partly because when things are going wrong he gets the blunt edge of the axe. He isn't counted worth conventional consideration and gets a lot of inside information in a few minutes when the boss is worried or out of temper; then how the news does travel. If he can't even things up for himself in any other way he can have fun enough out of the situation to call it square.

Most of the employees understand this; some of them have been office boys themselves, and in a surprisingly short time the entire working force is wise to the fact that something is wrong way up high and is on the watch to make out what it is. Whether they succeed or not, it uses up a little of their thought and attention and a certain amount of their confidence.

If you want to keep up a good appearance stand pat with your office boy and keep him sailing, even if you have to relax enough to smile yourself in doing it.

THE HOUSEWIFE'S TOOL KIT.

It has been well said that one of the hardships of housework is that woman is continually having to invent tools to work with. No wonder she has given the joke man some good material in the dozen or so uses she has found for a hairpin. If a man needs to pound, he thinks of course he must have a hammer; but a woman may use a stone, the edge of a flatiron or any old thing; and then, nine chances out of ten, he wonders why she is so awkward that she cannot even pound a nail without pounding off a finger nail. It is hardly fair to expect her to use an old nail for a screw driver or to keep her meat knife sharp on a crock or stovepipe.

A collection of a few tools which come in almost daily use in the household find ready sale if properly handled. A hammer, saw, hatchet chisel, file, wrench, gimlet and screw driver should be included in the collection. A more elaborate one might add wire clippers, can opener, whetstone, tack puller, corkscrew, awl, etc. The dealer when once his attention is directed to the matter, will readily supply a number of these little conveniences, some of which the average housewife so often feels the need of; some of which, equally valuable, she does not know are in existence. Extremes in size, where only one of a kind is included are to be avoided. The golden mean can be adopted to almost all purposes. Good material, that will not snap the first time used, is an essential.

Placed in the show window and labeled "The Housewife's Kit," will attract. Those who have never realized that such things were necessary in the house will awaken. Others will follow suit because there is an awakening of the feminine side to their possibilities and rights. "They won't know how to use them?" Just try it and see!

FORGET IT.

It is not always the man with the best business ideas who turns off the most first-class work; rather it is the one who has his thoughts under best control. To think is one thing; to forget is something else and equally important. No man can put his best energies to any task who is unconsciously dragging along with him the dregs of yesterday's work. That was for yesterday; today forget it; something else is on hand. The power, as soon as any task is done, to lay it completely out of mind without delay is not the easiest to acquire but one of the most important to a busy man. Learn to think hard on the task before you and, when it is finished, to forget it quickly.

PAINTING AND GLAZING.

Although it has become customary in many parts of the country for the window sash to be glazed at the mill and to come to the house ready glazed there are several sections, notably in Pennsylvania and Ohio, where it is still customary for all glazing to be done by painter and for the sash to be sent to the building from the mill unglazed. They are then fitted by the carpenters and sent to the paint shop for glazing. This method has almost always been found to give better satisfaction to the owner than when the sash is glazed at the mill, for glazing is essentially a painter's job.

To glaze a sash properly, the rabbets should first be primed with pure raw linseed oil and should then be back puttied with soft putty, or a putty composed of pure whiting, pure white lead and pure linseed oil. The glass is then set in the rabbet and is held in position by a sufficient number of glaziers' points—triangular pieces of zinc. The rabbet is then filled with glaziers' putty made from pure whiting and pure linseed oil, pressed well down with a putty knife and left smooth. Unfortunately, in order to save expense, much of the mill glazed sash is improperly primed by being coated with some cheap substitute oil, composed largely of rosin oil and petroleum, the back puttying in soft putty is omitted altogether, and the final puttying is done with a cheap putty made of marble dust and petroleum, or containing these ingredients in large proportion. While a good linseed oil and whiting putty becomes harder by time and will cling to the glass and sash indefinitely, a cheap putty of the character usually used by the sash factories will soon lose its cohesion and will begin to fall out piecemeal, leaving no protection from the weather and permitting the glass to fall out. Moreover, paint will not hold to the surface of such a putty, and houses of good quality otherwise are often sadly marred by the use of cheap putty in glazing the sash. It is not only the saving of a cent or two per pound in the cost of the putty itself, but a putty containing mineral oil can be worked much easier under the knife than a pure putty, hence the workman is able to glaze many more pairs of sash in a day by using it.

Many architects call for window glass to be free from all waves or bubbles and perfect in every particular. Now while this would be an ideal condition for glass, it is impossible to obtain sheet glass that will meet such a specification. Even plate glass can rarely be found that is absolutely free from minute bubbles, and from the very nature of things sheet glass must contain imperfections. If architects only understood the method of manufacturing it, they would not specify something impossible to obtain. The window glass blowers are among the highest paid labor in this country, but they work only a portion of the year, all the factories, by mutual agreement of the men and the factory owners, closing down in the summer months. In making window glass the workman stands in front of a pit, and taking a large lump of molten glass on the end of his rod begins to blow a cylinder, swinging it back and forth as he blows, in order to elongate it. Upon the skill of the workman will depend the size of the cylinder he is able to blow and the size of the resultant sheet of glass. As it is much more difficult to blow a large cylinder that is practically flawless than it is to blow a smaller one, the relative price of sheet glass increases materially as the size of the sheet increases. When the cylinder is blown to a sufficient size, the rounded end is cut off and the hot cylinder is cut open lengthwise and flattened out by opening it on a metal table. It is then passed through the annealing oven in order to toughen it. Within the past few years a machine for blowing glass has been put in some of the factories, but as yet the machine-made glass is inferior in quality to that blown by hand. It is being perfected year by year, however, and undoubtedly the time will come when machine glass will supercede the other and when it will be freer from flaws than it is now possible to obtain. It is manifest that any irregularity in blowing the cylinder or in fact almost any trifling cause will cause either a wavy place in the glass or a slight variation in the thickness of the sheet or else minute air bubbles in the molten glass. It is noticeable that the thinner the glass is blown, the freer it will be from imperfections, hence single thick glass can always be obtained clearer and cleaner than double thick or double strength, as it is termed. The single thick glass averages about one-sixteenth of an inch or less in the thickness, while double thick will probably average from one-tenth to one-eighth of an inch thick.

After the glass has been annealed the foreman of the factory sorts it out into A grade, B grade, and so on. There is no recognized standard for A glass, the A grade of one factory being no better, perhaps, than the B grade of another; hence when an architect specifies "A glass" the term is practically meaningless. After being sorted the glass is packed in boxes containing as nearly as possible fifty square feet of glass of the size contained in the box. The price is always quoted by the box, and varies by the rate of discount allowed from a standard list. In the list several different sizes are bracketed together, and larger discounts are usually allowed from the list price on the first three brackets, or the smaller sizes, than are quoted on the other brackets.

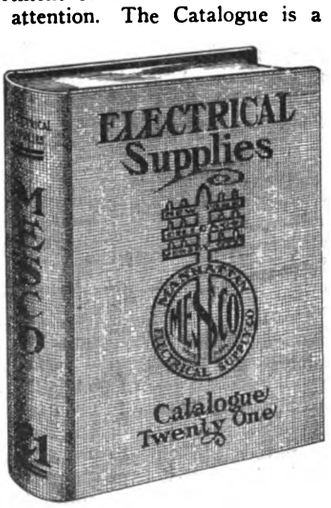
Although it cannot be made absolutely free from occasional minute air bubbles, plate glass is practically perfect, and where price is no special object and the owner desires to have his house as perfect in every detail as possible, plate glass should always be used, although its additional weight will entail the necessity for the use of lead weights for counter-balancing the sash, in most cases.

In the manufacture of plate glass, the metal, as it is termed, is heated in huge pots, in large furnaces, which in the Pittsburgh factories are heated by natural gas. When the metal is sufficiently melted, the pot is lifted from the furnace by means of a traveling crane and carried over a large flat iron table, mounted on a track and the molten glass is poured out upon the table. A huge iron roller is then rolled over the molten glass, flattening it out into a large sheet, of irregular outline and perhaps an inch in thickness. Any dross and foreign substances are quickly skimmed off the surface of the metal by a workman who stands ready, just before the roller reaches it. The truck is moved in front of an annealing oven that is ready to receive another sheet of glass, and some twenty workmen push the sheet from the

Digitized by Google

table into the oven, where it stays until it is properly tempered. After the glass is taken from the oven, twelve workmen turn the sheet on an end, and, supporting it with leather straps, carry it to the racks, where it is ready for the next process, the grinding and smoothing. The opaque plate of glass is laid on a revolving table, upon which two large circular discs revolve. The grinding is first done with coarse sand, then with finer, and so on until the final grinding is done with emery of the finest grade. This grinding is done first on one side and then on the other, until the plate is very materially reduced in thickness, nearly one-half of it being ground away. But the glass is still opaque and needs to be polished to bring it to the state of perfect transparency which is necessary. This polishing is done on another table by means of discs of rubbing felt that are moved back and forth upon the glass by mechanical means, the polishing being done by the action of rouge, or red oxide of iron. Of course the operations of grinding and polishing are conducted while a stream of water is constantly flowing upon the plate. After being polished, the glass is taken into the cutting room, where the largest possible plate is cut from each sheet that can be obtained and avoid the flaws that occur somewhere in almost every sheet. At the Charleroi plant of the Pittsburgh Plate Glass Company, the largest sheet that could be made four years ago, when the writer visited the plant, was 147 by 227 inches, but to produce a sheet of that size required weeks of trial, imperfections and breakage rendering it very difficult to obtain a perfect full-sized sheet.

In glazing ordinary dwelling house windows the same method is pursued with plate glass as with ordinary window glass, but for the large size show windows bedding in rubber is required, and the glass is held in position by wooden or metal moldings.



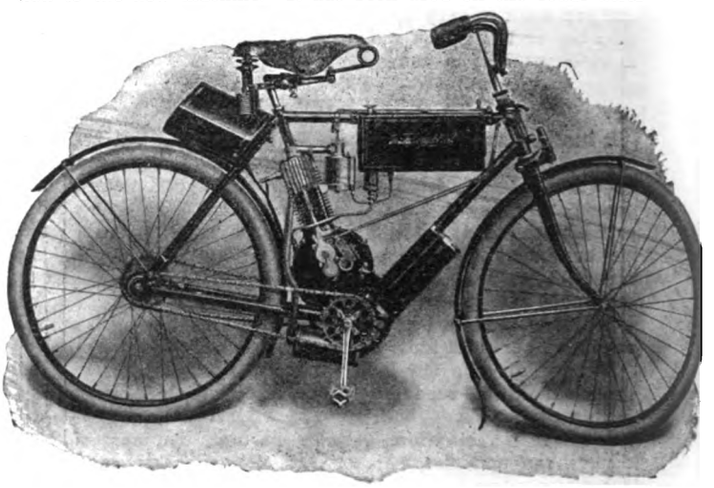
Up to a few years ago French plate was considered to be the finest made, but the use of natural gas has made the American product superior to any imported glass.

Besides sheet and plate glass, there are many special kinds of ornamental and colored glass. But it is scarcely necessary to go into the details of its manufacture or its uses, nor to more than mention the colored windows that are made of lead, which are bent into position and then soldered together. The price of leaded glass varies so much that it is usually most satisfactory, where it is desired, for the owner to purchase it himself as a separate contract, or else for the contract to provide for a certain amount to be allowed for leaded glass, permitting the owner to select whatever he may desire within that amount, or if he orders in excess of the specified figure to charge it as an extra.

While the writer believes it is to the best advantage of the owner for the glass to be included in the painter's contract, as already mentioned, still every builder will find it advantageous to make himself familiar with the different qualities of glass and to keep himself posted on market prices. The fluctuations in this material are often very considerable, and depend on local conditions, jobbers finding it necessary to realize cash frequently cutting prices below the regular discounts. This frequently makes it possible for the shrewd buyer to save considerable money on a large order for glass, if he keeps close watch on the market.

NEW CATALOGUE OF THE MANHATTAN ELECTRICAL SUPPLY CO.

The Manhattan Electrical Supply Company, 32 Cortlandt Street, New York, have recently issued a catalogue containing the largest assortment of Electrical Goods which we have had brought to our attention. The Catalogue is a 750-page book,



NEW CATALOGUE OF THE MANHATTAN ELECTRICAL SUPPLY CO.

containing illustrations and descriptions of electrical supplies of all kinds; it is compiled with especial reference to convenience in reference, and owing to the immense variety of goods which it covers, is indispensable to every purchaser and user of electrical goods. To persons furnishing them with evidence of their connection with the electrical business, the book will be expressed, prepaid, to them; to others who wish the book, it will be forwarded upon receipt of 50 cents; this amount to be rebated on first order for goods selected and sent out, provided the order does not amount to less than $5.00.

THE THOROUGHBRED MOTOR CYCLE.

Reading Standard Cycle Mfg. Co., Reading, Pa., are the makers of the Thoroughbred Motor Cycle which has been for some time before the motor cycle riders of the country, until they are familiar with the altered appearance it bears from all previous models. There are quite a number, however, among new riders to whom the illustration herewith will be the first introduction to the new machine. It has been used on the roads hereabouts since summer time, and thus has had the practical usage that has enabled the new features to be put to the test in ample season for any weak points to be corrected before being presented to the general public. These new features constitute a budget that makes largely for the increased comfort and convenience of the rider and also for more economical operation. The combined gasolene and oil tank has been removed from the rear of the machine and placed inside the diamond frame, where it is now suspended from the top bar, a position which it is claimed permits of more substantial construction of the tank and a better balance of the whole machine; also, it is better protected from damage and strains. The oil tank forms part of the gasolene tank, and is provided with a new and novel device which permits the lubrication of the motor without dismounting, which has been something long prayed for and of inestimable convenience. The rider simply pushes a knob on the top of the oil tank, which operation forces the oil into the motor. For the long cylindrical battery case carried inside the diamond frame there has been substituted a semi-circular box, which is secured to the rear forks. This change promotes accessibility and permits the use of standard dry cells, likewise no small advantage. A newly imported English saddle with compound springs will be also used and the Reading Standard Company is now testing a spring seat post which likewise may be made a part of the equipment. One of the greatest innovations and improvements is the patented duplex cushion fork which is claimed to be twice as soft and twice as elastic as any other similar device. It is made up of few parts and has but three brazed joints. A securely attached lamp bracket and provision for a luggage carrier will constitute other features of the new model. In addition to those described, the following changes have been made or are in course of construction: One-piece head. Top and bottom part of frame heavily reinforced. Rear forks and stays altered to accommodate 2¼-inch rear tire. Rear wheel equipped with 2¼-inch tire. Chain line widened from 1¾ inch to 1 15-16 inch, giving more room between the engine base and side of chain, and providing space for a longer bearing for crank shaft in engine base. Coaster brake ⅜ inch wider over all than formerly. ¼ inch wider between flanges. Cylinder of motor increased to 2⅝ inch bore and 3¼ inch stroke, making a substantial increase of tire. Alterations to carburettor stem, making it unnecessary to connect the upper bar. Internal improvements to carburetter which will improve the mixture. New cam lifting device, oil type and with roller contact. The effective grip of the Thoroughbred will be continued as heretofore. The standard finish of the Thoroughbred will be a golden brown with head and fork sides enameled milary green and tastily striped. All bright parts will be heavily nickled on copper.

BICYCLES AND THE HARDWARE DEALER, No. 2

There is an immense and increasing demand for Bicycles and Bicycle Sundries and, while the rush in the wheel business usually occurs in the Spring, Summer and early Fall, with the Bicycle coming into general use, not only as a vehicle of pleasure but as a necessity for urgent trips of any kind, there is bound to be "something doing" the whole year round.

By advertising Bicycles and Sundries in your local paper, with electrotypes furnished by the jobbers, you can stir up a permanent and profitable interest in the line. Do not see how cheap you can sell bicycles. Adhere strictly to one price on your leading line of wheels and win out on that line. Don't endeavor to sell cheap bicycles, but good wheels. This will result in better satisfaction to your customers and more profit to yourself. A good way to reach the buying public is through newspapers, circulars, personal talks and attractive floor and window display—any way to create interest and sell the goods. Some will not listen to a talk but will read an advertisement or circular. Others like to see the goods on display. Some need a personal letter to soften them. Try to personally know your trade and all the trade you are after some way or other—hustle each one as the occasion requires. Let your motto be, "Every one should buy of us." If they don't, there is a reason. Find out the reason and then start in and make them change their mind. It may be this week or next, or the week after, but keep on hammering uptil you hammer through, and land the sale.

The story of the pneumatic tire is one of the romances of the bicycle trade. Seldom has a simple invention had so startling or revolutionary a result. A Belfast surgeon, John Boyd Dunlop, though not himself a cyclist, was desirous of discovering for the benefit of his cycling sons, some means of preventing the vibration of which they complained when riding solid-tire machines over hard roads of granite boulders. After much experimenting, he was able to produce a tire from a piece of rubber hose which would hold air, but other difficulties were to be solved in regard to safety valves and rims.

When, in 1888, the first air tired machines appeared on the race path in Ireland, and afterward in England, they were a source of amused astonishment, but their riders, nevertheless, "swept the board." Despite the fact, however, that the English championships were secured in 1890 by Irishmen on the pneumatic tire there was still a natural reluctance on the part of English manufacturers to welcome the new tires. They had thousands of solid tired machines in stock and there was a justifiable fear that the air tire might not stand the wear and tear of all-round riding. It was discovered to have several faults, being liable to slip, burst and puncture. When punctured, it was most difficult to repair, so the original air tire was cemented fast to the rim and could only be detached by the application of heat. All of this has now changed to a remarkable degree. Not only is the repair of a puncture nowadays a comparatively trifling matter, but the necessity for it is a matter of infinitely less probability than formerly, owing to the outer cover being much improved. One puncture in three thousand miles may be set down as the average of probability with roadster tires, although many a rider goes right through the season without a single puncture. Bursting is now practically unknown. It certainly never enters into the ordinary rider's calculation, though, if he leaves his machine standing in an unusually hot sun, with the tires pumped up very hard, it may perhaps go "pop." That the superiority of the pneumatic tire is absolute, has long since ceased to be a matter for argument. It is now in the class of, once used, always used.

The first bearing used in bicycle construction was the "plain" bearing. To this, a nicely fitted and hardened sleeve was added, and this being known as the "parallel' bearing. The next change was to the roller bearing which was not a success. About the same time, the adjustable cone was tried. This was a male cone threaded to the axle and fitted into a female coned space in the hub. The final and most importat step in the evolution of the bearings was the innovation of ball bearings, a change which revolutionized previous theories and reduced friction to an almost imperceptible point. The part played by ball bearings and which have so effectually superceded the "parallel," "cone" and "roller" bearings of the "ordinary" days is so important that further reference thereto must be made. They have reduced friction almost to the irreducible minimum. So great is the nicety of their manufacture that the best micrometer gauges are ineffectual for the purposes of testing their accuracy and gauge plates of hard cast steel have to be used instead. Each plate is provided with six holes, the largest of which is only about a thousandth of an inch larger than the smallest, consequently, there is but one six-thousandth of an inch difference in size between the ball which will just pass through the second hole and that which will just pass through the first. When such accuracy as this is brought to bear on the construction of a bicycle, one can readily understand how it is that the front wheel of the modern safety has been known to continue in motion after a single downward pull, for no fewer than thirty-eight minutes.

The construction of the frames of the bicycle has passed through many eras. In the first Hobby Horses, the connection between the wheels were made of wood. On the early Velocipede, the frames were made of solid steel or iron bars. Then came the change from solid forging to tubing and finally, the weldless steel tube. The frame of the modern safety bicycle is a marvel of construction. It is really a bridge on wheels, built for the support of a man. Until a few years ago, the tendency was to reduce the weight. Tubing was used which was hardly thicker than a sheet of stout paper, but after roadsters were produced weighing about sixteen pounds, a change took place, and the average is now about twenty-two pounds. Ordinarily, the different parts of the frame were joined together with drop forge connections but now, sheet steel stampings are almost entirely used. The joints were of three kinds: flush, outside and lapped, of which flush joints are now used almost exclusively. One of the improvements greatly enlarging the use of the bicycle was the drop frame which enabled women to ride. The first drop-frame bicycle was entered in the Patent Office in February, 1886, and a patent on it was granted in March, 1887.

The improvement in rims has also been of far reaching importance. The Dandy Horse had wooden rims shod with iron but in the more modern Velocipede, these were supplanted by steel or iron. The first rims for rubber tires were of solid metal, grooved to receive the tire. Until 1891, steel and iron rims were used exclusively, but the latter year, a wheel with a wooden rim was put on the market, and in less than two years it had completely superceded the steel rim in the American market. The steel rim is now used only on wheels exported to England, where, it is claimed, that climatic conditions are unfavorable to the wooden rim.

On the subject of saddles, it is difficult to give advice that is of general value. Saddles are very much like shoes in the respect that no one can tell from looking at them, whether they will be comfortable. Experiment is the only thing in this line, and it should be borne in mind that even though you get a good fit, a new saddle, like new shoes, must be broken in. A new saddle will be stiff and uncomfortable for a few days at least, and one point in this relation will bear emphasis which is, that a saddle with easy springs is a snare and a delusion. In the long run, they will cause much more soreness than a hard seat. The fit is more important from a point of comfort, than the spring. When the saddle is springy, it gives on one side every time the leg makes a thrust and this causes chafing. When the saddle yields with the leg, there is also lost motion and much of the power of operation is wasted. No man can push very hard in any way if he is using for a brace, a cushion that yields instead of resisting. Besides all this, springy saddles get very soft and sag with use and then they cause no end of soreness.

In my opinion, the sale of bicycles and bicycle sundries belongs to the Hardware trade, as the live Hardware dealer keeps in touch with all good lines that are selling in his territory that he does business in. You will find bicycles and sundries a clean line to handle; a line that gives very little trouble and pays a good profit. Many Hardware dealers find there is a great deal more money in bicycles and bicycle sundries than there is in stoves, tinware and granite ware combined, and after a dealer once gets hold of the right wheel and understands the sundries business, it is a much easier and pleasanter line to sell. It is a line easy to become familiar with, and once understood, with a lot of push behind it, it is bound to win and prove a profit maker.

WHERE THE TENNIS RACQUETS COME FROM.

Take an Attleboro or Bristol County Railway Company car from Pawtucket, and in a 25 minutes ride you reach the place where the tennis racquets are made. It is a one-story building on the banks of a narrow but deep brook, three miles and a half from Pawtucket, three-quarters of a mile from the Hebronville railroad station, and if you want to locate the place more definitely by recourse to a map look in a corner of the town of Seekonk and you will find the exact spot, provided the map is a good one. If you go there, Mr. E. Kent, the tennis racquet manufacturer, will tell you how a little more than 20 years ago he learned to make good racquets by examination of types then used, without further instruction. For several years now he has been turning out a large proportion of all the gut-strung bats used in this country, in addition to shipping some to London.

Mr. Kent has reason to feel happy this year, because his business is experiencing a revival commensurate with that of the sport itself, which promises to stand during the coming Summer on an equal footing with golf in popularity. For a few years racquet manufacturing was a dull occupation. Everybody then talked and played golf, to the total exclusion of the livelier game. But Mr. Kent takes such things philosophically, adapting himself to existing conditions with equanimity, and getting the nimble dollar by making the kind of sporting goods the fad of the time requires. His factory is filled with woodworking machinery capable of being turned to a number of accounts. When golf raged he made club shafts, and he still turns them when there is any call. When ping pong took the country by storm he turned out hundreds of sets each week, and, in addition, made wagon tongue baseball bats, croquet sets, dumb bells, or whatever else occasion demanded. He never had to give up the tennis racquet business entirely, however, and now that the fickle tide of popular favor has turned to the game of grass and dirt courts once more he is reaping the reward of his pertinacity by being able to meet the demand for good American racquets.

About 25 men are employed by Mr. Kent in the various processes of racquet manufacture. Most of them live at Pawtucket, going to and from their work on the Attleboro cars, which pass within a few rods of the factory. It is a pleasant, light building, which has been devoted to this work, with water from the deep-flowing brook at its side as the motive power of the machinery, and heat from the dry house, a couple of rods distant, an arrangement which materially diminishes the danger from fire to which wood-working factories operated by engines are subject. It is apparent to any visitor at the shop that Mr. Kent believes in providing a pleasant place and plenty of elbow room for his workmen. It is equally evident that he feels pride in the business he has built up as he takes the visitor about and explains the various processes.

Straight-grained white ash, preferably second growth, is the basic material of a first-class tennis racquet. It is cut into strips about an inch by three-quarters and some six feet in length in the lumber camps of northern New England, whence it is shipped to Mr. Kent. Coming rough from the circular saws it is planed before being submitted to a steaming process, which makes it sufficiently pliable to be bent on iron forms to the shape of a racquet. When the single, straight strip of white ash is clamped in these forms one's mind's eye begins to grasp the idea of what the finished article is to be. Held tightly by the clamps, the strip of wood is put into the drying room, and when it comes out again it has been thoroughly seasoned, all the sap has been driven out of the wood, and the embryo racquet retains the shape of the form.

There is a single man at work in the drying room, and most of his day is spent with a glue pot by his side, putting the tongue into the handle. The tongue is a strip of black walnut, forming the centre of the handle, held by glue between the two ends of the strip of wood which makes the racquet frame. Some care is required in inserting this tongue, and the throat, a triangular bit of mahogany at the handle end of the bow, to preserve the proportions of the bow. When the workman, by measurements, is sure he has not undone the work of the drying form he clamps the racquet together until the glue has hardened, and it is then passed along into the main factory.

Here the processes are more rapid. A flat bed planer brings the bow and throat of the racquet down to the proper thickness, a buzz planer tapers the sides and top of the bow for the sake of lightness and symmetry, while leaving the bottom thicker, that it may be as strong as is compatible with the proper weight, and a lathe turns the handle to the proper dimensions. The glue pot is again requisitioned into service for sticking on the real handles. These are ordinarily strips of Spanish cedar, light in weight, red in color and when scored affording a good grip. On some of the more expensive racquets this year the handles are of bamboo, which takes a high polish and gives the racquet a dressy appearance. Then the bow is bevelled, a sandpaper wheel smooths it down and the wood is ready for its finish.

This process is the same as that given any article for which a high polish is desired. A "filling" preparation closes the pores of the wood; then the racquet is passed along to the man who applies the shellac, and from him to an expert who knows how to bring out the high lights of a perfect polish. It is no small task, this, of developing in a piece of wood the greatest finish of which it is susceptible. After two or three coats of shellac have been applied the expert, with finely powdered pumice stone, rubs and rubs until no glass could be smoother, repeating the shellac and rubbing several times before he feels sure he has developed the brightest finish possible. To the throat is transferred a decalcomania dealer's mark, above which the shellac is rubbed and polished.

When all this has been done the racquet is approaching completion. Holes are bored in the bow for the strings, the spaces between holes at the top of the bow being grooved to bring the gut flush with the wood, and the stringers take it in hand. These are men, as are all of Mr. Kent's employees. It requires strength to string a racquet, for the tighter the strings the better the racquet.

"We use American, English and Oriental gut," said Mr. Kent. "The first two are made from the intestinal linings of sheep or other small animals dried and twisted. Most of the American gut we use comes from Chicago, and is one of the by-products of the slaughter houses. The Oriental string is made from the sinews of animals. It is a cheaper grade than the best American string."

At the end of the bench where the men string the racquets is a boy whose duty it is to singe the ravellings of the gut with an alcohol lamp. The racquet is nearly finished. A coat of varnish is given the strings, and a couple of men put on the last touches, brightening up the polish and critically inspecting the product of the work of the others. Previously the handle has been completed by a butt of Spanish cedar or such other wood as makes the best appearance in connection with the general scheme, for the racquet is a work of art, as well as a useful toy. All that remains is to put it in its paper blanket and ship to the dealers.

"There are not many changes in styles this year," Mr. Kent said. "One of the popular kinds is the Doherty. But the best shape has been settled on through much usage, and there are not the variations now there were ten years ago.

"I began making tennis racquets when the game first began to be played in this country," he continued. "The racquets we made then were lop-sided, like the court tennis racquet of today." He pulled out some of the latter to illustrate the difference. "Business had been dull for the past few years until last year, when tennis grew popular again. I think golf had its effect in getting people to play tennis once more. The golf clubs found they could add tennis courts without much expense, and a great many people began to take it up." He pointed to a few score of baseball bats turned from straignt-grained, second-growth white ash, but not yet finished. "We make some of those things, too, but there isn't much use trying to compete with the mills where the lumber is cut, because they can turn them out cheaper there. All they need is a saw and a lathe, but we do all the work on the racquets here except sawing the strips from the log.

"Some of our racquets go to London, where there is a call for a certain kind, but these are not the highest-priced ones. Those are sold in the United States."—Providence, R. I., *Journal.*

THE FIRST HORSESHOE.

Horseshoeing is an old art, it having been begun in Italy about the eleventh or twelfth centuries, but greater progress has been made in it during the past twenty-five years than in all the time before that period. The first horseshoe was a thin iron plate having a rim on the outside which covered the whole ground surface of the foot. The shoes were held on by leather thongs fastened to the hoof and pastern. These were followed by a plate which had a rim held to the outside of the hoof by pointed hooks. The hooks were soon displaced by nails which had square heads. The Germans made the first horseshoes with a crease in them during the fifteenth century, and soon after shoes were made with calks. From these clumsy shoes to the present machine-made shoes was a work of slow growth, but perfection has not yet been reached by any means and the man who adds to the general knowledge of horseshoeing is a public benefactor.

PROFIT MAKING LINES

WHITE MOUNTAIN FREEZERS.

Among the lines of goods that naturally fall under the caption of Profit Making Lines that of Ice Cream Freezers present themselves as being quick sellers in what may be considered their best season, though they are used all the year round more than ever. They can be sold readily—those that are in popular demand—from a line of samples occupying but little space on the store floor to call proper attention to them. When once you have decided on the line you intend to handle you should become familiar with the essential features that make the line popular sellers. The essential features in which the claimed superiority of the White Mountain Freezer lies are the principle, mechanism, material and construction.

The principle of the White Mountain Freezer is the effective Triple Motion. It has been demonstrated that the use of the Triple Motion produces the finest quality of cream in the quickest time, and to the ingenious application of this principle is due the remarkable success of the White Mountain Freezer. With the can moving in one direction, the outside beater moving in the opposite direction, and the inside beater moving in a direction opposite to that of the outside beater, the cream is kept in constant motion. It is thrown from the center to the sides of the can and back again continually, thoroughly beating every particle, and making the grain fine and smooth.

THE MECHANISM of the White Mountain Freezer is simple, yet efficient. A combination of three cog-wheels produces the triple action, imparts to the can and the two beaters their separate motions, and makes the operation of the freezer a very easy matter. This triple motion is found only in the White Mountain Freezer.

THE MATERIAL used in the White Mountain Freezer is the best obtainable, and while passing through our factories receives additional treatment that makes it still better.

The Tub is made of carefully selected second growth white pine, absolutely free from imperfections, and every tub is impregnated with a chemical preparation that renders it water-proof and water-tight. They will never get soggy, never lose their shape, and never smell unpleasantly, as will cedar tubs.

The Can is made of the best charcoal tin plate, and every part of the freezer that comes in contact with the cream is plated with pure block tin, thus positively eliminating all possibility of poisonous influences. The inside castings, or the beaters, are of malleable iron, and tin plated. All outside castings are cast iron well galvanized to prevent rust.

THE CONSTRUCTION of the White Mountain Freezer is as perfect as experience can make it. It is of uniform strength in every part, while each part contributes to the strength of the whole, and helps to make the machine exceptionally durable. All White Mountain Freezers represent the latest mechanical improvements. They are built by experienced workmen from the best grade of material, and they are designed for the satisfaction of both the dealer and the public.

They help dealers to sell White Mountain Freezers by supplying them with all kinds of advertising matter free of charge. Special booklets, circulars, folders and electrotypes of newspaper advertisements will be furnished if wanted, and everything they can possibly do to push sales is promptly and thoroughly done.

WHITE MOUNTAIN HAND FREEZER WITH CRANK.

This is universally the favorite family ice cream freezer, because it combines more excellence than all the other family freezers made. It is easy to operate, because the parts fit perfectly, and therefore run smoothly. It is remarkably quick freezing, because it has the triple motion, and will produce a delicious, smooth, and even-grain cream in four minutes or less.

It is exceptionally durable. The tubs are built very strong, and will not warp, leak, or crack, and the cans are made of the finest quality bright charcoal tin plate. Its beaters and interior mechanism are plated with block tin, and the exterior metal parts are cast iron, finely galvanized to prevent rusting.

It is the only freezer made with a duplex malleable iron dasher and double self-adjusting scrapers, which keep every particle of cream in constant motion, causing it to freeze faster and more evenly than can possibly be accomplished by any other freezer.

WHITE MOUNTAIN HAND FREEZER WITH FLY WHEEL.

This is the same as the hand freezer previously described, with the addition of the fly wheel. The advantage of the fly wheel is obvious. It affords more leverage than a crank, thus making the freezer extremely easy to operate. The present manner of adjusting the gear frame of the White Mountain Freezer permits of easily putting on and taking off of the entire top without removing the fly wheel. This is a special feature and one that will merit attention.

Every White Mountain Hand Freezer is supplied with a crank. Fly wheels may be had additionally if desired for all sizes of freezers from two quarts up at a slight increase in cost.

HOTEL AND CONFECTIONERS' WHITE MOUNTAIN FREEZER.

This machine is built especially for these purposes. It is a very strong and durable hand freezer. It is not, however, built to withstand the wear and tear of steam or other motive power, and such power should never be used on it.

COMBINATION GEAR FRAME WHITE MOUNTAIN FREEZER.

The peculiar construction of this gear freezer makes it possible for two to operate at the same time, each operator being independent of and unhampered by the other. An extensive demand for such a freezer induced us to design and perfect this combination gear frame. This freezer is made with either two cranks, two fly wheels, or one crank and one fly wheel. It has all the superb features of the standard White Mountain Freezer, and will be found especially adapted to the needs of customers desiring large freezers and having nothing but hand power at their command.

WHITE MOUNTAIN HAND FREEZER WITH CRANK.

NEW PLATFORM WHITE MOUNTAIN FREEZER.

Here we have a machine built for either hand work or power. It is particularly substantial and unusually rigid in construction, and is splendidly adapted to meet the requirements of rapid and at the same time satisfactory ice cream making. The demand for this freezer has been something remarkable. It is just what is wanted by the ice cream maker with a large trade. The platform, stand, and frame are cast iron galvanized to prevent rust, and every part is perfect. By releasing the latch bolt and thumb screw the gear frame can be swung to one side so that both tub and cam may be removed. This machine is generally furnished with the fly wheel, but at a slight additional expense a pulley can be substituted, the result being a fine power freezer.

THE SAMSON POWER WHITE MOUNTAIN FREEZER.

The notable features of the "Samson" Freezer are:

The Triple Motion. Heavy, durable, four-hooped tubs. Cans made of the heaviest and best tin plate obtainable. Malleable iron beaters plated with pure block tin, and self-adjusting wood scraping bars. Absolutely accurate mechanism. It has every convenience. The gear frame can be released quickly and raised to an upright position in which it is firmly held, and the tub and can may be removed and replaced at pleasure.

The pulleys for the 25-quart size are 11½ by 4⅞, and for the 40-quart, 15½ by 5½. The freezer should be operated at a speed of 75 revolutions per minute.

MINOR ITEMS OF ANGLER'S EQUIPMENT.

Much has been written in regard to the original types of fish hooks, or more strictly speaking, of the various devices meeting the purpose of the fish hook of to-day, some of which were not hooks in any sense of the word. The inspiring idea was to get something in the fishes mouth that could not be expelled, and a straight splinter of wood or bone with sharpened ends, attached at its middle to the line, answered this end so well that some aboriginal tribes still persist in its use. Hooks were a later invention, and still later they were improved by the addition of barbs—but, as above stated, this subject has been learnedly discussed by scores of writers, in and out of the sporting goods trade. The second problem confronting the primitive angler, though at first thought it may appear easier of solution, is still interesting tackle manufacturers. All fish are not surface feeders; consequently it became necessary to sink the bait to proper depth. Doubtless the original sinkers were pebbles, picked up on the shore and chosen with reference to their shape and weight. Among the baser metals lead is the best suited for sinkers, because of its specific gravity and the ease with which it may be worked. There is no record of the earliest use for the purpose, nor is it likely that any other metal will ever take its place. But only in this one respect of having found the best material has the manufacture of fishing line sinkers attained that point beyond which progress is impossible.

Older readers, says *The Sporting Goods Dealer*, can recall the time when few stores selling fish hooks and lines supplied sinkers as well. The angler had to provide these for himself. The usual process was to flatten a piece of lead to a thin sheet and wrap it closely around the line, though split buck shot were preferred by some. Then, as now, anglers held to their individual preferences in the matter of sinker shapes. Hundreds of years of experience and argument has not settled this question. Probably to the end of time there will continue the same difference of opinion as to the comparative merits of spherical, egg-shaped and cylindrical sinkers. Ideas and beliefs acquired through experience are pretty hard to do away with. The individual angler, too, has his own views as to the proper location of the sinker, some placing them close to the hook, others quite a distance above on the line. Here you will find one pinning his faith on a single bit of lead, farther on you may find the same weight divided into two sinkers, while the third angler affixes a half-dozen tiny shots to his line and stands ready to argue that his is the only correct way. Of sizes, shapes and patterns of sinkers, there are no end. Many of them are covered by patents and are winning considerable income for their inventors. The improvements have been principally in the direction of easy attachment. When more lead is to be affixed to the line, or a portion of that already on to be removed, it is no longer necessary to take off the hook, or pry open the tightly closed halves of a split shot, or bother with wrapping or unwrapping stubborn sheet lead. A few twists of the line in a spiral wire, or maybe the turning of a screw, and in an instant the work is done and the line ready for another cast.

The primitive angler was doubtless a still fisher, and one of his numerous difficulties was to reach the likely looking spots with a short fishing pole and at the same time keep his sinker and bait off the bottom. He hit upon the right way at last, when he tied a dry stick to the line at the proper distance above the hook. There was no bothersome current to carry it away, he could now throw the bait out the full length of the pole and line, and it would "stay put." Moreover, by watching the stick he could detect a bite quite as readily as when using a short line and was thus given a chance to plant the butt of the first pole in the mud and cut and rig a second one. Some one has said that the element of laziness first began to figure in angling with the invention of the float, and even at this day it is not hard to find anglers who detest a float as heartily as sportsmen detest a market hunter. But for some descriptions of fishing it is indispensable and will continue in active demand, in spite of the growing popularity of fly and bait casting To sportsmen writers in quest of an interesting subject, there may be suggested "The Evolution of the Fishing Float." It is an awkward field of research and big enough to satisfy the most ambitious. Here, again, modern invention has been busy, old models improved upon, new materials used, methods of attachment devised. There are floats with spring actuated mechanism to keep the bait in motion, and others that respond to a bite with a "snap-and-catch-'em" action that leaves the fisherman nothing to do but remove his captive and set the machine for another. Nearly every known material of sufficient buoyancy and proof against moisture has been used in the manufacture of fishing floats. The list is too long for enumeration. But still inventors are busy, and rarely a month passes without the patent reports showing something new in this line.

Trade Meetings

SOUTH DAKOTA RETAIL HARDWARE DEALERS' ASSOCIATION.

The first annual convention of the South Dakota Retail Hardware Dealers' Association was called to order at Mitchell Wednesday forenoon, Jan. 17. The sessions were held in the City Auditorium. One hundred and fifty representatives of the trade were present, the attendance being much larger than was expected.

Edward Hawkins, of Vermilion, was made chairman, and E. Gregory, of Alexandria, was chosen secretary. Committees were appointed to prepare a Constitution and a set of by-laws, and to nominate officers for the new association.

The convention, without a dissenting vote, adopted the constitution and by-laws, and took the necessary steps to perfect the first organization of Retail Hardware Dealers in the history of the state.

Election of Officers.

A permanent organization of the new state association was perfected by the election of the following officers, who will serve until the next convention of the association:

President—E. D. Hawkins, Vermilion.
Vice-President—Otto E. Muller, Aberdeen.
Second Vice-President—F. J. Pixley, Montrose.
Secretary—Noah Keller, Woonsocket.
Treasurer—B. G. Wattson, Chamberlain.

The following were elected members of the executive committee: E. I. Gregory, Alexandria; F. J. Birkinbine, Scotland; H. E. Johnson, Redfield; F. Rummel, Sioux Falls; M. H. Gosche, Mitchell; John Roper, Parker; F. O. Steensland, Beresford; Noah Keller, Woonsocket; B. G. Wattson, Chamberlain.

When the ballots were counted on voting for the next place of meeting Fitchell had twenty-three votes and Aberdeen twenty-nine, and thus Aberdeen was selected as the place for holding the convention next year.

The first convention of the Hardware men was a success from beginning to end, and the members were extremely happy that the start for an independent organization was made this year. The association starts out with a good membership, which will be abundantly increased by the next annual meeting.

THE RETAIL DEALERS' HARDWARE & IMPLEMENT ASSOCIATION.

The Retail Dealers' Hardware & Implement Association of Texas held their eighth annual convention in the auditorium of the Dallas Commercial Club on January 23, 24 and 25. An elaborate programme had been prepared for the occasion and the meeting was one of the most complete ever held. The morning sessions were devoted to the transaction of regular business. The afternoons were set aside for addresses from visiting members and for general discussion. Members took occasion to visit the different jobbing and manufacturing concerns of Dallas, where the meeting was held.

ELECTION OF OFFICERS.

The Committee on Nominations recommended the following persons, who were unanimously elected:

President, R. L. Penick, Stamford.
Vice-President, W. A. Spangler, Bonham.
Directors—For three years: C. M. Patillo, Stamford; O. E. Schow, Clifton. For two years: J. R. Cole, Sherman.

The committee also recommended that the secretary-treasurer should receive a salary sufficient to compensate him for the heavy duties that rest upon him.

The question of the organization of a Texas association on the order of the Mutual Fire Insurance Associations of the Northern States was discussed, but no definite agreement reached. Catalogue houses, the parcels post bill, reciprocal business, advertising, price maintenance and other questions of a similar nature occupied a great part of the members' attention.

On Tuesday evening the smoker given by the Dallas Implement, Machinery and Vehicle Club at the Elks' Club was largely attended and was a highly enjoyable affair, from the Dutch lunch to the badger fight. An excellent orchestra furnished music, and with the lunch were served souvenir napkins on which was printed the evening's programme. A number of postprandial speeches were made which were interspersed with a vaudeville programme.

On January 25 a general reception was held at the auditorium of the Dallas Commercial Club.

THE MISSOURI RETAIL HARDWARE ASSOCIATION.

The Missouri Retail Hardware Association has decided to hold its annual convention at Kansas City instead of Hannibal, as it first proposed. Headquarters to be at the Coates House. The local committee have succeeded in getting up a brilliant programme in which entertainment predominates; and a railroad rate of one and a fifth fare on the certificate plan has been arranged for the delegates and others attending the convention.

MINNESOTA RETAIL HARDWARE ASSOCIATION.

The tenth annual convention of the Minnesota Retail Hardware Association will be held in Minneapolis, Feb. 28 and March 1 and 2. The meetings will be held in the former dining hall of the Hotel Nicollet. The association has materially increased in membership during the past year, and the tenth convention will unquestionably be larger than any of its predecessors.

NEW YORK STATE ASSOCIATION.

The headquarters of the New York State Association of Retail Hardware Dealers for their annual convention at Binghamton, February 20, 21 and 22, will be held at the Hotel Bennett, the different sessions being held in the assembly room of the hotel. Arrangements are being made for a convention of a business-like character, and a representative attendance of the Hardwaremen of the State is anticipated. Manufacturers and jobbers are reserving space for exhibits with confidence. A special railroad rate is being provided for, which will be announced later.

IOWA RETAIL HARDWARE ASSOCIATION.

The coming convention of the Iowa Retail Hardware Dealers' Association to be held in this city February 14 to 16, will take on much the nature of a Hardware exposition, so complete is to be the representation of all branches and phases of the business. The holding of the convention sessions in the same building in which is to be a big Hardware exhibit, makes this possible.

A school of practical salesmanship is to be conducted by some of the ablest men of the State. Trade matters in general are to be discussed.

The Des Moines Hardware Club, a local organization of Hardware, implement and vehicle jobbers and manufacturers, is preparing to tender to the visiting delegates an elaborate entertainment at the Elks' Club House on the evening of February 15. It is recognized that Des Moines has made wonderful strides as a Hardware center during the past six years. Two local houses travel continually twenty-five road representatives, whereas six years ago not more than eight men were employed by both houses combined.

Following is the programme:

WEDNESDAY, FEB. 14.

9 A. M.—Meeting of Board of Directors, Savery Hotel.
10:30 A. M.—Opening Session at Convention Hall.
Enrollment of Members.
Payment of Dues.
Distribution of Badges.
Announcement of Committees.
Question Box.—This feature of the program is in charge of W. M. Orcutt, Sioux City; F. R. Currie, Mason City; F. P. Bollinger; Afton; E. B. Woodruff, Knoxville.
2 P. M.—School of Practical Salesmanship.
Stoves—C. F. Schmidt, Marshalltown.
Furnaces—J. F. Doty, West Liberty.
Hay Tools—C. E. Haas, Le Mars.
Paints—S. R. Miles, Mason City.
Builders' Hardware—H. S. Vincent, Ft. Dodge.
Field Fence—L. C. Abbott, Marshalltown.
7:30 P. M. An Illustrated Lecture—The Factors of Modern Advertisement, by Prof. Conway McMillan, of the National School of Salesmanship, Minneapolis, Minnesota.
Question Box.

THURSDAY.

9:30 A. M. President's Annual Address—H. S. Vincent, Ft. Dodge.
Report of Secretary-Treasurer, A. R. Sale, Mason City.
Report of the Insurance Association, Vice-President L. Lindenberg.
10:30 A. M. Address by President of the National Retail Hardware Association, W. P. Bogardus, Mt. Vernon, Ohio.
11 A. M. Continuation of the Practical School of Salesmanship.
Question Box.
1:30 P. M. Executive Session.

THURSDAY EVENING.

The association will be entertained by "The Des Moines Hardware Club."

FRIDAY.

9 A. M. Question Box.
Report of Committees.
Election of officers.
Unfinished Business.

AT SAVERY HOTEL.

2 P. M. Session of Board of Directors.
3 P. M. Session of Board of Directors of the Iowa Hardware Mutual Insurance Association.

NEBRASKA RETAIL HARDWARE ASSOCIATION.

The Fifth Annual Convention of the Nebraska Retail Hardware Association will be held at Lincoln, Neb., on February 13, 14, and 15.

The following is a complete program of the sessions of the convention.

TUESDAY, FEBRUARY 13.

10 a. m.—Meeting of executive committee.
Enrollment of members.
Payment of dues and distribution of badges.
Announcement of standing committees.
Question Box.
Questions on illegitimate local competition—Kimel Barns, David City.
Questions on catalogue house methods—M. A. Hargelroad, Holstein.
Questions on quantity prices—Maurice D. Hussie, Omaha.
Questions on cash and credit methods—A. E. Small, Crete.
Questions on miscellaneous subjects—Aug. Lubeley, Hartington.
2 p. m.—Meeting called to order by President Max Uhling. Holdrege.
Invocation—Rev. H. C. Swearingen, D. D.
Address of welcome—Hon. F. W. Brown, mayor of Lincoln.
Response—Nathan Roberts, Omaha.
Annual address of the president.
Annual report of the secretary.
Annual report of the treasurer.
Ladies will adjourn to the parlors and meet with entertainment committee.
Report of the delegates to national convention.
Address—The Hardware Store, Its Past, Present and Future—J. H. McGrath, Hastings.
Voluntary remarks by members.
Paper—Best Methods of Getting All Hardware Men Into Our Organization—A. G. Hunt, Campbell.
Discussion of subject.
Address—Our Competitors; Why We Should Be On Friendly Terms—Alex F. Meyer, Falls City.
Discussion by members.
Paper—Advertising a Store in a Country Town—J. C. McPherson, Haigler.
Suggestions on this subject by members.
Address—Pushing the Business—P. A. Krause, Albion.
Discussion of subject.
8:00 p. m.—Stereopticon exhibition and lectures—For hardware dealers only.
1. The catalogue house methods illustrated.
2. Hardware stores displays.
By S. R. Miles, Mason City, Iowa. Member of the national wholesale and retail joint committee.

WEDNESDAY, FEBRUARY 14.

9:30 a. m.—Address—Steel Ranges; Standard Makes: Are the Prices Too High?—H. T. Moore, Alma.
Discussion.
Paper—How to Get Our Home People to Patronize Our Local Stores—A. L. McDonald, Eagle.
Remarks by members.
Address—W. P. Bogardus, Mt. Vernon, O., president of the National Retail Hardware Association.
Address—Pointers on Fire Insurance—W. P. Lewis, New Albany, Ind., Treasurer of National Hardware Mutual Life Insurance Co.
Discussion, led by H. J. Hall, Lincoln; C. P. Schneider, Syracuse; J. F. Goehner, Seward.
Address—The Traveling Man—By one of them.
2:00 p. m.—Executive session—For hardware merchants only.
Discussion—The Catalogue House Question.
Discussion led by J. C. Cornell, Ord; followed by volunteer remarks by members.
Address—Benefits of Fixed Retail Prices on Standard Goods—I. W. Hawe, Minden.
Discussion by members.
Question Box—Referred questions answered.
One hour and thirty minutes time will be given for the answer and the discussion of these questions by the members.
Paper—What Good has Our Association Done Us?—Walter Gabeler, Winside.
Discussion.
7:30 p. m.—Banquet, Lindell Hotel. Complimentary to the Hardware dealers and ladies, by the Lincoln jobbers and entertainment committee.

THURSDAY, FEBRUARY 15.

9:00 a. m.—Unfinished business—All business unfinished on previous days will be taken up at this time.
Reports of committees.
Election of officers.
Selection of place of next meeting.
12 m.—Adjournment.

◆

Laws cannot prevent extravagance; and perhaps it is not always an evil to the public. A shilling spent idly by a fool may be picked up by a wiser person who knows better what to do with it; it is, therefore, not lost.—FRANKLIN.

OUR CANADIAN LETTER

By our Special Correspondent.

TORONTO, FEB. 5, 1906.

TACK MANUFACTURERS ON TRIAL.

In our last letter references were made to the charges of conspiracy to restrain trade made against all the prominent tack manufacturers in Canada, they being members of the Canada Tack Manufacturers' Association, the secretary-treasurer of which was Mr. James Hardy, of Jenkins & Hardy, Toronto. The real investigation commenced on Jan. 2 and was continued in the Toronto Police Court, off and on, for about three weeks before a conclusion was reached. A clerk in the secretary's office was in the witness box the bulk of the time, he being kept busy answering questions and identifying books and papers exhibited in court by the crown prosecution.

The Association was organized in 1902, the object being to maintain the prices of tacks at profitable figures. All the members agreed to abide by the rules adopted and not to sell goods below or on better conditions than named in the agreements. Monthly statements were rendered and the secretary had the right to examine the books of the members. A $300 fine was decided upon as a punishment for breaking rules and "loyalty" and "quantity" rebates were offered to customers for buying exclusively and in large quantities from the manufacturers in the association. The Crown Prosecution endeavored to connect the tack association with other trade associations, in the course of the evidence speaking very harshly of it. Day after day spent by him in first sconning the minute books from 1892 to 1907 and reading extracts from them, and then later on doing the same with the letter files of the association. It is creditable to the members that during the whole period of fifteen years nothing of a damaging nature was found against them. Various differences occurred but absolutely nothing of a startling nature was unearthed. One point which the prosecution laid great stress upon was the quoting of a close figure by one manufacturer to a large implement concern. The latter were figuring on buying from the Atlas Tack Company and refused to do business with several of the Canadian producers. All then agreed that only one would offer to do the work at the figure previously quoted. The manufacturer was to get the advantage of uniformity by having all made in one factory and the association members agreed to divide the savings amongst themselves. The order finally went to the United States concern but the prosecuting attorney contended that the action of the association members was a criminal conspiracy. Another interesting occurrence was when the magistrate and the crown prosecution held up their hands in horror on a quotation of 85, 12½, 12½, 2½ and 5 per cent. off tacks, they showing their inexperience in business affairs by asking if this was not a mistake as it was paying customers to take the goods.

EIGHT MANUFACTURERS COMMITTED.

The case dragged along until Jan. 24 when the charges were withdrawn against several, eight of them, however, being committed for trial before the Criminal Assizes, these being: Thomas Jenkins and James Hardy, secretary-treasurers, Toronto; W. H. Woodall, Montreal; E. J. Fry, of the Peck-Benny Company, Montreal; William McMaster and H. M. Blaiklock, of the Montreal Rolling Mills Company, Montreal; F. H. Whitton, of the Ontario Tack Company, Hamilton; and W. Bruckhoff, of the Portland Rolling Mills, St. John, N. B. The case excited considerable interest amongst the trade, the Canadian trade paper, *Hardware and Metal*, giving almost a verbatum report of the proceedings, six pages being devoted in one issue to the report. The grand jury have not yet passed judgment upon the case but it is likely that they will bring in a true bill against the accused, in which event a legal battle will result with chances of an acquital very good as there are no damaging "bonuses" or "rake-offs" to damn the manufacturers case as caused the plumbers' trial. Upon the verdict in the tack case depends the question as to whether or not other trade associations will be proceeded against, the Crown prosecutor having stated that he has 38 other associations in view for attack, the next on the programme to be that of the Stamped Tinware and Enamelware Association.

PLUMBERS HEAVILY FINED.

Most of the charges against the members of the Master Plumbers and Supply Associations have been disposed of and in addition to the $12,000 odd imposed in fines, reported a month ago, further fines amounting to $10,300 have been imposed upon members of the Master Plumbers' Association. In addition to this those firms which arranged tenders and added amounts for each other to pay for the trouble of tendering, all agreed to hand back the "rake-offs" to their customers. The case against the Supply men is not being pressed so strongly and it looks as though it would peter out. In Hamilton, the courts have copied Toronto's example and fifteen master plumbers have been committed to trial for conspiracy.

CANADA'S PROSPERITY.

While business conditions in Canada are largely a reflex of those in the United States, this country is now enjoying a prosperity and industrial expansion of its own. Where thousands of Canadians formerly emigrated to the United States yearly, tens of thousands have moved or are preparing to leave the Middle Western States for homes on the rich farm lands of the Canadian Northwest. Last year's wheat crop was the largest in Canada's history, the harvest yielding about $100,000,000. With the mines also producing enormous wealth and new factories springing up on every hand, the future of this country looks exceedingly bright. Last year's record breaking building year is likely to be equalled or surpassed in 1906 and the mild open winter has already had a good effect upon the Hardware trade. Sales of skates, sleighbells, snowshoes and other winter lines have fallen flat since the holidays but builders' Hardware has met with a correspondingly increased sale. This is of interest to American manufacturers as the preferential tariff in favor of Great Britain has not resulted in the manufacturers of that country capturing the lead American builders' tools have secured on the Canadian market. The influx of American capital and factories into Canada continues steadily. Reference has already been made to the establishment of a branch factory in Toronto by Henry Disston and Sons, Philadelphia. They have spent $30,000 in a fire proof factory building and site and will spend as much more in completing their plant. The machinery is already here and the factory will probably be produced by March 1. Mr. W. E. Radcliffe is the Canadian manager. The Disston company have a large trade in Canada already and will extend it as a result of their move. But they will not be without strong opposition as during the past month the Simonds Manufacturing Company, Fitchburg, Mass., who have hitherto neglected this country, have, for about a quarter of a million, purchased the plants and established business of the Canada Saw Works. This latter concern had factories in Montreal, Toronto and St. John, as well as a recently closed down plant at Ottawa. As saw mill men are conservative buyers and are not prone to change their make of saws, the Simonds people showed good judgment in taking over an already large business instead of spending thousands of dollars in trying to work up a connection of their own. In the works purchased about 150 men are employed.

The Canada Saw Works was formerly controlled by the James Robertson Company, B. N. Feeney being manager of the plant in Montreal and Fred Woods in Toronto. E. S. Simonds, of Chicago, was largely interested in making the deal. Beyond the change of name to that of the Simonds Canada Saw Company and the extension of the existing plants to allow of an increased production and the making of machine knives, etc., the business will go on as usual.

Another concern which proposes to establish a Canadian factory is the White Sewing Machine Company, of Cleveland. They are negotiating for a site at Welland and offer to employ 300 hands. Welland is near Niagara Falls, and is the location chosen for the Plymouth Binder Twine Company's immense Canadian works which are nearing completion.

The report of the Illinois Manufacturers' Association that Canada's high tariff and the Dumping clause had forced 122 leading U. S. concerns to establish plants and invest $50,000,000 in Canada has caused much interest on this side of the line Canadians, of course, desire to see their country expand industrially and would like to see all of the factories which produce the $166,000,000 worth of merchandise imported from the United States yearly establish Canadian branches. The Canadian tariff, however, is not high enough to keep the rapidly growing trade of the Northwest Provinces for Canadian manufacturers and the output of factories in Chicago and other western cities are found in the stores of Winnipeg, Brandon, Calgary, Edmonton and other prairie cities in almost equal quantities as "Made in Canada" goods.

BUSINESS EXPANSION.

The Hobbs Hardware Company, jobbers, London, have opened a sample room in Toronto at 53 Colburne street.

The Marshall-Wells Hardware Company, Winnipeg, have been

Digitized by Google

made distributing agents for Henderson & Potts paints, the latter concern closing their Winnipeg branch.

The Kennedy Hardware Company, Toronto, have purchased a large new warehouse and office building at 51 Colburne street. Started only three years ago, their jobbing business has grown to large dimensions. S. R. Kennedy, the president, was formerly with Lewis Bros., wholesalers, Montreal, and for several years with the Simmons Hardware Company, St. Louis.

The Lenour Paint Company, Chicago, have established a branch factory in Montreal, to be conducted by the Martin-Lenour Company, a subsidiary concern.

Brooks-Sanford Hardware, Limited, jobbers of builders' Hardware, have just closed their first year. They are Toronto agents for Russell-Erwin builders' lines.

The Aikenhead Hardware Company, Toronto's oldest Hardware establishment, are moving into splendid new quarters.

The National Hardware Company is being organized in Montreal by A. M. St. Arnaud, formerly with the Canadian Hardware, Limited, in that city.

A steel billet mill is to be established in St. John, N. B., by parties interested in the Portland Rolling Mills.

Sargent & Company, Hardware manufacturers, New Haven, Conn., deny the rumor that they intended to establish a Canadian plant.

The Peterboro Shovel and Tool Company, Peterboro, Ont., are enlarging their plant and increasing their capital stock from $50,000 to $100,000.

The Murphy Varnish Company, New York, are considering the advisability of establishing a branch in Canada to be located at Toronto.

OTHER ITEMS OF NEWS.

Walter Grose, Montreal, one of the best known Hardware manufacturers in Canada, died suddenly at Waterbury, Conn., a fortnight ago. He was president of the Toronto Lamp and Lantern Company, Hamilton, and selling agent for several other concerns.

The first fine as a result of the tax on commercial travelers in Quebec Province has been imposed upon H. Weill, an English wine salesman. He had not paid the $300 tax and was assessed $50.

The Dominion Electric Heater Company, Montreal, are putting on the market a recently invented device which heats water coming from a tap by electricity.

The Mowry Safety Nut Company, St. John, is to establish a factory to manufacture the safety nut—the invention of a St. John man.

The "Aul-u-want" is the name of a useful harness sewing tool being put on the market by the Canadian Wholesale Agency, Montreal.

Eben Perkins, who is to establish a new nail factory at St. John, N. B., has sold the American rights of a new cold process for drawing nails, recently invented by him.

Hardwaremen have been honored in the elections of officers in the Toronto and Montreal Board of Trades. In the former city Mr. Pelig Howland, head of the wholesale firm of H. S. Howland, Sons & Co., was chosen president, and in Montreal, Mr. George Caverhill, of Caverhill, Leamont & Co., was elected first vice-president, and Mr. L. J. A. Surveyor, another Hardwareman, first vice-president of the French Chamber of Commerce.

MERCHANT & EVANS CO., INC., ROOFING RULES.

MERCHANT & EVANS CO., INC, Philadelphia, Pa., are presenting to the trade an exceedingly attractive and interesting pamphlet, entitled "Roofing Rules," which is a hand book on Sheet Metals in Building Construction, for Architects, Owners, Engineers and Builders. They state in introducing the book: "The following work has been prepared to present to owners and others in a plain and simple form the various points about metals in building construction, with the hope that it will prove of value in making a selection of such materials." They also call attention to the following points in regard to roofing: "The cover of any building is of the greatest importance. Upon it depends not only the durability and preservation of the whole structure but the safety of the contents and the comfort of the occupants. It is subject to more exposure than any other part of the building; and final economy is lost when cheap and perishable materials are employed. The roof and other cover parts should possess the following principal qualities: Storm Proof, Fire and Lightning-Proof, Light in Weight, Easy of Repair, and Ornamental in Appearance." The company claim that their roofing possesses all these qualities and a number of testimonial letters are given showing proof "that the best of all good Roofing Tin is 'Merchants' Old Method.'" The book will be gladly sent to interested parties, and will be found very valuable for reference purposes. Send for a copy.

RETAIL HARDWARE DEALERS' ASSOCIATIONS.

Annual Meetings in February and March.

INDIANA RETAIL HARDWARE ASSOCIATION:
President, A. N. Shidler, South Bend.
First Vice-President, Chas. Frame, North Manchester.
Second Vice-President, Walter B. Creed, New Albany.
Secretary-Treasurer, M. L. Corey, Argos.
Annual meeting at Indianapolis, February 13, 14 and 15; headquarters and exhibits at Tomlinson Hall.

NEBRASKA RETAIL HARDWARE ASSOCIATION:
President, Max Uhlig, Holdredge.
Vice-President, Albert Degner, Norfolk.
Second Vice-President, Frank Haeker, Friend.
Third Vice-President, M. A. Hagleroad, Holstein.
Treasurer, H. J. Hall, Lincoln.
Secretary, Frank K. Barr, Lincoln.
Annual meeting at Lincoln, February 13, 14 and 15.

IOWA RETAIL HARDWARE ASSOCIATION:
President, H. S. Vincent, Fort Dodge.
Vice-President, C. E. Haas, Le Mars.
Secretary-Treasurer, A. R. Sale, Mason City.
Annual meeting at DesMoines, February 14, 15 and 16.

ILLINOIS RETAIL HARDWARE ASSOCIATION:
President, Frank B. McKenney, Rockford.
Vice-President, F. Giessing, East St. Louis.
Treasurer, George A. Englehardt, Chicago.
Secretary, L. D. Nish, Elgin.
Annual meeting at Chicago, February 20, 21 and 22; headquarters and exhibits at First Regiment Armory.

KENTUCKY RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION:
President, J. C. Frederick, Owensboro.
First Vice-President, U. S. Shacklett, Fulton.
Second Vice-President, George W. Buck, Louisville.
Treasurer, A. Steitler, Jr., Owensboro.
Secretary. John R. Sower, Frankfort.
Annual meeting at Louisville, February 20, 21 and 22; headquarters at Galt House.

NEW YORK STATE ASSOCIATION OF RETAIL HARDWARE DEALERS:
President, C. P. Sherwood, White Plains.
First Vice-President, Louis J. Ernst, Rochester.
Second Vice-President, L. G. Mattison, Newark.
Treasurer, F. E. Pelton, Herkimer.
Secretary, J. B. Foley, Syracuse.
Annual meeting at Binghamton, February 20, 21 and 22.

CONNECTICUT RETAIL HARDWARE ASSOCIATION:
President, Chas. G. Agard, Torrington
First Vice-President, George A. Bassett, New Haven.
Second Vice-President, Irving C. Treat, Hartford.
Treasurer, Lewis B. Crosby, New London.
Secretary, James De F. Phelps, Windsor Locks.
Annual meeting at New Haven, February 27 and 28.

OHIO HARDWARE ASSOCIATION:
President, John F. Baker, Dayton.
Vice-President, C. S. Johnson, Barberton.
Financial Secretary, A. L. Shearer, Dayton.
Treasurer, L. F. Stahler, Waverly.
Corresponding Secretary, Frank A. Bare, Mansfield.
Annual meeting at Canton, February 27 and 28 and March 1; headquarters and exhibits at Auditorium Building.

MINNESOTA RETAIL HARDWARE ASSOCIATION:
President, A. T. Stebbins, Rochester.
Vice-President, George M. Evanson, St. Peter.
Treasurer, G. F. Duerre, Plain View.
Secretary, M. S. Matthews, Boston Block, Minneapolis.
Annual meeting at Minneapolis, February 28 and March 1 and 2.

MISSOURI RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION:
President, Taylor Frier, Louisiana.
Vice-President, Wm. H. Hahn, St. Louis.
Secretary-Treasurer, Frederick Neudorff, St. Joseph.
Annual meeting at Kansas City, Mo., February 20 and 21.

NEW ENGLAND RETAIL HARDWARE ASSOCIATION:
President, J. B. Hunter, Boston.
Secretary, F. Alexander Chandler, 36 Federal street, Boston.
Annual meeting at Boston, March 1 and 2.
Headquarters and Exhibits at Hotel Vendome.

CALIFORNIA STATE RETAIL HARDWARE ASSOCIATION:
President, H. C. Bennett, San Francisco.
Secretary, Henry Gracey, 235 Powell street, San Francisco.
Annual meeting at San Francisco in March.

NATIONAL RETAIL HARDWARE ASSOCIATION:
President, W. P. Bogardus, Mount Vernon, Ohio.
Secretary, M. L. Corey, Argos, Ind.
Annual meeting at Chicago March 20 21 and 22.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

SALE TO ARRIVE.

QUESTION.—An importer sold us certain goods to arrive by a specified ship. The contract of sale reads: "To be delivered on arrival of goods at any time before January 1st No arrival, no sale." The goods not having arrived, can we sue the importer to deliver them, or can he make us take them now that the time of delivery is passed?

REPLY.—A sale to arrive or on arrival is regarded by the law as conditional; and where the seller simply agrees to deliver the goods on their arrival, he cannot be held liable for non-delivery, unless the goods have actually arrived. In other words, if without any fault on the seller's part, the goods fail to arrive, neither party is bound by his bargain. The buyer cannot hold the seller liable in damages for failure to deliver, and the seller cannot make the buyer accept the goods, after the date specified in the contract.

TENANT'S RIGHT TO EMBLEMENTS.

QUESTION.—I leased a piece of land to a tenant for the term of one year from the first day of January, 1901, with the privilege of continuing the same from year to year as long as both agreed. The tenant stayed in possession till January 1st, 1906, when, without any notice to quit being given me by him, he gave me notice that he did not care to stay another year; gave up possession and I relet the farm to another tenant. In the fall of 1905 my former tenant sowed fourteen acres of rye on the farm and now claims to be the owner of the rye when the crop matures. Who is entitled to the rye?

REPLY.—You are entitled to the rye. Under some circumstances a tenant from year to year, or for any other uncertain period, has the right to his "emblements" or "away-going crops" and may come on the land and harvest them, even though they do not ripen till his tenancy is terminated. But the law is settled that if the tenant terminates his tenancy by his own act before the crop matures, he loses his right to the crops then growing on the land. Where the landlord terminates a tenancy for an uncertain period, as by notice to quit, the tenant can take away crops growing on the land, but not ripening until his tenancy ends; but it is otherwise where the tenancy is put an end to by the act of the tenant himself. Here your tenant voluntarily surrendered possession and you accepted his surrender. That terminated his tenancy. It was the result of his voluntary act. And he forfeited his right to claim any crops then planted on the land.

EFFECT OF CERTIFICATION OF CHECK.

QUESTION.—A man drew a check payable to my order for $50 and sent me the check in payment for goods sold him. I took the check to the bank on which it was drawn and had it certified. The next day the bank failed. The check has not been paid. Can I sue the man who gave it to me?

REPLY.—We think not. The effect of the certification of a check by the bank on which it is drawn is an acceptance by the bank and an agreement by the bank to hold so much of the drawers' funds for the benefit of the holder of the check. When the holder of the check procures it to be certified, he thereby discharges the drawer of the check and all indorsers from liability. The rule would be different, however, if before delivering the check to you the maker had had it certified. Then you could hold the drawer of the check if the bank failed.

LEASE OF FARM FOR OVER TWELVE YEARS VOID IN NEW YORK.

QUESTION.—"A" leased a farm from "B" for fifteen years at $500 a year and a written lease was drawn up and recorded. The land is situated in the State of New York. Some one tells "A" that his lease is void. Can you advise us on this point?

REPLY.—At the common law and in the States generally, such a lease would be perfectly valid. There is no reason why a lease of a farm should not be made for fifteen or twenty-five or one hundred years if the parties agree to it, but the Constitution of the State of New York provides: "No lease or grant of agricultural lands for a longer period than twelve years in which shall be reserved any rent or service of any kind shall be valid." As the land is situated in New York, the lease of course governed by this Constitutional provision, and being for a longer period than twelve years, is absolutely void.

PARTNERSHIP—DISSOLUTION—NOTICE.

The Supreme Court of Michigan held, in the case of The Smith & Cheney Company vs. Schmidt, that where goods are ordered by one of the members of a co-partnership and shipped after the dissolution of the firm, the retiring partner is bound, unless the vendor has notice of this dissolution of knowledge of such facts as will put him upon inquiry. The court said: "One of the partners had a right to give the order and bind the partnership; whether the other partner knew it or not is immaterial. Having given the order when they were partners, it is no defence that in the absence of notice of dissolution the goods were shipped after the partners had dissolved and defendant Schmidt had retired. No notice of the dissolution was given to the plaintiff. Actual notice or knowledge of the facts sufficient to put plaintiff on inquiry was necessary. The giving and taking of the order when the defendants were partners constituted a dealing with the firm which entitled plaintiff to actual notice."

THE LATE MARSHALL FIELD.

Marshall Field liked advertising men. Our San Francisco correspondent who got his first big ad from the great merchant, writes of him as follows:

The recent death of Marshall Field brought vividly to mind not only the rapid flight of time, but memory of the day I, as solicitor, was rewarded by getting from Marshall Field my first big display ad. and some good business advice, and how glad I felt.

It was about two or three weeks after the big Chicago fire that I, a straight shoot of a boy only 16 years old, big and overgrown, but no more full of the sap of life, it seems to me, than I am to-day. But this must be a mistake, for time, like advertising, does tell.

At that tender age I was a subscription and advertising solicitor for a Chicago daily with the biggest circulation, and in my territory was a long, wide one-story brick structure that had been erected temporarily on the southern line of the fire district for the reception of merchandise coming in for Field, Leiter & Co. I found in the centre of this temporary structure, in a glazed compartment about the size of a hall bed-room, Mr. Field, who was receiving, one at a time, a string of business callers.

Since that time I have known I was too diffident for my own good in those early days of my life, and Mr. Field must have observed my retiring disposition that permitted others who came after I did to secure his audience ahead of me, for he referred to it during the few minutes I was with him. He said to me substantially like this:

"Yes, I have copy here already prepared for a double column ad. which you may run in your next issue. By the way, young man, why did you hesitate in coming in? You stood back for others to precede you. My business here is like the barbers' 'Next'. I receive my callers in rotation as they arrive; no favors shown to anyone. Besides, I consider your business second to none, and advertising men are always welcome, for through them I expect to promote my business and make a success of it, or fail in the attempt."

In these advance days of publicity men in business houses it should be borne in mind that in the early days of which I write, there were no ad. men in stores, the proprietors themselves attending personally to all advertising matters.

I think that in the life of Marshall Field, who left an estate valued at a hundred million dollars, who was always in business and always had something to sell and advertised that fact incessantly, there is good argument in favor of always having plenty of printer's ink figure prominently in every business enterprise.

IN TEMPTATION'S WAY.

"This is the first time you have been to prayer meeting in a long time," said the pastor of a colored congregation.

"I had to come," replied Mr. Erasmus Pinkley. "I needs strength'nin. I'se got a job whitewashin' a chicken-coop an' buildin' a fence around a watermelon patch."

RECENT TRADE PUBLICATIONS.

CHADBORN & COLDWELL MANUFACTURING CO., Newburgh, N. Y., have favored us with a copy of their new catalogue of Lawn Mowers, which is attractively gotten up and finely printed on excellent paper. Among the many Lawn Mowers shown are the following: The "New Model," the "New Model" High Wheel, the "Rival," the "Rival" High Wheel, the "O. K.," the "Excelsior" Roller, the "Excelsior" Roller Golf, the "Royal Blue" Ball Bearing, the "Lenox" Ball Bearing, the "Invincible" and the "New Excelsior" Horse Lawn Mowers. Each of the models is carefully described and handsomely illustrated, and the book will repay a careful perusal. The company will be pleased to supply a copy to those not already in possession of one.

THE ENTERPRISE MANUFACTURING CO., Akron, Ohio, have favored us with a copy of their Catalogue and Price List for the season of 1905 and 1906. The catalogue is an immense publication, measuring 12 by 9 inches, and containing 170 pages. They state by way of introduction: "In presenting this, our annual catalogue No. F24, we solicit your earnest attention, believing that a careful perusal of same will be mutually beneficial. Especial attention is called to our line of Reels, Fish Hooks. Snelled Hooks and Flies, to which have been added many new patterns." The company claim to be the largest manufacturers of Artificial Fish Baits, Fish Hooks and Anglers' Specialties in the United States, and a very complete line of their products is shown in this their new catalogue. The book is profusely illustrated and is exceedingly attractive in appearance. Great care has been taken in its preparation and it will repay a thorough perusal of its pages. A copy will be gladly sent to those interested in this line of goods.

THE GILLETTE SALES CO., New York, N. Y., have sent us a very unique and interesting envelope sized pamphlet, entitled "In Memoriam," which, in the form of comic illustrated verse, effectively draws the reader's attention to the superior qualities of the Gillette Safety Razor. The peculiar fitness of the title may be seen in the last verse of the "poem" in which the writer bids a last farewell to the barber's pole, chair, razor, hone and strop, having found the acme of comfort and economy in the Gillette Safety Razor which gives "a barber's shave without the torture." The company claims that no invention in the 19th or 20th centuries has brought greater economy, helpfulness and happiness to mankind. They state in introducing the little book that the blades are made of steel as fine as a Damascus sword, and are tempered by a secret process, being so economically made as to allow of their being thrown away when dull; also that no honing or stropping is necessary with this razor and that it is so simple a child can adjust it. The pamphlet gives a view of the factory in Boston, Mass., which they claim is the largest plant in the world devoted exclusively to the manufacture of razors. For further information, prices, etc., write to the New York office, 1104 Times Building, Broadway.

AMES SWORD COMPANY, Chicopee, Mass., are presenting to the trade an exceedingly attractive and interesting illustrated catalogue of Patent Perfection Padlocks and other Hardware. Among the articles listed are the following: Small Padlocks for Dogs and Cats, Perfection Key Holders, Key Guard Chain, Perfection Padlocks, Baggage Protectors, Bicycle Padlocks, Cast Bronze Padlocks, and Padlock Keys. In introducing their catalogue they state: "The elegance and beauty of workmanship of these goods speak for themselves, while their strength and durability are guaranteed to be in no way inferior." In the latter part of the book will be found two very interesting testimonials in the form of letters ordering large quantities of the company's goods, and also a Partial List of Railroad and other companies who are using their Locks to a greater or less extent. For further information, illustrations, prices, etc., write for catalogue.

THE CENTRAL STAMPING CO., 24 Cliff Street, New York, manufacturing plant, Newark, N. J., have recently issued an illustrated price list of "Puritan" Ware, in regard to which they state as follows: "Puritan Pressed and Re-Coated Ware is made from very heavy tinned plates of highest quality and of superior finish, and is as nearly rustless as is possible with an iron or steel base and metal coating. 'Puritan' Ware is also superior in many respects to the best enameled, china or copper ware as the surface will not break, crack, scale or corrode." They claim that the capacity of the several articles follows the custom of the trade and that there are no scant sizes or light weights to be found on the list; the descriptions are actual and will not be deviated from. They also state that all knobs and wood handles on bails have a mahogany finish and that all "Puritan" Pressed Ware has a rustproof coating. The company announces that it will soon publish an extended list of "Puritan Ware" covering the most desirable articles in all lines of their manufacture. Information will be gladly and promptly given in regard to these goods and the Price List may be had upon application.

JOHN STORTZ & SON, Philadelphia, Pa., have recently issued a very interesting catalogue of Cement and Concrete Workers', Contractors', Paviors' and Asphalt Tools. They state in presenting their catalogue: "The degree of perfection which the steady increase in the use of Cement for innumerable purposes demands, necessitates the Cement Worker to be supplied with tools that experience has taught are well adapted for the work intended. In presenting this, our catalogue of Cement and Asphalt Workers', Paviors' and Contractors' Tools, we wish to state that our tools are made with care in every particular, and refer with pride to our reputation as manufacturers of edge tools for the past fifty years." They claim there are two grades—bronze and iron. The bronze tools are made of hard bronze of a composition insuring the best wearing qualities and greatest toughness, and will not rust, as it stands exposure and moisture. The other grade, they state, is made of clean, hard gray iron, and is therefore very serviceable as well as economical. They also claim that these tools are great labor-savers, and by giving style and beauty of finish a cement worker with a set of them is equipped for high grade work. The pamphlet is a very useful and handy one to have and may be had upon request.

EAGLE COOPERAGE WORKS, Circleville, Ohio, have recently mailed us a copy of their very artistic and exceedingly attractive Catalogue E which describes and illustrates their Eagle Mop Wringers and Buckets Combined, also Ohio Mop Heads and Detachable Handles. They state as follows: "We present our new catalogue and have spared no expense or labor to make it as complete as possible to insure its being kept as a book of reference. The increasing demand for the goods shown herein is conclusive evidence that our lines are the standard of comparison; the highest point of mechanics' skill; that none but the best material is used in their construction. It has always been our aim to keep our products in the front rank of merit, which enviable position we have earned by the strict adherance to the standard of highest qualities and true value." The company invites correspondence and the catalogue will be gladly and promptly sent to all interested parties.

LOWELL SCALE COMPANY, Lowell, Mass., recently mailed us a copy of their latest catalogue of Scales and Weighing Machines, in introducing which they state: "Since the issue of our last catalogue we have made several additions to our line of Scales. Hitherto we have said little about the quality of our Scales, preferring that their use should establish their reputation; but with an immense number of Scales now in use throughout the world to substantiate our claim, we do not hesitate to say that no scales are sold, at any price, that are superior to ours in accuracy or durability; and none at an equal price to ours in accuracy, durability and finish. We invite comparison. Especial attention is called to the "Premier" Scale and to the Bath Room Scale, both of which are new features in the catalogue, and among other weighing machines described are the "Portable Platform," "Double Beam," "Bag Rack," "Square Platform," "Drop Lever," "Meat or Fish," "Grocery or Butter," "Grain Dealers'," "Rolling Mill or Iron," and "Union or Family Scales." They claim that all the scales are of the highest grade of goods and consider their scales of the Portable Platform style and finished in natural finish the handsomest as well as the most accurate and durable scale on the market. The catalogue is well illustrated and is exceedingly interesting. A copy may be had upon request.

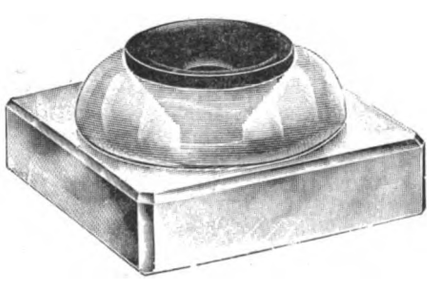
NEW GOODS AND SPECIALTIES.

NEW LAWN MOWER SHARPENER.

The Lawn Mower Sharpener which we illustrate herewith, is placed on the market by The Osborn Manufacturing Company,

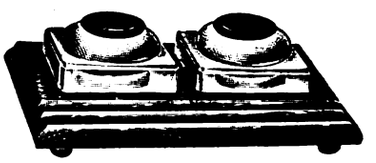
NEW LAWN MOWER SHARPENER.

Cleveland, Ohio. The holder is made of iron with neat, durable, "Tucker" bronze finish. The file has four cutting sides, which when worn can be turned by loosening the screws in the holder. The sharpeners are packed in compartment boxes, one of which



THE COMPARTMENT BOX.

is shown in Fig. 2, having hinged cover with neat two color label, making an attractive display package. The sharpeners are designed to retail at 25 cents each.

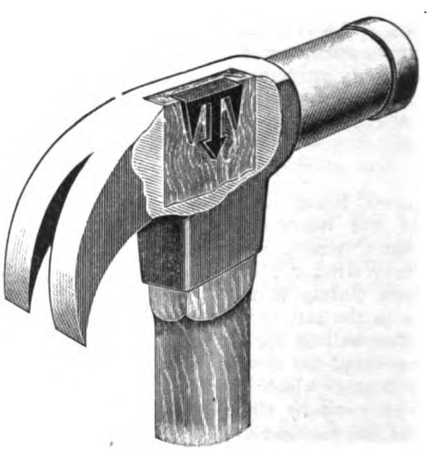


THE "CAPITOL" INKSTAND.

Cushman & Denison Mfg. Co., 240-242 West 23d Street, New York, N. Y., have recently placed on the market the "Capitol" inkstand, which we show in the accompanying illustration. It is

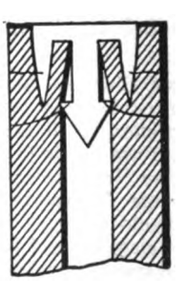
THE "CAPITOL" INKSTAND.

a large, handsome inkstand, suitable for the bank, office or library. There is no loss by evaporation, as the body of ink is kept from the air and dust and so rendered clear and fluid until the last drop is used. The depressing of funnel is avoided so that no time is lost and no consequent injury to pens. Just the right amount of ink is fed to the pen, and it is claimed to be impossible to get ink on holder. There are but two parts. By simply removing the funnel the glass well can be filled or cleaned in-



THE DOUBLE STAND.

stantly. The illustration is half size and the weight is nearly one pound. It can be furnished mounted on quartered oak, and with black funnel for black ink and red funnel for red ink. A pair of stands mounted this way (see cut, Fig. 2) is very effective.



THE NEVERSLIP ANCHOR WEDGE.

The Neverslip Anchor Wedge is a new article which is the only one piece wedge on the market, which not only insures a permanent anchorage of the handle but is claimed to preserve

THE NEVERSLIP ANCHOR WEDGE.

the life of the handle itself. The outside spurs engage the wood and bend it into the shoulders of the shank of the Wedge as shown in cut, Fig. 1. When the Wedge is driven into the handle the wood is forced up over the shoulders (See Fig. 2) and adds permanency as well as security anchoring the handle to the

SECTIONAL VIEW OF WEDGE.

hammer, axe or other handled tool. The anchorage is secured at its greatest wedging power, and by so doing closes the pores of the wood, making it practically impervious to moisture. It is made in 3 sizes, No. 2 O for hammers, No. O for axes and No. 2 X for hatchets. These Wedges are made by The Neverslip Anchor Wedge Company, Auburn, N. Y.

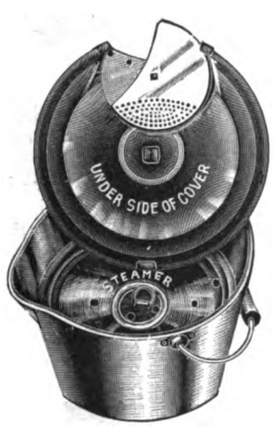
NEVER-BREAK GARDEN TROWEL.

Simplicity and strength are two main points which The Avery Stamping Company, of Cleveland, Ohio, have scored with their "Never-Break" forged steel garden trowels, as shown by the accompanying illustration. That the American gardening public

Digitized by Google

appreciates this tool immediately has been amply proved during the many years past in which the demand for same has grown from nothing to large proportions. The blade and socket of this garden trowel are both forged out of the same piece of

NEVER BREAK GARDEN TROWEL.

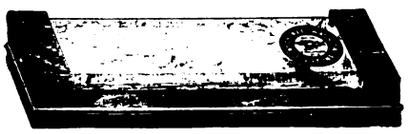


steel and are attached to a solid hardwood handle by means of a steel rivet. The tool is eleven inches long over all and will stand the most severe service without buckling or bending out of shape. The handle can not work loose and will not cramp the hand of the user, as it is large in size. The manufacturers do not claim that this trowel is a piece of jewelry but do assert that for all practical purposes and great durability it is indeed a jewel. The "Never-Break" garden trowels come packed in wooden boxes containing a gross in bulk, or they may be had in pasteboard cartons containing one dozen.

The Illinois Pure Aluminum Co., LeMont, Ill., are the The Illionois Pure Aluminum Co., LeMont, Ill., are the manufacturers of the "Gem" Aluminum Steam Cooker and Preserving Kettle, of which we give an illustration. It is made of pure aluminum, and is claimed by the manufacturers to heat in a third of the time required for any other metal. This Ket-

"GEM" ALUMINUM STEAMER.

tle combines the uses of a steam cooker with those of a general cooking kettle. The great conductivity of aluminum makes it possible to cook quickly and without scorching or imparting a burnt taste to the food, milk, rice, custards, oatmeal, oysters, lemons, vinegar, etc., without burning and with no need of



INTERIOR VIEW.

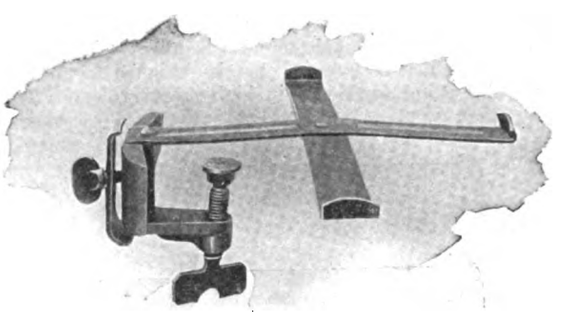
stirring. A steamer is provided by the use of a perforated disk so made as to engage the sides of the kettle in a circumferance about half way down. The steam being confined, all that is generated is thus utilized, doing the work in a short time and with small amount of fuel. To drain water from meats, potatoes, etc., by means of a simple automatic locking device the rim of the cover is tightly held to the rim of the kettle, and is so made as to provide a strainer, a steam tight or open spout, as desired. Liquids and solids can be strained or poured from the Kettle without the slightest danger of scalding or burning the hands.

PIKE'S COVERFAST OILSTONE BOXES.

The Pike Manufacturing Company are just putting upon the market their Coverfast Oilstone Boxes as illustrated herewith. This is an ideal mounting for an oilstone. It enables the entire length of the stone to be used and keeps the stone in perfect condition. To get the best results, an oilstone must be kept clean and always oil moistened. This is impossible with an unmounted stone or an ordinary loose-cover box. The Coverfast consists of a solid, hardwood box which cannot warp, and a strong, enameled metal cover, fastened by a pivot hinge which can be turned under the box instantly. The inside of the cover

PIKE'S COVERFAST OILSTONE BOXES.

contains a thick, felt pad which absorbs surplus oil and keeps the stone moist and clean and makes the cover practically air tight when closed. The ends of the box are flush with top of stone, thus enabling the tool to be pushed the entire length of stone without danger of nicking or blunting. The cover is never lost nor in the way. The stone is ever clean and moist. The tools are ever sharp, never nicked. The Coverfast Oilstone Boxes are offered with either Rosy Red, Lily White, or Indian Oilstones as preferred.



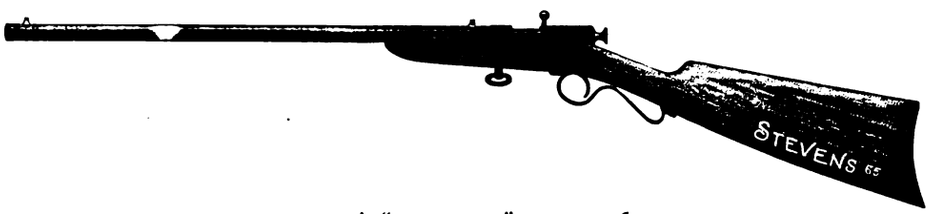
THE DIXIE IMPROVED BREAD MAKER.

The Standard Stamping Co., Albion, N. Y., are placing on the market the Dixie Improved Bread Maker, which we illustrate herewith. It consists of a pail with a mixing rod, a firm bearing attached to the under side of the cover, and possess-

THE DIXIE IMPROVED BREAD MAKER.

ing a clamping device (See Fig. 2) for attaching the mixer to the table, which is made of stamped steel and is non-breakable. The cut shows its interior construction by being broken away for the purpose. The cover is provided with a hinged door that

THE CLAMPING DEVICE.



may be used in watching the progress of the mixing when it may be necessary to add flour or other ingredients in the proper proportions. To lift the cover entirely the bail is removed when the crank cover and mixer can be lifted from the pail. The device is referred to as containing only the best material and as being simple and effective in its operation. It is furnished in two sizes: No. 1 and 2, the capacity of which is four and ten loaves respectively.

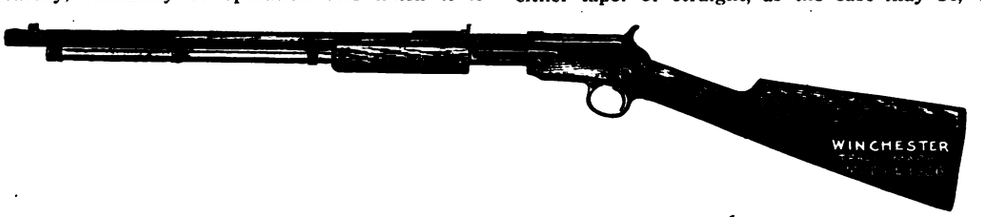
STEVEN'S "LITTLE KRAG" RIFLE NO. 65.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are placing upon the market the up-to-date and improved Rifle known as the "Little Krag," and has already become an exceedingly popular little Arm, especially among boys.

The "Little Krag" rifle in action is similar to the celebrated "Krag-Jorgenson," adopted by the United States Government. The Stevens "Little Krag" rifle has been aptly termed "a little brother" to the United States "Krag-Jorgenson" rifle. Is very simple in construction, by drawing back the hammer, which is made with a large knurled head. When rifle is cocked it is locked, so that it is impossible to open it until the hammer falls or is let down. Has a round 20-inch barrel, blued steel frame, single trigger, oiled walnut stock and forearm, rubber butt plate.



STEVEN'S "LITTLE KRAG" RIFLE, NO. 65.

For .22 Long Rifle R. F., .22 Long, .22 Short cartridges and C. B. Caps. Fitted with bead front and rear peep sights. Weight 3¼ pounds. List price, $5.00. The company has also been asked to furnish this rifle with an open rear sight, and will supply it with either rear peep or open rear, and open front sights. Rear peep open front sights will be regular, and rifles will be so supplied unless otherwise ordered.

WINCHESTER REPEATING RIFLE, .22 CALIBER, MODEL 1906.

Winchester Repeating Arms Co., New Haven, Conn., is engaged in placing before the Hardware and Sporting Goods trades the .22 Caliber 1906 Model Repeating Rifle of which we give an illustration herewith. This Winchester Model 1906 is a compact, light weight, take-down rifle, handling .22 Short Rim Fire Cartridges only. It is attractive in appearance and outline, and in accuracy, reliability of operation and finish it is

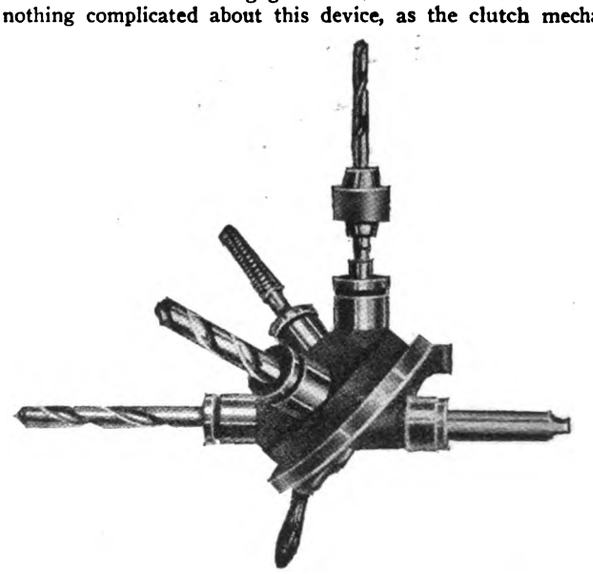
WINCHESTER REPEATING RIFLE, .22 CALIBER, MODEL 1906.

fully up to the established Winchester standard. The repeating and take-down systems used in this rifle are simple, positive and thoroughly tried, having always given entire satisfaction. This rifle is made with a 20-inch round barrel fitted with sporting front sight and an adjustable open rear sight. It measures 35¾ inches over all and weighs about 5 pounds; has a handsome straight grip stock 12⅞ inches long, with a drop at comb of 1⅝ inches, and at heel 2⅜ inches, finished with a rubber butt plate. The magazine holds 15 cartridges. Model 1906 rifles can be furnished only according to the above specifications.

The Winchester Repeating Arms Co. are also placing on the market the Winchester Supplemental Chamber which we illustrate herewith, which is a device that is designed to enable the use of popular pistol cartridges in high power rifles. There is

destined to be a demand for the chambers, as soon as their utility becomes known. They are made in the following sizes: .30 Winchester, .30 Army, .303 Savage, .303 British, .32-40 and .32 Winchester Special for .32 S. & W. and .32 Short Colt cartridges; .35 Winchester for .38 Colt New Police and .36 S. & W. cartridges; and .405 Winchester for .41 Colt D. A. Short cartridges.

BRAUNSDORF-MUELLER COMPANY, Elizabeth, N. J., have recently issued a supplement to their catalogue No. 3, which is intended to be inserted in the proper place in the catalogue. Among the articles described and illustrated are the New Century Screw Drivers, Machinists' Screw Drivers with Double Grip Handles, Insulated, Bull Dog and Midget Screw Drivers, Box Hooks, Masons' Jointers, Hand and Pin Vises, Carpet Hammers and Stretchers, Chisels, Drills, Tap Wrenches, Saddlers' Punches, Marble and Granite Workers' Tools. A copy of this interesting supplement may be had upon application.



THE DIAMOND IMPROVED TURRET ATTACHMENT.

The Powers Specialty Co., Detroit, Mich., are the manufacturers of the Diamond Improved Turret Attachment, of which we give an illustration. Every manufacturer is aware of the fact that much valuable time is lost on the drill press by changing drills and handling work several times for the different sized holes.

The Diamond Turret Attachment instantly converts the single spindle machine into a gang drill. It is superior to the gang drill in that every tool in use is in perfect alignment with spindle of machine, a job clamped to the table, or a heavy piece being operated on, subject to a series of operations, need not be changed. For drilling and tapping this device is so constructed that it responds at once to the reverse motion of the machine.

It also converts an ordinary lathe instantly into a turret lathe by simply inserting its shank into the tailstock spindle of the lathe. The attachment consists of two pieces, one of which is loosely mounted on spindle, which fits socket in machine spindle, either taper or straight, as the case may be, while the other is adapted to revolve on first mentioned piece, being suitably guided and carrying four spindle sockets, each having Morse taper hole to receive tools.

By the operation of latch the two pieces are locked together at the same time clutch is engaged and tool is in motion. There is nothing complicated about this device, as the clutch mechan-

THE DIAMOND IMPROVED TURRET ATTACHMENT.

ism and locking pin are both operated by downward pressure of latch, thus making it impossible to start tool until it is in perfect alignment. Tools not in use remain stationary.

HARDWARE MERCHANTS' AND MANUFACTURERS' ASSOCIATION OF PHILADELPHIA.

The Twentieth Annual Banquet of the Hardware Merchants and Manufacturers' Association of Philadelphia, Pa., was held Tuesday evening, January 30, at the Bellevue-Stratford Hotel in that city. There was a reception held by the officers of the Association in the Clover Room of the Hotel which preceded the banquet. The speakers and guests' table extended the full length of the room while those occupied by the other participants were smaller tables seating ten each. The room was handsomely decorated with flowers in which carnations and ferns were prominent. The various manufacturers were represented by the number of souvenirs which they presented which added materially to the attractive appearance of the banquet tables. The march to the Banquet Room was led by the President Thomas Devlin, who later called upon the Rev. J. R. Davies, D. D., to invoke the divine blessing. The *menu* card was original and unique, showing a banquet held in the olden time, touched up in water colors and having embossed thereon in gold the announcement, "XX Annual Banquet, Hardware Merchants and Manufacturers; Bellevue-Stratford, January 30, 1906." In addition to the *menu* were the names of the speakers and a list of toasts, the committee in charge, together with a complete list of those participating. A number of pages were left for the usual autographs.

After coffee and cigars, Thomas Devlin, the retiring President of the Association, introduced the toastmaster, Paul Griffith, in a graceful address in which he noted the appreciation of the honor conferred on him as President for two terms which was the constitutional limit. John R. Griffith, the newly elected President, was unable to be present owing to the illness of Mrs. Griffith. A resolution was unanimously adopted which read as follows:

Whereas, Thomas Devlin has served this association as its president for the last two years, giving freely of his time and talents to its welfare, be it

Resolved, That the heartfelt thanks of the Hardware Merchants and Manufacturers' Association be tendered to him for his successful conduct of its affairs, and that we, its members at this time of his retirement from office, all join in wishing him health, happiness and prosperity.

The Toastmaster then introduced Hon. John Weaver, Mayor of Philadelphia, who was down to respond to the toast, "Civic Patriotism," which he did in a very interesting manner, referring incidentally to the late reform movement in the politics of the State. Charles W. Asbury responded to the toast of "Common Honesty," in an address which was listened to with close attention and manifest approval of the sentiments expressed. The toast "Hardware History," was responded to by Rev. J. R. Davies, D. D. The toast, "The opening of a Chestnut Burr," was responded to by James H. Kennedy of the "*Hardware Dealers' Magazine,*" who treated the subject humorously, which was well received. The toast of "Commercial Organizations" was responded to by Mahlon H. Kline in which he referred to the success of commercial organizations generally, urging the consolidation of the many local organizations, which represented the different trades and lines of business, into one large general organization for the betterment of all.

The Banquet was brought to a finish with the singing of "Auld Lange Syne." A Male Quartet, composed of Paul Volkmann, Charles A. Huff, John C. McCauseland and Frank W. Huff, during the evening contributed vocal selections which were appreciated. The Bellevue-Stratford Orchestra also gave musical selections and Frank Conly contributed some interesting impersonations. Souvenirs donated by the following manufacturers were distributed:

SOUVENIRS.

Germontown Tool Works, Hammers.
Russell & Erwin Mfg. Company, Bronze Letter Opener.
McCaffrey File Company, Export and Domestic Files, Manicure Files.
Corbin Cabinet Lock Company, Sleeve Buttons.
Liveright Bros., "Whizzer" Manicure Files.
Pike Mfg. Company, Sharpening Stone in miniature, Pike selling assortment box.
Stanley Rule & Level Company, Brace and Bits.
Fayette B. Plumb, Incorporated, nickled Hammer Head Paper Weight.
Star Lock Works, miniature Padlocks.
North Bros. Mfg. Company, Yankee Screw Drivers.
Miller Lock Company, Padlocks.
Henry Disston & Sons, Spirit Levels and Screw Drivers.
Landers, Frary & Clark, Bread Mixers.

The Committee on Arrangements, who arranged and presented this most entertaining and enjoyable programme, was composed of Ed. S. Jackson, Harry C. Disston, Charles Z. Tyron, Henry C. Chriskey, Walter C. Devlin and Joseph J. McCaffrey, who performed their work in an admirable manner.

HOW SPONGES ARE GROWN.

Perilous Lives of the Natives Who Fish for Them—Profits to Monopoly.

The gathering and shipping of sponges is the principal industry of Nassau, the general work of which is done by the colored population, while the general profit is reaped by the white dealers on an export of probably half a million dollars a year. "Going to the mud" the natives call going out to the shallow, muddy seas around the out islands, where the sponges grow, and large fleets of two-masted schooners ply back and forth in the business. The men who go sponging have to work hard in the season, but seem a jolly set, and if they do not have a great deal to show for their labor, after their supplies are paid for, at a top-notch price, then, neither do they have many wants, and contentedly and improvidently live along and come upon the town in their old age. Down along the sponge wharves and about the sponge exchange is a good place to observe the sponge fishers, their ways and their wares, and lively times are there when the fleet comes in, gets its money, spends it, and goes out again.

As is known, the principal sponge fisheries, after those of the Mediterranean, are among the Bahamas, and along the Florida reefs, and each ground requires a different mode of working, owing to the varying depths of water. Some sponges are dived for, others hooked up with a long pole, and others still are dragged for with a trawl. The last-named way is not allowed by law in many places, owing to the process loosening the immature and useless stock, which drifts away into deep water and dies, or is washed ashore by the tides. Along the Mediterranean the diving is done by a stone-weighted man with a bag about his neck and a knife in his hand. He can only stay down two or three minutes—four at the very most among experts, and then, upon signal, is hauled rapidly to the surface. In deeper waters the divers' apparatus is used, and in ten-fathom water a man may stay down an hour, in fifteen fathoms a quarter of that time, and in twenty fathoms only a few minutes. These divers, along with the bag and knife men, are subject to diseases of which paralysis and lung troubles are the most common. The most of the sponges among the Bahamas are found in two or three fathoms of water. They are gathered by a man in a boat sculled by a boy. The man, with a 15 or 20-foot pole in his hand, leans over the side of the boat and peers down through the water glass—a wooden bucket whose bottom has been replaced by a tight pane of glass. This, when sunk slightly in the water, cuts off the surface ripple and makes all below visible. When he sees a promising sponge he hooks the two-pronged hook of the pole about it, twists it loose and hauls it up, and the process is repeated all day. He, too, is subject to various troubles consequent upon his cramped position and his exposure to storm and sun.

As is also known, the sponge of commerce is but the skeleton of living organisms and when first brought up from the water is a repulsive sight, being covered with a shiny black skin and filled with a gluey, slimy jelly. Upon exposure to the air the sponges die and are thrown into "crawls" or staked pens in the shallow water to rot. They are then trampled upon or beaten with sticks to be freed from the dead animal substance and are washed thoroughly and dried. As may be imagined, it is dirty, odorous work. When the fleets come into Nassau it is usually in the night, and by morning the sponges are arranged, best foot foremost, on the ground in the long yards and under the sheds of the sponge markets. Each kind is kept to itself and the layers are about two sponges deep, and after being sprinkled with water to plump them, are ready for the sponge brokers. These men go about among the numbered and marked sections, and, sizing up their quality, turn in sealed bids to the president of the sponge exchange. At a certain hour these bids are opened and the one offering the most gets the stock bid upon. So expert do these brokers become that bids of thousands of dollars will not vary more than a few shillings. After the brown caskets of sponges are bought—some of the sponges being 12 or more inches in diameter—they are gathered up into high-crated carts and hauled away to the sponge warehouses and dumped upon the floors. About the piles sit the clippers, colored men and women, with big shears in their hands. They pick up a sponge and snip it into sightly shape, removing blemishes and sandy spots, and toss it into any one of a half-dozen flat 4-foot baskets sitting by.

(To be continued.)

"You know Borem, don't you?"

"O! just enough to say 'how are you?'"

"Well, don't do it."

"What do you mean?"

"Don't say 'how are you?' to him. If you do he'll hold you up for ten or fifteen minutes and tell you."

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The convention was called to order on Tuesday morning, 30th ult., at 11 o'clock, by President H. F. Emery of Fargo, prayer being offered by the Rev. F. E. R. Miller, pastor of the First Baptist Church. A hearty welcome to Grand Forks was extended by Hon. George E. Duis, Mayor of the city. A feature of the opening session was the presence of Hon. E. Y. Sarles, Governor of North Dakota, who was warmly greeted and made a short address.

The report of C. N. Barnes, who has been the very efficient secretary of the association since its organization nine years ago, showed that there was a membership of 247, only five of this number being in arrears. This is a very large proportion of the Hardware merchants of the State. In connection with the meeting an especially creditable souvenir program was issued, this having been prepared under the supervision of Mr. Barnes. who is t be congratulated upon it.

More than 200 of the leading Hardware merchants of the State were in attendance and the association received a number of accessions to the membership.

H. F. EMERY, PRESIDENT.

ELECTION OF OFFICERS.

The following officers were elected for the ensuing year:
President, H. F. Emery, Fargo.
First Vice-President, J. S. Cole, Lisbon.
Second Vice-President, J. H. McCollom, Hope.
Third Vice-President, E. L. Garden, Souris.
Secretary, C. N. Barnes, Grand Forks.
Treasurer, H. T. Helgesen, Milton.
Executive Committee, E. E. Elliott, Sanborn.
Delegates to next meeting of the National Association: The President, Secretary, Hubert Harrington, Fargo, and G. W. Wolbert, Bismarck.

It was decided to hold the next annual meeting at Minot, a comparatively new commercial centre, in the northwestern corner of the State. This decision was made subject to the decision of the Implement Dealers' Association to meet at the same place.

LOCAL ASSOCIATIONS.

H. F. EMERY.

W. C. Webber of Rochester, Minn., made an address on the advantages of organization. Mr. Webber is secretary of the Olmstead County (in which Rochester is located) Retail Dealers' Association, an organization which has done effective work for its members. Mr. Webber stated that there had been a wide inquiry as to the methods adopted by his association, and over 200 other counties had since been organized on its plans.

He believed that in a few years the State associations would become federations of the county associations. By its Systematic campaign of education the Olmstead County Association had been able to cut down the business of the mail order houses in that section fully 70 per cent.

SCIENTIFIC SALESMANSHIP.

Alex. W. Crozier of Minneapolis, Minn., discussed "Scientific Salesmanship" in a paper which attracted much attention. Salesmanship, the speaker said, is the art of selling the article to be sold at a profit. A great many merchants seem to think that success consisted in being able to handle a large volume of business and to get customers away from competitors, rather than to be able to show a profit on the right side of the ledger at the end of the year. The science of successful salesmanship is organized knowledge of the art of selling.

Three mental steps must be taken in every sale. 1. Secure attention. 2. Inspire confidence. 3. Create a desire to purchase the article you have for sale at a profit. Eminence in the profession of successful salesmanship can only be obtained by a mastery of the situation. Many do not succeed largely because they do not attempt large things.

GASOLINE AND REFINED OILS.

A very instructive address was that of W. J. Holton, of St. Paul. Minn., on "Gasoline and Refined Oils," from the standpoint of an expert.

M. L. COREY'S ADDRESS.

One of the most interesting addresses of the convention was that of M. L. Corey, secretary of the National Association, in the course of which many features of the work of the national organization were covered. The speaker urged hearty co-operation between the State and National bodies. The speaker urged the importance of sustaining the mutual insurance companies and gave some statistics showing the benefits of these.

Mr. Corey also devoted considerable attention to the catalogue and mail order house competition. In solving this problem, he said, the jobbers and retail dealers stood side by side. Considerable is being done along the lines of a campaign of education. About 70 per cent. of the manufacturers of Hardware have discontinued selling to the catalogue houses. Fifteen per cent. more have refused to sell them unless they can control the price to consumers and place it on the same basis as that of the regular dealers, so that the catalogue houses are finding it more and more difficult to secure goods. Some of the latest catalogues have eliminated some of the standard lines of goods, obviously because they can no longer obtain the goods. The speaker urged the dealers to meet the competition of the mail order houses by employing the methods of the latter. so far as they were correct methods. He urged liberal advertising and said the local newspapers were the best channels for retail dealers.

In the campaign of education, he said, it was often an easy matter to demonstrate the difference in quality between the lines of goods sold by the catalogue houses and those handled by the regular dealers. Mr. Corey suggested that the dealers had themselves to blame to some extent for trade lost to the mail order houses. He suggested some things that might be done to improve conditions in this respect.

* * *

PAINTS AS A HARDWARE LINE.

V. W. Hartman of St. Paul, Minn., made an adress on "Paints as a Line to Be Carried by Hardware Dealers." Mr. Hartman said in part that the Hardware store was the natural and correct place for Paints to be found by the consumer. The man building his home comes to the Hardwareman for his Nails, Door and Window Fittings and the Hardware necessary in the construction of his home. The progressive dealer fills himself full of Paint facts, and he gets his clerk full of Paint, too. You cannot have too much enthusiasm about your business. The more you have the more you will give to your clerks; the more you will impress your customers that you believe in the worth of the goods you sell, and this is half the battle of selling anything.

The President, H. F. Emery, delivered his Annual Address which was an able one, and full of the kind of wisdom the Hardware Dealers rejoice in.

SECRETARY'S ANNUAL REPORT.

The annual report of C. N. Barnes, Grand Forks, secretary, was an interesting document and touched on many important matters connected with the association work. We make the following extracts from it:

It is with considerable gratification that I present at this time the ninth report that I have been privileged to submit to you, as we have much to feel encouraged over in the forward stride this association has made during the past 12 months.

GRIEVANCES.

On December 21 last I addressed a letter to every member of this association asking them to file with us any complaint they had. so a proper investigation could be made and a report presented at this meeting. We have had but one response from these letters. which leads us to believe that the Hardware business throughout the State is in a very satisfactory condition. inasmuch as our membership is larger than ever before and with fewer complaints from them.

MEMBERSHIP.

We have to-day 247 members, which is the largest number this association has ever enjoyed, and only five of this number are in arrears. Considering the number of Hardware dealers in the State to draw from, this should be very encouraging.

Digitized by Google

To secure this increased membership has necessitated a great deal of correspondence and in consequence quite an expenditure for postage. On account of the very large area covered by North Dakota and the comparatively small number of Hardware dealers in the State. it has never been considered feasible to adopt any other method of securing members than by correspondence, but I consider this a very opportune time to discuss other practicable ways to increase our membership and would be pleased to have the topic taken up while we are together.

SHIPPING TAGS FOR DIRECT SHIPEMENTS.

I am in hope that our members have complied with the resolution adopted at our last annual meeting which requests them to furnish their own shipping tags to jobbers and others when placing orders with them for goods to go direct on their account. By carrying out the spirit of this resolution it would aid very materially in our work.

DIRECTORY OF HARDWADE DEALERS.

One of the most difficult features of the work in this office is to secure a correct directory of the Hardware dealers in the State. I have tried every way I can conceive of to secure it. but as yet I have not made the success desired in its compiling. I am led to believe that the only way to collect an absolutely correct list of the Hardware merchants in the State is by their co-operation.

The list that is printed in our souvenir programme this year is reasonably correct, but there are many names that should be included in it that I have been unable to secure and there are others there that in all probability should not be. Before the adjournment of this meeting I will appreciaate exceedingly having my attention called to any omissions or errors found in it, as it is very important that a correct directory should be secured of the Hardware merchants of North Dakota if we expect to progress.

A. C. BARTLETT'S ADDRESS.

The feature of the Wednesday morning session was a notable address on "Business Success," by A. C. Bartlett, president of Hibbard, Spencer, Bartlett & Co., of Chicago, which attracted much interest. Mr. Bartlett said in part:

The evolution of trade has been as marked and rapid as has been the growth and development of this country. New conditions have demanded, nay, extorted, new methods. Merchants have as a rule reluctantly acknowledged the innovations which set at naught their preconceived ideas of the manner in which legitimate business should be transacted. This statement is applicable alike to the city and country dealer, to the wholesaler and retailer. The "good old days," about which we elderly men love to talk, have passed away, and the new era finds us wondering if profitable merchandizing will not eventually be numbered among the lost arts.

The jobber's reminiscenes carry him pack to the time when his customers visited his office and sample room twice each year.

MADE SELECTIONS AND PURCHASES FOR SIX MONTHS

to follow, and in the interim between visits sent occasional orders by mail to keep the assortment complete. The heads of wholesale houses and the proprietors of retail stores enjoyed a personal acquaintance, which, as a rule, ripened into lasting friendship. To-day the jobber rarely knows his customers except by name, and the pleasant social features of merchandizing are simply memories of the past.

He is represented by traveling salesmen, who scour the country for trade; by territorial managers, who look after the filing of orders, and by credit departments, which keep in touch with the financial and moral responsibility of the men who distribute the goods to the consumers. Commercial business has become more and more mechanical and necessarily. therefore, less and less sentimental. It has been reduced from the plane of sociability and good fellowship between principals to that of a comparatively inflexible system.

I take it for granted that the older retail merchants in common with the jobbers deplore this change from personal intercourse to long range transactions, however much the visits of well informed and genial representatives may lighten the labor incident to the making of purchases. The change, too, subjects the retailer to the temptation to mix his stock, to its detriment and to his loss of profit.

THE MERCHANT WHO BUYS GOODS

(outside the staple lines) of any good fellow who comes along is bound to have a heterogeneous assortment that is neither attractive nor conducive to fair profits; neither can he have a strong hold upon his customers.

The jobber is, generally speaking, compelled to adhere year after year to the same manufacture and the same brands of goods if his original selections have been wise. The jobbing house which should, for example, solicit your business on Steel Goods this year for Batcheller, next for Geneva, the third for Ashtabula, and the fourth for Iowa Farming Tool Company's, would make little impression on your mind with whatever it might offer the fifth year. It goes without question that this is true, to an extent. with the offerings to consumers by the retailer. If a carpenter buys a good Chisel he wants the same brand when he makes his next purchase.

Further than this, every good Tool sold a mechanic is a first-class advertisement for the dealer to every other mechanic with whom the former associates, and the advertisement costs the latter neither money nor friends. The merchant who buys his Locks and other Builders' Hardware here, there and elsewhere never fitted up a new house to his satisfaction or the satisfaction of his customer, and the odds and ends of a broken assortment, to be sold at a liberal discount, materially lessen his profits.

* * *

THE CATALOGUE HOUSE.

Another comparatively new feature in the commercial world is the advent of the catalogue house, the bane of the retailer in every city, village and hamlet throughout the country. The output of these houses is so large that their capital and expenses are small compared with the aggregate capital and expenses of the number of retail stores, which in combination sell an equal quantity of goods. This condition, together with the variety of articles which these houses carry, and from which the consumer may select, and the willing prepayment in cash by the country buyer, renders the competition fierce and frequently unprofitable.

These houses, which were originally started in a small way, were in their incipiency considered harmless and legitimate, and their wants were as freely supplied by the jobbers as were the wants of other dealers. As they grow in size and strength they become valuable customers to jobbers and manufacturers and, I regret to say, were not cut off by the former or by any of the latter until long after they had become a menace to the merchants whose business it was to supply the consumers in their respective localities.

This lack of promptness on the part of jobbers in declining to sell to catalogue houses was due in part to the human—perhaps greedy—desire to sell goods. but more especially to a lack of realization on their part of the real damage which their customers were sustaining at the hands of catalogue competitors. I question whether retailers themselves at the outset had any just comprehension of the evil which the principle itself engendered.

The jobbers are making strenuous efforts to convince all manufacturers that they should decline to make shipments not only to catalogue houses, but. to any dealers who will supply those houses. More than this, the jobbers are curtailing, so far as possible, their purchases from those manufacturers who have not joined this movement.

* * *

But

BUSINESS SUCCESS DOES NOT MEAN THE MAKING OF MONEY ONLY;

it means the making of better men and the improving of conditions in the community. Every merchant who has a handsome show window, a well kept and orderly stock of goods, who adopts and pursues the cleanest and best business methods, not only develops himself. but exerts an influence which makes for higher and better things in the town in which he lives. Not only does his example lead his neighbors to make improvements, but he is laying a section of the foundation for the education and mental development of the rising generation. Try as we may to adjust the results of our labors to ourselves, we know at heart that we are working for our own and our neighbors' children. We are in reality laboring with the hope that our progeny may suffer fewer hardships and receive greater educational advantages than were accorded to their parents, and we lay the main stress on the educational advantages. The world is coming to know more and more certainly that knowledge is power; that knowledge means a wider vision, a broader usefulness, and, therefore, greater real happiness. Men are learning that even the higher education is not necessarily wasted upon business men, whether they live in the country or in the city.

ALWAYS CARRY IT THROUGH.

There is no luck, for all practical purposes, to him who is not striving and whose senses are not all eagerly attent. What are called accidental discoveries are almost invariably made by those who are looking for something. A man incurs about as much risk of being struck by lightning as by accidental luck. There is perhaps an element of luck in the amount of success which crowns the efforts of different men, but even here it will usually be found that the sagacity with which the efforts are directed and the energy with which they are prosecuted measure pretty accurately the luck contained in the results achieved. Apparent exceptions will be found to relate almost wholly to single undertakings, while in the long run the rule will hold good. Two pearl divers, equally expert, dive together and work with equal energy. One brings up a pearl, while the other returns empty handed. But let both persevere, and at the end of five, ten or twenty years will be found that they have succeeded almost in exact proportion to their skill and industry. Stick to the thing and carry it through says *Success.* Believe you were made for the place you fill, and that no one else can fill it as well. Put forth your whole energy. Be awake—electrify yourself—go forth to the task. Only once learn to carry a thing through in all its completeness and proportion and you will become a hero. You will think better of yourself. Others will think better of you. The world in its very heart admires the stern, determined doer.

♣

Frank A. Bare, Mansfield, secretary of the Ohio Hardware Association reports that the enthusiasm caused by the coming convention at Canton is spreading all over the State. Traveling men are taking great interest in the gathering and giving the names of prospective members to the secretary, who is thus enabled to get on their track and secure their affiliation with the association. Mr. Bare has also received many letters from the members expressing their hearty approval of the policy of making the Question Box a greater feature of the annual gathering than ever before.

♣

While we are reasoning concerning life, life is gone; and death, though perhaps they receive him indifferently, yet treats alike the fool and the philosopher.—HUME.

THE CHOICE BY CLAWSON.

Just what particular new leaf to turn over this season; there was the question up against the House of Hendrick, or rather, against the senior partner of the house, Clawson, who was the whole thing. They always did investigate some revolutionary reform each New Year and of course—but what?

Out of the general office the head bookkeeper glanced uneasily through the glass panel of the door at his chief and grumbled to the nearest clerk:

"Wonder what the old man is up to now. Some new fad in his head I suppose, to apply three times before each meal and once the rest of the time to all of us poor devils who work for him. I'm glad New Year only comes once every year or he would get evolution germs on the brain."

The clerk glanced apprehensively at the private office, then down the long row of well-stocked shelving.

"Well, I am in no hurry to know; contented with the thought that it is bad enough."

"One thing a fellow here can always get consolation out of. We always know that whatever happens it isn't as bad as it will be later on."

"Oh, yes, we can always be happy thinking the worst is yet to come. It's your turn this year, though. We ought to escape after our last annual renovation."

When Mr. Silas Clawson finally closed his desk and put on his coat he was still unsettled as to "just what it should be." He thought the matter over all the way home and during the evening his thoughts were divided between his family, his paper and that ever present phantom of the office; in fact, the division of his interests so interfered with his progress that the entire evening passed without his having really enjoyed the one or finished either of the other two. He rather favored an overhauling of their entire management; still, the results of the past year had been most satisfactory and they always kept right up to date as they went along. However, that was the only department that had not been wholly overhauled for some time; yes, it ought to fall there, even if it wasn't needed—that is, unless he could think of some place where it was. He had no complaints in mind except that undercurrent of dislike that he well knew his clerks felt towards himself; that he could not avoid. He could make strict enough rules to govern their conduct and could enforce them, which he did; but he could not compel them to like him personally. That was *their* leaf to turn over and one he could not make them turn unless they wished to.

He leaned back in his chair to think the matter over from a different point of view. The action brought his eyes upon one of his favorite business mottoes that he had insisted on introducing into the house: "Do it thyself." The words caught his eye and pleased him mightily with his own sagacity. A similar motto faced the desks of all his employees at an inestimable profit to the firm. How many times he had actually seen time and money leave the house by just that spirit of doing things themselves among the employees instead of leaving certain details for some fellow clerk to carry out. That was certainly a happy hit of his in connection with his elaborate system of individual responsibility. What a system that was. It had taken him days to think it all out, that is, he had been studying over it that long as a sort of side issue, while conducting the general management of the place. Then, by another system he had impressed them with the commercial value of time; no more idling away hours that he was paying for in making elaborate plans. Action, quick action, was the watch-word and most of them had learned it. To be sure they made some blunders because of the haste but better that than puttering around doing nothing but think out plans. Well, he must get to work again upon some scheme to rejuvenate his advertising department or some other department, it didn't matter much what. But it would never do to let the New Year pass without showing some active line of improvement. The year before he had introduced a new stock-keeping system; that also represented a large amount of gray matter on his part and a lot of extra work for his clerks; that was what they were paid for, so why need they kick. And the year before that—pshaw, he must get down to business of the eternal *NOW*.

The evening long ago had put itself on the retired list; so had the rest of the family; but he still sat in his chair thinking the matter over, without coming to any decision. Finally he arose with a grunt, turned out the lights and started to retire; no, he would just give his feet a little extra toasting first before the fire.

Again, he tried to think over his problem but other rambling fancies, schemes, incidents would come into his mind to bother him. If he could only concentrate on some one——

Just then the firelight fell with special brilliancy upon his favorite motto, "Do it thyself." Just what idea it brought to him he did not say but he went off to bed presently in a decidedly thoughtful mood.

When New Year's morning gave place to the beginning of another year's efforts, the employees of the "House of Hendrick, Wholesalers, Retailers," and, as one of the clerks always insisted, "curtailers," were a little surprised at not being summoned to the office for instructions as to carrying out some business revolution, but none came. Mr. Clawson arrived promptly, walked with an unusual briskness to his private office and went at certain papers on his desk with the most complete application. Evidently he was not burdened with anything but the work before him.

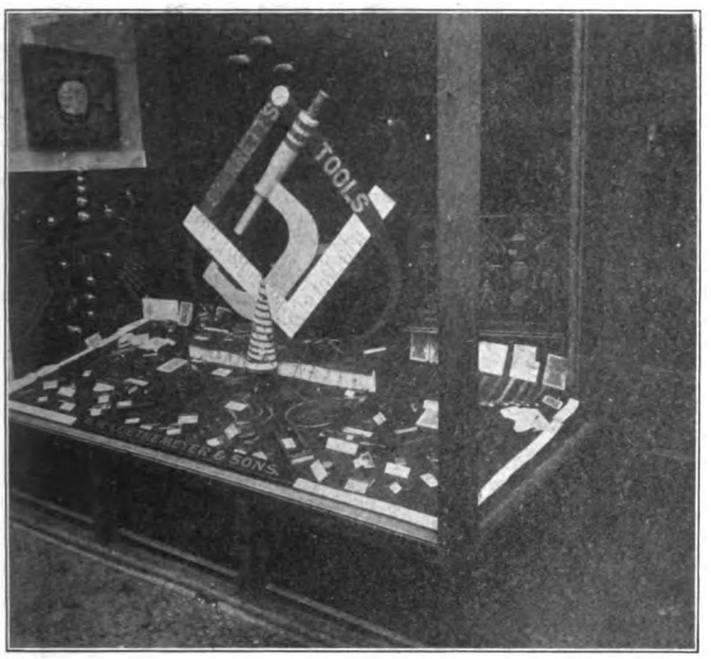
"Wait," whispered one clerk to another. "We will catch it later on. The old man is behind for once."

The prophesy was not fulfilled. Day after day business went on in its usual brisk and up-to-date manner, every man on the force with plenty to do and Mr. Clawson himself working a little harder than any of the others. The strange part of it was that he never seemed fresher or more vigorous in spite of extra efforts. Not only his clerks but his business associates, his friends and family all noticed the change in him. All knew that he was accomplishing far more than he ever did before; still he had time to accompany his wife to evening entertainments, went to church Sunday instead of to his office, took an active interest in the live topics of the day, found time to read the more important new books and to imbibe a smattering of the current magazines. No one read his own trade journals closer than he did and he was also a close student of advertising journals, was well posted in catalogues, price-lists, new goods and new trade issues and conditions. For the first time in years he took a few days off to attend a trade convention and while there proved to be one of the most interesting speakers in the general discussion because he really had something to say worth saying and knew enough to quit when he got through. Commercial men no longer found him too busy to see them. He always had time to give them a few minutes or else send out some good reason for not doing so and suggest some other time when he could meet them. All in all, the over-worked, over-crowded, over-worried and somewhat overcrabbed Clawson of old had given place to a prosperous man of business who managed in the midst of his work to enjoy life a little as he went along and with whom it was a pleasure to associate.

The following New Year told the story, or rather Clawson himself told it. This time the usual annual round-up came to his employees but, instead of coming unwillingly into his presence in fear of a general tearing up, all came with the utmost respect and friendship for their hard-working employer.

"As you know," he began, "it has been the custom of the house to make some radical changes every New Years. Sometimes these have been improvements. Sometimes, I am frank to say, they have either failed of their purpose or have entailed more lost time and expense in their introduction than they were worth. Last year I adopted a new plan; of trying each change myself first. It had occurred to me sometimes that there was a lack of concentration in some places and I began to watch my own life for that fault. I found lots of it. Much of my time I was prone to spend thinking out elaborate plans while pretending to attend to something else. The result was I acquired the habit of scattering my energies and did none of my work as promptly or as well as I should. All this I determined to remedy. When I had a letter to answer, I answered that letter and gave no attention to the collection of Smith's account. When I took up the account I did not allow myself to think about some flurry down in Wall street and worry over its effect on regular business. When I shut the office door I left my business behind, enjoyed my ride home by close observation of what was going on around me outside of my own business groove. At supper I ate, talked and enjoyed myself and did nothing else. Afterwards took an hour with the evening paper and knew more of what it contained than after four hours' with a dozen other things on my mind. Then I was ready for some other recreation, a romp with the children, an evening out with my wife or at home with a good book or magazine or music. But, mind you, I did not try to do two things at once. I either worked or played or read or sang or enjoyed myself and nothing else. The result was that I came back to the office next day feeling refreshed and actually jolly. Instead of going at work in a half-hearted dragging way, I fairly jumped at it because I had had enough recreation and rest to whet up my activity; I wanted good hard work then, and I usually got it.

Another thing this lesson taught me was in regard to sleep. A man can sleep half of his life and still be tired. Get tired first by hard work; then steady your nerves down by concentrating your entire attention on some recreation that will rest your brain; then go to sleep and stay there so long as you really sleep and when you begin to doze get up and hustle; you've had sleep enough. Lord Wellington used to say that when a man found it necessary to turn over it was time for him to turn out and that is about true. As many people half sleep over their books from too many hours in bed as from too few; mind you, I don't say they get too much rest. The trouble is they don't get any.



Digitized by Google

They take their cares to bed with them and drag their slumbers through their work the next day.

There, now, I have explained what gave me my extra time and better health the past year, as well as what new leaf I turned over. I have written the formula in one word to hang upon the wall 'CONCENTRATE." That is all, I believe, a happy New Year to you—and now let's get down to work."

A HANDSOME DISPLAY OF "STARRETT" TOOLS.

H. W. Leutkemeyer & Sons, Cleveland, Ohio, had a very attractive window display which compelled the admiration everybody has for an assortment of fine tools, the most useful and

A HANDSOME DISPLAY OF "STARRETT" TOOLS.

handsome outfit that could adorn the show window. It shows considerable ability in making a complete and effective display. No finer goods could be selected for the purpose than those emanating from the factory of The L. S. Starrett Co., Athol, Mass.

A SUGGESTION FOR FIREARMS DEALERS.

Granted conditions favoring its establishment, every store dealing largely in firearms, particularly rifles and revolvers, would find a properly equipped target range worth each year many times its cost of keeping up. Customers like to know what they are buying, especially when turning from an old and tried arm to another of different type, make, or model; moreover, there are a large percentage of buyers utterly lacking in gun lore, to whom all that a salesman can say concerning the merits of an arm is so much pointless expenditure of breath. To them five minutes of practical demonstration would be more convincing than hours of argument. Confront them with a target and let them burn a little powder. It is cheaper to hire a dollar-a-day man to clean guns than to let a high-salaried salesman waste time and breath on a customer who has the Missourian desire to be "shown."

Especially in the larger cities is the habit of carrying pocket-arms gaining ground. People are growing to distrust the protective ability of the police and detective systems. Rarely a day or night passes without its record of hold-ups and burglaries. Lives and property must be defended against the lawless, and so we find at the revolver counters of the sporting goods stores men who have never before owned any sort of a weapon. To them the multiplicity of makes, models and calibers is confusing. The matter of selection is of too great importance to be left to chance. The salesman, if consulted, will invariably recommend a high-priced revolver, and for perfectly legitimate reasons, but the buyer will compare the offered weapon with a cheaper one and fail to discover any marked difference in appearance. He becomes dissatisfied and suspicious, a state of mind likely to carry him to the store of some competitor, if not eventually to the pawn-shops or second-hand dealers. Right here the testing range comes in handy—and let the test be of the cheaper arm for which he has shown a preference. In 99 cases out of 100 its performance will be satisfactory from the buyer's viewpoint, for the majority of American made revolvers have a way of shooting reasonably close to the bulls-eye, and there are plenty of dollar-a-day men who are competent to make good scores at short range. At any rate the customer is convinced that the goods are being offered him solely on merit. and he has been furnished understandable data as to the importance of caliber and penetration. Gallery charges can now be had in nearly all rifle and revolver calibers. Usually there is room in store basements for at least a 10-yard range, bullet-proof shields around the target are easily and cheaply provided, and electricity has solved the problem of lighting. A testing range as part of the equipment of a modern sporting goods store is all right in theory and better still in practice.—W. H. ESSLINGER in the *Sporting Goods Dealer.*

THE RULES OF THE ROAD.

"On a bridge in the city of Victoria, B. C., there are more collisions every day than upon any other bridge in the world," announced an elderly gentleman in a group discussing horses.

"Railroad collisions, do you mean?" queried a youngster.

"No, sir; I don't mean railroad collisions. I mean head-on collisions between vehicles, and also face-to-face collisions between pedestrians. And the reason for them all is that that bridge is the spot where the American rule of the road clashes with the English rule of the road. We always keep to the right and the Canadians there keep to the left. And the result is one continual mix-up.

"Did you ever stop to consider how strange it is that in a custom of this kind, which is so important and so often used, the American colonies should have worked out a rule diametrically opposed to the mother country? Why is it that in England people on the road always keep to the left, while in the United States and most parts of Canada they always keep to the right?"

Nobody ventured to reply. "Well, why is it," continued the speaker, "that we now call the horse that is nearest to us the 'off' horse and the horse that s farthest away from us the 'night' horse?

A young man murmered a few indistinct words about "ox teams."

"Right you are!" exclaimed the veteran. "The humble and obsolete ox is responsible for all those collisions up in Victoria. In England, way back before they ever had carriages or vehicles of any kind, when armored knights on horseback used to be about the only people that met on the roads, the custom of keeping to the left sprang up, and most reasonable it was. Because in those days the knights were always looking for trouble, and they never knew who was going to hand them a blow from a broadsword. So they always took care to pass other travelers with their sword arm towards them, simply as a matter of precautionary self-defense. This naturally meant that they should hunch over to the left edge of the road and present their armed right hand to the passerby."

"Isn't that a pretty fanciful explanation?" asked one of the circle, who was bolder than his companions.

"Yes, I think it is, and I only gave it to you for what it is worth. But it's funny that, reasoning in the same way, you can explain why Americans keep to the right. Because in Colonial days the peril on the road did not come from the travellers, but from the savages lying in the ambushes in the surrounding forests. Therefore, the New England settler took care to present his right arm to the source of possible danger, and consequently rode on the right side of the road. His reasons were unconsciously the same as those of the knight of King Artnur, but by acting upon them he created an entirely different custom.

"But I don't think it was the knight or the colonial horseback rider that originated either of the national rules of the road. It was the carter and the ox driver. The carter was the person who made the greatest use of the English highways and byways as soon as the country developed enough to need a transportation system. Long caravans of heavy drays passed over the roads, each driven by a man who rode upon the left-hand animal was originally picked out, I suppose, because a horse is mounted on the left side, and because a position on the left side of the pair brought the right arm over into the centre of the field of action, and permitted free exercise of the whip. Being mounted on the left-hand horse, the carter naturally drew over to the lelt-hand side of the road when he wished to dismount in order to avoid the mud in the middle of the road, into which he would plunge if he pulled over to the right side and then got down to terra firma. And having dismounted on the left side, he would naturally trudge along that edge of the road with his team, and other teams similarly situated would, of course, keep to the left to avoid criss-crossing.

"It's odd," concluded the veteran, "that in the different provinces of Canada different customs in the matter prevail. In Ontario and Quebec drivers turn to the right, and in Nova Scotia and New Brunswick they turn to the left. In France the rule of right prevails; in different parts of Germany and Austria different habits obtain. You often have to change from left to right, or vice versa, when crossing some unimportant frontier."—*The Spokesman.*

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

A QUESTION OF IDENTITY.

There seems to be a fallacy among some dealers that for them to push an advertised article will cause them to lose their identity in the locality. This is entirely erroneous. If you will take up your morning paper and read the advertisement of any one of your large stores, you will find that they give special prominence to advertised articles.

They do this because they realize that although everybody in their city who might possibly buy goods of them does not know them; they all know of the advertised article. They realize at the same time, that it is of much importance to proclaim the fact that they stock these advertised articles which are so well-known in their community. Whether a woman has ever been in John Smith's or John Jones' store makes no difference. If she wants to buy JAP-A-LAC or some other advertised article, she will go to whichever store keeps it, as soon as she knows they keep it. Neither Jones nor Smith lose identity in a case of this kind; they thus get an opportunity of making a *permanent customer* out of this woman.

Thousands of customers are diverted from one store to another every day in the year because of some particular article they can get in one store and not another. A store that keeps the articles which are most in demand, is therefore the largest gainer of this floating trade. We believe you are sharp enough to not let the trade float, if you once get hold of it. You can lose nothing by the experiment which we now suggest.

JAP-A-LAC is known by almost every magazine reader in your community. Put your JAP-A-LAC in your window, keep it near the front of the store, advertise the fact that you keep JAP-A-LAC, and see what will happen. By doing this you will identify yourself with the best known article of the kind made. You will secure a great many new customers. You will give no excuse to your old customers for going to some other store for JAP-A-LAC, and we think there will be no question of identity after you finish the experiment.

PUSH JAP-A-LAC

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED JANUARY 22, 1906.

396,386. SASH FASTENER. F. A. Bascom, Greenville, Pa.
396,429. DOOR CHECK. C. A. Pratt, Toledo, Ohio.
396,436. MOP WRINGER. F. R. Smith, Bennington, Vt.
396,482. FIRE BAR. H. Hartung, Berlin, Germany.
396,488. DOOR CHECK. F. A. Hoover, Kimeo, Kans.
396,498. WASHING MACHINE. C. D. LaPort, Carson, Iowa.
396,516. DISH WASHER AND DRAINER. U. B. Smith, West Liberty, Iowa.
396,548. SASH FASTENER. C. H. Dexter, Annapolis, Md.
396,596. PADLOCK. A. Peterson, St. Paul, Minn.
396,668. DUST PAN. P. A. Spicer, Marshall, Mich.
396,669. DUST PAN. P. A. Spicer, Mich.

PATENTS ISSUED JANUARY 23, 1906.

810,408. MILK PAIL AND STRAINER. A. T. Genderson, Dunbar, Iowa.
810,409. RATCHET BRACE. G. M. D. Heard, Worcester, Mass.
810,411. DOOR CHECK AND CLOSER. W. K. Henry, New Britain, Conn.
810,440. SASH LOCK AND FASTENER. F. M. Straube, Boulder, Colo.
810,457. LAMP BURNER. Martin O. Amundson, Ivanhoe, Minn..
810,488. SHOVEL GUARD. G. W. Jarvis, Townsend, Mont.
810,530. SAW. John Guedel, Indianapolis, Ind.
810,549. WASHING MACHINE. A. G. Moeckel, Dallas, Texas.
810,584. LOCK. Wm. S. Sutton, Rockford, Ill.
810,599. WRENCH. E. K. Ansorge, Greenbay, Wis.
810,614. AX HOLSTER AND GUARD. J. G. Busch, Potter Valley, Cal.
810,657. WRENCH. Peter Kones, Castlewood, S. D.
810,692. DOOR SECURERS. Kund Anderson, Tacoma, Wash.

PATENTS EXPIRED JANUARY 29, 1905.

396,751. WRENCH ATTACHMENT. C. F. Laganke, Lorain and T. E. Gawn, North Amherst, Ohio.
396,755. ADJUSTABLE STRUT FOR VISES. F. Michel, Blair, Nebr.
396,817. CLOTHES LINE FRAME. F. W. Hofele, New York, N. Y.
396,856. HOE. R. M. Brown, Fort Gaines, Ga.
396,857. WRENCH L. F. Carstensen, Bridgeport, Conn.
396,877. WRENCH. C. H. Kennedy, Greenburg, N. Y.
396,902. COMBINED CORN SHELLER AND WASHBOARD. H. M. Stukes and O. P. Reid, Aguilases, Tex.
396,915. LOCK CASE. C. M. Burgess, New Britain, Conn.
396,960. PADLOCK. H. F. Sise, New York, N. Y.
396,970. WRENCH. J. VanAusdall, Keokuk, Iowa.
396,023. NUT CRACKER. F. J. Rabbeth, Boston, Mass.

PATENTS ISSUED JANUARY 30, 1906.

810,918. DOOR BOLT. E. E. Cunningham, Roselle, N. J.
810,927. SLIDING DOOR LATCH AND LOCK G. C. Emmert, Mount Morris, Ill.
810,962. METAL WINDOW SCREENS. A. H. Mix, Burlington, Vt.
810,964. SLEEVE IRONING BOARD J. F. McArthur, Detroit, Mich.
810,965. SCREEN. W. W. McCallip, Columbus, O.
810,984. TOOL FOR OPERATING UPON JAR COVERS. W. C. Smith, Coldwater, Mich.
810,986. GRATE BAR. H. B. Sperry,, Akron, Ohio.
811,011. NUT LOCK. J. C. Weems, Dillards, Ala.
811,020. SAD IRON HANDLE. C. Winter, Chicago, Ill.
811,224. WRENCH. M. M. Howland, Providence, R. I.
811,305. HEAD FOR CARPENTERS' BRACES. A. D. LeBlanc, Montreal, Can.
811,334. DESK PAD. I. Smigel, East Orange, N. J.
811,402. WINDOW SASH HOLDER. E. A. Hyde, Villisca, Iowa.
811,461. WRENCH. B. R. Wagy, Wichita, Kans.
811,511. LOCK. E. H. F. Krohn, Hamburg, Germany.

WHEN TO TRUST A MAN.

McGinnis kept a saloon and lived with his family upstairs. One day his bartender shouted to him:

"McGinnis, shall I trust Tim O'Leary for a drink?"

"Has he had a drink?" called back McGinnis.

"He has."

"Thin trust him."

REVIEW OF THE MARKETS.

WIRE NAILS: The mills are doing finely, the last month being the largest production for January in the history of the Wire trade and Wire Nails did its full share. This time of the year orders are not usually in excess of production, but this year orders are in this condition, the fine weather everywhere helping materially in this direction. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York.—The fine weather locally has made the demand for small lots from store unusually good and the demand has kept up remarkably well. Quotations for small lots from store are on the basis of $2.10 per keg.

CUT NAILS: At the meeting of the Cut Nail Association held last week the price of Cut Nails was advanced $1 per ton. General conditions of the market and the desire to keep Cut Nails at as near the price of Wire Nails as consistent with the demand, making the manufacturers incline with favor to an advance. While future contracts are being entered liberally the demand is but the average. Quotations are revised to the following: f.o.b. Pittsburgh, for carload lots, $1.80 base; for less than carload lots, $1.85. For carload lots on dock New York, $1.95; for less than carload lot, $2.00. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—The Cut Nail Association at the last meeting made an advance of 5 cents a keg, which affects the market locally in a favorable manner. The demand is fair, and prices well maintained. Quotations for small lots from store are on the basis of $2 per keg.

BARB WIRE: Specifications on contracts are reported as coming in in an encouraging manner, and the Spring trade is ready for a heavy demand with the brightest prospects ahead. It would not be much of a surprise in the face of so much business to see an advence. Quotations are continued as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: The filling of specifications on contract orders, many of which were taken before the recent advance, well occupy the attention of the mills. The demand is good in addition and the market is firm. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BUILDERS' HARDWARE: The manufacturers of Builders' Hardware, under date February 3, announce that on and after March 1, 1906, prices on all schedule quotations and schedule orders will be advanced 10 per cent. beyond the prices of goods intended for stock. Until March 1, 1906, orders will be accepted based on schedule estimates given by manufacturers since January 1 last, if such order covers a complete specification for the goods and particularizes the name and location of the building for which the material is intended. On and after March 1 next all schedule estimates then outstanding will be abrogated and no schedule orders will be accepted except on the basis of the new prices effective March 1, 1906. An advance of 10 per cent. was promulgated about a month ago on goods on schedule and contract orders where the goods were tagged or labeled in detail for convenience of the workman or contractor. That advance has been rescinded and the present 10 per cent. advance supersedes it.

SPRING BALANCES: John Chatillon & Sons, 85-93 Cliff Street, New York, announce an advance of 10 per cent. February 1 on their Spring Balances, classes A, A1, A2 and C. A similar advance has been made by the other manufacturers.

CLEAVERS: A new list of Cleavers has been made in the interest of some of the leading manufacturers which went into use February 1st. It was intended to revise inequalities in former lists, which date pretty well back, and so secure prices in conformity with cost.

WIRE HAT AND COAT HOOKS: Prices on Wire Hat and Coat Hooks and Ceiling Hooks show marked firmness. Manufacturers report a very large volume of trade, and some are said to be so pressed with business that they are unwilling to book new orders at present prices, although representing an advance of 5 per cent. or more over those prevailing a month or six weeks ago.

ROLLED THREAD CARRIAGE BOLTS: It is reported that a meeting of manufacturers producing Rolled Thread Bolts was lately held, and an extreme price of 75 and 10 per cent. discount was agreed upon, covering ⅜ x 6 and smaller sizes. This represents a considerable stiffening of the market, as prices on goods of this character have been more or less irregular.

SHEET ZINC: Under date, 5th inst., Matthiessen & Hegeler Zinc Company, La Salle, Ill., announces a reduction in price to $7.75 per 100 pounds, f.o.b. La Salle, for Sheet Zinc in 600-lb. casks, subject to the usual discounts for cash and quantity.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12½
B Quality Manila	11½
Pure Sisal, 7-16 and larger	9½
No. 2 Sisal, 7-16 and larger	8

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)	9 to 9½
Standard (500 feet to the pound)	9 to 9½
Standard Manila (550 feet to the pound)	10 to 10½
Manila (600 feet to the pound(	10 to 10½
Pure Manila (650 feet to the pound)	13 to 13¼

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....45 cents per gallon.
In lots of 5 barrels or more.....44 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price only applies to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

It is pleasant to report that the New Year has brought a very satisfactory volume of trade, the amount of sales for January being considerably in access of the same month of last year, while the prospects are bright for a continuance throughout the season. There appears to be no disposition to buy goods in a speculative way and goods purchased are apparently still going into immediate consumption. Usually, unseasonable weather retards business, but while it may have had this influence on the sale of Winter Clothing, Rubber Shoes, etc., it is a mooted question whether the open Winter has had this effect on the Hardware business. There is no doubt that the sale of such Winter goods as Sleds, Snow Shovels, Skates, Etc., has been very small during the past two months, but on the other hand the unusually mild weather has permitted the continuance of building operations so that there has been a good demand for tools and implements of all kinds, so that judging from the reports brought us by customers we are rather inclined to think that on the whole, distributive sales of Hardware have been larger by reason of the unusually mild weather. Prices are still firm and in fact, are advancing daily. The market is steady and if we are to believe manufacturers still higher prices may be expected in the near future on many lines.

THE CLEVELAND TRADE.

Since business is caring so well for itself, it is not out of character for a trade journal to give some attention to the fundamental principles upon which prosperity depends. The value of our accumulations is effected by the way the Government is administered. Criticism is legitimate, but when it results from envy it is base. The criticism of President Roosevelt by Republican Senators may be entirely sincere, but it will be extremely difficult to make the public believe it is. The old guard who have monopolized public admiration seem to be annoyed to see public acclaim transferred to another, but the ground for admiration changes with generations, and there is no better way of hastening such a change than offensive opposition to it from present incumbents. "Whom the Gods would destroy they first make mad." There is no vested right to popularity. Public office is a public trust and carries no inherent right to spoils. The impression that office holders have rights may have resulted from the fact that it has cost so much to obtain them. The worst danger to Republican Government is the purchase of public office. Money spending in political campaigns is the root from which corruption springs. Senatorial courtesy if it be a right, belongs to the public and its only right use is for the public good. The strong feeling that a revolution is pending in political methods, that the influence of wealth represented by corporations does not tend to promote square deal, is almost universal. The attack of the moneyed interest by a great political party justified in the opinion of many good citizens large contributions to protect its rights, but the continuance of large contributions to maintain party supremacy is believed by a large majority to be pernicious. Tainted money is made so, by its use, rather than by its accumulation. A money aristocracy is more dangerous than an hereditary one. When wealth is used by the wealthy to make laws favoring their class, they are responsible for creating class distinction, and whatever evil follows when the other class unite to protect their rights. It is not the part of wisdom for wealth to create such an issue. Party lines are weak and there is a disposition to jump fences. We hear of Roosevelt Democrats and Folk Republicans and patriotic Mugwumps in both parties. Loyalty to principle instead of to party will be the rallying cry in political campaigns of the near future. "To stand pat," "To let well enough alone," appeals only to those whose ambition is satisfied by money getting, but many of the people are not content with that.

Prosperous times do not usually promote reform. Hard times are supposed to aid professional Evangelists and help make converts, and it is a hopeful sign that our great prosperity has not caused indifference to ethical and moral aspects, and that the higher aspirations seem to keep pace with material prosperity. The demand for integrity in public and private life is contagious. The keynote of reform coming from the head has stirred the pulse of the people.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. Lockwood, Pres.

THE PITTSBURGH TRADE.

January business was the best in the Hardware Jobbing Trade for several years. While the weather was unseasonably warm for midwinter and the sale of cold weather goods small, general trade was excellent and more than made up for it. February is starting off in the same vigorous way and looks like the equal of January. The impending strike of coal mines is the only cloud on the business horizon, and we trust it may yet be dispelled before it becomes an actual fact.

THE CHICAGO TRADE.

January trade has started out with almost a boom. Retail dealers seem anxious to place orders not only for present delivery but also for future requirements. The open winter has enabled building operations to be prosecuted and an early Spring is looked for. Money is plentiful and cheap. Business prospects are excellent. Prices for iron and steel seem to be established on a firm basis. There is nothing in the political horizon that indicates any change in the general prosperity of the country. In view of these facts Spring trade in the wholesale Hardware business of the West is most likely to be very brisk, and most satisfactory. After a year's work our company has been able to complete and has about ready to deliver to its rapidly increasing list of customers, a large new, beautifully illustrated catalogue of Mechanics' Tools, Builders' Hardware, House Furnishing Goods, Farming Tools, Tin Plate, Metals, Sporting Goods, Fishing Tackle and Cutlery. For a couple of years our customers have been clamoring for a book that would show our line of goods so they could order more frequently from us by mail. We have supplied this demand and now stand ready to send them the latest issue and most up-to-date Hardware catalogue ever printed. Many of the illustrations are in colors. We trust the entire work will meet with the approval of the retail Hardware trade and hope to receive many voluntary orders by mail.

WELLS & NELLEGAR CO.

THE ST. PAUL TRADE.

Looking forward is what we ought to do at this time. The mercantile skies were never brighter than now, as we all know the amount of iron and steel sold for delivery during the next six months exceeds that of any other year, and for this good reason, prices are very firm. Advances are occurring every day and we believe they should, as prosperity means higher prices, but it also means work for all at good wages. We believe it advisable for all merchants, great and small, to buy their Spring and Sum-

Digitized by Google

mer goods now, as the price is sure to hold good or advance. Then, too, a scarcity is very possible and the man who has his goods will surely be ready to sell while the slow man, who is afraid will be unable to get what he needs. We advise buying to the extent of your necessity.

HACKETT, WALTHER, GATES HARDWARE CO...

THE DAVENPORT TRADE.

January weather was seven degrees warmer and we had a half inch more precipitation than normal. This exceedingly warm weather must have reduced the sale on seasonable cold weather goods, although the general sales footings were much larger than they were the same month a year ago. The firm and advancing market has been the means of bringing more and larger orders than we could have expected under other circumstances; in fact, the trade has anticipated their wants to an extent, in some instances, suggestive of speculation. The sun caught the ground hog the moment he peeped out of his window on February 2, and, of course, he will retire from sight for another six weeks. "Candlemas day, half your wood and half your hay," will have little terror for us here, for if we do not burn more coal in the next six weeks than we have during the last, we will survive. We are just beginning a new Hardware catalogue and would like to have applications for space from manufacturers.

SICKELS, PRESTON & NUTTING CO.

THE COLUMBUS TRADE.

We have been having mild weather so far this year, and it is hard to decide what effect it will have on trade. One thing is certain and that is, dealers are asking for shipments of goods that were to be shipped in March. The mild winter has checked the sale of horse blankets, carriage robes, axes, cross cut saws and a number of other articles that usually are in good demand in January; but this has been offset by the demand for goods that usually are not wanted until in March. A number of sugar camps were opened early in January and had a fine run of sap. However, we think there will be enough cold weather to remind us that the good old summer time is not here yet. Advance in prices seems to be the fashion this year, with wire cloth the exception. It might be well for dealers to keep tab on some cloth and see if there are 100 lineal feet in a roll. It hurts to sell a gold dollar for 90 cents. The outlook is certainly encouraging. Building in our city in business blocks, manufacturing and residences goes merrily along. Columbus now claims the finest business men's club in the United States with a membership of 600 and 200 on the waiting list. The writer expects to start South this week, for a needed vacation. I intend visiting Cuba while gone. My wife will accompany me to see that none of the Cuban maidens kidnap me. I might add that I expect to catch a few whales while I am gone. I may see some things that will interest your many readers. If so, I will jot them down and send them to you. THE SMITH BROS. HARDWARE CO.

J. H. SMITH.

THE SAN FRANCISCO TRADE.

Great rains all over the State have completely changed the business aspect, the State is wet from one end to the other, and with the usual spring precipitation, abundant crops will probably be harvested this year. It is the practically unanimous impression that prosperity has yet a long lease of life, and all views of stock and industrial investment are optimistic. In accordance with this sanguine view of the future new enterprises are being planned, and they range all the way from large extensions in railroad building, real estate and mining operations, edificial construction, etc., down to the multifarious expansions of wholesale and retail trade. If anything occurs to destroy these cheerful prospects it will be over-expenditure of money too easily earned, and not to any scarcity in money itself. The outlook for continued prosperity in California is, therefore, very bright, and we have no cause for complaint.

Farmers are the backbone of the country, 'tis said, and this class of fellow citizens are particularly well liked by San Francisco Hardwaremen, and all their yearnings for moist weather in due season have the sympathy of the trade. Along this line President Bennett of the State Retail Hardware Association said to the writer to-day: "They, the farmers, are 35 per cent. of the total population of the State, a number unequalled by the members of any other vocation. In our entire country the farmers last year furnished the capital to start 1754 new national banks, all for the service of rural communities. The American farmer is an industrial prince and the California farmer is a king among his kind. They have the power, by combination, to control any policy they may choose to favor, either in the State or nation. We are accustomed to read resolutions to Congressmen and legislators passed by organizations of various kinds in our cities. These expressions are indulged in without consulting the farmer. He is ignored entirely. No one asks if the instructions are in his interest or against it. Some day the farmers will pinch themselves, wake up, organize and go into the resolution business themselves and for themselves. They will stand by what they want at the polls, and the dealers in city resolutions will get a jolt that will be startling."

All the leading wholesale Hardware and Metal houses and Plumbers' supply houses of the States of California, Washington and Oregon were represented at a conference in this city a few days ago. After the conference a banquet took place the second and final evening at the Palace Hotel, at which forty-five leading business men of the Pacific Coast were seated. At the conference H. M. Haldernan of the Crane Company, of Seattle, presided, and at the banquet A. A. Watkins of the W. W. Montague Hardware Company, San Francisco, was the toastmaster.

The conference proceedings were informal. Some months ago the lack of uniformity in trade practices among the Hardware and Metal men of the coast led to correspondence. Finally a conference, to take place in this city, was arranged. Subjects to be discussed were provided, these covering many phases of business. The entire business hours of two days were consumed in talking and getting a better understanding. There was no idea of an organization of any kind, and those present declared that the matter of prices was not considered. There were various practices that needed amendment for the good of the trade, it was said.

The sessions were executive. Among the business men from outside of San Francisco were the following: A. S. Burwell of the Seattle Hardware Company, Sig. Schwabacher of the Schwabacher Hardware Company of Seattle, E. Bowles of the Seattle Supply Company, L. B. Peoples of the Crane Company of Seattle, A. Harnbach of the A. Harnbach Company of Seattle, T. M. Honeyman of the Honeyman Hardware Company of Portland, Mr. Nitcher of the Crane Company of Portland, Jay Smith of the Marshall-Wells Hardware Co., of Portland, Mr Gould of Gould & Kline of Portland, Mr. Thompson of the Thompson-Diggs Company of Sacremento, William Schaw of the Schaw-Batcher Company of Sacremento, L. C. Scheller of the Union Hardware and Metal Company of Los Angeles, H. B. Boynton of the J. G. Hooker Company of Los Angeles, B. W. McKenzie of the Western Metal Supply Company of San Diego, J. J. Reiff of the Holly-Mason Company of Spokane, C. D. Lownsdale of the Northern Association of Hardware and Metal Men and B. N. Coffman of Los Angeles of the Los Angeles local association.

Half of the past fortnight has been an epochal week in the history of California for great and incessant rain falls and overflowed rivers throughout the State. The city of Marysville is at the confluence of two important rivers whose record-breaking rise scared the town. Here, in the midst of all this excitement, the annual meeting of the Pacific Retail Hardware Association was held, and naturally many members were absent. The president of the association, John C. White, wrote HARDWARE correspondent that "the weather has been awful here and conditions have been such that I have not been able to send you a report of the association meeting, which, however, was mostly executive." A bit of news gleaned, however, announced at the meeting was that at the next month's annual meeting of the California State Retail Hardware Association a delegation from the National Association of Hardware Manufacturers will be in attendance.

INDUSTRIAL PRESS ASSOCIATION.

POPULAR TALKS ON LAW

No. 10. TAKING POSSESSION. LOYALTY TO THE LANDLORD DUTY OF LANDLORD TO PROTECT THE TITLE. TENANT'S OBLIGATION TO PAY RENT.

Possession of an unoccupied buiding is given when the landlord delivers the tenant the key and the tenant accepts it.

If at the time of the making of the lease the landlord is in possession, he is liable to damages for refusing to deliver possession at the time agreed on.

If the property is occupied by some other than the landlord and by the landlord's assent, the landlord is liable the same as if he were himself holding possession. The same is true if the person who has possession has a legal right to be there.

It is not so clear as to the landlord's liability, where the persons occupying the premises are intruders or tenants holding over. In such cases it is said that the landlord has done all that he is legally bound to do when he gives the tenant the right to possession, and that he is not bound in law to put the tenant into actual possession. This throws upon the tenant the necessity of getting possession for himself, and seeking his damages from the persons who are unlawfully holding possession. The result of this is that the tenant under such circumstances cannot throw up his lease and refuse to pay rent because the landlord does not put him into possession. Something to remember, therefore, is the suggestion that in making a lease to begin at a future time, it should be seen to that the landlord agrees to put the tenant into possession. Then, if there is any failure to do so, the landlord is liable.

Digitized by Google

Another general principle of the law of landlord and tenant is that the tenant cannot deny his landlord's title, that is, he will not be permitted in a court to maintain that the one who put him into possession did not have good title at the time. This does not mean that if the landlord parts with the title afterwards, a tenant cannot defend in a suit by the original landlord for rent, on the ground that this landlord has parted with the title, and was not entitled to the rent.

Should the tenant deny that the landlord had title when he put him into possession, his denial will be considered as good ground for forfeiture of his lease. In such a case the landlord can take measures at once to put the tenant out.

If the landlord's title is attacked by a third person, as where the third person claims a title to the property and a right to the rents, the tenant should at once notify the landlord and call upon him to defend his title; that is all the tenant is required to do. If the landlord then fails to defend, and the party suing and claiming title gets a judgment, the tenant may then regard the latter as the true landlord, and he will be protected in paying to him the rents.

The landlord is not bound to protect the tenant's possession against the acts of trespassers or wrong doers, except where the title is involved in legal proceedings.

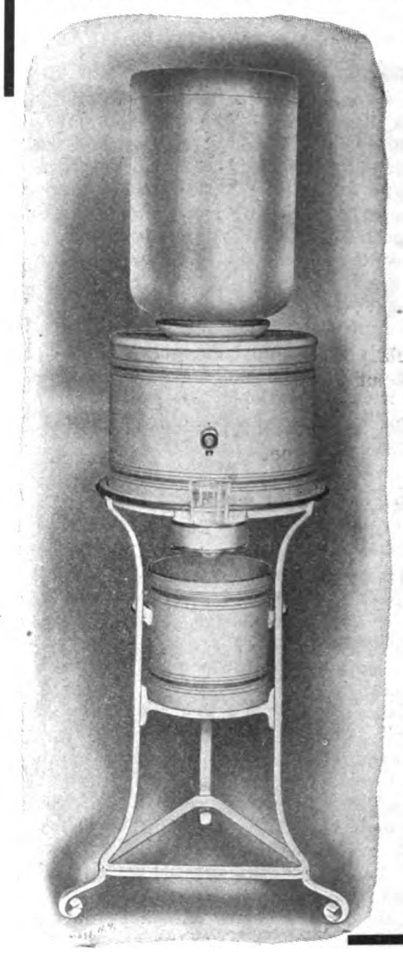
This rule prohibiting the tenant from denying that the landlord had title at the time he made the lease, extends to every sub-tenant.

A tenant cannot assert an outstanding title which he has bought in as against his landlord. The foundation of this rule lies in the fact that the tenant by his possession acquires an advantage which is given him by his landlord. If a tenant sets up a title against his landlord he may be ejected without notice to quit. A tenant in possession, compelled to buy up a mortgage in order to protect his possession, will be protected against the landlord until he is reimbursed.

It is held that where a tenant, without notifying his landlord, purchased the premises at a foreclosure sale, the presumption was that he purchased to protect his possession, and that the landlord may redeem. The tenant cannot extinguish his landlord's title by purchasing a title adverse to his landlord's.

If, after a tenancy is commenced, the tenant acquires a right adverse to his landlord's, he is bound to surrender possession before he will be permitted to assert that right. Then, after surrendering possession, he may sue and recover back the possession upon showing a better title in himself. A tenant in possession cannot gain a title adverse to his landlord through a sale for taxes levied during the time the tenancy existed. Where the tenant agreed to pay the taxes, but neglected to do so, and the land was sold, and the tenant purchased, it was held that he could not hold the property against the landlord. The rule that a tenant cannot show an outstanding title against the landlord, does not apply to a case where the title of the landlord has expired or has otherwise been extinguished since the creation of the tenancy.

When a landlord sues for rent, it is a very common thing for the tenant to put in the plea that he has not paid his rent because the landlord has not made repairs as he promised, or that the landlord owes him money on another account.



Where the landlord has agreed to repair, and does not do so, it is no defense in an action to recover the rent. The tenant's remedy in such case, is an action on the landlord's agreement to repair, or, he may set off or counter-claim his damages; or, he may make the repairs himself, on failure of the landlord after a notice, and deduct the cost from the rent; or he may abandon the premises, provided he does so at once after the default of the landlord.

It should be understood that in a suit brought by the landlord to regain possession because of non-payment of rent, a tenant cannot use such matters by way of defense; in other words, the tenant is bound to pay the rent ,or to move out of the premises. The payment of rent is a necessary prerequisite to holding possession.

If the landlord is himself a tenant, and the sub-tenant is threatened with being turned out because the principal tenant had not paid the rent, the sub-tenant may pay the owner of the property, and this will amount to payment to his landlord; and so he may even pay taxes, if necessary to save his possession or redeem from a mortgage foreclosure; and whatever he has to pay to save his possession may be regarded as a payment of the rent.

MADE FIRST CUT NAILS.

Jacob Perkins Invented the Machines In 1790, With Old and Slow Methods of Hand Manufacture.

For a century and a half after the settlement of the country nails were made by hand, and as large quantities were used and much manual work required, it was a slow and difficult process. They were forged from strips of iron, rolled at the mills into sizes that were suitable, flat and about three-eights of an inch in thickness.

The making of nails was always one of the first accomplishments of a blacksmith's apprentice, who made probably the larger part of the hand-made nails that were made in the country. The appliances for their manufacture by hand were simple and few, a small forge, a small anvil with a chisel set in it, a hammer and a bolster; these, with the exception of a pair of tongs to handle the iron was all of the outfit.

The bolster was a piece of steel about ten inches long. If only one kind of nails were to be made by it there was a hole the size of the nail; if there were more than one, as many holes were made as their sizes required.

The rod was headed at the forge fire, and was then rounded to the size desired by the beating of the rod into shape, while a little uneaven mass was left at the end for the head. It was then reheated and the end thrust through the bolster, being cut from the rod by a chisel. The bolster was held on the anvil, while the maker, with a few well-directed blows, formed the head which was usually oval, but in some cases long and narrow and was known as a T head.

Brads, and all small nails were made in the same way, but the nails used for horseshoes were of the best Swedish iron, and required skillful workmanship. In the early days nails were a part of the importation from England, as they were much cheaper than they could be manufactured here, but the war with England caused nails to be classed among non-importation articles, and it was recommended by Congress that they be manufactured here.

The war of the revolution caused a great scarcity of nails, and many of the farmers set up in their kitchens small forges for the manufacture of what they needed. So many of the good folks did this that a large number were made; these were sold to the merchants.

The demand was, however, so great that the minds of inventors were turned to the subject. Jeremiah Wilkinson of Cumberland, R. I., was the first who adopted the plan of cutting the tacks from sheet iron and forming the heads in a vise; Ezekiel Reed of Bridgewater invented a machine that cut cold tacks and nails. The first man to make complete machines was Jacob Perkins, a native of Newburyport, Mass. He was sent to school until he was apprenticed to a goldsmith. He was employed by the master of the mint at the age of 21, to make a suitable die for striking copper coins, and the result was the die that formed the old cent bearing the engraving of the eagle and the Indian.

In 1790, at the age of 24, he invented machines for the cutting and heading of nails, which, with subsequent improvements, greatly increased the product of a day's labor. He first made the nails in an old barn on the estate of Mr. Leonard Adams of Byfield, which is on the old Longfellow farm and near the home of Sec. Moody.

From there he went to Amesbury and perfected the machine, a patent being granted in the year 1795, when the machine would head 6,000 brads an hour, while the splitting machines would split several times as many.

Mr. Perkins bought the mill which is now used for manufacture of woolens in Byfield, Mass., from Abraham and Ebenezer Wheelwright and Ebenezer Stocker, for $800. Here he manufactured nails and in the spring of 1798 he found a partnership that was known as "Armstrong & Perkins." This firm made the "Newburyport" patent nails and brads.

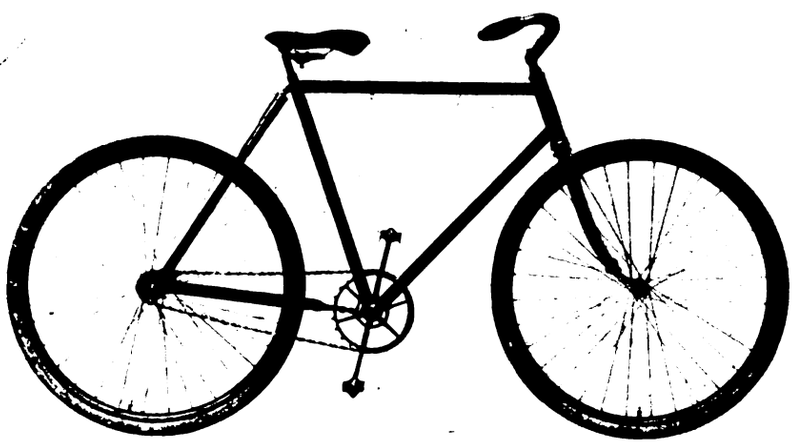
It was while Mr. Perkins was in business for himself that he invented a machine to make and head nails at once, but the machinist who assisted him brought the same invention under a different name. It was in a suit that was brought that he confessed that Mr. Perkins invented the operation at the time that he worked on the machinery under the direction of the inventor.

The partnership was dissolved, however, and the factory was not opened for five or six years.

In the meantime the inventor of the new process turned to other channels. He invented a stereotype check plate. This prevented the counterfeiting of bank notes and ultimately was a great success. All the banks of this country and England used them.

Mr. Perkins retired in 1834, and when he died at the age of 83, he was known as the "American inventor." He left no fortune.

The manufacture of nails was continued by the firm of Gaphy Armstrong at the Amesbury mills, but in 1823 the plant was sold at auction for $21,000 and the nail factory converted into a weaving room.



THE YOUNG MAN'S IDEA OF SUCCESS.

"What's the use talking about 'success,' can I ever get where they are?" asked a young man as he stood on the pavement on upper Fifth Avenue and watched the whirl of automobiles and carriages. He had figured it out that he had been working quite a long time for fifteen dollars a week in a store, and he didn't see how he could save enough out of that salary to get rich.

That young man's idea of "success" was to be rich—to have so much money that he wouldn't have anything to do but ride round in automobiles and spend it. He gazed once in a while at those who, he presumed, were doing that very thing, and, with the listlessness of despair, went down the Great White Way to get what amusement he could out of the small remnant of his fifteen-dollar weekly salary after his board was paid. The result was he returned to his work on Monday morning with a foggy mind and a dim recollection of a noisy Saturday night, the chief element of which were beer and tobacco smoke. Of course, he entered upon another week's work that could not be anything else than a severe grind and a hopeless routine.

That young man, and thousands of his kind, with envy and cobwebs in their minds and more thought for to-day than for to-morrow, will never find anything like success in life. Their idea of it is idleness and riches. They make no effort to find in their work inspiration; they never try to do it with that enthusiasm that brings them to the attention of their employers and moves them up; they never look beyond the narrow circle of the prescribed task, fearing lest they will find more than that to do, and they "are doing all they're getting paid for." More than that, they are not devoting their leisure hours to cultivation of the mind or of building up a character—the only thing that really counts for success in a man. These men have not a straight view of life and they have not even begun to think seriously of success, and until they do begin to think, their case is hopeless.—*N. Y. Commercial.*

The three great features in Pierce constructions for 1906, which makes them distinctively in a class by themselves, is the Cushion Frame, absorbing all vibration,—the Spring Fork, a natural evolution of the advanced ideas of the Pierce Company, to be used in conjunction with the Cushion Frame, and the Pierce Brake, made under the New Departure patent. These three combined make up the principal features of the "Tried & True" Pierce Cycles.

If you stopped handling bicycles when the craze stopped, you cut off a profitable source of revenue. Cheap, claptrap, thrown-together wheels disappeared with the boom. The well-made, serviceable, high-grade, profit-bringing bicycles are still demanded by thousands. Somebody is going to supply the demand and it might as well be you.

Pierce Cycles

have outlived the craze. They survived because they were built to appeal to wheelmen, not to fad chasers. They have always been all that discriminating riders desired. They are better to-day than ever. Pierce 1906 models are now ready. Why not a Pierce Agency for next year?

The Geo. N. Pierce Company

The "Heart and Soul"

of this Wrench

Is in the Name of the Maker

"COES"

COES

NEW

"Hammer Handle"

MODEL

Is every bit as strong as the "Steel Handle."

Size for size it is

30 PER CENT. STRONGER

Than any other Wrench Made

IF You are looking for quality in a Wrench, have the name COES with you.

You can't get away from the name COES. It's inseparably wrought into every part of the best "Steel Handle," "Knife Handle" and "Hammer Handle" Wrenches in the world.

Why? Because it belongs to the Coes Wrench Family. It fills the hand so that no gripping power is lost. Even in the large sizes the handle is not too large for one hand.

The handle is of hard wood—the heaviest on any wrench. Inserted at both ends—held by an extra large rivet in centre—double extra heavy riveted tip—it can't be taken off without breaking the rivets.

Best balanced—smoothest—best finished. 15-in., 18-in., 21-in. sizes.

No advance in price over other styles. The question remains:

How Many Do You Need For Spring Trade?

Are You A Gillette Safety Razor Dealer?

We supply signs, booklets and other advertising matter in liberal quantities to all dealers.

The Gillette Safety Razor

America's Foremost Trade Leader

It offers liberal profits, and its quick sales make it a trade winner in all lines . . . .

The best hardware dealers of the United States carry these razors, and the demand is constantly increasing.

Our new combination set, with razor, including soap and brush in silver case, is now ready

The "Gillette" cannot be put together in any way but the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see Gillette advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us. has resulted in your name not being on our list of dealers.

CAN YOU SELL 60

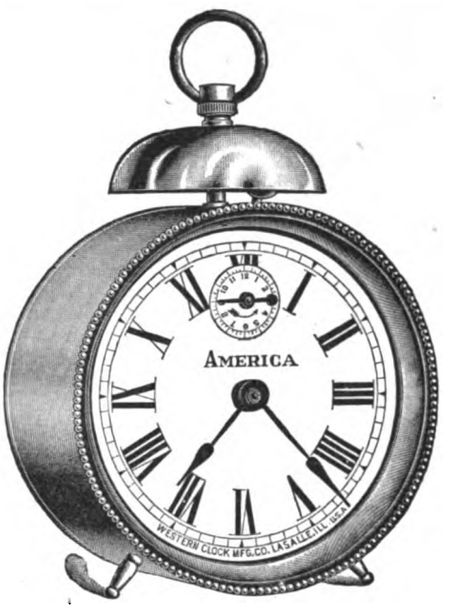
Iwan Post Hole and Well Augers during the Spring Season?

That is what many Hardware merchants have done in past seasons, showing how much demand there is for a *really GOOD* post hole auger.

The Iwan Post Hole and Well Auger is the most largely sold and the most prominently advertised earth auger on the market, our advertising reaching all classes of consumers who have use for a post hole auger.

WE HELP YOU SELL THEM

YOU should sell these augers if you sell FENCING. Three full turns of the auger, and it is full of earth, and lots of it. Makes a hole smoothly and quickly; empties easily; is very durable. Sizes 3, 4. 5, 6, 7, 8, 9, 10, 12 and 14 inch.



SOLD BY THE JOBBING TRADE.

IWAN BROTHERS,

STREATOR, ILL.

Manufacturers of Post Hole Augers and Diggers, Sickle Edge Hay Knives, Drain Cleaners, Excelsior Tiling Spades, Chimney-Tops, Wire Conductor Pipe Hangers, etc.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

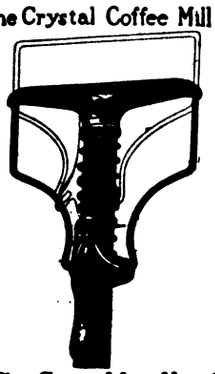
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

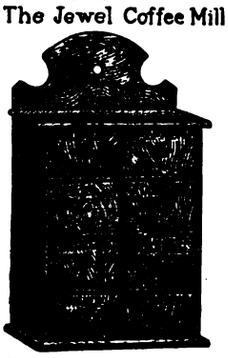
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

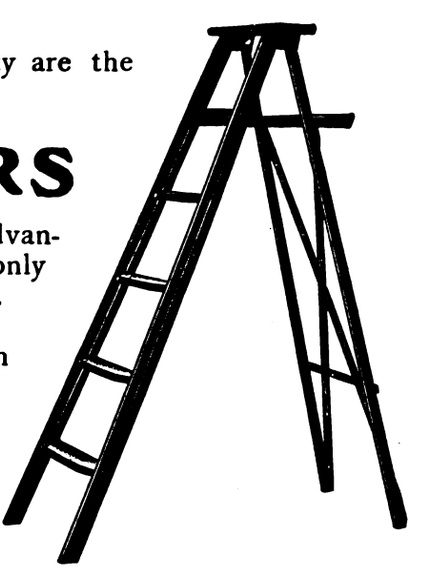
Back of every big ladder trade there's a cause--a reason for its success.



Push, salesmanship and advertising can move an undesirable stock of ladders—for a time, but a prosperous trade that grows each month larger and more profitable must be based on quality.

Strength, Stability, Lightness and Durability are the qualities that make

UDELL LADDERS

such satisfactory trade builders. There's not an advantage lacking in Udell Ladders to make them only "just as good as other kinds." They are the best.

Udell Ladders combine the best material with the most skilled workmanship and each one is backed by the "Udell" guarantee of satisfaction.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—Linscott Sporting Goods Co. has been incorporated to deal in sporting goods. Capital, $5,000. President, W. A. Bragdon; treasurer, J. M. Linscott.

Boston, Mass.—Martin Manufacturing Co. has been incorporated to deal in sporting goods, etc.; capital, $260,000. President, J. C. Edwards; treasurer, J. C. Martin.

Cincinnati, Ohio.—The Pickering Hardware Company is about to branch out in the sporting goods line on an extensive scale.

Hartford, Conn.—The Jones, Morgan & Co. has been incorporated with $50,000 to do a wholesale and retail business in household furniture, sporting goods, etc. The incorporators are: William C. Jones, J. P. Morgan and J. H. Lahey.

Portland, Me.—Peerless Skate Co. has been incorporated for the purpose of manufacturing and dealing in skates, sporting goods and Hardware, with $90,000 capital stock. Officers: President, Benjamin G. Ward of Portland; treasurer, William N. Osgood of Lowell, Mass.

Changes and Improvements.

Wilmington, N. C.—E. R. Pickard has retired from the Queen City Cycle Company. The business will be conducted in the future by W. J. Moore.

Bangor, Me.—Charles E. Phinney, bicycle dealer and repairer, has removed his stock to the store formerly occupied by R. J. Howland, and will continue his business from there at once.

New York, N. Y.—The Goodyear Tire and Rubber Company, formerly at No. 253 West Forty-seventh Street, has established itself in new and more commodious quarters to suit its growing business at Nos. 1914-1916 Broadway, at the corner of Sixty-fourth Street. It has one of the finest rubber stores in the country, occupying three stories and basement.

Chicago, Ill.—Edward C. Waller, Jr., and Oliver & Company, have leased for John F. Wilson to the Excelsior Supply Company, the land and building being erected thereon at 1436 and 1438 Michigan avenue. The lot is 50 by 1671 feet, and the building will be three stories. The lease is for about $5,000 a year for a ten-year period. The Excelsior Supply Company has for a number of years conducted a wholesale business, dealing in sewing machines, bicycles and automobile parts. It will conduct a retail business in its new quarters just leased on Michigan Avenue.

Miscellaneous.

Sportsmen of DeWitt, Ark., are planning for the incorporation of a club to be known as the Monroe-Morris Hunting Club. Articles of incorporation will soon be filed.

✤

Consul-General Guenther of Frankfort reports that, according to a correspondent of the Frankfurter Zeitung, only a very insignificant portion of the bicycles used in Switzerland is supplied by the home industry. During the last five years 74,500 bicycles were imported into Switzerland, of which 49,500 were German, 12,500 French, 6,000 American and 1,700 English. Less than ten years ago England controlled the Swiss bicycle market; to-day the English trade therein is almost old. The Zeitung correspondent says that the imports from Germany are steadily increasing, keys, bells, lanterns, oil cans, etc., coming almost exclusively from Germany.

✤

A good deal is being heard of the pneumatic tire which is to replace the ordinary rubber tire with a great saving of rubber. It is said the idea is an old one, though it does not seem to have had much of a trial. Whether it is a novelty or not, a strong London syndicate is now engaged in developing it, and great results are expected. The claim is that by fitting of a pneumatic cushion around the hub the same effect, as far as easy running is concerned, is obtained as in the case of the ordinary rubber tire encircling the rim.

✤

Several French inventors are working at a levocyclette, or bicycle, in which levers are substituted for cranks; and Dr. Mathieu, of the French Touring Club, considers that the hill-climbing machine of the future will be one with practical combination of pedaling by direct propulsion to permit of mounting the steepest gradient slowly, and a loose wheel, to permit of descending rapidly with the body at rest.

✤

Although the California Cycle Board of Trade, once a very powerful and well-knit organization, has existed only nominally during the past two years, those dealers who felt its good effects and who believe in organization, got together in San Jose on January 22-2, and formed the Northern California Retail Bicycle Dealers' Association. These were the officers elected: President, Joseph A. Desimone of San Jose; vice-president, Joseph Holle of San Francisco; secretary, J. A. Benson of San Jose; assistant secretary, A. C. Banta, of San Jose; treasurer, E. A. Donahoo of Fresno. The organization wlil hold its next annual meeting in Fresno. The Santa Clara County Cycle Board of Trade, which formed a part of the old State organization, was the nucleus of the new association and acted as the host on the occasion, a theatre party and a banquet being tendered the visiting dealers.

HARDWARE DEALERS' RECORD.

(Continued.)

Council Grove, Kan.—Theo. J. Taylor has purchased the Hardware business of A. G. Alexander & Co.

Detroit, Mich.—James H. Gregg and James J. Case, after a number of years with Buhl, Sons & Co., have opened the wholesale and retail Hardware house of the Gregg & Case Co. in the new building erected for them at 48 Cadillac square.

Duluth, Minn.—The Marshall-Wells Hardware Co. has increased its capital stock about $300,000, making the total issue now $2,400,000.

Earlham, Ia.—W. B. Jones has sold his Hardware business to N. O. Carmon.

Fremont, Neb.—Holloway & Co. have succeeded to the Hardware business of Holloway & Felt.

Grand Rapids, Mich.—The Clark-Rutka-Weaver company, jobbers of Hardware, have increased their capital stock to $75,000, and have succeeded in making arrangements whereby they will occupy the storerooms and warehouses about to be made vacant by the Clark-Jewell-Wells Company. This will give them very much improved facilities for handling their stock and for making prompt shipments. There is no change made in the management or officers of the firm.

Hawarden, Ia.—Mat Lien has purchased the retail store of the Van Bleck Hardware Co.

Howell, Neb.—L. C. Coufal has purchased the Hardware business of Auton Seda.

Jameson, Mo.—W. T. Feurt has sold his Hardware store to S. C. Shaffer.

Johnson, Neb.—C. A. Burke & Co. have purchased the Hardware business of Frank Keith.

Johnstown, Pa.—The Swank Hardware Co is about to erect a new storage building and stable which will be six stories in height. The six floors will contain about 27,000 square feet which will bring the space used by this large concern up to almost 100,000 square feet.

Kiel, Okla.—G. H. McDonald has purchased the Hardware store of Chas. Cavett.

Leigh, Neb.—Hahn Bros. have succeeded to the Hardware business of Hahn Bros. & Held.

Malvern, Ia.—A. J. Kronsbein has sold his Hardware store to G. T. White.

Marysville, Tenn.—Keny & Cox have succeeded to the Hardware business of J. L. Keny.

Monroe, Neb.—Nelson & Reed have been succeeded in the Hardware and implement business by Reed Bros.

Ohiowa, Neb.—R. E. Averill has succeeded to the Hardware business of Averill & Metcalf.

Palestine, Tex.—The Palestine Hardware Company, R. H. Jordon proprietor, has been sold to Wilfred McDonald, late of St. Joseph, Mo., who will take charge immediately.

Pawnee City, Neb.—C. A. Nevins has sold his Hardware business to Duncan & Simon, who will commence invoicing Feb. 1st.

Plattsmouth, Neb.—The Ebinger Hardware stock has been sold to E. A. Lauchs and H. L. Asenissen of Lake Park, Ia.

St. Paul, Minn.—Nicols, Dean & Gregg, wholesale Hardware dealers, are erecting a large $130,000 building.

Wichita, Kan.—The Simmons Warehouse Company, a New Jersey corporation with a capital of $250,000, will come into the state and start a branch here. This institution is a part of the Simmons Hardware Company of St. Louis and it means that the St. Louis concern is establishing a big branch house at Wichita.

Zanesville, O.—P. C. Schubach has purchased the stock of Martin Young of the Zanesville Hardware Co., and he will be personally associated with the store.

Worcester, Mass.—The American Steel and Wire Company at Worcester is about to enlarge its Worcester plants and will expend $300,000 on the work.

PROPOSALS

Treasury Department, Bureau of Engraving and Printing, Washington, D. C., February 1, 1906.—Sealed proposals will be received at this office until 2 p. m. on the dates named below, to furnish during the fiscal year beginning July 1, 1906, the following classes of supplies, viz: Monday, March 19, 1906: Dry Colors, Rubber Goods, Engravers' Supplies. Textiles Tuesday, March 20, 1906: Hardware, Oils, Dextrine. Grocers' Sundries: Monday, April 9, 1906: Paper, Binders' Supplies, Plumbers' Supplies. Chemicals; Tuesday, April 10, 1906: Electrical Supplies-Printers' Inking Rollers, Paper Boxes, Lumber, Awards will be made only to established manufacturers of, or dealers in, the articles. The right is reserved to reject any or all bids or parts of bids. Blank forms, with specifications for proposals and further information desired, will be furnished intending bidders on application to Wm. M. Meredith, Director of Bureau.

There's Money In It
The dealer who handles the Bi-Ped Tack Puller is sure of a ready seller. There's a great demand everywhere for this most helpful household article. Anyone can see at a glance how useful it is. A slight pressure on the handle of the
Bi-Ped Tack Puller
will lift the tacks straight up out of the floor without destroying them. It has one foot for carpet and one foot for matting tacks. Made of finest grade of steel. Will not break nor get out of order. Retails for 25 cents. We will send sample including both feet for 20 cents to any dealer, or will deliver one dozen to any dealer in United States for $2.00.
Write for full particulars, advertising literature, catalogue and quotations.

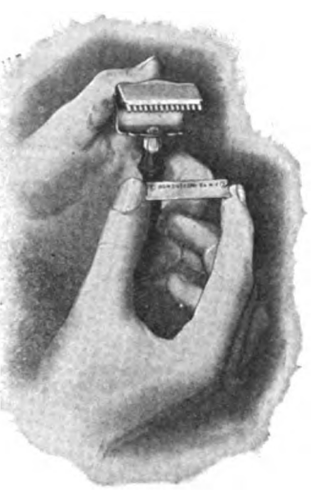
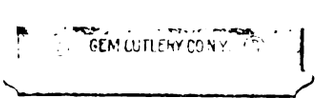
A Wave of Enthusiasm

Has been created by the Greatest Little Barber in the shaving world—**The Zinn Automatic Razor.**



Portland, Ore., Dec. 28, '05
Messrs. The Gem Cutlery Co.,
34 Reade St,, New York.
Gentlemen:—Your "Zinn" Razor is all right. I have been shaving with it every day since I received it and am well pleased with the work. I thought that I had just the right razor when I bought the advertised two-edge Safety, but I must confess that the "Zinn" is away ahead and is so well poised that it makes shaving a luxury.
Yours truly,
A. C. Going, Pres.
The Loewenberg & Going Co.

This testimonial is only one of thousands—conclusive proof that the Zinn is all we claim for it. ∴ ∴ ∴ ∴



The ZINN
Automatic Razor

Is the Razor with the Always Keen Blades. Twenty-four of them—so thin that 200 of them are only an inch thick! So hard that they cut glass; so sharp that no whiskers are too tough for the Zinn.

The Zinn effects a great saving in shaving--that's why it has made friends fast and--fast friends.

Show a Customer a Zinn Blade

He will buy a Zinn Razor

No Honing! No Stropping! No Dissatisfaction!

That's why its sales are so phenomenal and your profits, Mr. Dealer, so quick and sure—the very reason why you should

Share in ZINN PROFITS in 1906

We are advertising it everywhere. We furnish you with advertising literature.

We protect you against cut prices.

Send for our 1906 proposition to-day—

Don't wait till to-morrow!

The 4 Big Lawn Mowers

Our Style A Is the Only
ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers. Three others—Style E, K and C—belong to the same combination.

STYLE A

In each, the revolving cutters are without bar in centre have large, long bearings, and are the most satisfactory Lawn Mowers to sell. We have others shown in 1906 Catalogue. You ought to have a copy and see how complete our line is!

The Philadelphia Lawn Mower Co.

3101-09 Chestnut St., Philadelphia, Pa., U. S. A.

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

THE EBBING MANUFACTURING CO.

SALE OF BICYCLE BUSINESS

The business of E. H. Hall Company, Inc., of Rochester, New York, dealers in bicycle supplies is to be sold at auction by James G. Greene, Trustee in Bankruptcy, at 59 Exchange Street, Rochester, New York, on the 13th day of February, 1906, at 10 o'clock. The sale will include the entire stock of merchandise on hand, said to have cost about $15,000, together with the furniture, fixtures and tools, 7 American and foreign mud guard patents and one card index prepared at very considerable expense and containing the names of 14,000 dealers in bicycle sundries. The Hall Company has done a large and successful business for a number of years. An inventory of all the assets to be sold which consist principally of bicycle sundries, is on file at the office of the trustee in bankruptcy, 514 German Insurance Building, Rochester, New York, and subject to examination at any time. Private bids for the purchase of said assets and the good will of the business will be received at any time prior to the sale. For further information address

THE ARRIVAL OF FLINTSTONE

Three Coated Enamel Steel Ware Marks a new epoch in the history of cooking utensils—light, artistic, cleanly and economical, all of which the up-to-date housewife is not slow to take advantage of.

SEAMLESS, SANITARY, DURABLE.

The finished product of Science and skilled mechanics, inspired by the desire to make this ware better than it was ever made before.

The best Chemists in the United States officially pronounce FLINTSTONE free from poisonous ingredients and practically insoluble.

The chemicals used in its manufacture are especially imported from Austria and Germany in the raw state, and the duty on same being insignificant when compared with the duty on the finished product, gives Flintstone the advantage over the imported wares. :-: :-: :.:

The improvement made in this industry by Yankee ingenuity and progress has placed the Flintstone at the very summit, and we can truthfully make the statement that

Flintstone will outlast any other Enamel Ware made.

It is as hard as Flint and as durable as the mountains. ∴ ∴ ∴ ∴

These are some of the reasons why Flintstone has been so eagerly adopted throughout the country. The sale of this ware has been phenomenal, having more than tripled our output the past year, and the ratio of increase is steadily gaining. ∴ ∴ ∴ ∴ ∴ ∴ ∴

Handsome embossed booklet mailed on application.

Mr. Jobber

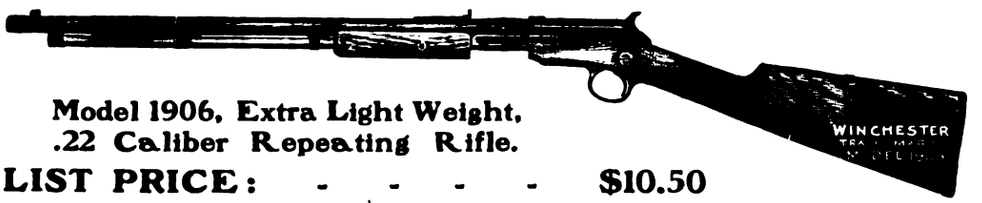
Our house wants you to take up the sale of our Scythestone, Oilstone and Razor Hone Selling Assortments.

¶ These assortments contain guaranteed goods, packed conveniently in attractive display cabinets.

¶ Each cabinet is packed in a strong individual shipping box.

¶ You don't have to bother with unpacking a shipment of sharpening stones from the house, and then repack in small orders for the trade, with the resultant loss sustained by breakage of stones and the loss of your most valuable asset-time. Just change the address on the box and re ship. That's all! You have saved time and money. Good wide-awake salesmen can sell enough of these assortments to reduce your selling expense to a minimum.

There's Dollars and Cents in this for you Mr. Jobber!



¶ We have three Oilstone, Two Scythestone and Two Razor Hone Assortments to offer. Either one will leave you a handsome margin for handling them. For further particulars write to

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

"DAN PATCH" SHOD WITH CAPEWELL HORSE NAILS WHICH ARE "THE BEST IN THE WORLD."

CORRUGATED PATTERN.

PLATE PATTERN.

ALLENTOWN, PA., Sept. 21, 1905.

THE CAPEWELL HORSE NAIL CO.,

Gentlemen: I shod **DAN PATCH** this morning, for his record breaking performance, with No. 4½ Plate nails, Capewell. He reduced the world's record on a half mile track from 2:03 to 2:01; also from 2:11 to 2:05 for wagon. I have driven Capewell nails for years on the Grand Circuit. I think them the only nail in the world for race horses. With best wishes, Yours truly, J. F. HANSON.

Made By

The CAPEWELL HORSE NAIL CO., Hartford, Conn.

Branches: New York, Philadelphia, Baltimore, Buffalo, Detroit, Cincinnati, Chicago, St. Louis, New Orleans, Denver, San Francisco, Portland, Mexico City, Toronto, Canada.

Why You Should Use a NO. 1 FIRE POT

No. 1 Fire Pot, $6.00 Net.

Its generator is powerful and produces a large volume of flame which is intensely hot and easily controlled, using less than half the gasoline required by other makes. It therefore *will save the user its cost* in a short time. The No. 1 has many points of advantage which save much time to the users and enable them to quickly do work not possible with other makes. Our catalog is free and it explains why *you cannot afford* to use other makes if presented to you. Our guarantee, "Your money back if you are not pleased," makes it safe to try our fires. Jobbers supply at factory price.

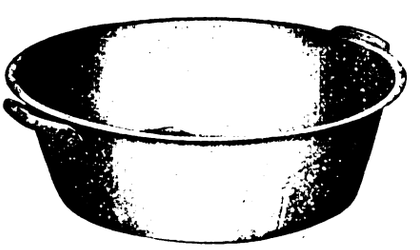
"Every Cloud Has Its Silver Lining"

If the cloud of "Dull Business" has been hovering over your store you can easily dispel it by putting in a complete line of

Flintstone Enameled Steel Ware

It is the Ware women most talk about because there is no other Three-Coated Enamel Steel Ware like The Flintstone.



It is light in weight, and artistic in design. Its gray, silken finish is most pleasing to the eye.

Best of all: It is as durable as Flintstone. It won't wear out nor rust out.

THE FLINTSTONE INCOMPARABLE AS A SELLER

Our output of Flintstone has more than trebled the past year so great has been the demand for it.

The Flintstone is the best moderate priced Enamel Ware made.

"Fall in line," Mr. Dealer—this is the time to stock up with, and sell, Flintstone.

OUR TEN YEARS' GUARANTEE WITH EVERY PIECE

Send at once for "Flintstone Booklet" with prices and discounts.

Mention HARDWARE.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

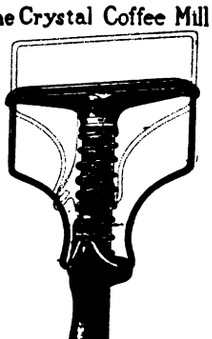
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

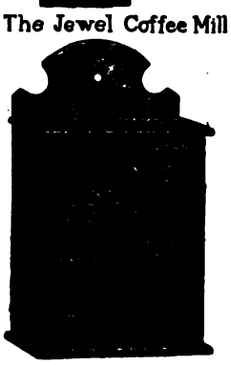
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

THE NEW IMPROVED KELSEY WARM AIR GENERATOR.

28,000 Kelsey Warm Air Generators Sold.

Hundreds of dealers interested in the Heating Business, and who are securing the best results are selling Kelsey's exclusively.

If you are anxious to get away from the Furnace competition small-profit unsatisfactory methods, why not secure the Kelsey exclusive Agency?

THE KELSEY is different from any furnace or boiler—has strong convincing selling points, and it's easy to show any prospective buyer how, in the end, it would give him most economical and satisfactory results.

Perhaps you think Kelsey claims are theory. Let us prove they are not, by sending our book "Opinions"—112 pages of letters and pictures of 250 Kelsey Heated houses. The pictures show that the Kelsey is used in the finest residences. The letters tell what the Kelsey does, and prove that it supplies better warm air and more of it, than any other System, and with less fuel.

Let us send you our Agency Proposition.

"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No. . . . .

That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.

It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

HARDWARE

The Bureau of Labor, Department of Commerce and Labor, Washington, is preparing a report covering the various systems of workingmen's insurance and employers' liability both in this country and abroad. The report will cover insurance against sickness, accident, disability, old age, death and unemployment. In this connection it is endeavoring to secure information concerning the existence in the United States of what are usually known as establishment funds—that is, mutual relief or insurance funds organized and maintained by the employes of an industrial establishment, or relief funds supported either wholly or in part by the employers themselves. It is desired to obtain, wherever possible, copies of constitutions, rules and by-laws, blank certificate forms, and any other matter relating to funds of this character. In the absence of other data, the name and location of establishments in which such funds exist are desired. It is hoped that persons possessing data of any kind relative to the existence of establishment funds in this country will communicate with Charles P. Neill, Commissioner, at their earliest convenience.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

Hardware men from all over New England will gather in annual convention in Boston on March 1 and 2 for what promises to be the most notable convention in their history. Although the association was organized thirteen years ago, this coming convention will be the first since the New England association became affiliated with the National Retail Hardware Association.

The New England Hardware Dealers' Association was organized March 15, 1893. Two years ago it was reorganized and has since been progressing along somewhat new lines. As a result the membership has increased over 100 per cent. since the last convention in 1905, when the New England association became affiliated with the national body.

The present officers are as follows: John B. Hunter, of Boston, president; S. H. Thompson of Lowell, and H. P. King of Portland, vice-presidents; F. Alexander Chandler of Boston, secretary; Henry M. Sanders of Boston, treasurer; D. Fletcher Barber of Boston, Charles E. Adams of Lowell, Bion C. Pierce of Taunton, Calvin M. Nichols of Boston and Frank E. Pierson of Pittsfield, directors.

The sessions will be held at the Hotel Vendome and will not only comprise the usual program of business, but also a considerable list of social events. Among the guests of the association will be Mayor Fitzgerald of Boston, Rev. E. A. Horton, chaplain of the Massachusetts Senate; W. P. Bogardus of Mt. Vernon, Ohio, president of the National Retail Hardware Association; M. L. Corey of Argus, Ind., secretary of the National Association; T. James Ferneley of Philadelphia, secretary of the National Wholesale Hardware Association; Samuel A. Bigelow of Boston, a former president of the National Wholesale Hardware Association; Charles E. Adams of Lowell, President of the Massachusetts State Board of Trade, and E. H. Walcott, secretary of the Boston Merchants' Association.

The first business session will be held Thursday afternoon, March 1, and will be followed by a supper and theatre party. Friday will be devoted to business matters, followed in the evening by the annual ladies' night banquet.

President Bogardus of the National Association has sent out an address to the New England Hardware Dealers' Association, which has been sent broadcast over New England to every retail Hardware dealer, in which he explains the aim of the national association in the following words:

"What are the ends we hope to accomplish? To ease the bitter competition we have to contend with; to teach men better ways of doing business, and to instill an enthusiasm for the calling we have chosen that will make us successful as business men; to have a success measured by honest effort and fair dealing; to rebuke the hot race for wealth as an end of life, and to help men to understand that wealth gotten in ways that are not open to the scrutiny of the public, is wealth that brings a curse rather than a blessing.

"The bitter competition we have is not bitter because it is competition, but because it is unfair. In this, that by buying large quantities of staple goods and offering them at others' cost, or less, an impression is sought to be made that the rergular dealer in Hardware is a robber, and is not worthy of the confidence of the consuming public. To make and to establish the principle that the giving of special prices is favoritism and that favoritsism is graft that only whets the appetite for greater graft and will bring ultimate ruin to those who indulge in the practice. These are some of the things we are working for and hope to accomplish."

AMERICAN SCREW COMPANY.

The annual meeting of the stockholders of the American Screw Co. was held on the 13th inst., at the office of the company, with a large majority of the stock represented. The 46th annual report of the president and board of directors was presented by the president, Col. Samuel M. Nicholson, and the annual financial report by the treasurer, George W. Thurston, both showing a prosperous condition of the company's affairs, and being received with evident satisfaction by the meeting, which was entirely harmonious.

The old board of directors, consisting of Charles B. Humphrey, Charles Alexander, George H. Robinson, George L. Shepley, Samuel M. Nicholson, Marsden J. Perry and Arthur H. Watson, were re-elected for the ensuing year.

At a meeting of the directors, held immediately upon the adjournment of the stockholders' meeting, the following officers were appointed: President, Samuel M. Nicholson; vice-president, Marsden J. Perry; treasurer, George W. Thurston; secretary, William A. Cranston; superintendent, Benjamin Thurston; agent, James A. Nealey; sales agent, William G. Smythe.

SARGENT'S STEEL SQUARES.

Sargent & Company, 149 Leonard Street, New York, are distributing to the trade a placard for dealers to hang prominently in their store, certifying to the fact that they sell Sargent's Steel Squares, and calling attention to those having the Rafter Table upon it in this manner: "Put your finger right on it! No figuring is required with Sargent's Rafter Table; the measure of the Rafter for anyone of seven pitches of roof is all on the Square. Sargent's Standard Steel Squares are used and recommended by the best mechanics. Made with other tables and labor-saving scales. In Royal Copper, Blued, Nickel Plated and other durable finishes. Fully warranted. Sold by dealers in Hardware. We have them, they are all right."

A NEW CHECKING PENCIL FOR THE DEALER.

The National Checking Pencil Co., 723 Monroe Street, Brooklyn, N. Y., is making a checking pencil in all colors suitable for a variety of purposes. It is made of the best materials, that are unaffected by climatic changes, and is adaptable for indelibly marking packages or any glass, leather or wooden surfaces. They are placed on the market so as to be sold at a moderate price and allow the dealer a good profit. Send for sample.

WELL DEFINED RECORDS FOR ACCURACY.

At the National Tournament of the .22 Caliber Rifle Indoor League recently held at Grand Rapids, Mich., the Stevens and Stevens-Pope Rifles won first, second and third prize of each event. This is certainly a most remarkable tribute to the unvarying superiority of Stevens Target Rifles and proves conclusively that a crack marksman equipped with our well-known make is an invincible factor in a Competitive Shoot.

Stevens Rifle Telescopes were used in the various Championship Matches alluded to and materially contributed to the Record Target Scores.

Stevens Rifles hold more records for Accuracy than all other makes combined—the results of the Grand Rapids Shoot are the latest links in the long chain of Stevens successes.

Mr. W. A. Tewes broke the world's record at above mentioned Tournament, scoring 2481 points out of a possible 2500. Mr. Tewes was equipped with a No. 52 Stevens Ideal Target Rifle. Other notable scores in the Championship Match were obtained by L. P. Ittel, who used a Stevens-Pope, and secured 2453 points; F. C. Ross, equipped with Stevens No. 52 Ideal Rifle, won 2452 points; A. J. Huebner, using a Stevens-Pope, scored 2446 points; A A. Stillman, equipped with Stevens-Pope, obtained 2443 points.

HOW TO FIGURE LEVERAGE.

The Avery Stamping Company, of Cleveland, Ohio, well-known makers of shovels, spades and scoops, also seamless steel cooking ware, have prepared a leaflet giving an easy method for determining the leverage powers of any type of shovels. The principle of having the centre of gravity as near as possible to the load to be lifted is applied with such good results to their patented plainback shovels, that it is claimed that 40 per cent less pressure is necessary to balance a load, which requires less exertion on the part of the laborer, who can thus do that much more work in the same length of time. A copy of "How to Figure Leverage" will be sent free to readers of HARDWARE.

FEBRUARY 25, 1906

Editorial Trade Review

This month, as far as the retailers are concerned, is pretty well devoted to Conventions and Convention purposes. The many associations and their progressive members, doing the best they know how, in getting better acquainted with their competitors, studying their fine points and becoming familiar with their several hobbies. They may expose their own weaknesses, perhaps, in an endeavor to so regulate the Hardware business that there will be plenty of it to occupy the spare hours of the remainder of the year, turning down the Catalogue Houses whenever they get a chance, and knowing where to put the profit themselves. Schemes for benefiting the trade in every particular will be largely promoted by the hard-working delegates, who will start for their homes refreshed in every respect by the few days' outing. These meetings take a man out of the rut he may have been in for years and broaden his views, increase his ability and make him more thoroughly enjoy his vocation.

There is a large amount of goods being placed along trade channels, and will soon find their way among a body of hungry consumers. All the reports say one thing, and that is, business is opening in a way that makes comparison with anything that has gone before decidedly flattering to the present. With the constant erection of new warehouses in the trade, larger and more commodious than ever; branch houses being added to the facilities of other far reaching plants, the fame of larger houses spreading in every conceivable direction, and every step adding to sales which are already huge; the Hardware Trade can truly be referred to as enjoying a harvest that is unexcelled as to present results, and hopeful as to the possibilities of the dawning future.

Advances in price of leading goods are not so prevalent as was formerly the case, and cause but little surprise when brought to the attention of the trade, now, that the trade has become used to the trend of all prices in an upward direction. The slump in the prices of Axes that have been too high in price because the combined manufacturers held them there. There is a recent decline in Ingot Copper, a metal that has had advancing tendencies for some time, and will no doubt effect the general market a little later on when the trend in prices becames a settled fact.

Goods are now being demanded for early Spring by every one who has orders out for specified delivery. Every one wants them on time, which will be none too soon if the temperature keeps up, and makes a grade of weather they can be sure of for a month ahead. The railroads even now are crowded with the movements of freight, and the immense amount of traffic that is moving along in every direction would astonish a man if he studied the statistics.

Builders' Hardware will be one of the branches of the Hardware Trade that will feel the direct effect of advancing conditions, on March 1st, when an advance of 10 per cent. is announced to take place. Wire Cloth and Poultry netting which have been disposed of by the Jobber without the profit they should bear, are likely to take a start upward, as fears are entertained that the available supply is all booked of the production of the looms. Dealers who are wise should be among the favored few who are booked for the future. Screen doors and windows have been hanging fire somewhat until the trade is used to the new prices are now being bought more freely, and as many manufacturers will not be heard from this season owing to their being out of business, it behooves the dealer to get his share of the goods that are made. In respect to leading staples, it would scarcely surprise one if there is another advance on wire products shortly.

THE WEAK MAN ON THE JOB.

He is always there, in some measure; the less he measures in weakness the more he is worth to you. But whatever the degree, don't make him weaker by letting all the errors and deficiences about the place be saddled upon him. He will be to blame for enough; don't blame him for the rest. It is the weak man more than any other who needs the help and encouragement. Some one has got to be the weakest man and the tendency too often is to crowd him down and make him weaker. The chances are he hasn't enough self-confidence to start with; if so he certainly will not be improved by being made the butt of all the fault-finding, all the ridicule, and all the unpleasantness there is about the place. That is just what is happening though on every hand. If the "boss" is short of temper he uses up what he has left upon the weak man. If some dapper clerk has a particularly mean jest to crack he doesn't put it against the head book-keeper or the quick-witted salesman who would make him wish he hadn't thought of it; he brings it down upon the weak man, who is always safe. If something disagreeable in a physical way has to be done the weak man is nearly always called upon to do it. It isn't fair and it's cowardly; and further than that, it doesn't pay. If the man is really hopeless discharge him and be done with it; but if he stays give him a chance. If his weakness is mainly due to inexperience, as it probably is, a little help will probably make him strong and as valuable as the rest.

BE THE MAN OUTSIDE.

Try and place yourself occasionally in the position of the man outside. Would your own advertisements really appeal to you if you were him? Do they tell enough about the goods offered? Do they tell what you most want to know about them if you knew nothing about them at the start? Or would you be interested if you knew nothing about them to begin with? The talk your favorite commercial man gave you is about what you ought to give your customer though perhaps in a less technical form. A commercial man is a pretty good sort of fellow to study. He knows the art of selling goods and besides, when talking with him, you are the man outside. How does he manage to gather you in?

Then how about the appearance of your store? Would it seem inviting and up-to-date to you if it belonged to some one in whom you hadn't any interest? Does it look as if the goods were new or that there is a fair prospect of getting what you are after? If it is full of loafers doesn't it impress you at the door that there is no immediate chance of getting waited on? A good many men are in a hurry in a Hardware store. Some are never in a hurry but those are the sort of men that never buy.

There is a great deal for the real born merchant to learn about himself by going out of his shop, figuratively speaking, and looking into it as an entire stranger. Lots of little faults that don't disturb him now he has gotton used to them will floor the fellow who has not. Just try it once. Imagine yourself in your most despised enemy's establishment for a few minutes and see how you could cut loose on him.

A MOTTO FOR CLERKS.

Many a man limps needlessly through life because he does not know his own deformity and no one is kind enough to tell him. It may take diplomacy to do so without giving offence or wounding his feelings but diplomacy is one of the very qualities a good employer ought to have and just a suggestion from the man behind the pocket-book, spoken in a kindly spirit, will be heeded where the words of another would only cause resentment.

Often some simple motto that applies to his particular defect can be quietly handed an employe whose efficiency is impaired by some mannerism or trait, with a few pointed but friendly words and the suggestion that the motto be kept where it can be seen occasionally. That gives the impression that a correction is really desired and that the idea is not merely a passing impulse of a fault-finding moment; the prepared slip of paper shows that it is a premeditated suggestion and adds weight to the request.

THE NECESSARY QUALIFICATIONS.

An enumeration of the good or bad qualifications that are needed to form the good or bad merchant can always be looked for in the experience of the Hardwareman. His views in regard to formation of such a character are always to be had when called for, and grounded as they are on the observation of a student of human nature may safely be relied upon as being nearly correct. The following is the result of one merchant's "summing up," and is respectfully submitted.

A GOOD MERCHANT.

One who pays his bills promptly.
One who keeps up his assortment.
One who buys new desirable goods, as presented by salesmen and then shows them to his trade.
One who carries the best qualities and recommends them to his trade.
One who keeps his store neat and clean.
One who is attentive to his customers.
One who collects his bills.

A POOR MERCHANT.

One who does not pay his bills promptly.
One who buys from everybody, and anything, and has no standard of quality.
One who, when he buys new goods, does not show them up.
One who buys more than three months' stock at one purchase.
One who allows loafing around his store.
One who does not answer correspondence. Every letter should be read and answered if necessary.
One who, when he gets accommodation from his jobber, does not appreciate it.
One who, when making a sale on time, does not have a distinct understanding when the payment shall be made.
One who dares not ask money from those who owe him when past due.
One who allows dust and dirt to accumulate on his stock and windows.
One who neglects to keep goods nicely arranged in his show window, with prices attached.
One who continually neglects his business to go hunting and fishing.
One who does not go to bed early and get up early.

HARDWARE CONVENTIONS.

THAT WILL BE HELD IN FEBRUARY AND MARCH.

CONNECTICUT RETAIL HARDWARE ASSOCIATION:
President, Chas. G. Agard, Torrington.
First Vice-President, George A. Bassett, New Haven.

Secretary, M. L. Corey, Argos, Ind.
Annual meeting at Chicago, March 20, 21 and 22.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

SALE OF GOODS—STATUTE OF FRAUDS.

QUESTION.—A customer gave us a verbal order for three cases of goods. The goods to be delivered subject to examination. There was no written contract drawn. We sent the goods ordered to his store and after keeping them a few days, he told us they were unsatisfactory and returned them saying he would not accept them. He has not paid anything on account of the goods. They were perfectly right in every way and there was no reason why he should not be satisfied with them. Can we make him take them?

REPLY.—You cannot, because of the statute of frauds. That statute provides that no contract for the sale of goods of $50 or upwards (in come jurisdictions the amount is less) shall be enforced, unless there is a memorandum drawn and signed by the party to be charged, or the buyer accepts and receives the goods or pays something by way of part payment. Here there was no written agreement and no part payment. The receipt of the goods "subject to examination" does not comply with the statute. There must also have been an actual acceptance. When goods are sold subject to examination and there is no part payment and no written contract, the rule of the law is as follows: "So long as the buyer can without self contradiction declare that the goods are not to be taken in fulfillment of the contract, he does not accept them. And it is immaterial whether his refusal to take the goods is reasonable or not. If he refuses, assigning grounds, false or frivolous or assigning no reasons at all, it is still clear that he does not accept them, and the question is not whether he ought to accept them, but whether he *has* accepted them." Under this rule it is plain that you cannot compel your customer to take the goods.

JUDGMENT—DISCHARGE IN BANKRUPTCY.

QUESTION.—We had a judgment against a customer for $100 for goods sold him. The judgment was not collected and several years later our customer went through bankruptcy and was discharged. We had no notice or knowledge that this man was adjudged a bankrupt and had no notice to prove our claim. The schedules filed show that our residence was given as unknown. Did the discharge in bankruptcy affect our judgment?

REPLY.—No. It is clear that where no notice or knowledge of the filing of the petition or of the adjudication in bankruptcy has been received by a creditor, that he has no notice to prove his claim or of the application for the discharge of the bankrupt and where the schedule gives his residence as unknown, although it might be ascertained by ordinary diligence, the judgment is not affected by the bankruptcy. The discharge in general may be valid, but it does not extend to this particular claim.

PARTNERSHIP—LIABILITY OF INCOMING PARTNER.

QUESTION.—Can an incoming partner be held liable for the debts of the old firm contracted before he became a partner?

REPLY.—An incoming partner is not as, of course, liable for the debts of the firm, whether he succeeds an outgoing partner by purchase or whether upon the death of one partner he joins with the survivors in carrying on the business. He may become liable by agreement, if for a valid consideration he agrees to assume the debts of the former firm, but is not liable in the absence of such an expressed agreement.

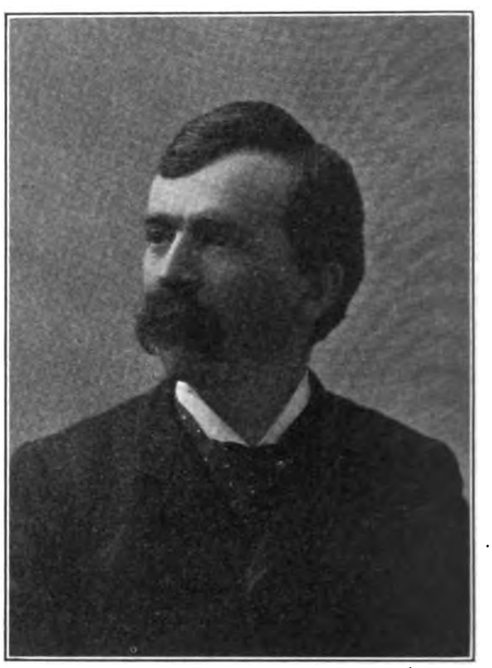
IOWA RETAIL HARDWARE ASSOCIATION



The Eighth Annual Convention of the Iowa Retail Hardware Association was held at Des Moines February 14, 15 and 16. The attendance was quite large and was representative of the entire State, there being not far from 400 retail merchants present. Arrangements for the accommodation of visitors was easily made, Des Moines being fortunately situated in having a large number of good hotels. As usual, the Savery Hotel was made headquarters, but the Chamberlin, the Kirkwood, and other hostleries were filled to the limit with Hardware men.

For the first time the manufacturers' exhibits were installed in a building where the sessions were held under the same roof. A rule was established that all exhibits must be closed during the sessions of the convention, and while this might have been more closely adhered to, all the meetings were well attended.

The Thursday morning session was attended by upwards of 300 delegates and was an especially notable meeting, being attended by President Wright of the National Hardware Association. President Bogardus of the National Retail Hardware Association and F. E. Cutler of the Cutler Hardware Company, Waterloo, Iowa, President of the Iowa Jobbers' Hardware Association.

H. S. VINCENT, PRESIDENT.

A. R. SALE, SECRETARY.

The Annual Address of President Vincent was delivered at this time as was the report of Secretary Sale, also report of the Insurance Association, delivered by L. Lindenberg, its vice-president.

Following came the address of President Bogardus, who took for his subject "Legitimacy."

The American Hardware Manufacturers' Association was represented at the Convention by Vice-President C. W. Asbury of the Enterprise Mfg. Co., of Philadelphia, who, in a brief address, assured the retailers that the manufacturers were with them on any question bearing upon the Hardware trade. "The manufacturer," he said, "appreciates that the retailer is the ultimate distributor of the product, but by force of circumstances they have not been in as close touch with each other as is manifestly desirable." He urged that fairness, frankness, confidence and square dealing offer the best means of correcting any existing evils and declared the belief that his association and the various retail organizations should make common cause.

"Manufacturers, jobbers and retailers," he said, "are all in the same boat. They are absolutely interdependent for neither can get out of the woods."

The National Hardware Association was represented by its President, W. S. Wright of the Wright & Wilhelmy Company, Omaha. Mr. Wright delivered a very suggestive address on Thursday afternoon in which he humorously referred to his business dealings with Iowa merchants, and proceeded to discuss the work of the Joint Catalogue House Committee.

A stereopticon lecture by the Joint Committee was delivered by S. R. Miles of Mason City and comprised the views and arguments with which the trade is now familiar. Mr. Miles also discussed the Parcels Post campaign and recommended that all members use their influence with their congressmen to prevent legislation favorable to Parcels Post and to further the cause of one-cent letter postage.

SCHOOL OF PRACTICAL SALESMANSHIP.

This department of the programme, which partook of the nature of a question box, was scattered throughout the sessions. The following papers were prepared with a view to delivering them under its auspices.

Stoves, by C. F. Schmidt, Marshalltown.
Furnaces, by J. F. Doty, West Liberty.
Hay Tools, by C. E. Haas, LeMars.
Paints, by S. R. Miles, Mason City.
Builders' Hardware, by H. S. Vincent, Fort Dodge.
Field Fence, by L. C. Abbott, Marshalltown.

General discussion followed the reading of the papers and methods and ideas of great practical value were suggested and in some cases fully described.

An illustrated lecture on "Advertisement" was delivered by Professor Conway MacMillan of the National School of Salesmanship, Indianapolis,

The question box proper was under the leadership of W. M. Orcutt, Sioux City.

The following Convention Committees were announced by President Vincent:

CONVENTION COMMITTEES.

The following convention committees were announced by President Vincent:

RESOLUTIONS: S. R. Miles, Mason City; E. C. Moore, Waverly; L. H. Kurtz, Des Moines.

NOMINATIONS: W. H. Millard, Cherokee; J. J. Sobolik, Cresco; P. C. De Vol, Council Bluffs.

AUDITING: L. A. Gnam, Carroll; Charles Griebeling, Newton; L. R. Bailey, Mason City.

PRESS: L. Lindenberg, Dubuque; H. S. Rayburn, Newton; R. J. Breckenridge, Brooklyn.

OFFICERS FOR 1906.

The following officers and directors were elected for the ensuing year:

PRESIDENT, H. S. Vincent, Fort Dodge.

VICE-PRESIDENT, C. E. Haas, LeMars.

SECRETARY-TREASURER, A. R. Sale, Mason City.

DIRECTORS: First District, E. C. Barbour, Fort Madison; Second District, J. F. Doty, West Liberty; Third District, E. C. Moore, Waverly; Fourth District, F. R. Currie, Mason City; Fifth District, L. C. Abbott, Marshalltown; Sixth District, George Haw, Jr., Ottumwa; Seventh District, L. C. Clifford, Des Moines; Eighth District, F. P. Bolinger, Afton; Ninth District, Charles Swaine, Council Bluffs.

THURSDAY EVENING

was devoted to a smoker, which was intended to be a very interesting and pleasurable affair for all who attended the Convention. The Des Moines Hardware Club, however, prepared a most enjoyable complimentary entertainment, including a buffet lunch as well as the smoker, which was held at the Elks Club House. The affair was in charge of a representative committee; the music was furnished by a local orchestra and the programme included athletic contests, moving pictures and acts from local vaudeville theatres.

Digitized by Google

PRESIDENT'S ANNUAL ADDRESS.

From President H. S. Vincent's interesting address we make the following extracts.

Our association has grown from the group of dealers who met in Council Bluffs in 1898 to 500 paid members at the present time. This number includes no dead timber of any kind, but means 500 live, full-paid members. I think the association should be congratulated upon this membership of the best and most up-to-date Hardware dealers in Iowa.

We are here with the idea of getting practical benefits from the exchange of ideas and seeing how the "other fellow" carries on his business, and I hope that each and every one of you will be able to take some ideas home that will

DO YOU GOOD IN A PRACTICAL WAY

and aid you in conducting your business. We are here to help each other and the only way this can be done is by becoming acquainted and exchanging ideas and methods of doing business. Get busy; get acquainted. Don't wait for an introduction. Any man you meet with a key on I will guarantee is all right, and he may have the very idea that you want to apply to your business if you only ask for it.

In the last issues of the catalogues that we all should have on our desks you can see some of the fruits of the National Associatoin work. Many of the standard goods that used to be quoted there are

CONSPICUOUS BY THEIR ABSENCE.

All is due to the efforts of the National Association and the Joint Committee. I take this opportunity of endorsing the Joint Committee in their very able work, and believe that I voice the sentiments of every member of this association in doing so.

You have heard criticisms of the plan of having the exhibits in the hotels, and likely you have criticisms to make on this plan as it is before you to-day. We would be glad to hear from any one who has any suggestions to make, and hope the critic will have something better to offer, for I assure you that the working out of this idea of having the

CONVENTION AND THE EXHIBITS UNDER ONE ROOF

has given your Executive Committee and officers and directors of the association more trouble and made more work than anything that has been undertaken by the association since I have been identified with its work.

We have been informed, much to our surprise and regret, that there are

SOME HARDWARE DEALERS WHO ATTEND THESE CONVENTIONS

and share in the benefits of the association who fail to affiliate with us, and thus deprive the association of the strength of their names and influence. I hope that no criticisms of this nature will be made at our 1906 convention, but that every Hardwareman present will do his full duty and leave his name and membership with our secretary before leaving the convention rooms.

I can see no reason why our association should not continue in its march of progress. I think we have the best association in the National body, and its continued growth and prosperity rest entirely with the Hardware dealers of Iowa. The association has received

CONSTANT AND LOYAL SUPPORT

from all its members, and the continuation of this spirit will keep us in the van of State associations, and thus demonstrate again that "In all that's good, Iowa affords the best."

RESOLUTIONS.

A number of resolutions were prepared by a committee appointed for that purpose, which were adopted by the unanimous vote of the Convention.

SECRETARY'S REPORT.

The following extracts are taken from the Annual Report of Secretary-Treasurer A. R. Sale. of Mason City.

It is very evident from the general correspondence and interviews with people in the field that Iowa Hardware people are becoming fully convinced that the Hardware Association is not only an annual convention, but that it is a living, growing force, embodying the abilities and business interests of 500 up-to-date Hardware merchants. More than this, they are beginning to realize that its great ally, theNational Retail Hardware Association, with its *Bulletin* and Joint Committee,

IS WIELDING AN INFLUENCE

never before equaled in any commercial organization.

It is true that there are those who are throwing rocks and clubs, but we all remember the old saying about the best apple tree being located by its accumulation of clubs and rocks. When a force like our twenty-three retail Hardware organizations begins to focus and move, there is bound to be some hard grinding and squealing somewhere. But to return to the details of the work of our own organization.

Last year we reported a total of 449 members upon our rolls up to the convention date. Many of these names, however, were those carried along delinquent, with the expectation that they would attend our meeting and renew their allegiance to the organization. After the convention, however, a series of communications was opened up, including bills for dues and a notice of sight draft fr same if not paid by a certain date. All of

THESE COMMUNICATIONS BROUGHT GOOD RESULTS,

many not responding, however, until drafts were forwarded. The final result of this campaign was the dropping out of 137 names for delinquency, removal and out of business. This left the net membership 449 less 137, or 312. To this has been added during the year and up to the date of this writing new names, making a total of 480 paid members. If we add 125 new members at this session and include all who have paid up to 1906, we shall have the largest number of paid memberships in the whole list of Hardware organizations.

The making of a larger and more presentable souvenir programme, which was decided upon by your committee, is a new departure for Iowa, and one which we hope meets the approval of the membership. It certainly

APPEALS TO THE ADVERTISING PUBLIC

who have things to say to you in its pages, as you may see by their liberal patronage.

Some of the trade press people are saying unkind things about the programme advertising, but it is a fair proposition to say that these lamentations are only another case of "sour grapes." Take the case home to yourselves. You get the programme, you get the trade papers. In which publication did you do the most advertisement reading? The

REAL TEST OF THE VALUE OF AN ADVERTISEMENT

is the amount of attention it secures. This feature of our work has netted the association treasury a handsome profit.

Our exhibit feature is, of course, an experiment, but is one being tried in Ohio, Wisconsin, Illinois and Indiana this year, and

IS CAPABLE OF A VERY FINE DEVELOPMENT.

Your committee were practically compelled to undertake the work on account of the crowded condition of the hotels during the session of the Legislature. But they were seriously handicapped by the lack of a suitable building for the purpose. Des Moines promises to be ready by another year with something worthy of our central convention city, so that at the next annual meeting we shall hope to have an exhibit housed and displayed in a way worthy of the people who make it, the people who come to see it and the great branch of commercial interests that it represents. We predict that, in spite of the many obstacles that have been met in our first attempt and the necessarily crude presentation in our poorly-housed exhibit of this year, that this feature of the annual convention will grow and develop until it becomes a great educational and trade exposition, bringing the factories and jobbing houses of the country to our own doors.

TREASURER'S REPORT.

Mr. Sale's Report as Treasurer showed receipts for the year of $3,747.43, and disbursements of $2,182.74, leaving a balance on hand of $1,564.69.

THE CANTON CONVENTION.

From all outward signs at the present time the convention of the Ohio Hardware Association, especially in the way of the Manufacturers' Exhibits, will prove to be of larger proportions than they had reason to expect. The committee arranged for additional space, but with all that have been unable to supply the demand. A great many manufacturers and jobbers have applied, but could not be accommodated. The Hardware merchants over the State approve of having the Military Band. This feature will also add to the life and enthusiasm of the occasion. According to information already on file in the secretary's office, the attendance will be larger than any previous convention. We feel very certain that we are correct when we say that there will be assembled at the Canton Convention the largest number of Hardware merchants ever gathered together in that State. Holman's lecture on "Hardware Salesmanship" is bringing out favorable comment. A great many traveling men as well as merchants have signified their intention of hearing this lecture. They expect to have at the Banquet speakers enjoying a national reputation. No pleasanter affair than the theatre party laid out for one evening of the festivities, could possibly be imagined.

HERMAN BOKER & CO.'S NEW CATALOGUE.

Herman Boker & Co., 101 and 103 Duane St., New York. N. Y., have recently published an illustrated catalogue of 250 pages, a copy of which they have forwarded to us. The book is an exceptionally fine production measuring 11 by 8 inches, and is cloth bound. The first four pages of the catalogue are devoted to full-page views of the company's New York Offices and their manufacturing plants at Solingen, Germany, and Newark, N. J., while the three following pages contain lists of the names of the various concerns for which they are sole representatives. The Company manufactures and imports American, English, German and French Cutlery and Hardware, and among the newer goods shown in the catalogue are examples of electric welded bright coil and halter Chain, both straight and twisted links, which they handle exclusively. Important lines are their American Toilet, Horse, Fetlock and Dog Clippers, and an extensive line of Hardware, Cutlery, etc., are shown, most of which are manufactured by themselves, and some of which, both foreign and domestic, they handle exclusively. A very complete line of "Gibford's" Razor Strops is shown, and descriptions and illustrations are also given of the "Lenawee" Razor Strops. They state they stock a very complete line of Electrotypes illustrating goods of their manufacture and will be pleased to furnish Electrotypes to their customers, for catalogue or advertising purposes.

WISCONSIN RETAIL HARDWARE ASSOCIATION

The Tenth Annual Convention of the Wisconsin Retail Hardware Association was held at the West Side Turn Hall, Milwaukee, February 7 and 8. Of the 525 members which now compose the Association there were present over 450; 75 new members were added to the list during the session. A large number of manufacturers and jobbers had fine displays of goods at the Hall where the convention was held and in the Republican House, the headquarters of the Convention.

The report of the Mutual Fire Insurance Company was most gratifying and Secretary C. A. Peck informed the policy holders that they will receive return premiums this year amounting to 33 1-3% of their policy.

This company has only been writing business for nineteen months and already foots up more than $1,145,000 insurance. It has paid more than $4,000 in losses and shows a gain of between 60 and 70 % above losses and expenses. The return premiums last year to policy holders amounted to $1,200 and from 1906 it is estimated to approximate $3,500. Due to the careful and prudent management of Secretary-Treasurer C. A. Peck, the financial conditions of the Association are in a flourishing condition. On January 28, this year, the balance on hand was $1,986.96; even the handsome souvenir programme netted a profit of $542.

ADDRESS OF MR. FERNLEY.

T. J. Fernley, Secretary of the National Hardware Association, being obliged to leave the city to attend another convention, President R. M. Burtis of Oshkosh called upon him to address the convention before leaving. He said in part:

I have watched, as secretary of the National Hardware Association, which is composed of 185 of the leading jobbers of the country, the growth of this retail Hardware movement with a great deal of interest. The National Hardware Association was formed in 1894. At that time there was no movement of this kind among the retail trade, and we recognized that a great deal of the loss of energy on the part of our association was due to the fact that there was no way in which we could secure the co-operation of the retail merchants of the country.

The facts are that those who produce goods—our manufacturing friends—can be more quickly influenced by the retail men of the country than by our jobbing friends, first, because you are in a position to influence the user of the goods. We are not. A consumer who comes to your store for a given article can be induced to purchase some other article, or of similar make; the jobber has no such opportunity. The manufacturer realizes that the jobber is powerless to correct him when he transgresses what we generally look upon as proper trade ethics; so, I say, from the standpoint of the jobbers' association we have watched the growth of these retail associations with a great deal of interest and we have done what we could to foster this movement.

Referring to the work of the wholesale and retail Hardware Joint Committee on the catalogue house question, Mr. Fernley said:

We are having great success. We need, however, to a greater extent the co-operation of the retail merchants of the country. We feel that they should more frequently enter complaint where they find manufacturers quote prices to the mail order houses which interfere with the profit of the legitimate retail merchant.

Mr. Fernley also referred to the parcels post propositions which are now before Congress, pointing out the disastrous effect upon the retail merchants' business which would follow their adoption.

President Ralph M. Burtis of Oshkosh then presented

THE PRESIDENT'S ANNUAL ADDRESS.

Gentlemen of the Convention:

It affords me great pleasure to stand before such a body of representative business men this morning, and I am proud to be a member of the Wisconsin Hardware Dealers' Association.

I think we may all be proud that we are Hardwaremen, for I believe there is no business that places a man in a better position to become a leader in his community in all things that make for manliness and strength of character than the Hardware business. There seems to be something in the fact that the Hardwareman has to do with things of iron and other weighty metals that gives many of our members

STRENGTH AND COURAGE TO TACKLE THE HARD PROBLEMS

that confront every community, and we can see all over the country notable examples of Hardwaremen filling places of honor and respect.

Hardwaremen can do much alone, but when they are united in any common cause the possibilities before them are great enough to cause any one to pause and reflect.

We are not banded together that we may take advantage of any one, or any class, but that we may protect our own interests, and the interests of the community of which we are a part; that we may learn how to better serve our friends and neighbors, and that we may have their full confidence and esteem, so that while they give us their business, which is so essential to our existence, we may give them service that more than repays them for their patronage.

EX-PRESIDENT, RALPH M. BURTIS.

Each one of us has his own work to do to gain and retain the confidence of his townsmen. We must ever be on the watch to guard against those who would by oily persuasion plant the seeds of mistrust in the minds of our neighbors so that they may reap the benefits of our downfall. Let each of us treat our customer as our friend, and should he be tempted away from trading with us let us reason with him as man to man. If he is quoted lower prices let us be able to show him where

THERE IS A DIFFERENCE IN QUALITY

in articles which may be described the same. If the articles are the same, let us meet the price, and keep meeting it, till price does not enter into the question. If we do not carry the goods, let us be willing and ready to get them; do not force our friends away from us and compel them to send to others for what we should furnish them. Let us carry goods of quality, for a reputation built upon this is the permanent kind, then with honesty as our guiding star and the fact that we are the men on the ground, in our favor, we have advantages that give us a long lead in the race.

The old times have gone by when a Hardware store can thrive with dirt, dust and cobwebs over everything, and when the windows can be left without a bath for months, and a band of loafers are allowed to sit around and whittle and spit till no self-respecting woman will care to enter if there is any other way to obtain that which she needs.

THE HARDWAREMAN MUST BE A MERCHANT.

Let him be constantly on the lookout for profitable side lines which will brighten up his stock. Let him fill his clean show windows with attractive goods and new articles to catch the eye of the buyer. Have the clerks learn that they must not be merely order-takers, but that they must be salesmen; and in this way can the Hardwareman retain his own, and not only hold what he has, but add to his prestige year by year.

It is a great help to us as individuals to know that we are not alone in the battle. That working with us are thousands of friends in our own line, in our and other States. Back of them is the National Association, back of them comes the jobbers and manufacturers associations, and back of all these are our trade

Digitized by Google

journals which are exerting a powerful influence, surely a grand aggregation of influences to speed our work along.

There is one point which I would like to bring out so strongly that should you forget all else that you hear at this convention, this one word would stay with you every day of the year to come; this word is "loyalty."

WE MUST BE LOYAL TO THE PRINCIPLES OF OUR ASSOCIATION,

and when we take a point up and decide on a course of action we must work shoulder to shoulder as one man. We all know what good results will come of this; let us never forget to live up to our convictions.

Let us be loyal to our association and talk its good points to our neighbors and try our best to enroll every Hardwareman in Wisconsin with us before the close of 1906. And right here I want to tell you something which most of you know, that we have the most energetic, untiring and enthusiastic secretary that any association can boast. He has worked for our interests all the time and when you hear his report you will see that his work has counted.

Our programme this year shows that we have made progress in this line as well as others, and I wish to ask for our advertisers your kindest consideration. Remember them with orders when you can for they are the ones who give us the opportunity to be members of this association with dues at $2.00 a year.

EMIL TEITGEN, PRESIDENT.

You will all be pleased to see the

WONDERFUL GROWTH OF OUR INSURANCE COMPANY,

and to know that it has passed the experimental stage and is now firm and strong, and you can all use it to the fullest extent without a question of doubt but that your interest will be taken care of as well as in any company, and at a great reduction in cost.

I hope that this meeting will pass resolutions in regard to the postal legislation which is fast becoming a serious problem, and after the resolutions are passed I trust each member will feel it his personal duty to see that his representatives are well informed as to the position we take.

And now in closing, I want to urge upon you all to become better acquainted. This is one great thing that our association has done for us all; we have mingled with our competitors and found that after all there were some good points that we had not discovered while we were so busy trying to secure all the orders in our community.

I will now leave the meeting in your hands, and feel sure that you will make this convention the greatest one we have ever had.

Secretary-Treasurer C. A. Peck, of Berlin, then presented his report, of which we give a summary as follows:

SECRETARY PECK'S ANNUAL REPORT.

The summary of the Secretary's report was "That looking back but a few years when only forty met in Milwaukee to organize a State Hardware Association, and then to-day with 531 members, we ought to feel that we have not labored in vain."

The results accomplished should satisfy every one, and while there is much yet to do, we ought to feel especially gratified with what has been accomplished. The sympathy of interests that to-day exists between not only the jobbers and retailers, but the manufacturers, as well is an omen for good, to all parties concerned.

Our gain during the year has been 130 and I doubt not that that number will amount to 175 before the close of the present session.

WE HAVE NEVER, SINCE THE FIRST YEAR, LACKED FOR FUNDS,

but have always had enough in the "locker" to meet all necessary expenses and carry a little forward for the next year. This has been very largely due to the patronage given by jobbers and manufacturers to our annual programmes, and while it has always been our plan to assure those parties that we did not wish to urge them out of their own best interests, still if they had anything to say to the trade, and felt that we could give them value received we were ready to serve them.

The secretary has made seventeen trips through different parts of the State in the interests of the association and the Fire Insurance Company, and secured 51 new members, with the promise, that many more would attend the present session. Our ridiculous low dues ($2.00 per annum) would hardly keep any dealer out of the ranks from a financial point of view, but indifference, and a feeling of uselessness in

MAKING ANY EFFORT TO CORRECT EXISTING EVILS

has had more to do with the lukewarmness of many than any thing else.

When we close to-morrow night we shall have something over $5,000 in our treasury, and no debts unpaid.

Complaints have been more numerous than in previous years,

C. A. PECK, SECRETARY.

but all have been satisfactorily settled except one now in the hands of the Executive Committee.

I had the pleasure of meeting at Saginaw last August the Michigan State Association and they are prospering finely, even crowding us out of second place in the National Association, but I mistrust we have worked our way back.

The delegates to the National Association at Minneapolis will report at this session and I will only say, in passing it was a most successful meeting.

In September I met a number of secretaries of kindred associations in St. Louis, and at that time was organized an organization to be known as the Affiliated Presidents and Secretaries Commercial and Trade Organizations, and in my opinion,

THEY WILL BE HEARD FROM FOR GOOD

right along the lines we are working in the near future.

I am more than ever convinced of the high grade of business men engaged in the retail Hardware business and can only say that if we keep right on along the lines we have been pursuing we shall see results that will be most satisfactory.

For our motto let us take this: Wisconsin Hardware dealers to the extent of ninety per cent. must be induced to come in with us and we will show them that we can do them good.

Thanking you one and all for the many courtesies shown me during the year past, with a kind word to those traveling men who have always been ready and willing to speak a good word for us, and have done it, I am ready to begin the campaign for another, and I trust a more prosperous year.

Mr. Peck, as Treasurer, reported that the total receipts, including the amount on hand last year, was $3,034.25 and the total expenditures, $1047.29, leaving a balance on hand January 28, 1906, of $1986.86.

More attention than usual was paid to the Question Box. A number of questions were offered by members and delegates for discussion in which, among others, W. P. Bogardus of Mt. Vernon, O., President of the National Association, took part.

Digitized by Google

W. P. BOGARDUS' ADDRESS.

W. P. Bogardus delivered an address referring to the National Association of which we give in part as follows:

Already more than 20 State associations have affiliated themselves with the national organization and the growth of the several State associations has indicated that there is a rising interest in the questions that confront us as Hardwaremen and require a solution. Sometimes I think we fail to grasp the fact that there are certain things that hinder our progress that must be removed before we can hope for a solid foundation for our work and a permanent advance in the cause we all have so much at heart.

I think we have gotten by the idea that we are in business to kill off our competitors; that our success depends on the failure of some one else; that competition means war and that

THERE CAN BE NO FRIENDLY RIVALRY;

that salesmanship does not count, and that only the cutting of prices is of any real value in the building up and keeping of trade. I say I think we have gone by the time when the above and kindred arguments have the force they once had.

We recognize the force and value of scientific salesmanship, and we value salesmen who can sell goods at profit; who know the value of the goods they are selling and the reasons why they are best for the customer to purchase; who can impress on the mind of the customer that what he is buying is worth the money he is paying.

WITH THIS IDEAL SALESMANSHIP BEFORE US

to stimulate us and to strive after we have much to do before we can reach as high as we would like to go. In the eager rush for wealth with the underlying idea that those who accumulate the fastest are the ones to pattern by we have lost sight of some very vital principles that are necessary for a successful building up of characters that will make of us men, for the crying need of the present generation is men whose integrity is above suspicion. For a quarter of a century or more there has been gradually creeping into business methods the idea that the end justifies the means and that success is to be measured by results brought about by any means necessary.

These teachers of business methods and business morals have had their day. The opening of the books and the turning on of the sunlight of investigation has awakened the public as it has not been awakened before. And men who have charge of large things are beginning to realize that they are but trustees and that they will have to reckon with the public in their final settlements; that honor comes only through honesty; that true fame comes only by probity; and that integrity of character comes only by right living and right thinking. And as these false teachers are shown up in their true colors as the investigations proceed there comes a time when their places will be taken by other teachers, and it is with us what kind of teachers they shall be.

The most serious question we have to consider is the catalogue house question. Controlled as they are by men who have been taught in the school where might is right,

EVERYTHING IS LEGITIMATE THAT IS NOT INDICTABLE

and where price is the great recommendation for the goods they sell; where advertising is taught, not as a statement of truth, but as a means to catch the unwary. With such competition we have a very difficult question to solve. One hopeful sign is the evident anxiety of the catalogue houses to get further names and the frantic efforts they are making to get the help of the Government. Absurd and unjust as their proposition is, it will have advocates, and it behooves us to be on the alert to block their efforts.

S. R. Miles of Mason City, Iowa, member of the Wholesale and Retail Hardware Joint Committee, then delivered a stereopticon talk on the Catalogue House Question which was listened to by the delegates with considerable attention.

COOPERATIVE BUYING.

In the absence of Henry Grimshaw of Elroy, Secretary Peck read his paper on "Cooperative Buying", which was in part as follows:

Under the present order of things we retail dealers must buy our stocks from the jobbers and we are entirely dependent upon them for our wares. We are in no position to deal with the manufacturer direct. We cannot even approach him in a business way, as our individual orders are too small to secure his attention. The catalogue houses, on the other hand, with their immense capital and business, are no longer obliged to purchase of the jobber; they are in position to deal directly with the manufacturer, or even do their own manufacturing. They give large orders and in certain lines

COMMAND THE ENTIRE OUTPUT OF THE MANUFACTURER.

To a certain extent the jobber stands between us and the manufacturer. We pay him his profit. The mail order house does not have to do this; it saves to itself the jobbers' profits and in many instances shares in the profits of the manufacturers. This enables it to put the goods upon the market as cheaply and in some instances cheaper than the retail merchant can buy them of his jobber and still make a large profit.

This is the situation we have to meet if we wish to survive in

THIS GREAT COMMERCIAL STRUGGLE NOW GOING ON.

Unless we meet it and meet it soon we may be obliged to close our doors and go out of the business we are now in.

In my opinion co-operative buying will enable us to meet the competition that is upon us. We should get together and establish an immense jobbing and supply house of our own. This supply house can then deal directly with the manufacturer and buy his products as cheaply as the catalogue houses do. As soon as we are able to buy the goods as cheaply as our competitors do we can in turn sell them as cheaply to our customers as they have been doing. It seems feasible to me that the retail dealers in Hardware, doing business in this State can form a corporation,

STOCK IN THE CORPORATION TO BE SUBSCRIBED BY THE DEALERS.

themselves and open up a large supply or jobbing house in some city of this State centrally located. I mean centrally located in a commercial way, where suitable quarters could be had at reasonable rents and where the cheapest in and out freight rates could be had.

When fully organized it seems to me that such a corporation could supply its members all articles of wares and merchandise in our line as cheaply as they are now bought by the jobbers and the mail order houses. For instance, our company could agree upon a certain make of Stoves, and enter into a contract with a manufacturer to take his entire output, or at least the exclusive right to handle his make of Stoves in this State.

Such a supply house could maintain its own printing department and issue a catalogue containing cuts and prices similar to the catalogues of the mail order houses. These catalogues should bear the names of the local dealers, and direct the public to them for the goods quoted therein.

THE LOCAL DEALER WOULD FIND IT TO HIS INTEREST.

to distribute the catalogues among his customers, and the customers would be enabled to compare the prices therein with other catalogues in his possession.

MAIL ORDER BUSINESS.

Mr. Peck also read the paper prepared by N. Kawin, who was unavoidably absent, on Mail Order Business. This seemed to possess great interest to the delegates present, but its extreme length prevents us from giving it here.

CONVENTION COMMITTEES.

The following Convention Committees were appointed.

TRANSPORTATION.—E. H. Ramm, New London; Rud. Puchner, Jr., Wittenberg.

AUDITING.—J. Montgomery, Wausau; E. Dewey, Kenosha.

PRESS.—O. P. Schlafer, Appleton; H. Schmitz.

RESOLUTIONS.—J. Hessel, Antigo; J. W. Jones, Racine.

QUESTION BOX.—R. M. Burtis, Oshkosh; J. Murphy, Racine.

LEGISLATIVE.—John Hughes, Fond Du Lac; Mr. Cross, Port Washington.

GRIEVANCE.—J. Kornely, Milwaukee; F. J. McPherson, Oshkosh; B. Dexter, Cambria.

BENEFITS OF LOCAL ASSOCIATIONS.

Emil Teitgen of Manitowoc read a paper on "The Benefits of Local Association", which in part was as follows:

The benefits of local association are many and important, both from a social and economic standpoint. I believe that every city and community in this State should have a local Hardware association. Some of you will say that your competitors are too mean and would not be trustworthy in any agreement. Now this is a mistake. Others who have tried it can tell you that they have met with great success where the conditions at first were extremely unfavorable to the formation of a local association, and these local associations have been maintained for years to the advantage of every member thereof. The best way to get together is to form an association for protection against poor accounts. Every community has its quota of deadbeats. Almost

EVERY MERCHANT IS WILLING TO JOIN AN ASSOCIATION

for this protection, and the general public who learn you have a Hardware association should be informed that it is for protection against these bad accounts. After the association has been formed each member thereof should make out a list of his poor and dead accounts and bring it to the metting and have it arranged in alphabetical order in a book for each merchant, and each merchant should have this book handy and when Mr. Deadbeat comes in and wants credit he can tell him that he owes Mr. Jones $5 and Mr. Smith $3 and so on and that he cannot give him credit until he pays these accounts. Of course the deadbeat becomes indignant and tells you that he can trade elsewhere and get plenty of credit; but he will go to the next place and will be treated the same way, and after a while the deadbeat will realize that he cannot work that old game any longer. You will find it an advantage to have each member of the association to carry a distinct line of such goods as Stoves, Refrigerators, Lawn Mowers, Garden Hose, Hay Carriers, Granite Ware, Cutlery and other things, thereby removing competition upon these lines and insuring you a better profit and enabling you to carry a better line—a higher grade of goods.

Then again you will find it an advantage to buy such goods as Linseed Oil, White Lead, Wheel Barrows, Building Paper in company with your competitor in carload lots and get carload prices and lower freight rates, enabling you to make a better profit on these lines, which are usually sold on a close margin.

The association

MEMBERS COULD ARRANGE TO HELP OUT ONE ANOTHER

in case they run short on an article at an agreed price above cost, thereby enabling thm to supply customers always at a profit,

PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION

The Fifth Annual Convention of the Pennsylvania Retail Hardware Dealers' Association was held at Williamsport on February 7, 8 and 9, at the Park Hotel. At the opening session a formal welcome to the city was extended by Mayor S. T. Foresman and an address was also delivered by H. E. Herman, President of the Williamsport Merchants' Association, who spoke in great favor of trade organization and sketched the history of the local organization and reviewed its accomplishments.

High praise was due and was unreservedly accorded to the Committee of arrangements, consisting of A. W. Lieb of Williamsport, A. H. Kaufman, Lock Haven and William Mendenhall of Montoursville, for its excellent work and careful attention to all details, which went so far to make the convention a success. The programme which was gotton up by this committee with the assistance of the Secretary J. E. Digby, McKees Rocks, was a handsome publication, while the banquet menu was a model of tasteful printing, bearing on its cover a portrait of the President, George V. Thompson of Mt. Jewett.

THE PRESIDENT'S ADDRESS.

The Presidential Address of George V. Thompson, Mt. Jewett consisted in part as follows:

I hold that it is the duty of every Hardware merchant to not only become a member of this State Association but to attend its annual meetings. If for no other reason I would say that it is neccessary for you to do this in order to get away from your labors for a short time and get a too often much needed rest. In years gone by the merchant made two or three annual visits to the city to buy goods, which gave him this needed recreation, but now, with the angels of commerce, the traveling salesmen, chasing each other over the country and playing hide and seek as it were in your store trying to get at you to sell you goods, there is no need for you to go to the city to buy; but you do need rest and change of scenery, and I know of no better way of getting this much needed recreation than by

ATTENDING YOUR ANNUAL HARDWARE CONVENTION.

Some one has said that the Hardware merchant is supposed, as it were, to absorb the sterling qualities of the metal which he handles (with the possible exception of brass and *steal.*) Consequently, we find him usually a leading citizen in the community in which he lives, working not only for his own interests but for the interests of the entire community.

WITH THE CHANGED CONDITIONS OF GRADE.

serious questions confront the Hardwareman, and in order to make our influence felt we must be united. As one of the signers of the Declaration of Independence said, we must hang together or we will all hang separately, and this seems to express the present conditions of the retail Hardware business. Individually we have little influence with either the manufacturer or jobber, but unitedly we have been able already to enlist a large number of both manufacturers and jobbers in sympathy with our efforts in combating unfair competition, and have succeeded to some extent in establishing our rights with the trade as retailers.

I would suggest as a future means of increasing the membership of our association and enlarging its usefulness that this convention consider the advisability of organizing a local association in each county, to meef every three months

TO DISCUSS LOCAL CONDITIONS AND MATTERS

of interest. This would afford an opportunity to instruct the local Hardware merchants in regard to our State and National associations and the benefits to be derived from the insurance features of same and would eventually result in a large increase in our membership. I would suggest that we also consider the advisability of asking the other State Association to join us in requesting the Jobber's Association to have its members adopt a uniform width of invoice paper. Most of our filing devices will accommodate a billhead 8½ inches wide, but some invoices are narrower and some are so much wider that they have to be folded over on the edge where the figures are, and on account of the poor quality of the paper in many instances the bill is soon worn out.

THIS IS ONE OF THE SMALL WORRIES

of the retail Hardwareman and we think it could be remedied without inconvenience to any one, and we believe if the jobbers' attention were called to this they would cheerfully comply with our request.

I wish here to express our appreciation of the services of the trade papers in their untiring efforts to assist our organization in sending representatives to our convention and

PUBLISHING OF INTEREST TO US.

The retail Hardware merchant who does not take and read at least one of the trade papers can hardly be an up to date merchant.

I would urge all our members to take advantage of the benefits to be derived from carrying a policy in our Fire Insurance Association. You can carry $3,000 and save about 50 per cent.

THE SECRETARY'S REPORT.
